BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published three times per month (except four times per month in April, August, and November) by Academic Press
Editorial and Production Offices: 525 B Street, Suite 1900, San Diego, CA 92101-4495
Accounting and Circulation Offices: 6277 Sea Harbor Drive, Orlando, FL 32887-4900
1999: Volumes 254–266. Price: $2950.00 U.S.A. and Canada; $3540.00 all other countries
All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence, permission requests, and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900 (telephone: 407-345-2000). Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send change of address to *Biochemical and Biophysical Research Communications,* 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

Periodicals postage paid at Orlando, FL, and at additional mailing offices.

ALL RIGHTS RESERVED

No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher. *Exceptions:* Explicit permission from Academic Press is not required to reproduce a maximum of two figures or tables from an Academic Press article in another scientific or research publication provided that the material has not been credited to another source and that full credit to the Academic Press article is given. In addition, authors of work contained herein need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

The appearance of the code at the bottom of the first page of an article in this journal indicates the Publisher's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1999 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

BREAKTHROUGHS AND VIEWS

Senescence Marker Protein-30 (SMP30): Structure and Biological Function	**Toshiko Fujita**	1

REGULAR ARTICLES

Stimulation Side-Dependent Asymmetrical Secretion of Poly I:Poly C-Induced Interferon-β from Polarized Epithelial Cell Lines	**Sachiko Okamoto, Kiyo Nakanishi, Yoshihiko Watanabe, Fumiyoshi Yamashita, Yoshinobu Takakura, and Mitsuru Hashida**	5
Differential Subcellular Localization of the Survival Motor Neuron Protein in Spinal Cord and Skeletal Muscle	**Barbara Y. Williams, Shyamala Vinnakota, Cheryl A. Sawyer, J. Clifford Waldrep, Susan L. Hamilton, and Hemanta K. Sarkar**	10
The Human Vasoactive Intestinal Peptide/Pituitary Adenylate Cyclase Activating Peptide Receptor 1 (VPAC1): Constitutive Activation by Mutations at Threonine 343	**Pascale Gaudin, Alain Couvineau, Christiane Rouyer-Fessard, Jean-José Maoret, and Marc Laburthe**	15
Molecular Cloning and Characterization of Mammalian Homologues of Vesicle-Associated Membrane Protein-Associated (VAMP-Associated) Proteins	**Yuhei Nishimura, Masaaki Hayashi, Hiroyasu Inada, and Toshio Tanaka**	21
Role of Heterocellular Gap Junctional Communication in Endothelium-Dependent Smooth Muscle Hyperpolarization: Inhibition by a Connexin-Mimetic Peptide	**Kim A. Dora, Patricia E. M. Martin, Andrew T. Chaytor, W. Howard Evans, Christopher J. Garland, and Tudor M. Griffith**	27
Solution Structure Determination by Two-Dimensional ^{1}H NMR of ω-Conotoxin MVIID, a Calcium Channel Blocker Peptide	**C. Civera, A. Vázquez, J. M. Sevilla, M. Bruix, F. Gago, A. G. García, and P. Sevilla**	32
Role of the C-Terminal Extension in the Interaction of S100A1 with GFAP, Tubulin, the S100A1- and S100B-Inhibitory Peptide, TRTK-12, and a Peptide Derived from p53, and the S100A1 Inhibitory Effect on GFAP Polymerization	**Marisa Garbuglia, Marco Verzini, Richard R. Rustandi, Dirk Osterloh, David J. Weber, Volker Gerke, and Rosario Donato**	36
cDNA Cloning and Distribution of the *Xenopus* Follistatin-Related Protein	**Koji Okabayashi, Hiroki Shoji, Yasuko Onuma, Takanori Nakamura, Kiyoshi Nose, Hiromu Sugino, and Makoto Asashima**	42

Copyright © 1999 by Academic Press
All rights of reproduction in any form reserved.

Reconstituted 3-Dimensional Human Skin as a Novel *in Vitro* Model for Studies of Carcinogenesis — **Ji F. Zhao, Yu J. Zhang, Joseph Kubilus, Xin H. Jin, R. M. Santella, Mohammad Athar, Zhi Y. Wang, and David R. Bickers** 49

The T0 Domain of Rabbit KV1.3 Regulates Steady State Channel Protein Level — **Alan S. Segal, Xiaoqiang Yao, and Gary V. Desir** 54

Bacterial Expression, Purification, and Characterization of a Novel Mouse Sulfotransferase That Catalyzes the Sulfation of Eicosanoids — **Ming-Cheh Liu, Yoichi Sakakibara, and Chau-Ching Liu** 65

Evolutionary, Mechanistic, and Predictive Analyses of the Hydroxymethyldihydropterin Pyrophosphokinase Family of Proteins — **Dietlind L. Gerloff, Gina M. Cannarozzi, Marcin Joachimiak, Fred E. Cohen, David Schreiber, and Steven A. Benner** 70

Enhanced Phosphoinositide Hydrolysis via Overexpression of Phospholipase C β1 or δ1 Inhibits Stimulus-Induced Insulin Release in Insulinoma MIN6 Cells — **Hisamitsu Ishihara, Takako Wada, Nobuaki Kizuki, Tomoichiro Asano, Yoshio Yazaki, Masatoshi Kikuchi, and Yoshitomo Oka** 77

Some Properties of Mitochondrial Adrenodoxin Associated with Its Nonconventional Electron Donor Function toward Rabbit Liver Microsomal Cytochrome P450 2B4 — **M. Lehnerer, J. Schulze, R. Bernhardt, and P. Hlavica** 83

Extracellular Signal-Regulated Kinase Mediates Renal Regeneration in Rats with Myoglobinuric Acute Renal Injury — **Shino Ishizuka, Tomohiro Yano, Kiyokazu Hagiwara, Masayoshi Sone, Hiroshi Nihei, Hisashi Ozasa, and Saburo Horikawa** 88

NF-κB is Involved in the Induction of the Rat Hepatic α1-Acid Glycoprotein Gene by Phenobarbital — **Najet Mejdoubi, Cécile Henriques, Elizabeth Bui, and Dominique Porquet** 93

L-Arginine Reduces Right Heart Hypertrophy in Hypoxia-Induced Pulmonary Hypertension — **Julie M. Fagan, Sandra E. Rex, Sandra A. Hayes-Licitra, and Lloyd Waxman** 100

Disulfide Isomers of α-Neurotoxins from King Cobra (*Ophiophagus hannah*) Venom — **Shinne-Ren Lin, Long-Sen Chang, and Chun-Chang Chang** 104

Extended X-Ray Absorption Fine Structure Evidence for a Single Metal Binding Domain in *Xenopus laevis* Nucleotide Excision Repair Protein XPA — **Garry W. Buchko, Lilia M. Iakoucheva, Michael A. Kennedy, Eric J. Ackerman, and Nancy J. Hess** 109

5-Methylcytosine in CpG Sites and the Reactivity of Nearest Neighboring Guanines Toward the Carcinogen Aflatoxin B_1-*8,9*-Epoxide — **Matthew K. Ross, Brian H. Mathison, Boctor Said, and Ronald C. Shank** 114

An Acute Oral Gavage Study of 3β-Acetoxyandrost-5-ene-7,17-dione (7-oxo-DHEA-acetate) in Rats — **Henry Lardy, Susan M. Henwood, and Charles E. Weeks** 120

An Escalating Dose Oral Gavage Study of 3β-Acetoxyandrost-5-ene-7,17-dione (7-oxo-DHEA-acetate) in Rhesus Monkeys	**Susan M. Henwood, Charles E. Weeks, and Henry Lardy**	124
Spatial and Temporal Expression of the Cystathionine β-Synthase Gene During Early Human Development	**Isabelle Quéré, Véronique Paul, Christelle Rouillac, Charles Janbon, Jacqueline London, Jacques Demaille, Pierre Kamoun, Jean-Louis Dufier, Marc Abitbol, and Jean-François Chassé**	127
Isolation of a Low-Molecular-Weight Growth Inhibitory Factor from Hybridoma Cell Cultures	**Øyvind Røe, Ilia Brondz, Øystein W. Rønning, and Jon Nissen-Meyer**	138
Serum Amyloid A Induces Chemotaxis of Human Mast Cells by Activating a Pertussis Toxin-Sensitive Signal Transduction Pathway	**Niclas Olsson, Agneta Siegbahn, and Gunnar Nilsson**	143
Use of Benzyl Mercaptan for Direct Preparation of Long Polypeptide Benzylthio Esters as Substrates of Subtiligase	**Ervin Welker and Harold A. Scheraga**	147
Mitochondrial DNA Deletions in Human Cardiac Tissue Show a Gross Mosaic Distribution	**Chunfang Zhang, Amelia Lee, Vincent W. S. Liu, Salvatore Pepe, Franklin Rosenfeldt, and Phillip Nagley**	152
The Exogenously Added Small Subunit of Smooth Muscle Myosin Phosphatase Increases the Ca^{2+} Sensitivity of the Contractile Apparatus in the Permeabilized Porcine Renal Artery	**Yingbi Zhou, Junji Nishimura, Katsuya Hirano, and Hideo Kanaide**	158
Rat Hsp20 Confers Thermoresistance in a Clonal Survival Assay, but Fails to Protect Coexpressed Luciferase in Chinese Hamster Ovary Cells	**Francy A. J. M. van de Klundert, Paul R. L. A. van den IJssel, Gerard J. J. Stege, and Wilfried W. de Jong**	164
Cyclosporin A Induces a Biphasic Increase in KCl-Induced Calcium Influx in GH3 Pituitary Cells	**Yu-Chi Chou and Jim C. Fong**	169
Secondary Structure of Sea Anemone Cytolysins in Soluble and Membrane Bound Form by Infrared Spectroscopy	**Gianfranco Menestrina, Veronique Cabiaux, and Mayra Tejuca**	174
Localisation of *cis* Regulatory Elements at the β-Globin Locus: Analysis of Hybrid Haplotype Chromosomes	**Solomon F. Ofori-Acquah, Michel R. A. Lalloz, and D. Mark Layton**	181
Soluble Guanylate Cyclase: Effect of YC-1 on Ligation Kinetics with Carbon Monoxide	**Vijay S. Sharma, Douglas Magde, Vladimir G. Kharitonov, and Doris Koesling**	188
Wilms' Tumor Gene Product WT1 Arrests Macrophage Differentiation of HL-60 Cells Through Its Zinc-Finger Domain	**Thomas F. Deuel, Li-Shuang Guan, and Zhao-Yi Wang**	192
Imbalanced Expression of Functionally Different WT1 Isoforms May Contribute to Sporadic Unilateral Wilms' Tumor	**Jia-Jia Liu, Zhao-Yi Wang, Thomas F. Deuel, and Yong-Hua Xu**	197

Nitric Oxide Inhibits HIV-1 Replication in Human Astrocytoma Cells — **Tiziana Persichini, Marco Colasanti, Maurizio Fraziano, Vittorio Colizzi, Paolo Ascenzi, and Giuliana M. Lauro** — **200**

TFAR19, a Novel Apoptosis-Related Gene Cloned from Human Leukemia Cell Line TF-1, Could Enhance Apoptosis of Some Tumor Cells Induced by Growth Factor Withdrawal — **Hongtao Liu, Yugang Wang, Yingmei Zhang, Quansheng Song, Chunhui Di, Guanghui Chen, Jian Tang, and Dalong Ma** — **203**

Protein Kinase C Activation Increases Binding of Transcription Factor PU.1 in Murine Tissue Macrophages — **Yan Xue, Paul Alford, and Rodney E. Shackelford** — **211**

Microenvironment of the High Affinity ATP-Binding Site of Na^+/K^+-ATPase Is Slightly Acidic — **Holger Linnertz, Edvard Lanz, Martin Gregor, Roberto Antolovic, Rita Krumscheid, Tomas Obsil, Jan Slavik, Zeljka Kovarik, Wilhelm Schoner, and Evzen Amler** — **215**

Isolation, Pharmacology and Gene Organization of KPSFVRFamide: A Neuropeptide from *Caenorhabditis elegans* — **N. J. Marks, A. G. Maule, C. Li, L. S. Nelson, D. P. Thompson, S. Alexander-Bowman, T. G. Geary, D. W. Halton, P. Verhaert, and C. Shaw** — **222**

Induction of Nitric Oxide Synthase mRNA by Shear Stress Requires Intracellular Calcium and G-protein Signals and Is Modulated by PI 3 Kinase — **Adel M. Malek, Lianwei Jiang, Ike Lee, William C. Sessa, Seigo Izumo, and Seth L. Alper** — **231**

Effect of Insulin on Farnesyltransferase Gene Transcription and mRNA Stability — **Marc L. Goalstone and Boris Draznin** — **243**

Molecular and Functional Evidence for Calcineurin-A α and β Isoforms in the Osteoclast: Novel Insights into Cyclosporin A Action on Bone Resorption — **Emmanuel M. Awumey, Baljit S. Moonga, Bali R. Sodam, Anatoliy P. Koval, Olugbenga A. Adebanjo, Masayoshi Kumegawa, Mone Zaidi, and Solomon Epstein** — **248**

Functional Divergence of the Plastid and Cytosolic Forms of the 54-kDa Subunit of Signal Recognition Particle — **Danja Schuenemann, Pinky Amin, and Neil E. Hoffman** — **253**

Basic Fibroblast Growth Factor Induces Cyclooxygenase-2 Expression in Endothelial Cells Derived from Bone — **Kumie Kage, Naoya Fujita, Tomoko Oh-hara, Etsuro Ogata, Toshiro Fujita, and Takashi Tsuruo** — **259**

Proteasome Inhibitors MG132 and Lactacystin Hyperphosphorylate HSF1 and Induce hsp70 and hsp27 Expression — **Dooha Kim, Sun-Hee Kim, and Gloria C. Li** — **264**

Gαolf Identification by RT-PCR in Purified Normal Pancreatic B Cells and in Islets from Rat Models of Non-insulin-Dependent Diabetes — **Stéphane Frayon, Marcia Pessah, Marie-Héléne Giroix, Dany Mercan, Claudine Boissard, Willy J. Malaisse, Bernard Portha, and Jean-Michel Garel** — **269**

Identification of a Novel Seven-Transmembrane Receptor with Homology to Glycoprotein Receptors and Its Expression in the Adult and Developing Mouse — **Guido Hermey, Axel Methner, H. Chica Schaller, and Irm Hermans-Borgmeyer** — **273**

Number 2, January 19, 1999

Synthetic Peptides Corresponding to the β-Hairpin Loop of Rabbit Defensin NP-2 Show Antimicrobial Activity — **S. Thennarasu and R. Nagaraj** — **281**

Real-Time Visualization of PH Domain-Dependent Translocation of Phospholipase C-δ1 in Renal Epithelial Cells (MDCK): Response to Hypo-osmotic Stress — **Makoto Fujii, Masaaki Ohtsubo, Tetsuo Ogawa, Hideaki Kamata, Hajime Hirata, and Hitoshi Yagisawa** — **284**

Glucocorticoid-Mediated Suppression of the Promoter Activity of the Cyclooxygenase-2 Gene Is Modulated by Expression of Its Receptor in Vascular Endothelial Cells — **Hiroyasu Inoue, Kazuhiko Umesono, Takeo Nishimori, Yukio Hirata, and Tadashi Tanabe** — **292**

Identification of Inducible Genes at the Early Stage of Adipocyte Differentiation of 3T3-L1 Cells — **Masayoshi Imagawa, Tomoko Tsuchiya, and Tsutomu Nishihara** — **299**

A Dehydroalanyl Residue Can Capture the 5′-Deoxyadenosyl Radical Generated from *S*-Adenosylmethionine by Pyruvate Formate-Lyase-Activating Enzyme — **A. F. Volker Wagner, Jens Demand, Gerhard Schilling, Thomas Pils, and Joachim Knappe** — **306**

Binding Characteristics of Dialkyl Phthalates for the Estrogen Receptor — **Makoto Nakai, Yukiko Tabira, Daisuke Asai, Yoshikuni Yakabe, Teruo Shimyozu, Masato Noguchi, Mineo Takatsuki, and Yasuyuki Shimohigashi** — **311**

Identification of the Physiological Promoter for Spinocerebellar Ataxia 2 Gene Reveals a CpG Island for Promoter Activity Situated into the Exon 1 of This Gene and Provides Data about the Origin of the Nonmethylated State of These Types of Islands — **Jorge Aguiar, Simon Santurlidis, Joachim Nowok, Christiane Alexander, Doda Rudnicki, Suzana Gispert, Wolfgang Schulz, and Georg Auburger** — **315**

Validation of Lucigenin as a Chemiluminescent Probe to Monitor Vascular Superoxide as Well as Basal Vascular Nitric Oxide Production — **Mikhail P. Skatchkov, Daniel Sperling, Ulrich Hink, Alexander Mülsch, David G. Harrison, Irene Sindermann, Thomas Meinertz, and Thomas Münzel** — **319**

Hamster Diphtheria Toxin Receptor: A Naturally Occurring Chimera of Monkey and Mouse HB-EGF Precursors — **Jeong-Heon Cha, Joanna S. Brooke, and Leon Eidels** — **325**

How Do Skinned Skeletal Muscle Fibers Relax?	**B. K. Hoskins, S. Lipscomb, I. P. Mulligan, and C. C. Ashley**	**330**
Interaction of Novel Thiocolchicine Analogs with the Tubulin Isoforms from Bovine Brain	**Asok Banerjee, Lorraine T. Kasmala, Ernest Hamel, Li Sun, and Kuo-Hsiung Lee**	**334**
The 26S Proteasome Assembly Is Regulated by a Maturation-Inducing Hormone in Starfish Oocytes	**Michiko Takagi Sawada, Chikako Morinaga, Kazuo Izumi, and Hitoshi Sawada**	**338**
Med8, a Subunit of the Mediator CTD Complex of RNA Polymerase II, Directly Binds to Regulatory Elements of *SUC2* and *HXK2* Genes	**Romina S. Chaves, Pilar Herrero, and Fernando Moreno**	**345**
Heterogeneous Nuclear Ribonucleoprotein I (hnRNP-I/PTB) Selectively Binds the Conserved 3′ Terminus of Hepatitis C Viral RNA	**Raymond T. Chung and Lee M. Kaplan**	**351**
A Mutant of Deleted Variant of Hepatocyte Growth Factor (dHGF) with Alanine Substitution in the N-Terminal Basic Region Has Higher Activity *in Vivo*	**Masahiko Kinosaki, Kyoji Yamaguchi, Yasushi Yamashita, Yasuhiro Uematsu, Hiromi Aihara, Hiroaki Masunaga, Tomonori Morinaga, and Kanji Higashio**	**363**
Activation of Cl^- Channel and $Na^+/K^+/2Cl^-$ Cotransporter in Renal Epithelial A6 Cells by Flavonoids: Genistein, Daidzein, and Apigenin	**Naomi Niisato, Yasushi Ito, and Yoshinori Marunaka**	**368**
Phosphorylation and Dephosphorylation of the B Subunit of DNA Polymerase α-Primase Complex in the Early Embryogenesis of *Drosophila*	**Kazufumi Kuroda and Ryu Ueda**	**372**
Fish Androgen Receptor: cDNA Cloning, Steroid Activation of Transcription in Transfected Mammalian Cells, and Tissue mRNA Levels	**Takashi Todo, Toshitaka Ikeuchi, Tohru Kobayashi, and Yoshitaka Nagahama**	**378**
Microphthalmia-Associated Transcription Factor Interacts with PU.1 and c-Fos: Determination of Their Subcellular Localization	**Motohiko Sato, Eiichi Morii, Kimiko Takebayashi-Suzuki, Natsuo Yasui, Takahiro Ochi, Yukihiko Kitamura, and Shintaro Nomura**	**384**
Cleavage of RXRα by a Lysosomal Enzyme, Cathepsin L-type Protease	**Yoshio Nomura, Takashi Nagaya, Shunsuke Yamaguchi, Nobuhiko Katunuma, and Hisao Seo**	**388**
Evidence against the Current Hypothesis of “Gene Dosage Effects” of Trisomy 21: ets-2, Encoded on Chromosome 21” Is Not Overexpressed in Hearts of Patients with Down Syndrome	**Susanne Greber-Platzer, Dritan Schatzmann-Turhani, Gregor Wollenek, and Gert Lubec**	**395**
Cholecystokinin-Induced Redistribution of Paxillin in Rat Pancreatic Acinar Cells	**Jürgen Leser, Hardi Lührs, Michael F. Beil, Guido Adler, and Manfred P. Lutz**	**400**
Solution Structure of a β-Neurotoxin from the New World Scorpion *Centruroides sculpturatus* Ewing	**Michael J. Jablonsky, Patricia L. Jackson, John O. Trent, Dean D. Watt, and N. Rama Krishna**	**406**

Genomic Structure, 5′ Flanking Sequences, and Precise Localization in 1P31.1 of the Human Prostaglandin F Receptor Gene	**Regina Betz, Jacob Lagercrantz, Darek Kedra, Jan P. Dumanski, and Agneta Nordenskjöld**	413
Identification and Characterization of Nuclear Pore Subcomplexes in Mitotic Extract of Human Somatic Cells	**Yosuke Matsuoka, Masatoshi Takagi, Tadanobu Ban, Masanori Miyazaki, Takahiro Yamamoto, Yukihiro Kondo, and Yoshihiro Yoneda**	417
Regulation of Ground Squirrel Na$^+$K$^+$-ATPase Activity by Reversible Phosphorylation during Hibernation	**Justin A. MacDonald and Kenneth B. Storey**	424
Pyruvate Kinase as a Microtubule Destabilizing Factor *in Vitro*	**Beáta G. Vértessy, Dóra Bánkfalvi, János Kovács, Péter Löw, Attila Lehotzky, and Judit Ovádi**	430
Synchronization of Glucose-Induced Ca^{2+} Transients in Pancreatic β-Cells by a Diffusible Factor	**Eva Grapengiesser, Erik Gylfe, and Bo Hellman**	436
p85 Subunit of PI3 Kinase Does Not Bind to Human Flt3 Receptor, but Associates with SHP2, SHIP, and a Tyrosine-Phosphorylated 100-kDa Protein in Flt3 Ligand-Stimulated Hematopoietic Cells	**Shuli Zhang and Hal E. Broxmeyer**	440
Arachidonic Acid as a Messenger for the Expression of Long-Term Potentiation	**Tomoyuki Nishizaki, Tamotsu Nomura, Toshiyuki Matsuoka, and Yosuke Tsujishita**	446
Pro12Ala Missense Mutation of the Peroxisome Proliferator Activated Receptor γ and Diabetes Mellitus	**Jens Ringel, Stefan Engeli, Armin Distler, and Arya M. Sharma**	450
Sp1 Phosphorylation by Erk 2 Stimulates DNA Binding	**Juanita L. Merchant, Ming Du, and Andrea Todisco**	454
Pulsatile Stretch Stimulates Vascular Endothelial Growth Factor (VEGF) Secretion by Cultured Rat Cardiac Myocytes	**Yoshinori Seko, Yuko Seko, Naoyuki Takahashi, Masabumi Shibuya, and Yoshio Yazaki**	462
Optical Mapping of DNA Polymerase I Action and Products	**Xinghua Hu, Christopher Aston, and David C. Schwartz**	466
Cloning and Characterization of DYRK1B, a Novel Member of the DYRK Family of Protein Kinases	**Susanne Leder, Yvonne Weber, Xavier Altafaj, Xavier Estivill, Hans-Georg Joost, and Walter Becker**	474
Oncogenic *ras* Fails to Restore an *in Vivo* Tumorigenic Phenotype in Embryonic Stem Cells Lacking Vascular Endothelial Growth Factor (VEGF)	**Yu-Ping Shi and Napoleone Ferrara**	480
Role of Trp-187 in the Annexin V-Membrane Interaction: A Molecular Mechanics Analysis	**Claire Pigault, Anny Follenius-Wund, and Marie Chabbert**	484

Expression, Subcellular Localization, and Cloning of the 130-kDa Regulatory Subunit of Myosin Phosphatase in Porcine Aortic Endothelial Cells	**Mayumi Hirano, Naohisa Niiro, Katsuya Hirano, Junji Nishimura, David J. Hartshorne, and Hideo Kanaide**	**490**
Identification of Thyroid Hormone Transporters	**Edith C. H. Friesema, Roelof Docter, Ellis P. C. M. Moerings, Bruno Stieger, Bruno Hagenbuch, Peter J. Meier, Eric P. Krenning, Georg Hennemann, and Theo J. Visser**	**497**
Eicosapentaenoic Acid and Docosahexaenoic Acid Inhibit Vascular Smooth Muscle Cell Proliferation by Inhibiting Phosphorylation of Cdk2-cyclinE Complex	**Takashi Terano, Tomoaki Tanaka, Yasushi Tamura, Masatoshi Kitagawa, Hideaki Higashi, Yasushi Saito, and Aizan Hirai**	**502**
Long-Extension PCR to Detect Deleted Mitochondrial DNA Molecules Is Compromized by Technical Artefacts	**Olli A. Kajander, Tarja A. Kunnas, Markus Perola, Sanna K. Lehtinen, Pekka J. Karhunen, and Howard T. Jacobs**	**507**

ERRATUM

Volume 252, Number 3 (1998), in Article No. RC989715, “Ventral Neural Tube Cells Differentiate into Craniofacial Skeletal Muscles,” by G. S. Sohal, A. A. Ali, and M. M. Ali, pages 675–678 **515**

Number 3, January 27, 1999

Cross-Linked Telomere–Protein Complexes from Chicken Erythrocyte Nuclei: Isolation by a New Procedure	**Laura Cervoni, Anna Ferraro, Margherita Eufemi, Fabio Altieri, Silvia Chichiarelli, and Carlo Turano**	**517**
Lactation-Dependent Expression of an mRNA Splice Variant with an Exon for a Multiply *O*-Glycosylated Domain of Mouse Milk Fat Globule Glycoprotein MFG-E8	**Kenji Oshima, Naohito Aoki, Mizue Negi, Mikiya Kishi, Ken Kitajima, and Tsukasa Matsuda**	**522**
Cloning, Sequencing, and Developmental Expression Levels of a Novel Glutamate-Gated Chloride Channel Homologue in the Parasitic Nematode *Haemonchus contortus*	**Sean G. Forrester, Fadi F. Hamdan, Roger K. Prichard, and Robin N. Beech**	**529**
Articular Cartilage Superficial Zone Protein (SZP) Is Homologous to Megakaryocyte Stimulating Factor Precursor and Is a Multifunctional Proteoglycan with Potential Growth-Promoting, Cytoprotective, and Lubricating Properties in Cartilage Metabolism	**Carl R. Flannery, Clare E. Hughes, Barbara L. Schumacher, Debbie Tudor, Margaret B. Aydelotte, Klaus E. Kuettner, and Bruce Caterson**	**535**

A PEA3 Site Flanked by SP1, SP4, and GATA Sites Positively Regulates the Differentiation-Dependent Expression of *Brachyury* in Embryonal Carcinoma P19 Cells	**Hirotake Yamaguchi, Kimiko Tanaka, Yasuo Kitagawa, and Kiyoshi Miki**	542
Molecular Cloning of a Full-Length cDNA for Human Type 3 Adenylyl Cyclase and Its Expression in Human Islets	**Bei Yang, Bing He, Samy M. Abdel-Halim, Annika Tibell, Mathias D. Brendel, Reinhard G. Bretzel, Suad Efendic, and Jan Hillert**	548
Extent and Limitation of the Control of Nuclear Apoptosis by DNA-Fragmenting Factor	**Wolfgang Wöhrl and Georg Häcker**	552
Imbalanced Expression of the Glucocorticoid Receptor Isoforms in Cultured Lymphocytes from a Patient with Systemic Glucocorticoid Resistance and Chronic Lymphocytic Leukemia	**Homayoun Shahidi, Alessandra Vottero, Constantine A. Stratakis, Susan E. Taymans, Michael Karl, Carlos A. Longui, George P. Chrousos, William H. Daughaday, Stephanie A. Gregory, and Janet M. D. Plate**	559
c-*fos* Induction by Heat, Arsenite, and Cadmium Is Mediated by a Heat Shock Element in Its Promoter	**Toshio Ishikawa, Tetsuya Igarashi, Keishi Hata, and Toshiro Fujita**	566
The Hepatitis C Virus NS2 Protein Generated by NS2-3 Autocleavage Is Required for NS5A Phosphorylation	**Qingyan Liu, Ramesh A. Bhat, Alfred M. Prince, and Pei Zhang**	572
A Significant Role of Leptin in the Generation of Steroid-Induced Luteinizing Hormone and Prolactin Surges in Female Rats	**Akira Kohsaka, Hajime Watanobe, Yoshifumi Kakizaki, Satoshi Habu, and Toshihiro Suda**	578
Increased Expression of Cyclooxygenases and Peroxisome Proliferator-Activated Receptor-γ in Alzheimer's Disease Brains	**Yoshihisa Kitamura, Shun Shimohama, Hideyasu Koike, Jun-ichi Kakimura, Yasuji Matsuoka, Yasuyuki Nomura, Peter J. Gebicke-Haerter, and Takashi Taniguchi**	582
Expressions of Vascular Endothelial Growth Factor in Nonparenchymal as Well as Parenchymal Cells in Rat Liver after Necrosis	**Keiko Ishikawa, Satoshi Mochida, Shoji Mashiba, Mie Inao, Astushi Matsui, Hitoshi Ikeda, Akihiko Ohno, Masabumi Shibuya, and Kenji Fujiwara**	587
Cloning and Characterization of a Novel *Rab*-Family Gene, *Rab36,* within the Region at 22q11.2 That Is Homozygously Deleted in Malignant Rhabdoid Tumors	**Toshiki Mori, Yoji Fukuda, Hiroshi Kuroda, Takafumi Matsumura, Shigeru Ota, Tohru Sugimoto, Yusuke Nakamura, and Johji Inazawa**	594
Ventrally Emigrating Neural Tube Cells Differentiate into Heart Muscle	**G. S. Sohal, M. M. Ali, A. A. Ali, and D. Dai**	601
An Homologue of the Human 100-kDa Protein (p100) Is Differentially Expressed by *Histoplasma capsulatum* during Infection of Murine Macrophages	**A. Porta, S. Colonna-Romano, I. Callebaut, A. Franco, L. Marzullo, G. S. Kobayashi, and B. Maresca**	605

Inhibition of Murine Neutrophil Serine Proteinases by Human and Murine Secretory Leukocyte Protease Inhibitor — **Clifford D. Wright, John A. Kennedy, Ralph J. Zitnik, and Mohammed A. Kashem** — 614

Distribution and Developmental Changes of Adenylate Kinase Isozymes in the Rat Brain: Localization of Adenylate Kinase 1 in the Olfactory Bulb — **Sachiye Inouye, Yasue Yamada, Koshiro Miura, Haruko Suzuki, Keisuke Kawata, Koh Shinoda, and Atsushi Nakazawa** — 618

Stimulation of Gastric Acid Secretion by Centrally Administered Orexin-A in Conscious Rats — **Nobuhiko Takahashi, Toshikatsu Okumura, Hiroto Yamada, and Yutaka Kohgo** — 623

Validation of Methods for CYP2C9 Genotyping: Frequencies of Mutant Alleles in a Swedish Population — **Ümit Yasar, Erik Eliasson, Marja-Liisa Dahl, Inger Johansson, Magnus Ingelman-Sundberg, and Folke Sjöqvist** — 628

Transfer of Sulfur to Biotin from Biotin Synthase (BioB protein) — **Katharine J. Gibson, Dale A. Pelletier, and Ivan M. Turner** — 632

Carcinoma Cell Lines Resistant for Growth Inhibition and Apoptosis to Retinoic Acid Are Responsive to 4-Hydroxy-phenyl-retinamide: Correlation with Tissue Transglutaminase — **Maria V. Chiantore, Valeria Giandomenico, and Luigi M. De Luca** — 636

Isolation, Characterization, and Distribution of a 24-kDa Proteoglycan in the Urine of Cachectic Cancer and AIDS Patients — **Julio E. Figueroa, Parakat Vijayagopal, Anand Prasad, David V. Schapira, and Chandan Prasad** — 642

Radiation Sensitivity of an *Escherichia coli* Mutant Lacking NADP$^+$-Dependent Isocitrate Dehydrogenase — **Su Min Lee, Ho-Jin Koh, Tae-Lin Huh, and Jeen-Woo Park** — 647

Antioxidant Agent Nimesulid and β-Blocker Metoprolol Do Not Exert Protective Effects against Rat Mitochondrial DNA Alterations in Adriamycin-Induced Cardiotoxicity — **Athanassios Kotsinas, Vassilis Gorgoulis, Panayotis Zacharatos, Harilaos Zioris, Filippos Triposkiadis, Ismini Donta, Michael Kyriakidis, Panayotis Karayannacos, and Christos Kittas** — 651

Roles of Acetyl-CoA Carboxylase β in Muscle Cell Differentiation and in Mitochondrial Fatty Acid Oxidation — **Jung-Kee Lee and Ki-Han Kim** — 657

Oxidation of Hypotaurine to Taurine with Photochemically Generated Singlet Oxygen: The Effect of Azide — **Laura Pecci, Mara Costa, Gabriella Montefoschi, Antonio Antonucci, and Doriano Cavallini** — 661

Stimulation of Large-Conductance Ca^{2+}-Activated K$^+$ Channels by Evans Blue in Cultured Endothelial Cells of Human Umbilical Veins — **Sheng-Nan Wu, Chung-Ren Jan, Hui-Fang Li, and Shih-Ann Chen** — 666

Solution Conformation of Ferricytochrome c-551 from *Pseudomonas stutzeri* Substrain ZoBell — **Mengli Cai and Russell Timkovich** — 675

Cell Cycle Control of Reverse Transcriptase Activity for the Yeast Retrotransposon Ty3	**Stephanie M. Karst, Naseem Sadeghi, and Thomas M. Menees**	679
Pressure Regulation of Malic Dehydrogenase in Reversed Micelles	**Natalia L. Klyachko, Pavel A. Levashov, Andrey V. Levashov, and Claude Balny**	685
Targeting of MAL, a Putative Element of the Apical Sorting Machinery, to Glycolipid-Enriched Membranes Requires a Pre-Golgi Sorting Event	**Rosa Puertollano and Miguel A. Alonso**	689
In Vitro SUMO-1 Modification Requires Two Enzymatic Steps, E1 and E2	**Toru Okuma, Reiko Honda, Genya Ichikawa, Noriko Tsumagari, and Hideyo Yasuda**	693
Activation of Calcium Channels by cAMP in STC-1 Cells Is Dependent upon Ca^{2+} Calmodulin-Dependent Protein Kinase II	**Srisaila Basavappa, Allen W. Mangel, LeAnn Scott, and Rodger A. Liddle**	699
Expression of Adenylyl Cyclase Subtypes in Pancreatic β-Cells	**Colin A. Leech, Maurice A. Castonguay, and Joel F. Habener**	703
The MH1 Domains of Smad2 and Smad3 Are Involved in the Regulation of the ALK7 Signals	**Rie Watanabe, Yuichiro Yamada, Yu Ihara, Yoshimichi Someya, Akira Kubota, Shinji Kagimoto, Akira Kuroe, Toshio Iwakura, Zhen-Ping Shen, Akari Inada, Tetsuya Adachi, Nobuhiro Ban, Kazumasa Miyawaki, Yasuhiro Sunaga, Kinsuke Tsuda, and Yutaka Seino**	707
Novel Sodium Binding Properties of Some Cyclopentapeptide Endothelin A Selective Receptor Antagonists: Electrospray and Fast-Atom-Bombardment Mass Spectrometric Studies	**Lambert C. M. Ngoka and Michael L. Gross**	713
Effect of Long-Term Exercise on Gene Expression of Insulin Signaling Pathway Intermediates in Skeletal Muscle	**Young-Bum Kim, Takatoshi Inoue, Rieko Nakajima, Yoko Shirai-Morishita, Kumpei Tokuyama, and Masashige Suzuki**	720
Activation of Stress-Activated Protein Kinases by Hepatocyte Isolation Induces Gene 33 Expression	**Claire L. Varley, Suzanne Armitage, and Alan J. Dickson**	728
3T3-L1 Adipocytes Express Two Isoforms of Phospholipase D in Distinct Subcellular Compartments	**Caroline A. Millar, Thomas J. Jess, Khalid M. Saqib, Michael J. O. Wakelam, and Gwyn W. Gould**	734
Resveratrol, a Natural Product Present in Wine, Decreases Tumour Growth in a Rat Tumour Model	**Neus Carbó, Paola Costelli, Francesco M. Baccino, Francisco J. López-Soriano, and Josep M. Argilés**	739
Sequence Elements Required for Apolipoprotein B mRNA Editing Enhancement Activity from Chicken Enterocytes	**Makoto Nakamuta, An Tsai, Lawrence Chan, Nicholas O. Davidson, and Ba-Bie Teng**	744

Environmental Upregulation of the Atrial Natriuretic Peptide Gene in the Living Fossil, *Limulus polyphemus* — **Matthew D. Vesely and David L. Vesely** 751

Thiazolidinediones Suppress Endothelin-1 Secretion from Bovine Vascular Endothelial Cells: A New Possible Role of PPARγ on Vascular Endothelial Function — **Hiroaki Satoh, Kazuhisa Tsukamoto, Yoshiaki Hashimoto, Naoaki Hashimoto, Masako Togo, Masumi Hara, Hisato Maekawa, Naoyuki Isoo, Satoshi Kimura, and Tsuyoshi Watanabe** 757

Oxidative Injury Induced Cyclooxygenase Activation in Experimental Hepatotoxicity — **S. Basu** 764

Manganese Dipyridoxyl Diphosphate: MRI Contrast Agent with Antioxidative and Cardioprotective Properties? *In Vitro* and *ex Vivo* Assessments — **Heidi Brurok, Jan Henrik Ardenkjær-Larsen, Georg Hansson, Sissel Skarra, Kirsti Berg, Jan O. G. Karlsson, Ib Laursen, and Per Jynge** 768

Macrophage-Inflammatory Protein-1α Regulates Preosteoclast Differentiation *in Vitro* — **Ben A. A. Scheven, John S. Milne, Irene Hunter, and Simon P. Robins** 773

Identification and Characterization of Baxϵ, a Novel Bax Variant Missing the BH2 and the Transmembrane Domains — **Bing Shi, Diane Triebe, Shama Kajiji, Kenneth K. Iwata, Arthur Bruskin, and Jamal Mahajna** 779

The Genomic Organization of the Partial D Category D^{Va}: The Presence of a New Partial D Associated with the D^{Va} Phenotype — **Toshinori Omi, Junko Takahashi, Naoki Tsudo, Hiroshi Okuda, Sadahiko Iwamoto, Mitunobu Tanaka, Taiko Seno, Yoshihiko Tani, and Eiji Kajii** 786

Telomerase Activity Does Not Always Imply Telomere Maintenance — **Michel M. Ouellette, Dara L. Aisner, Isabelle Savre-Train, Woodring E. Wright, and Jerry W. Shay** 795

Proteasome Inhibitors Induce the Association of Alzheimer's Amyloid Precursor Protein with Hsc73 — **Zen Kouchi, Hiroyuki Sorimachi, Koichi Suzuki, and Shoichi Ishiura** 804

Structure–Activity Relationship Study of Steroidal and Nonsteroidal Inhibitors of the Enzyme Estrone Sulfatase — **Sabbir Ahmed, Karen James, Luther Sampson, and Calli Mastri** 811

Opposite Role of Interferon-γ and Interleukin-4 on the Regulation of Blood Pressure in Mice — **Dicky van Heuven-Nolsen, Sjef J. De Kimpe, Thea Muis, Ingrid van Ark, Huub Savelkoul, Rolf B. Beems, Antoon J. M. van Oosterhout, and Frans P. Nijkamp** 816

Intracellular Acidification during Apoptosis Can Occur in the Absence of a Nucleus — **Chad M. Wolf and Alan Eastman** 821

Author Index for Volume 254 828

Volume 255, Number 1, February 5, 1999

R-Loop in the Replication Origin of Human Mitochondrial DNA Is Resolved by RecG, a Holliday Junction-Specific Helicase	**Takashi Ohsato, Tsuyoshi Muta, Atsushi Fukuoh, Hideo Shinagawa, Naotaka Hamasaki, and Dongchon Kang**	**1**
A Comparative Study of Apoptosis and Necrosis in HepG2 Cells: Oxidant-Induced Caspase Inactivation Leads to Necrosis	**Afshin Samali, Helena Nordgren, Boris Zhivotovsky, Elizabeth Peterson, and Sten Orrenius**	**6**
Signal Transduction in Rat Vascular Smooth Muscle Cells: Control of Osmotically Induced Aldose Reductase Expression by Cell Kinases and Phosphatases	**Agata Fazzio, Stefan E. Spycher, and Angelo Azzi**	**12**
Refolding of Thioredoxin Reductase Assisted by groEL and PDI	**P. Y. Cheung, J. E. Churchich, and K. S. Lee**	**17**
Stimulation of Tyrosine Phosphorylation by Progesterone and Its 11-OH Derivatives: Dissection of a Ca^{2+}-Dependent and a Ca^{2+}-Independent Mechanism	**Francisco Martinez, Jan Tesarik, Carmen-Maria Martin, Agatangelo Soler, and Carmen Mendoza**	**23**
Three Steroidogenic Factor-1 Binding Elements Are Required for Constitutive and cAMP-Regulated Expression of the Human Adrenocorticotropin Receptor Gene	**Danielle Naville, Armelle Penhoat, Philippe Durand, and Martine Begeot**	**28**
Identification of Caveolin-1 as a Fatty Acid Binding Protein	**Bernardo L. Trigatti, Richard G. W. Anderson, and Gerhard E. Gerber**	**34**
Functional Organization of the Human Uncoupling Protein-2 Gene, and Juxtaposition to the Uncoupling Protein-3 Gene	**Claire Pecqueur, Anne-Marie Cassard-Doulcier, Serge Raimbault, Bruno Miroux, C. Fleury, Chantal Gelly, Frédéric Bouillaud, and Daniel Ricquier**	**40**
Light-Dependent and Rhythmic *psbA* Transcripts in Homologous/Heterologous Cyanobacterial Cells	**Ganesh Kumar Agrawal, Munehiko Asayama, and Makoto Shirai**	**47**
In Vitro Binding Study of Adaptor Protein Complex (AP-1) to Lysosomal Targeting Motif (LI-Motif)	**Hideaki Fujita, Masayo Saeki, Kumiko Yasunaga, Tadashi Ueda, Taiji Imoto, and Masaru Himeno**	**54**
Identification and Mutation Analysis of *DOC-1R,* a DOC-1 Growth Suppressor-Related Gene	**Xue Zhang, Hensin Tsao, Takanori Tsuji, Shinsei Minoshima, Jim McBride, Paul Majewski, Randy Todd, Nobuyoshi Shimizu, David T. W. Wong, David E. Housman, and Frank G. Haluska**	**59**

Retinoic Acid Potentiates TNF-α-Induced ICAM-1 Expression in Normal Human Epidermal Keratinocytes — **Sophie Janssens, Luc Bols, Marc Vandermeeren, Guy Daneels, Marcel Borgers, and Johan Geysen** — **64**

Styrene and Styrene Oxide Affect the Transport of Dopamine in Purified Rat Striatal Synaptic Vesicles — **Saroj K. Chakrabarti** — **70**

Bioconjugation of Laminin Peptide YIGSR with Poly(Styrene Co-maleic Acid) Increases Its Antimetastatic Effect on Lung Metastasis of B16-BL6 Melanoma Cells — **Yu Mu, Haruhiko Kamada, Yoshihisa Kaneda, Yoko Yamamoto, Hiroshi Kodaira, Shin-ichi Tsunoda, Yasuo Tsutsumi, Mistuko Maeda, Koichi Kawasaki, Motoyoshi Nomizu, Yoshihiko Yamada, and Tadanori Mayumi** — **75**

Hepatocyte Growth Factor Is a Major Mediator in Heparin-Induced Angiogenesis — **Masaharu Okada, Akira Matsumori, Koh Ono, Tadashi Miyamoto, Mamoru Takahashi, and Shigetake Sasayama** — **80**

Generation of Highly Site-Specific DNA Double-Strand Breaks in Human Cells by the Homing Endonucleases I-*Ppo*I and I-*Cre*I — **Raymond J. Monnat, Jr., Alden F. M. Hackmann, and Michael A. Cantrell** — **88**

Regulation of ProMMP-1 and ProMMP-3 Activation by Tissue Factor Pathway Inhibitor-2/Matrix-Associated Serine Protease Inhibitor — **C. N. Rao, S. Mohanam, A. Puppala, and Jasti S. Rao** — **94**

Mutations in the *p53* and *Scid* Genes Do Not Cooperate in Lymphomagenesis in Doubly Heterozygous Mice — **S. Kosugi, T. Miyazawa, D. Chou, Y. Saito, T. Shinbo, A. Matsuki, H. Okano, C. Miyaji, H. Watanabe, K. Hatakeyama, O. Niwa, and R. Kominami** — **99**

Selection of a Peptide Ligand to the p75 Neurotrophin Receptor Death Domain and Determination of Its Binding Sites by NMR — **Leopold L. Ilag, Christine Rottenberger, Edvards Liepinsh, Günter Wellnhofer, Fritz Rudert, Gottfried Otting, and Leodevico L. Ilag** — **104**

Transforming Growth Factor β Triggers Two Independent-Senescence Programs in Cancer Cells — **Yoshinori Katakura, Eriko Nakata, Takumi Miura, and Sanetaka Shirahata** — **110**

SHC1, a High pH Inducible Gene Required for Growth at Alkaline pH in *Saccharomyces cerevisiae* — **Sung Ki Hong, Seung Baek Han, Michael Snyder, and Eui Yul Choi** — **116**

Cloning and Expression of Two Carbonyl Reductase-like 20β-Hydroxysteroid Dehydrogenase cDNAs in Ovarian Follicles of Rainbow Trout (*Oncorhynchus mykiss*) — **Guijun Guan, Minoru Tanaka, Takashi Todo, Graham Young, Michiyasu Yoshikuni, and Yoshitaka Nagahama** — **123**

IL-1 Rescues Scleroderma Myofibroblasts from Serum-Starvation-Induced Cell Death — **Theresa Z. Kirk and Maureen D. Mayes** — **129**

The NAD$^+$ Precursors, Nicotinic Acid and Nicotinamide Upregulate Glyceraldehyde-3-Phosphate Dehydrogenase and Glucose-6-Phosphate Dehydrogenase mRNA in Jurkat Cells	**Qing Yan, Margaret Briehl, Cara L. Crowley, Claire M. Payne, Harris Bernstein, and Carol Bernstein**	**133**
Isolation of cDNA, Chromosome Mapping, and Expression of the Human TBP-Like Protein	**Tetsuya Ohbayashi, Toshihiko Kishimoto, Yasutaka Makino, Miho Shimada, Tomoyoshi Nakadai, Tsutomu Aoki, Takefumi Kawata, Shin-ichiro Niwa, and Taka-aki Tamura**	**137**
Kupffer Cell-Mediated Down Regulation of Rat Hepatic CMOAT/MRP2 Gene Expression	**Jun-ichi Nakamura, Toshirou Nishida, Ken'ichiro Hayashi, Norifumi Kawada, Shigeyuki Ueshima, Yuichi Sugiyama, Toshinori Ito, Kenji Sobue, and Hikaru Matsuda**	**143**
A Model Phosphatase 2C → Phosphatase 1 Activation Cascade via Dual Control of Inhibitor-1 (INH-1) and DARPP-32 Dephosphorylation by Two Inositol Glycan Putative Insulin Mediators from Beef Liver	**L. C. Huang, D. Heimark, J. Linko, R. Nolan, and J. Larner**	**150**
Transcription Initiation Mediated by Initiator Binding Protein in *Saccharomyces cerevisiae*	**Tomoko Ohishi-Shofuda, Yuriko Suzuki, Ken-ichi Yano, Hiroshi Sakurai, and Toshio Fukasawa**	**157**
The Key Amino Acid Residue of Prostaglandin EP3 Receptor for Governing G Protein Association and Activation Steps	**Shuji Satoh, Chang-sheng Chang, Hironori Katoh, Hiroshi Hasegawa, Kazuhiro Nakamura, Junko Aoki, Hirotada Fujita, Atsushi Ichikawa, and Manabu Negishi**	**164**
Identification of Myosin II as a Binding Protein to the PH Domain of Protein Kinase B	**Motonari Tanaka, Hiroaki Konishi, Kazushige Touhara, Fumio Sakane, Masato Hirata, Yoshitaka Ono, and Ushio Kikkawa**	**169**
Molecular Cloning of CLC Chloride Channels in *Oreochromis Mossambicus* and Their Functional Complementation of Yeast *CLC* Gene Mutant	**Hiroaki Miyazaki, Shinichi Uchida, Yoshio Takei, Tetsuya Hirano, Fumiaki Marumo, and Sei Sasaki**	**175**
Molecular Cloning and Expression of a Second Glucuronyltransferase Involved in the Biosynthesis of the HNK-1 Carbohydrate Epitope	**Takashi Seiki, Shogo Oka, Koji Terayama, Kimiyuki Imiya, and Toshisuke Kawasaki**	**182**

Number 2, February 16, 1999

BREAKTHROUGHS AND VIEWS

Human Glycosylation Disorders and Sugar Supplement Therapy	**Hudson H. Freeze**	**189**

REGULAR ARTICLES

Phage Display *cDNA* Cloning of Protein with Carbohydrate Affinity **Miyako Yamamoto, Yoshihiko Kominato, and Fumiichiro Yamamoto** 194

Overexpression of Protein Tyrosine Phosphatase-α (PTP-α) but not PTP-κ Inhibits Translocation of GLUT4 in Rat Adipose Cells **Li-Na Cong, Hui Chen, Yunhua Li, Chung H. Lin, Jan Sap, and Michael J. Quon** 200

Regulation of Egr-1-Dependent Gene Expression by the C-Terminal Activation Domain **Uwe Gosslar, Roland M. Schmid, and Bernhard Holzmann** 208

Three Kinds of Guanylate Cyclase Expressed in Medaka Photoreceptor Cells in Both Retina and Pineal Organ **Osamu Hisatomi, Hanayo Honkawa, Yoshikazu Imanishi, Takunori Satoh, and Fumio Tokunaga** 216

Immortal Brown Adipocytes from *p53*-Knockout Mice: Differentiation and Expression of Uncoupling Proteins **Yukiko Irie, Atsushi Asano, Xavier Cañas, Hideki Nikami, Shin-ichi Aizawa, and Masayuki Saito** 221

Proinsulin-like Growth Factor-II Overexpression Does Not Alter Monoallelic *H19* Gene Expression in Transfected Human Embryonic Kidney Fibroblasts **Wieland Kiess, Jean Paquette, Gabriele Koepf, Eckard Wolf, and Cheri Deal** 226

The N-Terminus of K_{IR}6.2 Limits Spontaneous Bursting and Modulates the ATP-Inhibition of K_{ATP} Channels **Andrey P. Babenko, Gabriela Gonzalez, and Joseph Bryan** 231

Characterization of *Mycobacterium smegmatis* Mutants Defective in 1-D-*myo*-Inosityl-2-amino-2-deoxy-α-D-glucopyranoside and Mycothiol Biosynthesis **Gerald L. Newton, Mia D. Unson, Sara J. Anderberg, Joseph A. Aguilera, Nancy N. Oh, Stephen B. delCardayre, Yossef Av-Gay, and Robert C. Fahey** 239

The LIM Proteins FHL1 and FHL3 Are Expressed Differently in Skeletal Muscle **M. J. Morgan and A. J. A. Madgwick** 245

The Fourth Member of the FHL Family of LIM Proteins Is Expressed Exclusively in the Testis **M. J. Morgan and A. J. A. Madgwick** 251

Identification of a Site of Hsp27 Binding with Hsp27 and αB-Crystallin as Indicated by the Yeast Two-Hybrid System **Chenghua Liu and Michael J. Welsh** 256

Involvement of Reactive Oxygen Species Produced via NADPH Oxidase in Tyrosine Phosphorylation in Human B- and T-Lineage Lymphoid Cells **Yoshihiro Suzuki and Yasushi Ono** 262

Smad6 Suppresses TGF-β-Induced Growth Inhibition in COLO-357 Pancreatic Cancer Cells and Is Overexpressed in Pancreatic Cancer **Jörg Kleeff, Haruhisha Maruyama, Helmut Friess, Markus W. Büchler, Dean Falb, and Murray Korc** 268

Extractive Cultivation of Recombinant *Escherichia coli* Using Aqueous Two Phase Systems for Production and Separation of Extracellular Xylanase **N. Kulkarni, A. Vaidya, and M. Rao** 274

Regulation of Macrophage Inflammatory Protein-1α Expression and Function by Endogenous Interleukin-10 in a Model of Acute Inflammation	**Maureen N. Ajuebor, Anuk M. Das, László Virág, Csaba Szabó, and Mauro Perretti**	**279**
Human LAT1, a Subunit of System L Amino Acid Transporter: Molecular Cloning and Transport Function	**Puttur D. Prasad, Haiping Wang, Wei Huang, Ramesh Kekuda, Deva P. Rajan, Frederick H. Leibach, and Vadivel Ganapathy**	**283**
Structural and Functional Analysis of the *LaMDR1* Multidrug Resistance Gene in *Leishmania amazonensis*	**Ken Katakura, Masaki Iwanami, Hiroshi Ohtomo, Hiroshi Fujise, and Yoshihisa Hashiguchi**	**289**
Liberation of Hydrogen Sulfide during the Catalytic Action of *Desulfovibrio* Hydrogenase under the Atmosphere of Hydrogen	**Yoshiki Higuchi and Tatsuhiko Yagi**	**295**
Altered Expression of Hepatic *CYP2E1* and *CYP4A* in Obese, Diabetic *ob/ob* Mice, and *fa/fa* Zucker Rats	**Annabelle Enriquez, Isabelle Leclercq, Geoffrey C. Farrell, and Graham Robertson**	**300**
Roles of the Four Cysteine Residues in the Function of the Integral Inner Membrane Hg^{2+}-Binding Protein, MerC	**Lena Sahlman, Eva-Maj Hägglöf, and Justin Powlowski**	**307**
RNA Helicase-Related Genes of *Plasmodium falciparum* and *Plasmodium cynomolgi*	**Ping Song, Pawan Malhotra, Narendra Tuteja, and Virender Singh Chauhan**	**312**
NADH Peroxidase Activity of Rubrerythrin	**E. D. Coulter, N. V. Shenvi, and D. M. Kurtz, Jr.**	**317**
Drought Induces Many Forms of Cysteine Proteases Not Observed during Natural Senescence	**Renu Khanna-Chopra, B. Srivalli, and Y. S. Ahlawat**	**324**
Isolation of a Gene Encoding a Glycosylated Cytokinin Oxidase from Maize	**Roy O. Morris, Kristin D. Bilyeu, James G. Laskey, and Nordine N. Cheikh**	**328**
Biophysical Characterization of the Oligomeric State of Bax and Its Complex Formation with Bcl-X_L	**Yee-Joo Tan, Walter Beerheide, and Anthony E. Ting**	**334**
Intracellular Localization of SNAP-23 to Endosomal Compartments	**Dong Chen and Sidney W. Whiteheart**	**340**
Cloning and Identification of the Gene Gob-5, Which Is Expressed in Intestinal Goblet Cells in Mice	**Tohru Komiya, Yoko Tanigawa, and Setsuo Hirohashi**	**347**
Excessive Extramedullary Hematopoiesis in Cbfa1-Deficient Mice with a Congenital Lack of Bone Marrow	**Kenji Deguchi, Hideshi Yagi, Masahiko Inada, Kazuyuki Yoshizaki, Tadamitsu Kishimoto, and Toshihisa Komori**	**352**
Physico Chemical Modeling of the Role of Free Radicals in Photodynamic Therapy. IV. Quantitative Aspects of Photodynamic Effects on Free Radicals Generated in Cell Cultures	**András Németh, Judit Jakus, Tamás Kriska, Ágnes Keszler, Rozália Vanyur, and Dezsõ Gál**	**360**

Dopamine D4-like Binding Sites Labeled by $[^3H]$Nemonapride Include Substantial Serotonin 5-HT2A Receptors in Primate Cerebral Cortex	**Kyoko Noda-Saita, Mitsuyuki Matsumoto, Kazuyuki Hidaka, Ken-ichi Hatanaka, Junya Ohmori, Masamichi Okada, and Tokio Yamaguchi**	**367**
1,25-Dihydroxyvitamin D_3 Suppresses the Expression of the VCAM-1 Receptor, VLA-4 in Human Leukemic HL-60 Cells	**Atsuko Kaneko, Satoru Suzuki, Masahiro Hara, Jun-ichirou Mori, Mieko Kumagai, Hiroki Yajima, Koh Yamashita, Tomoko Kakizawa, Masanori Yamazaki, Teiji Takeda, Takahide Miyamoto, Kazuo Ichikawa, and Kiyoshi Hashizume**	**371**
Low Density Lipoprotein (LDL)-Mediated Suppression of Lewis Lung Carcinoma in Hypercholesterolemic LDL Receptor-Deficient Mice	**Vuong N. Trieu and Fatih M. Uckun**	**377**
Intrinsically Fluorescent Luteinizing Hormone Receptor Demonstrates Hormone-Driven Aggregation	**Regina D. Horvat, Scott Nelson, Colin M. Clay, B. George Barisas, and Deborah A. Roess**	**382**
Toward Selection of Internalizing Antibodies from Phage Libraries	**Baltazar Becerril, Marie-Alix Poul, and James D. Marks**	**386**
A Novel Cytochrome P450 3A Isoenzyme in Rat Intestinal Microsomes	**Ghennady V. Gushchin, Marina I. Gushchin, Nicholas Gerber, and R. Thomas Boyd**	**394**
Compensatory Expression of p73 in PARP-Deficient Mouse Fibroblasts as Response to a Reduced Level of Regularly Spliced Wild-Type p53 Protein	**Gerald Schmid, Zhao-Qi Wang, and Jozefa Wesierska-Gadek**	**399**
Calmodulin Functions as an Activator of Pur α Binding to Single-Stranded Purine-Rich DNA Elements (*PUR* Elements)	**Che-Hui Kuo, Etsuko Nishikawa, Hisashi Ichikawa, Tetsushi Sadakata, San-Yong Niu, and Naomasa Miki**	**406**
cDNA Cloning and Expression of Acutin, a Thrombin-Like Enzyme from *Agkistrodon* acutus	**Hua Pan, Xiaoyan Du, Guangzhen Yang, Yuancong Zhou, and Xiangfu Wu**	**412**
Extracellular Role of S100A4 Calcium-Binding Protein in the Periodontal Ligament	**Wagner R. Duarte, Tadahiro Iimura, Keizo Takenaga, Keiichi Ohya, Isao Ishikawa, and Shohei Kasugai**	**416**
Tissue-Specific Expression and Endogenous Subcellular Distribution of the Inositol 1,3,4,5-Tetrakisphosphate-Binding Proteins $GAP1^{IP4BP}$ and $GAP1^{m}$	**Peter J. Lockyer, Sara Vanlingen, Jon S. Reynolds, Tracy J. McNulty, Robin F. Irvine, Jan B. Parys, and Peter J. Cullen**	**421**
Cloning, Sequencing, and Transcriptional Studies of the Gene Encoding Copper-Containing Nitrite Reductase from *Alcaligenes xylosoxidans* NCIMB 11015	**Eiji Suzuki, Naoko Horikoshi, and Takamitsu Kohzuma**	**427**
The Complete Coding Sequence of a European Isolate of GB-C/Hepatitis G Virus	**Rémi N. Charrel, Houssam Attoui, Philippe De Micco, and Xavier de Lamballerie**	**432**

Involvement of Oxidative Reactions and Extracellular Protein Chaperones in the Rescue of Misassembled Thyroglobulin in the Follicular Lumen	**Frédéric Delom, Pierre-Jean Lejeune, Liliane Vinet, Pierre Carayon, and Bernard Mallet**	438
A Bacterial Signal Peptidase Enhances Processing of a Recombinant Single Chain Antibody Fragment in Insect Cells	**Eric Ailor, Jay Pathmanathan, Jan D. H. Jongbloed, and Michael J. Betenbaugh**	444
N-Linked Oligosaccharides of Vomeromodulin, a Putative Pheromone Transporter in Rat	**Yehia Mechref, Weidong Ma, Gang Hao, and Milos V. Novotny**	451
N-Oleoylethanolamine Inhibits Glucosylation of Natural Ceramides in CHP-100 Neuroepithelioma Cells: Possible Implications for Apoptosis	**Angelo Spinedi, Sabrina Di Bartolomeo, and Mauro Piacentini**	456
The Adhesion of Anti-CD3-Activated Mouse T Cells to Syngeneic Colon Adenocarcinoma Cells Is Differentially Regulated by Protein Tyrosine Kinase-, Protein Kinase C-, and cAMP-Dependent Pathways in the Effector Cell	**Willena M. MacKenzie, David W. Hoskin, and Jonathan Blay**	460
Early Decrease of IIx Myosin Heavy Chain Transcripts in Duchenne Muscular Dystrophy	**Marina Pedemonte, Claudia Sandri, Stefano Schiaffino, and Carlo Minetti**	466
Genomic Organization, Sequence Analysis and Transcriptional Regulation of the Human MCP-4 Chemokine Gene (SCYA13) in Dermal Fibroblasts: A Comparison to Other Eosinophilic β-Chemokines	**Herbert Hein, Carsten Schlüter, Reinhard Kulke, Enno Christophers, Jens-M. Schröder, and Joachim Bartels**	470
Activation of Caspase 3 in HL-60 Cells Exposed to Hydrogen Peroxide	**Anna M. DiPietrantonio, Tze-chen Hsieh, and Joseph M. Wu**	477
Isolation and Characterization of the Mouse *Aire* Gene	**Lauréane Mittaz, Colette Rossier, Maarit Heino, Pärt Peterson, Kai J. E. Krohn, Arnaud Gos, Michael A. Morris, Jun Kudoh, Nobuyoshi Shimizu, Stylianos E. Antonarakis, and Hamish S. Scott**	483
Nitrogen-Containing Bisphosphonates Inhibit Isopentenyl Pyrophosphate Isomerase/Farnesyl Pyrophosphate Synthase Activity with Relative Potencies Corresponding to Their Antiresorptive Potencies *in Vitro* and *in Vivo*	**Ermond van Beek, Elsbet Pieterman, Louis Cohen, Clemens Löwik, and Socrates Papapoulos**	491
The Amino Terminal Regions of proBNP and proANP Oligomerise through Leucine Zipper-like Coiled-coil Motifs	**Tim Seidler, Chris Pemberton, Tim Yandle, Eric Espiner, Gary Nicholls, and Mark Richards**	495
Ral and Rho-Dependent Activation of Phospholipase D in v-Raf-Transformed Cells	**Paul Frankel, Miguel Ramos, Judith Flom, Sergei Bychenok, Troy Joseph, Eugen Kerkhoff, Ulf R. Rapp, Larry A. Feig, and David A. Foster**	502

Molecular Cloning and Characterization of Two Novel Human Renal Organic Anion Transporters (hOAT1 and hOAT3)	**JoAnne E. Race, Steven M. Grassl, William J. Williams, and Eli J. Holtzman**	**508**
The Effect of Amiodarone on the β-Adrenergic Receptor Is Due to a Downregulation of Receptor Protein and Not to a Receptor–Ligand Interaction	**V. Drvota, J. Häggblad, I. Blange, Y. Magnusson, and S. Sylvén**	**515**
Complementation of the *fol2* Deletion in *Saccharomyces cerevisiae* by Human and *Escherichia coli* Genes Encoding GTP Cyclohydrolase I	**Roberta Mancini, Francesca Saracino, Giacomo Buscemi, Markus Fischer, Nicholas Schramek, Andreas Bracher, Adelbert Bacher, Markus Gütlich, and Maria Luisa Agostoni Carbone**	**521**
Analysis of the Consensus Binding Sequence and the DNA-Binding Domain of ZF5	**Takuya Obata, Akifumi Yanagidani, Ken Yokoro, Michitaka Numoto, and Shoso Yamamoto**	**528**
Possibility of the Transformation of eEF-2 (100 kDa) to eEF-2 (65 kDa) in the Peptide Elongation Process *in Vitro*	**Anna Gajko, Krystyna Średzińska, Władysław Gałasiński, and Andrzej Gindzieński**	**535**
Formation of a Uniquely Stable Type I Interferon Receptor Complex by Interferon β Is Dependent upon Particular Interactions between Interferon β and Its Receptor and Independent of Tyrosine Phosphorylation	**Dean Russell-Harde, T. Charis Wagner, H. Daniel Perez, and Ed Croze**	**539**
VEGF Stimulates MAPK through a Pathway That Is Unique for Receptor Tyrosine Kinases	**A. Masharn Doanes, Donald D. Hegland, Rachna Sethi, Imre Kovesdi, Joseph T. Bruder, and Toren Finkel**	**545**

ERRATA

Volume **247,** Number 2 (1998), in Article No. RC988794, "Expression of Peroxisome Proliferator-Activated Receptor γ (PPARγ) in Rat Aortic Smooth Muscle Cells," by Katsuya Iijima, Masao Yoshizumi, Junya Ako, Masato Eto, Seungbum Kim, Masayoshi Hashimoto, Naota Sugimoto, Yi-Qiang Liang, Noriko Sudoh, Kenji Toba, and Yasuyoshi Ouchi, pages 353–356	**549**
Volume **253,** Number 3 (1998), in Article No. RC989834, "Nitrilase Catalyzes Amide Hydrolysis as Well as Nitrile Hydrolysis," by Michihiko Kobayashi, Masahiko Goda, and Sakayu Shimizu, pages 662–666	**549**

Number 3, February 24, 1999

BREAKTHROUGHS AND VIEWS

Osmotic Induction of Signaling Cascades: Role in Regulation of Cell Function	**Dieter Häussinger and Freimut Schliess**	**551**

REGULAR ARTICLES

Intergenic Transcription Occurs throughout the Human IL-4/IL-13 Gene Cluster	**David F. Rogan, David J. Cousins, and Dontcho Z. Staynov**	556
Oxidation of α1-Proteinase Inhibitor by the Myeloperoxidase–Hydrogen Peroxidase System Promotes Binding to Immunoglobulin A	**L. J. Scott, G. I. Russell, N. B. Nixon, P. T. Dawes, and D. L. Mattey**	562
Actin Polymerization Induces Shedding of FcγRIIIb (CD16) from Human Neutrophils	**P. J. Middelhoven, J. D. van Buul, M. Kleijer, D. Roos, and P. L. Hordijk**	568
Molecular Cloning and Functional Characterization of Rat Δ-6 Fatty Acid Desaturase	**Tsunehiro Aki, Yayoi Shimada, Katsuya Inagaki, Hirofumi Higashimoto, Seiji Kawamoto, Seiko Shigeta, Kazuhisa Ono, and Osamu Suzuki**	575
Reduction of Caveolin 1 Gene Expression in Lung Carcinoma Cell Lines	**Claudia Racine, Martin Bélanger, Hirohisa Hirabayashi, Maryléne Boucher, Jamila Chakir, and Jacques Couet**	580
Mechanism of Ret Activation by a Mutation at Aspartic Acid 631 Identified in Sporadic Pheochromocytoma	**Naoya Asai, Toshihide Iwashita, Hideki Murakami, Hiroki Takanari, Kenji Ohmori, Masatoshi Ichihara, and Masahide Takahashi**	587
Thimet Oligopeptidase (EC 3.4.24.15), a Novel Protein on the Route of MHC Class I Antigen Presentation	**Celio L. Silva, Fernanda C. V. Portaro, Vânia L. D. Bonato, Antonio C. M. de Camargo, and Emer S. Ferro**	591
Thimet Oligopeptidase and the Stability of MHC Class I Epitopes in Macrophage Cytosol	**Fernanda C. V. Portaro, Marcelo D. Gomes, Adriana Cabrera, Beatriz L. Fernandes, Celio L. Silva, Emer S. Ferro, Luis Juliano, and Antonio C. M. de Camargo**	596
SRPK1 and LBR Protein Kinases Show Identical Substrate Specificities	**Stamatia Papoutsopoulou, Eleni Nikolakaki, and Thomas Giannakouros**	602
Interference Mapping of Nuclear Protein Binding to the Acute Phase Response Element of the Mouse α_1 Acid Glycoprotein Gene	**Jeffrey P. Rabek and John Papaconstantinou**	608
IGF-I Regulates IRS-1 Expression in 3T3-L1 Adipocytes	**K. Michael Rice and Charles W. Garner**	614
Direct Interaction between a Quinoline Derivative, MS-209, and Multidrug Resistance Protein (MRP) in Human Gastric Cancer Cells	**Takashi Nakamura, Mikio Oka, Kikuo Aizawa, Hiroshi Soda, Minoru Fukuda, Kenji Terashi, Koki Ikeda, Yohei Mizuta, Yuji Noguchi, Yoshimitsu Kimura, Takashi Tsuruo, and Shigeru Kohno**	618

Differential Regulation of Ligand-Dependent and Ligand-Independent Functions of the Mouse Retinoid X Receptor β by Alternative Splicing	**Atsushi Fujita and Tomoaki Mitsuhashi**	625
Identification of Ribosomal Protein L34 as a Novel Cdk5 Inhibitor	**Mark Moorthamer and Bhabatosh Chaudhuri**	631
Assembly of Lipoprotein (a) in Transgenic Rabbits Expressing Human Apolipoprotein (a)	**Jianglin Fan, Masahiro Araki, Lihua Wu, Mireille Challah, Hiroaki Shimoyamada, Richard M. Lawn, Hirotoshi Kakuta, Hisakata Shikama, and Teruo Watanabe**	639
Cloning and Localization of Rab3 Isoforms in Bovine, Rat, and Human Parathyroid Glands	**Zhengmin Huang, Cindy Ritter, Alex Brown, Jane Finch, Yousef Abu-Amer, Patrick Ross, and Eduardo Slatopolsky**	645
Expression of Human Kidney 11β-Hydroxysteroid Dehydrogenase (11-HSD2) in Bacteria	**B. Scott Nunez, Tomoatsu Mune, and Perrin C. White**	652
A Cellulose-Binding Domain-Fused Recombinant Human T Cell Connective Tissue-Activating Peptide-III Manifests Heparanase Activity	**Meirav Rechter, Ofer Lider, Liora Cahalon, Ehud Baharav, Mara Dekel, Daniel Seigel, Israel Vlodavsky, Helena Aingorn, Irun R. Cohen, and Oded Shoseyov**	657
X11L2, a New Member of the X11 Protein Family, Interacts with Alzheimer's β-Amyloid Precursor Protein	**Hiroshi Tanahashi and Takeshi Tabira**	663
An Antisense Transcript to *SMAD5* Expressed in Fetal and Tumor Tissues	**Jiri Zavadil, Petr Svoboda, Hong Liang, Lazar V. Kottickal, and Lalitha Nagarajan**	668
Photodynamic Therapy-Induced Apoptosis in Lymphoma Cells: Translocation of Cytochrome c Causes Inhibition of Respiration as Well as Caspase Activation	**Marie E. Varnes, Song-Mao Chiu, Liang-Yan Xue, and Nancy L. Oleinick**	673
17β-Estradiol Induces Apoptosis in the Preosteoclastic FLG 29.1 Cell Line	**S. Zecchi-Orlandini, L. Formigli, A. Tani, S. Benvenuti, G. Fiorelli, L. Papucci, S. Capaccioli, G. E. Orlandini, and M. L. Brandi**	680
Coincubation of Bovine Synovial or Capsular Tissue with Cartilage Generates a Soluble "Aggrecanase" Activity	**Mireille N. Vankemmelbeke, Mirna Z. Ilic, Christopher J. Handley, C. Graham Knight, and David J. Buttle**	686
Up-Regulation of Integrin $\alpha5$ by a C-Terminus Four-Amino-Acid Sequence of Substance P (Phenylalanine-Glycine-Leucine-Methionine-Amide) Synergistically with Insulin-like Growth Factor-1 in SV-40 Transformed Human Corneal Epithelial Cells	**Tai-ichiro Chikama, Masatsugu Nakamura, and Teruo Nishida**	692
Acute Effects of Exercise on Circulating Leptin in Lean and Genetically Obese *fa/fa* Rats	**Claudio Pagano, Marco Marzolo, Marnie Granzotto, Daniel Ricquier, Giovanni Federspil, and Roberto Vettor**	698

Cloning of BRAK, a Novel Divergent CXC Chemokine Preferentially Expressed in Normal versus Malignant Cells	**Robert Hromas, Hal E. Broxmeyer, Chang Kim, Harikrishna Nakshatri, Kent Christopherson II, Mohd Azam, and Yong-Hao Hou**	**703**
Mapping of the Human Voltage-Dependent Anion Channel Isoforms 1 and 2 Reconsidered	**Angela Messina, Marta Oliva, Cecilia Rosato, Marjan Huizing, Wim Ruitenbeek, Lambert P. van den Heuvel, Michael Forte, Mariano Rocchi, and Vito De Pinto**	**707**
Novel *Dictyostelium* Unconventional Myosin MyoK Is a Class I Myosin with the Longest Loop-1 Insert and the Shortest Tail	**Moeru Yazu, Hiroyuki Adachi, and Kazuo Sutoh**	**711**
Cloning and Characterization of a cDNA Encoding a Novel Fibroblast Growth Factor Preferentially Expressed in Human Heart	**L. D. S. Kok, S. K. W. Tsui, M. Waye, C. C. Liew, C. Y. Lee, and K. P. Fung**	**717**
Effects of Wild-Type and Mutated p53 and Id Proteins on the Induction of Apoptosis by Adenovirus E1A, c-Myc, Bax, and Nip3 in p53 Null Mouse Cerebellum Cells	**Haruki Tsunoda, Tomoko Terasawa, Mika Yageta, Takuma Nakajima, Yasuhiro Tomooka, Nobuo Tsuchida, and Kinichiro Oda**	**722**
Capacity of a Low Calcium Diet to Induce the Renal Vitamin D 1a-Hydroxylase Is Decreased in Adult Rats	**H. J. Armbrecht, T. L. Hodam, M. A. Boltz, and V. B. Kumar**	**731**
Antiangiogenic Activity of Restin, NC10 Domain of Human Collagen XV: Comparison to Endostatin	**Ramani Ramchandran, Mohanraj Dhanabal, Ruediger Volk, Matthew J. F. Waterman, Mark Segal, Hua Lu, Bertrand Knebelmann, and Vikas P. Sukhatme**	**735**
Hepatocyte Growth Factor Activator Inhibitor Type 2 Lacking the First Kunitz-Type Serine Proteinase Inhibitor Domain Is a Predominant Product in Mouse but Not in Human	**Hiroshi Itoh, Hiroaki Kataoka, Ryoichi Hamasuna, Naomi Kitamura, and Masashi Koono**	**740**
Analysis of Mitochondrial Targeting Sequence and Coding Region Polymorphisms of the Manganese Superoxide Dismutase Gene in German Parkinson Disease Patients	**E. M. Grasbon-Frodl, S. Kösel, O. Riess, U. Müller, P. Mehraein, and M. B. Graeber**	**749**
Effect of Antisense Human Telomerase RNA Transfection on the Growth of Human Gastric Cancer Cell Lines	**Kazuhito Naka, Hiroshi Yokozaki, Wataru Yasui, Hidetoshi Tahara, Eiji Tahara, and Eiichi Tahara**	**753**
Characterization of Genomic Regions Directing the Cell-Specific Expression of the Mouse Aldose Reductase Gene	**Hang Li, Yoshitaka Nobukuni, Tong Gui, and Chihiro Yabe-Nishimura**	**759**
Human Phenylalanyl-tRNA Synthetase: Cloning, Characterization of the Deduced Amino Acid Sequences in Terms of the Structural Domains and Coordinately Regulated Expression of the α and β Subunits in Chronic Myeloid Leukemia Cells	**Marianna Rodova, Valentina Ankilova, and Mark G. Safro**	**765**

Muscarinic M3 and Epidermal Growth Factor Receptors Activate Mutually Inhibitory Signaling Cascades in Human Neuroblastoma SH-SY5Y Cells **Liang Zhang and Richard S. Jope** **774**

Parathyroid Hormone-Regulated Production of Stem Cell Factor in Human Osteoblasts and Osteoblast-like Cells **Harry C. Blair, Bruce A. Julian, Xu Cao, S. Elizabeth Jordan, and Sai-Sai Dong** **778**

Intracellular Expression of a Cloned Antibody Fragment Interferes with Hepatitis B Virus Surface Antigen Secretion **Jasper zu Putlitz, Arne Skerra, and Jack R. Wands** **785**

Author Index for Volume 255 **792**

Volume 256, Number 1, March 5, 1999

Specific Sandwich-type Enzyme Immunoassays for Smooth Muscle Constricting Novel 31-Amino Acid Endothelins	**Naoko Okishima, Yoshiaki Hagiwara, Tsutomu Seito, Mihiro Yano, and Hiroshi Kido**	1
Molecular Modeling and Experimental Approaches toward Designing a Minimalist Protein Having Fc-binding Activity of *Staphylococcal* Protein A	**Jayati Sengupta, Pratima Sinha, Chaitali Mukhopadhyay, and Prasanta K. Ray**	6
Transverse Elasticity of Myofibrils of Rabbit Skeletal Muscle Studied by Atomic Force Microscopy	**Yoshihiro Yoshikawa, Toshihiro Yasuike, Akira Yagi, and Takenori Yamada**	13
Isolation and Partial Characterization of an Extracellular Low-Molecular Mass Component with High Phenoloxidase Activity from *Thermoascus aurantiacus*	**Angela Machuca, Hiroshi Aoyama, and Nelson Durán**	20
Genomic Organization and Regulation by Dietary Fat of the Uncoupling Protein 3 and 2 Genes	**Da-Wei Gong, Yufang He, and Marc L. Reitman**	27
G Protein-Mediated Mitogen-Activated Protein Kinase Activation by Two Dopamine D2 Receptors	**Eun-Young Choi, Dae-won Jeong, Kye Won Park, and Ja-Hyun Baik**	33
Gangliosides GD1a and GM3 Induce Interleukin-10 Production by Human T Cells	**Naoko Kanda**	41
Recruitment of TBP or TFIIB to a Promoter Proximal Position Leads to Stimulation of RNA Polymerase II Transcription without Activator Proteins both *in Vivo* and *in Vitro*	**Jun Ryul Huh, Jin Mo Park, Mijin Kim, Bradley A. Carlson, Dolph L. Hatfield, and Byeong Jae Lee**	45
Inactivation of Mitogen-Activated Protein Kinases by a Mammalian Tyrosine-Specific Phosphatase, PTPBR7	**Masato Ogata, Masatsugu Oh-hora, Atsushi Kosugi, and Toshiyuki Hamaoka**	52
Uptake of Liposomes Containing Phosphatidylserine by Liver Cells *in Vivo* and by Sinusoidal Liver Cells in Primary Culture: *In Vivo–in Vitro* Differences	**Jan A. A. M. Kamps, Henriëtte W. M. Morselt, and Gerrit L. Scherphof**	57
Cloned Prokaryotic Iron Superoxide Dismutase Protects Yeast Cells against Oxidative Stress Depending on Mitochondrial Location	**Rena Balzan, Dolores R. Agius, and William H. Bannister**	63
UV-Laser Induced Protein/DNA Crosslinking Reveals Sequence Variations of DNA Elements Bound by c-Jun *in Vivo*	**Raffaella Santoro, Stefan Wölfl, and Hans Peter Saluz**	68

Genomic Cloning and Promoter Analysis of the Mouse 105-kDa Heat Shock Protein (HSP105) Gene	**Kunihiko Yasuda, Keiichi Ishihara, Kazuo Nakashima, and Takumi Hatayama**	75
Quinone Analogue Irrecoverably Paralyses the Filarial Parasites *in Vitro*	**V. M. Sivan and R. Kaleysa Raj**	81
Photosensitization of Wild and Mutant Strains of *Escherichia coli* by *meso*-Tetra (*N*-methyl-4-pyridyl)porphine	**Giuliana Valduga, Barbara Breda, Giorgio M. Giacometti, Giulio Jori, and Elena Reddi**	84
Increase in Three α,β-Dicarbonyl Compound Levels in Human Uremic Plasma: Specific *in Vivo* Determination of Intermediates in Advanced Maillard Reaction	**Hiroko Odani, Toru Shinzato, Yoshihiro Matsumoto, Jun Usami, and Kenji Maeda**	89
Benzoyl ATP Is an Antagonist of Rat and Human P2Y$_1$ Receptors and of Platelet Aggregation	**Paul Vigne, Béatrice Hechler, Christian Gachet, Jean Philippe Breittmayer, and Christian Frelin**	94
The Role of Protein Kinase C in Laminin-Mediated Neurite Outgrowth	**Benjamin S. Weeks, Paul J. Wilson, Cathleen C. Heffernan, Ammar Ahmad, and Kris Mahadeo**	98
The Identification and Characterization of Two Promoters and the Complete Genomic Sequence for the Wiskott–Aldrich Syndrome Gene	**Tracy L. Hagemann and Sau-Ping Kwan**	104
Shedding of CD163, a Novel Regulatory Mechanism for a Member of the Scavenger Receptor Cysteine-Rich Family	**Anne Droste, Clemens Sorg, and Petra Högger**	110
Signal Transduction Pathways Mediated by Glycoprotein Ia/IIa in Human Platelets: Comparison with Those of Glycoprotein VI	**Katsue Inoue, Yukio Ozaki, Kaneo Satoh, Yi Wu, Yutaka Yatomi, Yongchol Shin, and Takashi Morita**	114
In Vivo and *in Vitro* Recruitment of an IκBα-Ubiquitin Ligase to IκBα Phosphorylated by IKK, Leading to Ubiquitination	**Hiroshi Suzuki, Tomoki Chiba, Masato Kobayashi, Masahiro Takeuchi, Kiyoshi Furuichi, and Teiji Tanaka**	121
IκBα Ubiquitination Is Catalyzed by an SCF-like Complex Containing Skp1, Cullin-1, and Two F-Box/WD40-Repeat Proteins, βTrCP1 and βTrCP2	**Hiroshi Suzuki, Tomoki Chiba, Masato Kobayashi, Masahiro Takeuchi, Toshiaki Suzuki, Arata Ichiyama, Tsuneo Ikenoue, Masao Omata, Kiyoshi Furuichi, and Keiji Tanaka**	127
Xenobiotic-Responsive Element for the Transcriptional Activation of the Rat Cu/Zn Superoxide Dismutase Gene	**Hae Yong Yoo, Mun Seog Chang, and Hyune Mo Rho**	133
Increase in Uncoupling Protein-2 mRNA Expression by BRL49653 and Bromopalmitate in Human Adipocytes	**Nathalie Viguerie-Bascands, Jean-Sébastien Saulnier-Blache, Myriam Dandine, Michèle Dauzats, Danièle Daviaud, and Dominique Langin**	138

S. aureus Superantigen Protein A Expands $CD4^+$/$CD8^+$/$CD19^+$/$CD34^+$ Cells in Mice: A Potential Immunorestorer	**Amiya K. Ghosh, Pratima Sinha, Tanya Das, Gaurisankar Sa, and Prasanta K. Ray**	142
Lipophilins: Human Peptides Homologous to Rat Prostatein	**Chengquan Zhao, Tung Nguyen, Taleh Yusifov, Ben J. Glasgow, and Robert I. Lehrer**	147
The Solution Structure of Heregulin-α and a N-Terminal Mutant with Suppressed Activity	**Marc Adler and Stewart A. Thompson**	156
Spatiotemporal, Allelic, and Enforced Expression of *Ximpact,* the *Xenopus* Homolog of Mouse Imprinted Gene *Impact*	**Yoichi Yamada, Yuriko Hagiwara, Koichiro Shiokawa, Yoshiyuki Sakaki, and Takashi Ito**	162
Purification and Characterization of a Lymph Node Sulfotransferase Responsible for 6-*O*-Sulfation of the Galactose Residues in 2′-Fucosyllactose and Other Sialyl Lewis^x-Related Sugars	**Kunwar Shailubhai, Q. Khai Huynh, Hymavathi Boddupalli, Hong H. Yu, and Gary S. Jacob**	170
Tctex2-Related Outer Arm Dynein Light Chain Is Phosphorylated at Activation of Sperm Motility	**Kazuo Inaba, Osamu Kagami, and Kazuo Ogawa**	177
A Long-Term Culture of Human Hepatocytes Which Show a High Growth Potential and Express Their Differentiated Phenotypes	**Hiroshi Hino, Chise Tateno, Hajime Sato, Chihiro Yamasaki, Shigeru Katayama, Toshihiko Kohashi, Akio Aratani, Toshimasa Asahara, Kiyohiko Dohi, and Katsutoshi Yoshizato**	184
VEGF Induces Nuclear Translocation of Flk-1/KDR, Endothelial Nitric Oxide Synthase, and Caveolin-1 in Vascular Endothelial Cells	**Yiyu Feng, Virginia J. Venema, Richard C. Venema, Nigel Tsai, and Ruth B. Caldwell**	192
Cholestanol Induces Apoptosis of Cerebellar Neuronal Cells	**Kenji Inoue, Shunichiro Kubota, and Yousuke Seyama**	198
Stimulation of PC Cell-Derived Growth Factor (Epithelin/Granulin Precursor) Expression by Estradiol in Human Breast Cancer Cells	**Runqing Lu and Ginette Serrero**	204
Multiple Infection of *TT Virus (TTV)* with Different Genotypes in Japanese Hemopohiliacs	**Shigenobu Takayama, Satoshi Yamazaki, Sumitaka Matsuo, and Shunji Sugii**	208
Threshold-Dependent DNA Synthesis by Pure Pressure in Human Aortic Smooth Muscle Cells: Giα-Dependent and -Independent Pathways	**Takefumi Ozaki, Kenji Iizuka, Miwako Suzuki, Takeshi Murakami, Akira Kitabatake, and Hideaki Kawaguchi**	212
Three Splicing Variants of Tomosyn and Identification of Their Syntaxin-Binding Region	**Shigekazu Yokoyama, Hiromichi Shirataki, Toshiaki Sakisaka, and Yoshimi Takai**	218
SEA-scFv as a Bifunctional Antibody: Construction of a Bacterial Expression System and Its Functional Analysis	**Naoki Sakurai, Toshio Kudo, Masanori Suzuki, Kouhei Tsumoto, Shin-ichi Takemura, Hideaki Kodama, Shinji Ebara, Atsushi Teramae, Yu Katayose, Masao Shinoda, Tadashi Kurokawa, Yuji Hinoda, Kohzoh Imai, Seiki Matsuno, and Izumi Kumagai**	223

Metabolic Properties of Normal and Mutant Mannan-Binding Proteins in Mouse Plasma — **Haruna Naito, Yong Ma, Kazuhide Uemura, Yasushi Arano, and Toshisuke Kawasaki** 231

Optimisation of Electroporation for Biochemical Experiments in Live Cells — **Rosalind A. Meldrum, Michael Bowl, Swee Bee Ong, and Simon Richardson** 235

Aquaporin-1 Expression in Proximal Tubule Epithelial Cells of Human Kidney Is Regulated by Hyperosmolarity and Contrast Agents — **Wheamei Jenq, Denise R. Cooper, Polly Bittle, and German Ramirez** 240

Cloning of a GADD34-like Gene That Interacts with the Zinc-Finger Transcription Factor Which Binds to the $p21^{WAF}$ Promoter — **Tadao Hasegawa, Hengyi Xiao, and Ken-ichi Isobe** 249

ERRATUM

Volume 254, Number 1 (1999), in Article ID bbrc.1998.9921, “Induction of Nitric Oxide Synthase mRNA by Shear Stress Requires Intracellular Calcium and G-protein Signals and Is Modulated by PI 3 Kinase,” by Adel M. Malek, Lianwei Jiang, Ike Lee, William C. Sessa, Seigo Izumo, and Seth L. Alper, pp. 231–242 255

Number 2, March 16, 1999

BREAKTHROUGHS AND VIEWS

Regulation of Pyruvate Kinase M Gene Expression — **Kazuya Yamada and Tamio Noguchi** 257

REGULAR ARTICLES

Analysis of the RNA Recognition Motifs of Human Neuronal ELAV-like Proteins in Binding to a Cytokine mRNA — **Koichiro Sakai, Yoko Kitagawa, and Genjiro Hirose** 263

The Lipoxygenase Product 13-Hydroxyoctadecadienoic Acid (13-HODE) Is a Selective Inhibitor of Classical PKC Isoenzymes — **Judit Pongracz and Janet M. Lord** 269

Effects of Cytosolic Ca^{2+} on Membrane Voltage and Conductance of Cultured Mesangial Cells from Stroke-Prone Spontaneously Hypertensive Rats and WKY Rats — **Kiyoshi Nakagawa, Shunji Ueda, Hajime Kida, Makoto Sawamura, Katsumi Ikeda, and Yukio Yamori** 273

Appropriately Spaced Nuclear Localizing Signals Are Necessary for Efficient Nuclear Import of Nonnuclear Proteins — **Harm-Jan W. Borgeld, Keiji Naruse, Shuh-ichi Nishikawa, Jin Zhang, Akihiko Kikuchi, Koichi Furukawa, Kunio Yagi, and Masashi Tanaka** 278

Low Intensity Pulsed Ultrasound Exposure Increases Prostaglandin E_2 Production via the Induction of Cyclooxygenase-2 mRNA in Mouse Osteoblasts	**Takeshi Kokubu, Nobuzo Matsui, Hiroyuki Fujioka, Masaya Tsunoda, and Kosaku Mizuno**	**284**
Single-Molecule Electron Tunneling Spectroscopy of the Higher Plant Light-Harvesting Complex LHC II	**Philip B. Lukins**	**288**
Active Oxygen Species in Blue Light Mediated Signal Transduction in Coleoptile Tips	**Manmohan M. Laloraya, Kumar Chandra-kuntal, G. Pradeep Kumar, and Malini Laloraya**	**293**
Epithelin/Granulin Growth Factors: Extracellular Cofactors for HIV-1 and HIV-2 Tat Proteins	**Dorothy P. Trinh, Ken M. Brown, and Kuan-Teh Jeang**	**299**
A Novel Endopeptidase with a Strict Specificity for Threonine Residues at the P1′ Position	**Sébastien Niamké, Jean-Pierre Sine, Olivier Guionie, and Bernard Colas**	**307**
Cloning and Characterization of the L15 Ribosomal Protein Gene Homologue from the Crayfish *Orconectes limosus*	**Moshe Tom, Michael R. Waterman, Detlef Böcking, and Chantal Dauphin-Villemant**	**313**
Recurrent Missense (R197C) and Nonsense (Y89X) Mutations in the XLRS1 Gene in Families with X-Linked Retinoschisis	**Barkur S. Shastry, Fielding J. Hejtmancik, and Michael T. Trese**	**317**
Sources of Reactive Oxygen Species Production in Excitotoxin-Stimulated Cerebellar Granule Cells	**Alexander A. Boldyrev, David O. Carpenter, Matthew J. Huentelman, Craig M. Peters, and Peter Johnson**	**320**
Human MD-1 Homologue Is a BCG-Regulated Gene Product in Monocytes: Its Identification by Differential Display	**Nasim A. Begum, Shoutaro Tsuji, Midori Nomura, Kyoko Shida, Ichiro Azuma, Akira Hayashi, Misako Matsumoto, Tsukasa Seya, and Kumao Toyoshima**	**325**
Two Homologous Cytochrome b_5s Are Expressed in Both Neurons and Glial Cells of the Rat Brain	**Min Yoo**	**330**
Characterization of Psychrophilic Alanine Racemase from *Bacillus psychrosaccharolyticus*	**Yoko Okubo, Kumio Yokoigawa, Nobuyoshi Esaki, Kenji Soda, and Hiroyasu Kawai**	**333**
Regulatory Effect of Thiamin Pyrophosphate on Pig Heart Pyruvate Dehydrogenase Complex	**Slawomir Strumilo, Jan Czerniecki, and Pawel Dobrzyn**	**341**
Retinoic Acid Biosynthetic Activity and Retinoid Receptors in the Olfactory Mucosa of Adult Mice	**Qing-Yu Zhang**	**346**
Sequence and Tissue Distribution of a Novel G-Protein-Coupled Receptor Expressed Prominently in Human Placenta	**Štefan Čikoš, Paul Gregor, and Juraj Koppel**	**352**
High Affinity Interaction of Endothelin-3 with Recombinant ETA Receptors	**Julien Desmarets and Christian Frelin**	**357**

Rapid Aggregate Formation of the Huntingtin N-Terminal Fragment Carrying an Expanded Polyglutamine Tract	**Noriko Hazeki, Koichiro Nakamura, Jun Goto, and Ichiro Kanazawa**	**361**
Cross-Linking between Cytochrome c_3 and Flavodoxin from *Desulfovibrio gigas*	**Cristina Correia, Enrico Monzani, Isabel Moura, Jorge Lampreia, and José J. G. Moura**	**367**
Neuronal Differentiation of Neuro 2a Cells by Inhibitors of Cell Cycle Progression, Trichostatin A and Butyrolactone I	**Junji Inokoshi, Masako Katagiri, Shiho Arima, Haruo Tanaka, Masahiko Hayashi, Young Bae Kim, Ryohei Furumai, Minoru Yoshida, Sueharu Horinouchi, and Satoshi Ōmura**	**372**
Brain Regional Distribution of Endocannabinoids: Implications for Their Biosynthesis and Biological Function	**T. Bisogno, F. Berrendero, G. Ambrosino, M. Cebeira, J. A. Ramos, J. J. Fernandez-Ruiz, and V. Di Marzo**	**377**
Changes in Caspase Expression in Alzheimer's Disease: Comparison with Development and Aging	**Shun Shimohama, Hiroko Tanino, and Sadaki Fujimoto**	**381**
Ribosome-Associated Protein LBP/p40 Binds to S21 Protein of 40S Ribosome: Analysis Using a Yeast Two-Hybrid System	**Manabu Sato, Yoshinaga Saeki, Kiyoji Tanaka, and Yasufumi Kaneda**	**385**
Structure and Expression of the Murine Thromboxane A_2 Receptor Gene	**Björn Båtshake, Christer Nilsson, and Johan Sundelin**	**391**
Activation of Nitric Oxide Synthase (NOS3) by Mechanical Activity Alters Contractile Activity in a Ca^{2+}-Independent Manner in Cardiac Myocytes: Role of Troponin I Phosphorylation	**David M. Kaye, Stephen D. Wiviott, and Ralph A. Kelly**	**398**
The Long Isoform of the Cell Adhesion Molecule C-CAM Binds to Actin	**Luis Da Silva-Azevedo and Werner Reutter**	**404**
Compilation and Analysis of Plant Mitochondrial Promoter Sequences: An Illustration of a Divergent Evolution between Monocot and Dicot Mitochondria	**Julien Fey and Laurence Maréchal-Drouard**	**409**
Hydrazide Synthesis: Novel Substrate Specificity of Amidase	**Michihiko Kobayashi, Masahiko Goda, and Sakayu Shimizu**	**415**
Bone Morphogenetic Protein-3b (BMP-3b) Gene Expression Is Correlated with Differentiation in Rat Calvarial Osteoblasts	**Jun Hino, Hisayuki Matsuo, and Kenji Kangawa**	**419**
Toward the Engineering of a Super Efficient Enzyme	**Silvia Folcarelli, Francesca Venerini, Andrea Battistoni, Peter O'Neill, Giuseppe Rotilio, and Alessandro Desideri**	**425**

Human Immunodeficiency Virus-1 Infection Requires Pertussis Toxin Sensitive G-Protein-Coupled Signalling and Mediates cAMP Downregulation — **Christine Guntermann, Brendan J. Murphy, Richard Zheng, Amer Qureshi, Peter A. Eagles, and Keith E. Nye** — **429**

Liver Poly(ADP-ribose)polymerase Is Resistant to Cleavage by Caspases — **Richard A. Jones, Victoria L. Johnson, Richard H. Hinton, Guy G. Poirier, Sek C. Chow, and George E. N. Kass** — **436**

Structural Features Underlying the Unusual Mode of Calmodulin Phosphorylation by Protein Kinase CK2: A Study with Synthetic Calmodulin Fragments — **Oriano Marin, Flavio Meggio, and Lorenzo A. Pinna** — **442**

ERRATUM

Volume **250,** Number 1 (1998), in Article No. RC988807, “Reactivity of the Flavin Semiquinone of Nitric Oxide Synthase in the Oxygenation of Arginine to N^G-Hydroxyarginine, the First Step of Nitric Oxide Synthesis,” by Cor F. B. Witteveen, John Giovanelli, Moon B. Yim, Ratan Gachhui, Dennis J. Stuehr, and Seymour Kaufman, pages 36–42 — **447**

Number 3, March 24, 1999

BREAKTHROUGHS AND VIEWS

A New Member of Tumor Necrosis Factor Ligand Family, ODF/OPGL/TRANCE/RNAKL, Regulates Osteoclast Differentiation and Function — **Naoyuki Takahashi, Nobuyuki Udagawa, and Tatsuo Suda** — **449**

REGULAR ARTICLES

Interaction of S-SCAM with Neural Plakophilin-Related *Armadillo*-Repeat Protein/δ-Catenin — **Nobuyuki Ide, Yutaka Hata, Maki Deguchi, Kazuyo Hirao, Ikuko Yao, and Yoshimi Takai** — **456**

Cross-Talk between 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin and Testosterone Signal Transduction Pathways in LNCaP Prostate Cancer Cells — **N. R. Jana, S. Sarkar, M. Ishizuka, J. Yonemoto, C. Tohyama, and H. Sone** — **462**

The *phnIJ* Genes Encoding Acetaldehyde Dehydrogenase (Acylating) and 4-Hydroxy-2-oxovalerate Aldolase in *Pseudomonas* sp. DJ77 and Their Evolutionary Implications — **Soonyoung Hwang, Seong-Jae Kim, Chi-Kyung Kim, Youngsoo Kim, Sang-Jin Kim, and Young-Chang Kim** — **469**

The *IalA* Invasion Gene of *Bartonella bacilliformis* Encodes a (Di)Nucleoside Polyphosphate Hydrolase of the MutT Motif Family and Has Homologs in Other Invasive Bacteria — **Jared L. Cartwright, Phillipa Britton, Michael F. Minnick, and Alexander G. McLennan** — **474**

Tyrosine Phosphorylation of STAT3 by Leptin through Leptin Receptor in Mouse Metaphase 2 Stage Oocyte **Tetsu Matsuoka, Masahiro Tahara, Takeshi Yokoi, Nobuyuki Masumoto, Takashi Takeda, Masaaki Yamaguchi, Keiichi Tasaka, Hirohisa Kurachi, and Yuji Murata** **480**

Mycobacterium tuberculosis KatG Is a Peroxynitritase **Nancy L. Wengenack, Michael P. Jensen, Frank Rusnak, and Michael K. Stern** **485**

A Core Promoter and a Frequent Single-Nucleotide Polymorphism of the Mismatch Repair Gene *hMLH1* **Emi Ito, Yuka Yanagisawa, Yuki Iwahashi, Yutaka Suzuki, Hiromi Nagasaki, Yoshimitsu Akiyama, Sumio Sugano, Yasuhito Yuasa, and Kazuo Maruyama** **488**

Widespread Distribution of Orexin in Rat Brain and Its Regulation upon Fasting **Muhtashan S. Mondal, Masamitsu Nakazato, Yukari Date, Noboru Murakami, Masashi Yanagisawa, and Shigeru Matsukura** **495**

Addition of Veratryl Alcohol Oxidase Activity to Manganese Peroxidase by Site-Directed Mutagenesis **Sergei L. Timofeevski, Guojun Nie, N. Scott Reading, and Steven D. Aust** **500**

Colocalization of GLUT3 and Choline Acetyltransferase Immunoreactivity in the Rat Retina **Takashi Watanabe, Shinya Nagamatsu, Satsuki Matsushima, Takaaki Kirino, and Hidemasa Uchimura** **505**

Carboxyl-Terminal Fragments of Presenilin-1 Are Closely Related to Cytoskeletal Abnormalities in Alzheimer's Brains **Yasushi Tomidokoro, Koji Ishiguro, Yukifusa Igeta, Etsuro Matsubara, Mitsuyasu Kanai, Masami Shizuka, Takeshi Kawarabayashi, Yasuo Harigaya, Shinobu Kawakatsu, Kunio Ii, Masaki Ikeda, Peter H. St. George-Hyslop, Shunsaku Hirai, Koichi Okamoto, and Mikio Shoji** **512**

Expression of CD30 Ligand (CD153) on Murine Activated T Cells **Osamu Shimozato, Kazuyoshi Takeda, Hideo Yagita, and Ko Okumura** **519**

Expression of Osteopontin in Kupffer Cells and Hepatic Macrophages and Stellate Cells in Rat Liver after Carbon Tetrachloride Intoxication: A Possible Factor for Macrophage Migration into Hepatic Necrotic Areas **Rumiko Kawashima, Satoshi Mochida, Atsushi Matsui, YuSuFu YouLuTuZ, Keiko Ishikawa, Keiko Toshima, Fumio Yamanobe, Mie Inao, Hitoshi Ikeda, Akihiko Ohno, Sumiko Nagoshi, Toshimitsu Uede, and Kenji Fujiwara** **527**

Recognition of Sequence-Directed Structure of the ssDNA Backbone by Nucleases **Eiko Akaboshi** **532**

Combinational Chemistry Reveals a New Motif That Binds the Platelet Fibrinogen Receptor, gpllblla **David S. Thorpe, Helen Yeoman, A. W. Edith Chan, Viktor Krchnak, Michal Lebl, and Stephen Felder** **537**

Expression of Human Perlecan Domain I as a Recombinant Heparan Sulfate Proteoglycan with 20-kDa Glycosaminoglycan Chains **Lloyd D. Graham, John M. Whitelock, and P. Anne Underwood** **542**

Characterization of the Advanced Glycation End-Product Receptor Complex in Human Vascular Endothelial Cells	**Alan W. Stitt, Cijang He, and Helen Vlassara**	549
Human Achaete-Scute Homologue 1 (HASH-1) Is Downregulated in Differentiating Neuroblastoma Cells	**Helena Söderholm, Eva Örtoft, Irja Johansson, June Ljungberg, Christer Larsson, Håkan Axelson, and Sven Påhlman**	557
Purification and Characterization of Human Metallocarboxypeptidase Z	**Elena G. Novikova and Lloyd D. Fricker**	564
Protein S-Myristoylation in *Leishmania* Revealed with a Heterologous Reporter	**Dora Abena Armah and Kojo Mensa-Wilmot**	569
ZF5, Which Is a Kruppel-Type Transcriptional Repressor, Requires the Zinc Finger Domain for Self-Association	**Michitaka Numoto, Ken Yokoro, and Junko Koshi**	573
Distinct Characteristics of Receptor-Operated Ca^{2+} Influx and Refilling in Pancreatic Acinar Cells	**Yasuhiro Tsunoda and Yutaka Tashiro**	579
Identification of Tcf4 Residues Involved in High-Affinity β-Catenin Binding	**Charles A. Omer, Patricia J. Miller, Ronald E. Diehl, and Astrid M. Kral**	584
Structural Requirements of a Human Deoxyribonuclease II for the Development of the Active Enzyme Form, Revealed by Site-Directed Mutagenesis	**Toshihiro Yasuda, Haruo Takeshita, Reiko Iida, Tamiko Nakajima, Osamu Hosomi, Yoshimitsu Nakashima, Shinjiro Mori, and Koichiro Kishi**	591
Lack of Correlation in JNK Activation and p53-Dependent Fas Expression Induced by Apoptotic Stimuli	**Yi-Rong Chen and Tse-Hua Tan**	595
A Role for Leptin in Brain Development	**Claire M. Steppan and Andrew G. Swick**	600
STAT-1-Independent Upregulation of FADD and Procaspasje-3 and -8 in Cancer Cells Treated with Cytotoxic Drugs	**Olivier Micheau, Arlette Hammann, Eric Solary, and Marie-Thérèse Dimanche-Boitrel**	603
The Immediate Early Gene Products of Human Cytomegalovirus Increase Vascular Smooth Muscle Cell Migration, Proliferation, and Expression of PDGF β-Receptor	**Yi Fu Zhou, Zu Xi Yu, Chad Wanishsawad, Matie Shou, and Stephen E. Epstein**	608
Expression of the Dominant-Negative Regulator Id4 Is Induced during Adipocyte Differentiation	**Heping Chen, Yi-Chinn Weng, Gina C. Schatteman, Laura Sanders, Robert J. Christy, and Barbara A. Christy**	614
Phosphorylation of TRAF2 Inhibits Binding to the CD40 Cytoplasmic Domain	**Amitabha Chaudhuri, Scott Orme, Trang Vo, Weihong Wang, and Bobby J. Cherayil**	620

α-Thrombin Inhibits Interleukin-6-Induced Stat3 Signaling and gp130 Gene Expression in Primary Cultures of Human Lung Fibroblasts — **G. Jayarama Bhat, Ganesh Raghu, Jagadambika J. Gunaje, and Steven Idell** — **626**

Cell Surface *N*-Acetylneuraminic Acid α2,3-Galactoside-Dependent Intercellular Adhesion of Human Colon Cancer Cells — **Charles J. Dimitroff, P. Pera, Fabio Dall'Olio, Khushi L. Matta, E. V. Chandrasekaran, Joseph T. Y. Lau, and Ralph J. Bernacki** — **631**

Effects of Acute or Prolonged Exposure to Human Leptin on Isolated Human Islet Function — **Roberto Lupi, Piero Marchetti, Margherita Maffei, Silvia Del Guerra, Luca Benzi, Lorella Marselli, Anna Bertacca, and Renzo Navalesi** — **637**

A 16-kDa Fragment of Collagen Type XIV Is a Novel Neutrophil Chemotactic Factor Purified from Rat Granulation Tissue — **Hideo Nakagawa, Katsuhiko Takano, and Hidekazu Kuzumaki** — **642**

Antizyme-Dependent and -Independent Mechanisms Are Responsible for Increased Spermidine Transport in Amino Acid-Restricted Human Cancer Cells — **C. Aubel, H. Chabanon, L. Persson, L. Thiman, M. Ferrara, and P. Brachet** — **646**

Intense Myristoylation of a Single Protein in the Ocular Lens — **Richard J. Cenedella and Gudesiva Chandrasekher** — **652**

Role of Microphthalmia Transcription Factor in Regulation of Melanocyte Differentiation Marker TRP-1 — **Dong Fang and Vijayasaradhi Setaluri** — **657**

PACAP Is an Islet Neuropeptide Which Contributes to Glucose-Stimulated Insulin Secretion — **Karin Filipsson, Frank Sundler, and Bo Ahrén** — **664**

The Csk Homologous Kinase, Chk, Binds Tyrosine Phosphorylated Paxillin in Human Blastic T Cells — **Svetozar Grgurevich, Anwar Mikhael, and Daniel W. McVicar** — **668**

Inhibition of IRS-1 Phosphorylation and the Alterations of GLUT4 in Isolated Adipocytes from Cachectic Tumor-Bearing Rats — **Takaki Yoshikawa, Yoshikazu Noguchi, and Shinobu Satoh** — **676**

Isoniazid Accumulation in *Mycobacterium smegmatis* Is Modulated by Proton Motive Force-Driven and ATP-Dependent Extrusion Systems — **Baisakhee Saha Choudhuri, Susmita Sen, and Parul Chakrabarti** — **682**

Tyrosine Residues of the Erythropoietin Receptor Are Dispensable for Erythroid Differentiation of Human CD34+ Progenitors — **S. Fichelson, S. Chrétien, M. Rokicka-Piotrowicz, S. Bouhanik, S. Gisselbrecht, P. Mayeux, and C. Lacombe** — **685**

Cloning and Characterization of a Short Variant of the Corticotropin-Releasing Factor Receptor Subtype from Rat Amygdala — **Ichiro Miyata, Chiyo Shiota, Yoko Ikeda, Yuichi Oshida, Shigeyuki Chaki, Shigeru Okuyama, and Tadashi Inagami** — **692**

Author Index for Volume 256 — **697**

Volume 257, Number 1, April 2, 1999

BREAKTHROUGHS AND VIEWS

Electrospray Ionization Mass Spectrometry: A Promising New Technique in the Study of Protein/DNA Noncovalent Complexes — **Timothy D. Veenstra** — 1

REGULAR ARTICLES

Detection of Various Epitopes of Murine Osteopontin by Monoclonal Antibodies — **Hiroshi Hotta, Shigeyuki Kon, Yohko U. Katagiri, Noriko Tosa, Taiji Tsukamoto, Ann F. Chambers, and Toshimitsu Uede** — 6

Role of Suc1 in the Activation of the Cyclosome by Protein Kinase Cdk1/Cyclin B — **Michal Shteinberg and Avram Hershko** — 12

A Radicicol-Related Macrocyclic Nonaketide Compound, Antibiotic LL-Z1640-2, Inhibits the JNK/p38 Pathways in Signal-Specific Manner — **Kenji Takehana, Sei-ichi Sato, Tsuyoshi Kobayasi, and Tatsuya Maeda** — 19

Isolation and Characterization of Mouse Homologue for the Human Epilepsy Gene, *EPM2A* — **Subramaniam Ganesh, Kenji Amano, Antonio V. Delgado-Escueta, and Kazuhiro Yamakawa** — 24

Molecular Cloning of the Human ATP-Binding Cassette Transporter 1 (hABC1): Evidence for Sterol-Dependent Regulation in Macrophages — **Thomas Langmann, Jochen Klucken, Markus Reil, Gerhard Liebisch, Marie-Françoise Luciani, Giovanna Chimini, Wolfgang E. Kaminski, and Gerd Schmitz** — 29

Structural and Functional Characterization of the *Drosophila* Glycogen Phosphorylase Gene — **Gabriella Tick, Imre Cserpán, Viktor Dombrádi, Bernard M. Mechler, István Török, and István Kiss** — 34

Characterization and Purification of Carbohydrate Response Element-Binding Protein of the Rat L-Type Pyruvate Kinase Gene Promoter — **Kazuya Yamada, Takashi Tanaka, and Tamio Noguchi** — 44

Cloning and Expression of a Novel Lysophospholipase Which Structurally Resembles Lecithin Cholesterol Acyltransferase — **Yoshio Taniyama, Sachio Shibata, Shunbun Kita, Kenichi Horikoshi, Hiromitsu Fuse, Hideo Shirafuji, Yasuhiro Sumino, and Masahiko Fujino** — 50

Cyclic ADP-Ribose-Dependent Ca^{2+} Release Is Modulated by Free $[Ca^{2+}]$ in the Scallop Sarcoplasmic Reticulum — **Isabella Panfoli, Bruno Burlando, and Aldo Viarengo** — 57

Association and Dissociation of the Calcium-Binding Domains of Calpain by Ca^{2+} — **Satoshi Suo, Hisashi Koike, Hiroyuki Sorimachi, Shoichi Ishiura, and Koichi Suzuki** — 63

Title	Authors	Page
Characterization of *TFG* in *Mus musculus* and *Caenorhabditis elegans*	**Marina Mencinger and Pierre Aman**	**67**
Bystander Macrophages Silence Transgene Expression Driven by the Retroviral Long Terminal Repeat	**Masanori Kitamura**	**74**
Paradoxical Decrease of an Adipose-Specific Protein, Adiponectin, in Obesity	**Yukio Arita, Shinji Kihara, Noriyuki Ouchi, Masahiko Takahashi, Kazuhisa Maeda, Jun-ichiro Miyagawa, Kikuko Hotta, Ichiro Shimomura, Tadashi Nakamura, Koji Miyaoka, Hiroshi Kuriyama, Makoto Nishida, Shizuya Yamashita, Kosaku Okubo, Kenji Matsubara, Masahiro Muraguchi, Yasuichi Ohmoto, Tohru Funahashi, and Yuji Matsuzawa**	**79**
Alternative Initiation of Translation Accounts for a 67/45 kDa Dimorphism of the Human Estrogen Receptor ERα	**Patrice Barraille, Patrick Chinestra, Francis Bayard, and Jean-Charles Faye**	**84**
Chronic Ethanol Consumption Disrupts Complexation between EGF Receptor and Phospholipase C-$_{\gamma1}$: Relevance to Impaired Hepatocyte Proliferation	**Bao-Hong Zhang and Geoffrey C. Farrell**	**89**
H-Ras Is a Negative Regulator of $\alpha_3\beta_1$ Integrin Expression in ECV304 Endothelial Cells	**Eun-Young Shin, Ji-Youn Lee, Mee-Koung Park, Goo-Bo Jeong, Eung-Gook Kim, and Seok-Yong Kim**	**95**
Identification of NEDD8-Conjugation Site in Human Cullin-2	**Hiroyoshi Wada, Edward T. H. Yeh, and Tetsu Kamitani**	**100**
A *Bacillus*-Specific Factor Is Needed to Trigger the Stress-Activated Phosphatase/Kinase Cascade of σ^B Induction	**Janelle M. Scott, Natalya Smirnova, and W. G. Haldenwang**	**106**
Characterization of a Novel Ras-Binding Protein Ce-FLI-1 Comprising Leucine-Rich Repeats and Gelsolin-like Domains	**Masahiro Goshima, Ken-ichi Kariya, Yuriko Yamawaki-Kataoka, Tomoyo Okada, Mitsushige Shibatohge, Fumi Shima, Etsuko Fujimoto, and Tohru Kataoka**	**111**
Cloning, Sequencing, and Expression of an *Escherichia coli* Acid Phosphatase/Phytase Gene (*appA2*) Isolated from Pig Colon	**Eric Rodriguez, Yanming Han, and Xin Gen Lei**	**117**
Uncompetitive Inhibition of Superoxide Generation by a Synthetic Peptide Corresponding to a Predicted NADPH Binding Site in gp91-*phox*, a Component of the Phagocyte Respiratory Oxidase	**Tomoko Tsuchiya, Shinobu Imajoh-Ohmi, Hiroyuki Nunoi, and Shiro Kanegasaki**	**124**
The Proto-oncogene p120^{Cbl} Is a Downstream Substrate of the Hck Protein-Tyrosine Kinase	**Christopher J. Howlett, Sabine A. Bisson, Mary E. Resek, Allan W. Tigley, and Stephen M. Robbins**	**129**

Molecular and Functional Study of *AQY1* from *Saccharomyces cerevisiae:* Role of the C-Terminal Domain	**Vincent Laizé, Renée Gobin, Germain Rousselet, Céline Badier, Stefan Hohmann, Pierre Ripoche, and Frédérique Tacnet**	139
Rapid Induction of NF-κB Binding during Liver Cell Isolation and Culture: Inhibition by *L-NAME* Indicates a Role for Nitric Oxide Synthase	**Antonio Rodriguez-Ariza and Alan J. Paine**	145
Temporal Effects of the Detoxification Enzyme Inducer, Benzyl Isothiocyanate: Activation of c-Jun N-terminal Kinase Prior to the Transcription Factors AP-1 and NF κB	**E. J. Pattern and M. J. DeLong**	149
Multiple Alternative Transcripts of the Human Homologue of the Mouse *TRAD/R51H3/RAD51D* Gene, a Member of the *rec A/RAD51* Gene Family	**Masahiro Kawabata and Kiyomi Saeki**	156
Altered Levels of Primary Antioxidant Enzymes in Progeria Skin Fibroblasts	**Tao Yan, Shijun Li, Xiaohong Jiang, and Larry W. Oberley**	163
The Influence of SV40 Immortalization of Human Fibroblasts on p53-Dependent Radiation Responses	**Manu Kohli and Timothy J. Jorgensen**	168
Tissue Distribution of Placenta- Type 6-Phosphofructo-2-kinase/Fructose-2,6-bisphosphatase	**Ryuzo Sakakibara, Tomonari Okudaira, Kunio Fujiwara, Mie Kato, Takafumi Hirata, Shigeki Yamanaka, Makoto Naito, and Masashi Fukasawa**	177
Angiogenin Is Involved in Morphological Changes and Angiogenesis in the Ovary	**Heungshik S. Lee, In-se Lee, Tae-Cheon Kang, Goo-Bo Jeong, and Soo-Ik Chang**	182
Differentially Expressed Genes in Activin-Induced Apoptotic LNCaP Cells	**Shilung Lin and Shao-Yao Ying**	187
An Additional Exon of Stress-Inducible Heat Shock Protein 70 Gene (HSP70-1)	**Shoichi Shimizu, Kaoru Nomura, Makoto Ujihara, and Hiroshi Demura**	193
Expression of the Human Hepatocyte Growth Factor cDNA in Primary Cultures of Rat Hepatocytes	**Dorothee M. Runge, William C. Bowen, Sikander Katyal, Dieter Runge, Valerie Suski, and George K. Michalopoulos**	199
Molecular Cloning of a Novel 130-kDa Cytoplasmic Protein, Ankhzn, Containing Ankyrin Repeats Hooked to a Zinc Finger Motif	**Kazuhisa Ito, Naoya Ishii, Akinori Miyashita, Kei Tominaga, Hideyuki Kuriyama, Hiroshi Maruyama, Manabu Shirai, Makoto Naito, Masaaki Arakawa, and Ryozo Kuwano**	206
Acceleration of Adhesion of Cancer Cells and Neutrophils to Endothelial Cells in the Absence of *de Novo* Protein Synthesis: Possible Implication for Involvement of Hydroxyl Radicals	**Keiichiro Suzuki, Hironobu Eguchi, Young Ho Koh, Yong Seek Park, and Naoyuki Taniguchi**	214

Presence of Bleomycin-Detectable Free Iron in the Alveolar System of Preterm Infants **C. E. Gerber, G. Bruchelt, H. Stegmann, F. Schweinsberg, and Ch. P. Speer** 218

Reverse Motion of Organelles with Myosin Molecules along Bundles of the Actin Filaments in a Characean Internodal Cell **Go Uchida, Tsuneo Chinzei, and Hiroyuki Matsuura** 223

A Mitochondrial DNA Mutation Cosegregates with the Pathophysiological U Wave **Rumiko Matsuoka, Michiko Furutani, Jun-Ichi Hayashi, Kotoyo Isobe, Kaoru Akimoto, Toshimitsu Shibata, Shin-ichiro Imamura, Mariko Tatsuguchi, Yoshiyuki Furutani, Atsuyoshi Takao, Satoshi Ohnishi, Hiroshi Kasanuki, and Kazuo Momma** 228

Signaling Transduction Pathway of Angiotensin II in Human Mesangial Cells: Mediation of Focal Adhesion and GTPase Activating Proteins **Yasushi Shikata, Kenichi Shikata, Mitsuhiro Matsuda, Hikaru Sugimoto, Jun Wada, and Hirofumi Makino** 234

Synergistic Inhibition of Carboxypeptidase A by Zinc Ion and Imidazole **William L. Mock and Lingyan Wang** 239

Oxidative Stress in Newborn Infants with and without Asphyxia as Measured by Plasma Antioxidants and Free Fatty Acids **Kentaro Hara, Satoshi Yamashita, Akio Fujisawa, Shun Ishiwa, Teruyuki Ogawa, and Yorihiro Yamamoto** 244

CORRIGENDUM

Volume **232,** Number 2 (1997), in Article No. RC976283, “Estrogen Affects Development of Alveolar Structures in Whole-Organ Culture of Mouse Mammary Glands,” by John Barlow, Theresa Casey, Jen-Fu Chiu, and Karen Plaut, pages 340–344 **249**

ERRATUM

Volume **253,** Number 2 (1998), in Article No. RC989740, “Yellow Fever 5′ Noncoding Region as a Potential Element to Improve Hepatitis C Virus Production through Modification of Translational Control,” by Isabelle Malet, Czeslaw Wychowski, Jean-Marie Huraux, Henri Agut, and Annie Cahour, pages 257–264 **250**

Number 2, April 13, 1999

BREAKTHROUGHS AND VIEWS

Amadorins: Novel Post-Amadori Inhibitors of Advanced Glycation Reactions **Raja G. Khalifah, John W. Baynes, and Billy G. Hudson** 251

REGULAR ARTICLES

Expression of Dioxin-Responsive Genes in Human Endometrial Cells in Culture **Jae-Ho Yang** 259

Distribution and Characterization of Immunoreactive Prolactin-Releasing Peptide (PrRP) in Rat Tissue and Plasma	**Hirokazu Matsumoto, Yuko Murakami, Yasuko Horikoshi, Jiro Noguchi, Yugo Habata, Chieko Kitada, Shuji Hinuma, Haruo Onda, and Masahiko Fujino**	**264**
The Pest Regions Containing C-Termini of Mammalian Ornithine Decarboxylase and Histidine Decarboxylase Play Different Roles in Protein Degradation	**María Teresa Olmo, Daniel Rodríguez-Agudo, Miguel Ángel Medina, and Francisca Sánchez-Jiménez**	**269**
Electrostatic Interaction between Cytochrome P450 and NADPH-P450 Reductase: Comparison of Mixed and Fused Systems Consisting of Rat Cytochrome P450 1A1 and Yeast NADPH-P450 Reductase	**Shunya Kondo, Toshiyuki Sakaki, Hideo Ohkawa, and Kuniyo Inouye**	**273**
Regulation of the Reduced-Folate Transporter by Nitric Oxide in Cultured Human Retinal Pigment Epithelial Cells	**Sylvia B. Smith, Wei Huang, Christy Chancy, and Vadivel Ganapathy**	**279**
Genomic Organization of Human Myristoyl-CoA: Protein *N*-Myristoyltransferase-1	**Rajala V. S. Raju, Raju S. S. Datla, and Rajendra K. Sharma**	**284**
Unidirectional Transport from Apical to Basolateral Compartment of Cobalt Ion in Polarized Madin-Darby Canine Kidney Cells	**Masaya Nagao, Eiji Sugaru, Taiho Kambe, and Ryuzo Sasaki**	**289**
Assignment of Disulfide Linkages in Chum Salmon Stanniocalcin	**Irena Hulova and Hiroshi Kawauchi**	**295**
The *map1* Gene of *Cowdria ruminantium* Is a Member of a Multigene Family Containing Both Conserved and Variable Genes	**Carlos R. Sulsona, Suman M. Mahan, and Anthony F. Barbet**	**300**
Nicotine Regulates Basic Fibroblastic Growth Factor and Transforming Growth Factor β_1 Production in Endothelial Cells	**Alessandra Cucina, Valentina Corvino, Paolo Sapienza, Valeria Borrelli, Marco Lucarelli, Sigfrido Scarpa, Roberto Strom, Luciana Santoro-D'Angelo, and Antonino Cavallaro**	**306**
Full-Length cDNA of Human Cathepsin F Predicts the Presence of a Cystatin Domain at the N-terminus of the Cysteine Protease Zymogen	**Dorit K. Nägler, Traian Sulea, and Robert Ménard**	**313**
Genotoxicity of Human Milk Extracts and Detection of DNA Damage in Exfoliated Cells Recovered from Breast Milk	**Francis L. Martin, Kathleen J. Cole, Gillian Weaver, Philip L. Grover, and David H. Phillips**	**319**
S-Form Lipopolysaccharide (LPS), but Not Lipid A or R-Chemo-type LPS, Induces Interleukin-6 Production in Vitamin D_3-Differentiated THP-1 Cells	**Yasuo Suda, Kazue Aoyama, Kazumi Arimoto, Toshihide Tamura, and Shoichi Kusumoto**	**327**

Cloning, Expression, and Chromosomal Mapping of a Human ATPase II Gene, Member of the Third Subfamily of P-Type ATPases and Orthologous to the Presumed Bovine and Murine Aminophospholipid Translocase	**Isabelle Mouro, Margaret S. Halleck, Robert A. Schlegel, Marie Geneviève Mattei, Patrick Williamson, Alain Zachowski, Philippe Devaux, Jean-Pierre Cartron, and Yves Colin**	**333**
73-kDa Heat Shock Cognate Protein Interacts Directly with P27Kip1, a Cyclin-Dependent Kinase Inhibitor, during G1/S Transition	**Susumu Nakamura, Ichiro Tatuno, Yoshihiko Noguchi, Masatoshi Kitagawa, Leonard D. Kohn, Yasushi Saito, and Aizan Hirai**	**340**
Stoichiometric Arginine Binding in the Oxygenase Domain of Inducible Nitric Oxide Synthase Requires a Single Molecule of Tetrahydrobiopterin per Dimer	**Steven P. Rafferty, Jeffrey C. Boyington, Rachel Kulansky, Peter D. Sun, and Harry L. Malech**	**344**
Determination of Mean and Standard Deviation of Dihedral Angles	**Rold Döker, Till Maurer, Werner Kremer, K.-P. Neidig, and Hans Robert Kalbitzer**	**348**
Changes in Expression of the 44-Kilodalton Outer Surface Membrane Antigen (p44 kD) for Monitoring Progression of Infection and Antimicrobial Susceptibility of the Human Granulocytic Ehrlichiosis (HGE) Agent in HL-60 Cells	**Tze-chen Hsieh, Anna M. DiPietrantonio, Harold W. Horowitz, J. Stephen Dumler, Maria E. Aguero-Rosenfeld, Gary P. Wormser, and Joseph M. Wu**	**351**
Hairpin Ribozyme Specificity *in Vivo:* A Case of Promiscuous Cleavage	**Robert B. Denman**	**356**
Increased Sensitivity of Human Colon Cancer Cells to DNA Cross-Linking Agents after GRP78 Up-Regulation	**Charles A. Belfi, Satadal Chatterjee, David M. Gosky, Sosamma J. Berger, and Nathan A. Berger**	**361**
Biochemical Localisation of the 5-HT$_{2A}$ (serotonin) Receptor in Rat Skeletal Muscle	**Eric Hajduch, Luce Dombrowski, Froogh Darakhshan, Franck Rencurel, André Marette, and Harinder S. Hundal**	**369**
Role of Endothelin-1 and Interleukin-4 in Buccal Mucosal Ulcer Healing: Effect of Chronic Alcohol Ingestion	**Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany**	**373**
Focal Sites of DNA Repair Synthesis in Human Chromosomes	**Maria P. Svetlova, Liudmila V. Solovjeva, Nadezhda A. Pleskach, and Nikolai V. Tomilin**	**378**
Effects of Missense Mutations and Deletions on Membrane Anchoring and Enzyme Function of Human Steroid 21-Hydroxylase (P450c21)	**Svetlana Lajic, Andrej Nikoshkov, Mikael Holst, and Anna Wedell**	**384**
Adamantyl Globotriaosyl Ceramide: A Monovalent Soluble Mimic Which Inhibits Verotoxin Binding to Its Glycolipid Receptor	**M. Mylvaganam and C. A. Lingwood**	**391**
Nitric Oxide Up-regulates the Expression of Intercellular Adhesion Molecule-1 on Cancer Cells	**Takahiko Toyoshima, Ryutaro Kamijo, Kunio Takizawa, Kaname Sumitani, Masashi Hatori, and Masao Nagumo**	**395**

Physical Interaction between Interleukin-12 Receptor β 2 Subunit and Jak2 Tyrosine Kinase: Jak2 Associates with Cytoplasmic Membrane-Proximal Region of Interleukin-12 Receptor β 2 via Amino-Terminus	**Koh Yamamoto, Fumi Shibata, Osamu Miura, Ryuichi Kamiyama, Shinsaku Hirosawa, and Nobuyuki Miyasaka**	400
Chronic Hyperammonemia in Rats Impairs Activation of Soluble Guanylate Cyclase in Neurons and in Lymphocytes: A Putative Peripheral Marker for Neurological Alterations	**María-Dolores Miñana, Regina Corbalán, Carmina Montoliu, Che-Ming Teng, and Vicente Felipo**	405
PSC833, CyclosporinA, and Dexniguldipine Effects on Cellular Calcein Retention and Inhibition of the Multidrug Resistance Pump in Human Leukemic Lymphoblasts	**Paul W. Wigler**	410
Threonine 188 Is Critical for Interaction with NAD$^+$ in Human NAD$^+$-Dependent 15-Hydroxyprostaglandin Dehydrogenase	**Huiping Zhou and Hsin-Hsiung Tai**	414
Crystal Structure of Mistletoe Lectin I from *Viscum album*	**Ruth Krauspenhaar, Susanne Eschenburg, Markus Perbandt, Vjacheslav Kornilov, Nina Konareva, Inna Mikailova, Stanka Stoeva, Roland Wacker, Timm Maier, Tej Singh, Albert Mikhailov, Wolfgang Voelter, and Christian Betzel**	418
Colocalization of Leptin Receptor (OB-R) mRNA and Placental Lactogen-II in Rat Trophoblast Cells: Gestational Profile of OB-R mRNA Expression in Placentae	**Motoyuki Kawai, Takashi Murakami, Shizuka Otani, Kenji Shima, Masaaki Yamaguchi, and Kurajiro Kishi**	425
Identification of the Factors Affecting the Rate of Deactivation of Hypochlorous Acid by Melatonin	**Shawn M. Dellegar, Shelly A. Murphy, Andrew E. Bourne, John C. DiCesare, and Gordon H. Purser**	431
Glucose Protection from MPP$^+$-Induced Apoptosis Depends on Mitochondrial Membrane Potential and ATP Synthase	**Ruth M. E. Chalmers-Redman, Andrew D. MacLean Fraser, Graeme W. Carlile, Amanda Pong, and William G. Tatton**	440
Molecular Design of Conjugated Tumor Necrosis Factor-α: Synthesis and Characteristics of Polyvinyl Pyrrolidone Modified Tumor Necrosis Factor-α	**Haruhiko Kamada, Yasuo Tsutsumi, Shin-ichi Tsunoda, Tetsunari Kihira, Yoshihisa Kaneda, Yoko Yamamoto, Shinsaku Nakagawa, Yoshifumi Horisawa, and Tadanori Mayumi**	448
Expression of *TRAIL* and Its Receptors in Human Brain Tumors	**Stephan Frank, Uta Köhler, Gabriele Schackert, and Hans K. Schackert**	454
2-Deoxy-D-ribose-Induced Apoptosis in HL-60 Cells Is Associated with the Cell Cycle Progression by Spermidine	**Maria Giuseppina Monti, Stefania Ghiaroni, Daniela Barbieri, Claudio Franceschi, Gaetano Marverti, and Maria Stella Moruzzi**	460

Origin of Guanine Nucleotides in Isolated Heart Mitochondria	**Edward E. McKee, Alice T. Bentley, Ronald M. Smith, Jr., and Christina E. Ciaccio**	**466**
Protein 7B2 Is Essential for the Targeting and Activation of PC2 into the Regulated Secretory Pathway of rMTC 6-23 Cells	**Pierre Barbero and Patrick Kitabgi**	**473**
Characterization of MARCKS (Myristoylated Alanine-Rich C Kinase Substrate) Identified by a Monoclonal Antibody Generated against Chick Embryo Neural Retina	**Flavio R. Zolessi, Ulf Hellman, Adriana Baz, and Cristina Arruti**	**480**
Production of Prostanoids and Nitric Oxide by Infarcted Heart *in Situ* and the Effect of Aspirin	**Tadahiko Yamamoto, Anna M. Cohen, N. Rani Kakar, Masako Yamamoto, Paul E. Johnson, Y. Kelly Cho, and Richard J. Bing**	**488**
Tissue Inhibitor of Metalloproteinases-1 (TIMP-1) Binds to the Cell Surface and Translocates to the Nucleus of Human MCF-7 Breast Carcinoma Cells	**Linda M. Ritter, Susan H. Garfield, and Unnur P. Thorgeirsson**	**494**
Comparison of Three Classes of Snake Neurotoxins by Homology Modeling and Computer Simulation Graphics	**Hsueh-Fen Juan, Chin-Chun Hung, Kung-Tsung Wang, and Shyh-Horng Chiou**	**500**
Mouse Thyroid Primary Culture	**Lukas T. Jeker, Mehrdad Hejazi, C. Lynne Burek, Noel R. Rose, and Patrizio Caturegli**	**511**
Epithelial-Cell-Specific Transcriptional Regulation of Human Galβ1,3GalNAc/Galβ1,4GlcNAc α2,3-Sialytransferase (hST3Gal IV) Gene	**Akiyoshi Taniguchi and Kojiro Matsumoto**	**516**
Nonspecific Inhibition of Myogenic Tone by PD98059, a MEK1 Inhibitor, in Rat Middle Cerebral Arteries	**Guy J. L. Lagaud, Eugene Lam, Amy Lui, Cornelis van Breemen, and Ismail Laher**	**523**
Involvement of Tyrosine Kinases on Cyclooxygenase Expression and Prostaglandin E_2 Production in Human Gingival Fibroblasts Stimulated with Interleukin-1β and Epidermal Growth Factor	**Tülay Yucel-Lindberg, Harri Ahola, Jan Carlstedt-Duke, and Thomas Modéer**	**528**
Isolation and Characterization of a Genomic Region Upstream from the Ovine Na^+/D-Glucose Cotransporter (SGLT1) cDNA	**I. Stuart Wood, Gordon G. Allison, and Soraya P. Shirazi-Beechey**	**533**
Identification of a Novel *cis*-Acting Positive Element Responsible for the Cell-Specific Expression of the *NK-1* Homeobox Gene	**Sun Jung Kim, Taekyu Park, and Kyung-Kwang Lee**	**538**
Sorting of a Constitutive Secretory Protein to the Regulated Secretory Pathway of Exocrine Cells	**Sven-Ulrik Gorr and Yancy R. Moore**	**545**

Ca^{2+}-Activated K Channel of the BK-Type in the Inner Mitochondrial Membrane of a Human Glioma Cell Line	**Detlef Siemen, Christos Loupatatzis, Jiri Borecky, Erich Gulbins, and Florian Lang**	549
Oxidative DNA Damage by a Metabolite of Carcinogenic and Reproductive Toxic Nitrobenzene in the Presence of NADH and Cu(II)	**Yasuhiro Ohkuma and Shosuke Kawanishi**	555
The Yeast Npi1/Rsp5 Ubiquitin Ligase Lacking Its N-Terminal C_2 Domain Is Competent for Ubiquitination but Not for Subsequent Endocytosis of the Gap1 Permease	**Jean-Yves Springael, Johan-Owen De Craene, and Bruno André**	561
Identification of the Dehydroascorbic Acid Reductase and Thioltransferase (Glutaredoxin) Activities of Bovine Erythrocyte Glutathione Peroxidase	**Michael P. Washburn and William W. Wells**	567
Hypochlorous Acid-Induced DNA Base Modification: Potentiation by Nitrite: Biomarkers of DNA Damage by Reactive Oxygen Species	**Matthew Whiteman, Jeremy P. E. Spencer, Andrew Jenner, and Barry Halliwell**	572
Molecular Cloning, Expression Analysis, and Chromosomal Localization of Human Syntaxin 8 (STX8)	**Vincent Thoreau, Thierry Bergès, Isabelle Callebaut, Zuzana Guillier-Gencik, Laetitia Gressin, Alain Bernheim, Francis Karst, Jean-Paul Mornon, Alain Kitzis, and Jean-Claude Chomel**	577
A Novel Apolipoprotein A-1 Variant, Arg173Pro, Associated with Cardiac and Cutaneous Amyloidosis	**Kamran Hamidi Asl, Juris J. Liepnieks, Masaaki Nakamura, Frank Parker, and Merrill D. Benson**	584
Phosphorylation of Human MAD1 by the BUB1 Kinase *in Vitro*	**Todd W. Seeley, Ling Wang, and Julia Y. Zhen**	589
Optimization of Treatment Conditions for Studying the Anticancer Effects of Retinoids Using Pancreatic Adenocarcinoma as a Model	**Tarek H. El-Metwally and Thomas E. Adrian**	596
Lack of Reciprocal Genomic Imprinting of Sense and Antisense RNA of Mouse Insulin-like Growth Factor II Receptor in the Central Nervous System	**Ji-Fan Hu, Kalpana A. Balaguru, Radha D. Ivaturi, Haritha Oruganti, Tao Li, Binh T. Nguyen, Thanh H. Vu, and Andrew R. Hoffman**	604
Interleukin-6 Induces G_1 Arrest through Induction of $p27^{Kip1}$, a Cyclin-Dependent Kinase Inhibitor, and Neuron-like Morphology in LNCaP Prostate Tumor Cells	**Shunsuke Mori, Kaoru Murakami-Mori, and Benjamin Bonavida**	609
Human Very-Long-Chain Acyl-CoA Synthetase: Cloning, Topography, and Relevance to Branched-Chain Fatty Acid Metabolism	**Steven J. Steinberg, Susan J. Wang, Do G. Kim, Stephanie J. Mihalik, and Paul A. Watkins**	615

Glucose Metabolic Alterations in Isolated and Perfused Rat Hepatocytes Induced by Pancreatic Cancer Conditioned Medium: A Low Molecular Weight Factor Possibly Involved — **A. Valerio, D. Basso, L. Brigato, G. Ceolotto, G. Baldo, A. Tiengo, and M. Plebani** 622

Evidence for Cooperative Binding of (−)Isoproterenol to Rat Brain β_1-adrenergic Receptors — **C. J. Fowler, V. Vedin, and E. Sjöberg** 629

Interferon-γ, Bacterial Lipopolysaccharide, and Tumor Necrosis Factor-α Induce CD11a mRNA and Protein via Na^+/H^+ Exchange and Protein Kinase C-Dependent Mechanisms in Tissue Macrophages — **Rodney E. Shackelford** 635

ERRATUM

Volume **253,** Number 3 (1998), in Article No. RC989859, "Na^+,K^+-ATPase Was Found to Be the Membrane Component Responsible for the Hydrophobic Behavior of the Brain Membrane Tubulin," by Alejandra del C. Alonso, Mariana Nuñez-Fernandez, Dante M. Beltramo, César H. Casale, and Héctor S. Barra, pages 824–827 642

Number 3, April 21, 1999

BREAKTHROUGHS AND VIEWS

CTP:Phosphocholine Cytidylyltransferase: Insights into Regulatory Mechanisms and Novel Functions — **Joel M. Clement and Claudia Kent** 643

REGULAR ARTICLES

Formation of Phospholipid Hydroperoxides and Its Inhibition by α-Tocopherol in Rat Brain Synaptosomes Induced by Peroxynitrite — **Honglian Shi, Noriko Noguchi, Yuexian Xu, and Etsuo Niki** 651

S 17092-1, a Highly Potent, Specific and Cell Permeant Inhibitor of Human Proline Endopeptidase — **Hélène Barelli, Agnès Petit, Etienne Hirsch, Sherwin Wilk, Guillaume De Nanteuil, Philippe Morain, and Frédéric Checler** 657

In Vitro Codon-Reading Specificities of Unmodified tRNA Molecules with Different Anticodons on the Sequence Background of *Escherichia coli* $tRNA_1^{Ser}$ — **Kazuyuki Takai, Hiroshi Takaku, and Shigeyuki Yokoyama** 662

Phosphatidylinositol-3 Kinase Dependent MAP Kinase Activation via p21ras in Endothelial Cells Exposed to Cyclic Strain — **Masataka Ikeda, Hiroyuki Kito, and Bauer E. Sumpio** 668

IRF-1 Is an Essential Mediator in IFN-γ-Induced Cell Cycle Arrest and Apoptosis of Primary Cultured Hepatocytes	**Arihiro Kano, Takahiro Haruyama, Toshihiro Akaike, and Yoshifumi Watanabe**	**672**
The Development of Extraocular Muscle Calcium Homeostasis Parallels Visuomotor System Maturation	**John D. Porter and Paraskevi Karathanasis**	**678**
Role of Inducible Nitric Oxide Synthase in Leukocyte Extravasation *in Vivo*	**Adam Cockrell, F. Stephen Laroux, David Jourd'heuil, Shigeyuki Kawachi, Laura Gray, Henry Van der Heyde, and Matthew B. Grisham**	**684**
Cell Reactions to Dielectrophoretic Manipulation	**Steffen Archer, Tong-Tong Li, A. Tudor Evans, Stephen T. Britland, and Hywel Morgan**	**687**
The Novel Sarcomeric Protein Telethonin Exhibits Developmental and Functional Regulation	**P. Mason, S. Bayol, and P. T. Loughna**	**699**
Role of the His273 Located in the Sixth Transmembrane Domain of the Angiotensin II Receptor Subtype AT2 in Ligand–Receptor Interaction	**Cortney A. Turner, Shannon Cooper, and Lakshmidevi Pulakat**	**704**
Fabry Disease: Identification of Novel Alpha-Galactosidase A Mutations and Molecular Carrier Detection by Use of Fluorescent Chemical Cleavage of Mismatches	**Dominique P. Germain and Livia Poenaru**	**708**
Apolipoprotein(a), a Link between Atherosclerosis and Tumor Angiogenesis	**Vuong N. Trieu and Fatih M. Uckun**	**714**
Reciprocal Gene Expression of Osteoclastogenesis Inhibitory Factor and Osteoclast Differentiation Factor Regulates Osteoclast Formation	**Masazumi Nagai and Nobuko Sato**	**719**
Expression of Extended Polyglutamine Sequentially Activates Initiator and Effector Caspases	**Toshiyuki Miyashita, Jun Matsui, Yuko Ohtsuka, Mami U, Sayaka Fujishima, Yuko Okamura-Oho, Tadashi Inoue, and Masao Yamada**	**724**
The 37-Amino-Acid Interdomain of Dengue Virus NS5 Protein Contains a Functional NLS and Inhibitory CK2 Site	**Jade K. Forwood, Andrew Brooks, Lyndall J. Briggs, Chong-Yun Xiao, David A. Jans, and Subhash G. Vasudevan**	**731**
HOXC5 and HOXC8 Expression Are Selectively Turned on in Human Cervical Cancer Cells Compared to Normal Keratinocytes	**Younes Alami, Vincent Castronovo, Dorina Belotti, Domenico Flagiello, and Nathalie Clausse**	**738**
Molecular Mechanisms for the Hepatic Uptake of Magnetic Resonance Imaging Contrast Agents	**Lorella Pascolo, Felicia Cupelli, Pier Lucio Anelli, Vito Lorusso, Massimo Visigalli, Fulvio Uggeri, and Claudio Tiribelli**	**746**

Role of Ground and Excited Singlet State Oxygen in the Red Light-Induced Stimulation of *Escherichia coli* Cell Growth	**Laura Polo, Francesca Presti, Andreas Schindl, Liesbeth Schindl, Giulio Jori, and Giulio Bertoloni**	**753**
Repression of Hepatitis B Virus X Gene Expression by Hammerhead Ribozymes	**Young Kyeung Kim, Ensung Junn, Inwon Park, Younghoon Lee, Changwon Kang, and Jeong Keun Ahn**	**759**
Characterization of Low-Affinity Binding Sites for Glibenclamide on the Kir6.2 Subunit of the β-Cell K_{ATP} Channel	**L. Gros, A. Virsolvy, G. Salazar, D. Bataille, and P. Blache**	**766**
Induction of Apoptosis in Cultured Colon Cancer Cells by Transfection with Human Interferon β Gene	**Mariko Kito, Yukihiro Akao, Nobuko Ohishi, and Kunio Yagi**	**771**
Hepatitis C Virus NS5A Protein Is Phosphorylated by Casein Kinase II	**Jiyun Kim, Daeyoup Lee, and Joonho Choe**	**777**
Heat Stability of the Potato Tuber ADP-Glucose Pyrophosphorylase: Role of Cys Residue 12 in the Small Subunit	**Miguel A. Ballicora, Yingbin Fu, Jeremiah B. Frueauf, and Jack Preiss**	**782**
High Levels of Circulating Aβ42 Are Sequestered by Plasma Proteins in Alzheimer's Disease	**Yu-Min Kuo, Mark R. Emmerling, Heather C. Lampert, Stephen R. Hempelman, Tyler A. Kokjohn, Amina S. Woods, Robert J. Cotter, and Alex E. Roher**	**787**
High Efficient Expression of the Functional Ligand Binding Site of the Inositol 1,4,5-Trisphosphate Receptor in *Escherichia coli*	**Fumio Yoshikawa, Tsuyoshi Uchiyama, Hirohide Iwasaki, Chieri Tomomori-Satoh, Toshiyuki Tanaka, Teiichi Furuichi, and Katsuhiko Mikoshiba**	**792**
Differential Serine Phosphorylation Regulates IκB-α Inactivation	**Chih-Li Chen, Fiona E. Yull, and Lawrence D. Kerr**	**798**
Genetic and Biochemical Evidence for a Critical Role of Janus Kinase (JAK)-3 in Mast Cell-Mediated Type I Hypersensitivity Reactions	**Ravi Malaviya and Fatih M. Uckun**	**807**
Indian Hedgehog in the Late-Phase Differentiation in Mouse Chondrogenic EC Cells, ATDC5: Upregulation of Type X Collagen and Osteoprotegerin Ligand mRNAs	**Haruhiko Akiyama, Chohei Shigeno, Ken-ichi Iyama, Hiromu Ito, Yuji Hiraki, Junji Konishi, and Takashi Nakamura**	**814**
Autoimmune Regulator Is Expressed in the Cells Regulating Immune Tolerance in Thymus Medulla	**Maarit Heino, Pärt Peterson, Jun Kudoh, Kentaro Nagamine, Anssi Lagerstedt, Vladimir Ovod, Annamari Ranki, Immo Rantala, Markku Nieminen, Juha Tuukkanen, Hamish S. Scott, Stylianos E. Antonarakis, Nobuyoshi Shimizu, and Kai Krohn**	**821**

Angiotensin II Activates the Proinflammatory Transcription Factor Nuclear Factor-κB in Human Monocytes	**Roger Kranzhöfer, Michael Browatzki, Joachim Schmidt, and Wolfgang Kübler**	826
Transcription of the Human Thyrotropin-Releasing Hormone Receptor Gene—Analysis of Basal Promoter Elements and Glucocorticoid Response Elements	**P. I. Høvring, V. Matre, Å. K. Fjeldheim, O. P. Løseth, and K. M. Gautvik**	829
Involvement of Spt7p in Vacuolar Polyphosphate Level of *Saccharomyces cerevisiae*	**Ken Nishimura, Kyoko Yasumura, Kazuei Igarashi, and Yoshimi Kakinuma**	835
Heparan Sulfate Composition of Alternatively Spliced CD44 Fusion Proteins	**Michael Piepkorn, Peter Hovingh, Kelly L. Bennett, and Alfred Linker**	839
Species-Specific Alternative Splicing of Transgenic RNA in the Mammary Glands of Pigs, Rabbits, and Mice	**Bernhard Aigner, Konstanze Pambalk, Ursula Reichart, Urban Besenfelder, Zsuzsanna Bosze, Matthias Renner, Walter H. Günzburg, Eckhard Wolf, Mathias Müller, and Gottfried Brem**	843
The Cysteine Residues of Recombinant Human Gastric Lipase	**S. Canaan, M. Rivière, R. Verger, and L. Dupuis**	851
Identification of Receptor Genes in Renal Cell Carcinoma Associated with Angiogenesis by Differential Hybridization Technique	**Atsushi Takahashi, Hiroki Sasaki, Sun Jin Kim, Tadao Kakizoe, Noriomi Miyao, Takashi Sugimura, Masaaki Terada, and Taiji Tsukamoto**	855
The Melanocortin 4 Receptor Mediates Leptin Stimulation of Luteinizing Hormone and Prolactin Surges in Steroid-Primed Ovariectomized Rats	**Hajime Watanobe, Helgi B. Schiöth, Jarl E. S. Wikberg, and Toshihiro Suda**	860
Down-Regulation of Nucleophosmin/B23 mRNA Delays the Entry of Cells into Mitosis	**Pei. S. Jiang and Benjamin Y. M. Yung**	865
Yeast One-Hybrid Assay Identifies YY1 as a Binding Factor for a Proacrosin Promoter Element	**Hans-Jürgen Schulten, Wolfgang Engel, Karim Nayernia, and Peter Burfeind**	871
Rapid Selection of Tetracycline-Controlled Inducible Cell Lines Using a Green Fluorescent-Transactivator Fusion Protein	**Bernard A. Callus and Bernard Mathey-Prevot**	874
Up-Regulation of Liver Uncoupling Protein-2 mRNA by either Fish Oil Feeding or Fibrate Administration in Mice	**Nobuyo Tsuboyama-Kasaoka, Mayumi Takahashi, Hyounju Kim, and Osamu Ezaki**	879
The Mouse Ortholog of the Human *SMARCB1* Gene Encodes Two Splice Forms	**Carl E. G. Bruder, Jan P. Dumanski, and Darek Kedra**	886
Restricted Expression Pattern of *vegf-d* in the Adult and Fetal Mouse: High Expression in the Embryonic Lung	**Filip Farnebo, Fredrik Piehl, and Jacob Lagercrantz**	891

Ca^{2+} and Protein Kinase C Signaling for Histamine and Sulfidoleukotrienes Released from Human Cultured Mast Cells — **Masahiro Kimata, Michitaka Shichijo, Toru Miura, Isao Serizawa, Naoki Inagaki, and Hiroichi Nagai** — **895**

A Two-Component Tetrachlorohydroquinone Reductive Dehalogenase System from the Lignin-Degrading Basidiomycete *Phanerochaete chrysosporium* — **G. Vijay Bhasker Reddy and Michael H. Gold** — **901**

Identification of a Human Akt3 (Protein Kinase B γ) Which Contains the Regulatory Serine Phosphorylation Site — **Kaname Nakatani, Hiroshi Sakaue, Devon A. Thompson, Ronald J. Weigel, and Richard A. Roth** — **906**

Author Index for Volume 257 — **911**

Volume 258, Number 1, April 29, 1999

BREAKTHROUGHS AND VIEWS

Free and N-Linked Oligomannosides as Markers of the Quality Control of Newly Synthesized Glycoproteins — **René Cacan and André Verbert** — 1

REGULAR ARTICLES

Competitive Inhibition of Cathepsin C by Guanidinium Ions and Reexamination of Substrate Inhibition — **Blaž Cigić and Roger H. Pain** — 6

Isolation of a cyp2b10-like cDNA and of a Clone Derived from a cyp2b10-like Pseudogene — **Nathalie Marc, Marie Damon, Alain Fautrel, André Guillouzo, and Laurent Corcos** — 11

Involvement of Endothelin-1 in Up-regulation of Gastric Mucosal Inflammatory Responses to *Helicobacter pylori* Lipopolysaccharide — **Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany** — 17

Functional Expression of Components of the Natriuretic Peptide System in Human Ocular Nonpigmented Ciliary Epithelial Cells — **Javier Ortego and Miguel Coca-Prados** — 21

Effect of the Selection Marker on the Viability and Plasmid Stability of Two Human Proteins with Neurotrophic Action Expressed in *Escherichia coli* — **Yssel Mendoza Marí, Angela Estela Sosa Espinosa, Raimundo Ubieta, Osmani Fernández Batista, and Miladys Limonta Fernández** — 29

Cumene Hydroperoxide-Supported Demethylation Reactions Catalyzed by Cytochrome P450 2B4 Lacking the NH_2-Terminal Sequence — **Yiqun Zhang and Steven J. Pernecky** — 32

The Ncd Tail Domain Promotes Microtubule Assembly and Stability — **A. Karabay and R. A. Walker** — 39

Oxidative Stress and Upregulation of Mitochondrial Biogenesis Genes in Mitochondrial DNA-Depleted HeLa Cells — **Soledad Miranda, Rocio Foncea, Javier Guerrero, and Federico Leighton** — 44

Prostaglandin J_2 and Its Metabolites Promote Neurite Outgrowth Induced by Nerve Growth Factor in PC12 Cells — **Takumi Satoh, Kyoji Furuta, Masaaki Suzuki, and Yasuyoshi Watanabe** — 50

A New Assignment Strategy for the Hyperfine-Shifted ^{13}C and ^{15}N Resonances in Fe_2S_2 Ferredoxins — **Nitin U. Jain and Thomas C. Pochapsky** — 54

Nitric Oxide Stimulates Chronic Ceramide Formation in Glomerular Endothelial Cells	**Andrea Huwiler, Simone Dorsch, Verena A. Briner, Henk van den Bosch, and Josef Pfeilschifter**	**60**
Ca^{2+}/Calmodulin-Dependent Phosphorylation of the Ca^{2+}-ATPase, Uncoupled from Phospholamban, Stimulates Ca^{2+}-Pumping in Native Cardiac Sarcoplasmic Reticulum	**Ande Xu and Njanoor Narayanan**	**66**
Secretion of Lecithin:Cholesterol Acyltransferase by Brain Neuroglial Cell Lines	**Xavier Collet, Omar Francone, Francois Besnard, and Christopher J. Fielding**	**73**
An Early S Phase Checkpoint Is Regulated by the E2F1 Transcription Factor	**Matthew C. Stubbs, Gordon D. Strachan, and David J. Hall**	**77**
Development of *p*-Benzoylbenzoylated [N,C,rANP (1-28)] pBNP32 (pBNP1) Derivatives and Affinity Photolabeling of the Bovine NPR-A Receptor	**Martin Coupal, André De Léan, Normand McNicoll, and Alain Fournier**	**81**
Heme Initiates Changes in the Expression of a Wide Array of Genes during the Early Erythroid Differentiation Stage	**Yonghua Zhu, Thomas Hon, and Li Zhang**	**87**
Search for Genes Potentially Involved in *Mycobacterium tuberculosis* Virulence by mRNA Differential Display	**Laura Rindi, Nicoletta Lari, and Carlo Garzelli**	**94**
Dynamics of DNA Molecules in Gel Studied by Fluorescence Microscopy	**Ronald M. Kantor, Xuan-Hui Guo, Edward J. Huff, and David C. Schwartz**	**102**
FGF-10 Is a Growth Factor for Preadipocytes in White Adipose Tissue	**Masahiro Yamasaki, Hisayo Emoto, Morichika Konishi, Tadahisa Mikami, Hideyo Ohuchi, Kazuwa Nakao, and Nobuyuki Itoh**	**109**
Inhibition of the Expression of VE-Cadherin/Catenin Complex by Gamma Linolenic Acid in Human Vascular Endothelial Cells, and Its Impact on Angiogenesis	**Jun Cai, Wen G. Jiang, and Robert E. Mansel**	**113**
Hypothalamic Hypocretin/Orexin and Neuropeptide Y: Divergent Interaction with Energy Depletion and Leptin	**Bernard Beck and Sébastien Richy**	**119**
Membrane Proteins of Human Erythrocytes Are Modified by Advanced Glycation End Products during Aging in the Circulation	**Ken Ando, Masatoshi Beppu, Kiyomi Kikugawa, Ryoji Nagai, and Seikoh Horiuchi**	**123**
Balance of IgG Subclasses toward Human Papillomavirus Type 16 (HPV16) L1-Capsids Is a Possible Predictor for the Regression of HPV16-Positive Cervical Intraepithelial Neoplasia	**Koji Matsumoto, Hiroyuki Yoshikawa, Toshiharu Yasugi, Shunsuke Nakagawa, Kei Kawana, Shiro Nozawa, Hiroshi Hoshiai, Kenji Shiromizu, Tadahito Kanda, and Yuji Taketani**	**128**

Aberrant Metabolic Sialylation of Recombinant Proteins Expressed in Chinese Hamster Ovary Cells in High Productivity Cultures	**Lydia Santell, Thomas Ryll, Tina Etcheverry, Michael Santoris, George Dutina, Angie Wang, Jane Gunson, and Thomas G. Warner**	132
The Gln27Glu β_2-Adrenergic Receptor Variant Is Associated with Obesity Due to Subcutaneous Fat Accumulation in Japanese Men	**Yasumichi Mori, Hoon Kim-Motoyama, Yoichi Ito, Tomiyoshi Katakura, Kazuki Yasuda, Satomi Ishiyama-Shigemoto, Kentaro Yamada, Yasuo Akanuma, Yasuo Ohashi, Satoshi Kimura, Yoshio Yazaki, and Takashi Kadowaki**	138
A Minimized Fc Binding Peptide from Protein A Induces Immunocyte Proliferation and Evokes Th1-Type Response in Mice	**Pratima Sinha, Jayati Sengupta, and Prasanta K. Ray**	141
Widespread Occurrence of the Homologues of the Early Nodulin (*ENOD*) Genes in *Oryza* Species and Related Grasses	**P. M. Reddy, R. K. Aggarwal, M. C. Ramos, J. K. Ladha, D. S. Brar, and H. Kouchi**	148
Cloning of CYP4F7, a Kidney-Specific P450 in the Sea Bass *Dicentrarchus labrax*	**C. Sabourault, M. Amichot, D. Pauron, J.-B. Bergé, M. Lafaurie, and J.-P. Girard**	155
Cloning and Functional Activity of a Novel Truncated Form of Annexin IV in Mouse Macrophages	**Carol L. Sable and David W. H. Riches**	162
Loss of 3-Nitrotyrosine on Exposure to Hypochlorous Acid: Implications for the Use of 3-Nitrotyrosine as a Bio-marker *in Vivo*	**Matthew Whiteman and Barry Halliwell**	168
Matrix Metalloproteinases and Lysosomal Cysteine Proteases in Osteoclasts Contribute to Bone Resorption through Distinct Modes of Action	**Takashi Inui, Osamu Ishibashi, Yumi Origane, Ko Fujimori, Toshio Kokubo, and Motowo Nakajima**	173
Localized Structural Effects of Electrostatic Interactions in a Thermostable Enzyme	**David J. Rhode and Bruce L. Martin**	179
Protein Targeting to Glycogen/PPP1R5: Screening of Coding and Flanking Genomic Regions for Polymorphisms and Association Analysis with Insulin Action in Pima Indians	**Paskasari A. Permana, Georgia Luczy-Bachman, and Clifton Bogardus**	184
Overexpression of GLUT4 in Mice Causes Up-Regulation of UCP3 mRNA in Skeletal Muscle	**Nobuyo Tsuboyama-Kasaoka, Nobuyo Tsunoda, Kayo Maruyama, Mayumi Takahashi, Hyounju Kim, David W. Cooke, M. Daniel Lane, and Osamu Ezaki**	187
Vascular Response to Angiotensin II Is Exaggerated through an Upregulation of AT1 Receptor in AT2 Knockout Mice	**Masami Tanaka, Shinya Tsuchida, Taihei Imai, Nobuharu Fujii, Hitoshi Miyazaki, Toshihiro Ichiki, Mitsuhide Naruse, and Tadashi Inagami**	194

Detection of Phosphatidylserine Surface Exposure on Human Erythrocytes Using Annexin V-Ferrofluid	**Danielle Geldwerth, Dominique Helley, Kitty de Jong, Domagoj Sabolovic', Claude Sestier, Jacky Roger, Jean-Noel Pons, Jean-Marie Freyssinet, Philippe F. Devaux, and Frans A. Kuypers**	**199**
Release of Glycosylphosphatidylinositol-Anchored Carboxypeptidase M by Phosphatidylinositol-Specific Phospholipase C Upregulates Enzyme Synthesis	**Xiao-Yi Li and Randal A. Skidgel**	**204**
Depletion of *Bacillus subtilis* Histone-like Protein, HBsu, Causes Defective Protein Translocation and Induces Upregulation of Small Cytoplasmic RNA	**Takao Yamazaki, Shou-ichi Yahagi, Kouji Nakamura, and Kunio Yamane**	**211**
Nitric Oxide Inhibits Execution of Apoptosis at Two Distinct ATP-Dependent Steps Upstream and Downstream of Mitochondrial Cytochrome *c* Release	**Marcel Leist, Barbara Single, Heike Naumann, Eugenio Fava, Bernadett Simon, Simone Kühnle, and Pierluigi Nicotera**	**215**
Expression of Saliva-Binding Epitopes of the *Porphyromonas gingivalis* FimA Protein on the Surface of *Streptococcus gordonii*	**Ashu Sharma, Kiyonobu Honma, Hakimuddin T. Sojar, Dennis E. Hruby, Howard K. Kuramitsu, and Robert J. Genco**	**222**

ERRATUM

Volume **254,** Number 3 (1999), in Article ID bbrc.1998.9992, "Validation of Methods for CYP2C9 Genotyping: Frequencies of Mutant Alleles in a Swedish Population," by Ümit Yasar, Erik Eliasson, Marja-Liisa Dahl, Inger Johansson, Magnus Ingelman-Sundberg, and Folke Sjöqvist, pages 628–631 **227**

Number 2, May 10, 1999

BREAKTHROUGHS AND VIEWS

Function and Evolution of Otx Proteins	**William H. Klein and Xiaotao Li**	**229**

REGULAR ARTICLES

Cloning and Analysis of the Gene for the Human Puromycin-Sensitive Aminopeptidase	**Michael W. Thompson, Andreas Tobler, Adriano Fontana, and Louis B. Hersh**	**234**
Binding of Gelsolin, a Secretory Protein, to Amyloid β-Protein	**Ved P. S. Chauhan, Indrani Ray, Abha Chauhan, and Henryk M. Wisniewski**	**241**
Inhibition of the Ryanodine Receptor Calcium Channel in the Sarcoplasmic Reticulum of Skeletal Muscle by an ADP/ATP Translocase Inhibitor, Atractyloside	**Naohiro Yamaguchi, Takashi Kagari, and Michiki Kasai**	**247**

Ricin RCA_{60}: Evidence of Its Phospholipase Activity	**M. Helmy, S. Lombard, and G. Piéroni**	252
The GM2 Activator Protein, a Novel Inhibitor of Platelet-Activating Factor	**Brigitte Rigat, Denis Reynaud, Natasha Smiljanic-Georgijev, and Don Mahuran**	256
Identification of a Novel Kinase-like Gene Induced during Neuronal Cell Death	**Keiko Mayumi-Matsuda, Satoshi Kojima, Harukazu Suzuki, and Tsuneaki Sakata**	260
A 58-kDa Shc Protein Is Present in *Xenopus* Eggs and Is Phosphorylated on Tyrosine Residues upon Egg Activation	**Mamoru Aoto, Ken-ichi Sato, Shingo Takeba, Yasue Horiuchi, Tetsushi Iwasaki, Alexander A. Tokmakov, and Yasuo Fukami**	265
Detection of DNA Abnormalities by Arbitrarily Primed PCR Fingerprinting: Amplification of the *MDM2* Gene in a Mediastinum Fibrosarcoma	**Hideo Kuchiki, Jun Yasuda, Takamasa Kayama, Yoshinori Murakami, and Takao Sekiya**	271
Cloning and Characterization of the 5′ Flanking Region of the Human Uncoupling Protein 3 (UCP3) Gene	**Alberto Acín, Marianne Rodriguez, Hervé Rique, Emmanuel Canet, Jean A. Boutin, and Jean-Pierre Galizzi**	278
Prolactin-Dependent Up-Regulation of *BRCA1* Expression in Human Breast Cancer Cell Lines	**David A. Favy, Pascale Rio, Jean-Claude Maurizis, Candan Hizel, Yves-Jean Bignon, and Dominique J. Bernard-Gallon**	284
A Genetic Polymorphism in the Promoter Region of DRD4 Associated with Expression and Schizophrenia	**Yuki Okuyama, Hiroki Ishiguro, Michio Toru, and Tadao Arinami**	292
Analysis of Hepatitis G Virus/GB Virus C Quasispecies and Replication Sites in Human Subjects	**Marek Radkowski, Lian-Fu Wang, Janusz Cianciara, Jorge Rakela, and Tomasz Laskus**	296
Phosphorylation of the Cytoplasmic Domain of Alzheimer's β-Amyloid Precursor Protein at Ser655 by a Novel Protein Kinase	**Toshio Isohara, Atsuko Horiuchi, Takuo Watanabe, Kanae Ando, Andrew J. Czernik, Isao Uno, Paul Greengard, Angus C. Nairn, and Toshiharu Suzuki**	300
The β1-Integrin Cytosolic Domain Optimizes Phospholipase A2-Mediated Arachidonic Acid Release Required for NIH-3T3 Cell Spreading	**Rebecca A. Whitfield and Bruce S. Jacobson**	306
Establishment of a New System for Determination of Coreceptor Usages of HIV Based on the Human Glioma NP-2 Cell Line	**Yasushi Soda, Nobuaki Shimizu, Atsushi Jinno, Hui-Yu Liu, Katsuaki Kanbe, Toshio Kitamura, and Hiroo Hoshino**	313
Regeneration of the Tyrosyl Radical in Native or *p*-Butoxyphenol-Treated Mouse Ribonucleotide Reductase R2 Protein	**Albert Davydov and Astrid Gräslund**	322

The Novel Mrf-2 DNA-Binding Domain Recognizes a Five-Base Core Sequence through Major and Minor-Groove Contacts	**Robert H. Whitson, Ting Huang, and Keiichi Itakura**	**326**
Adenoviral-Mediated Gene Transfer of Interleukin-6 in Rat Lung Enhances Antiviral Immunoglobulin A and G Responses in Distinct Tissue Compartments	**Zhou Xing, Todd Braciak, Duncan Chong, Xueya Feng, Jane-Ann Schroeder, and Jack Gauldie**	**332**
Characterization of an Element within the Rat Parathyroid Hormone/Parathyroid Hormone-Related Peptide Receptor Gene Promoter That Enhances Expression in Osteoblastic Osteosarcoma 17/2.8 Cells	**Georgia Giannoukos, Louise J. S. Williams, Peter J. Chilco, and Abdul B. Abou-Samra**	**336**
Heat Shock Protein Stimulates *in Vitro* Transcription of Nitrogen Regulator Gene *glnL* of *Escherichia coli*	**Tokuya Takahashi**	**341**
Cloning, Expression, and *in Vitro* Activity of Human Endostatin	**Mohanraj Dhanabal, Ruediger Volk, Ramani Ramchandran, Michael Simons, and Vikas P. Sukhatme**	**345**
Advanced Glycation Endproducts Accelerate Calcification in Microvascular Pericytes	**Sho-ichi Yamagishi, Hideki Fujimori, Hideto Yonekura, Nobushige Tanaka, and Hiroshi Yamamoto**	**353**
Evaluation of Cationic Liposome Suitable for Gene Transfer into Pregnant Animals	**Takahiro Ochiya, Yasushi Takahama, Hiroyasu Baba-Toriyama, Makoto Tsukamoto, Yuko Yasuda, Hiroshi Kikuchi, and Masaaki Terada**	**358**
Functional Analysis of Human Smad1: Role of the Amino-Terminal Domain	**Ren-He Xu, Robert J. Lechleider, Hsiu-Ming Shih, Chen-Fei Hao, Dvora Sredni, Anita B. Roberts, and Hsiang-fu Kung**	**366**
A Novel Serine Protease Overexpressed in the Hair Follicles of Nude Mice	**N. Meier, T. N. Dear, and T. Boehm**	**374**
Multiple Centrosome Formation Induced by the Expression of Vpr Gene of Human Immunodeficiency Virus	**Yuzuru Minemoto, Mari Shimura, Yukihito Ishizaka, Yukito Masamune, and Katsumi Yamashita**	**379**
Genome Structure and Chromosomal Mapping of the Gene for Fe65L2 Interacting with Alzheimer's β-Amyloid Precursor Protein	**Hiroshi Tanahashi and Takeshi Tabira**	**385**
Localization of Glutaredoxin (Thioltransferase) in the Rat Brain and Possible Functional Implications during Focal Ischemia	**Yasushi Takagi, Takayuki Nakamura, Akira Nishiyama, Kazuhiko Nozaki, Toru Tanaka, Nobuo Hashimoto, and Junji Yodoi**	**390**

High Levels of Ezrin Expressed by Human Pancreatic Adenocarcinoma Cell Lines with High Metastatic Potential	**Naoaki Akisawa, Isao Nishimori, Takeshi Iwamura, Saburo Onishi, and Michael A. Hollingsworth**	395
Cloning of Novel Temperature-Related Expressed Sequence Tags in Rat Testis during Spermatogenesis	**Guo Cai-xia, Tang Tie-shan, Mu Xiao-ming, Li Shu-hong, Fu Guo-qiang, Liu He, and Liu Yi-xun**	401
SNAP-23 and SNAP-25 Are Palmitoylated *in Vivo*	**Karen Vogel and Paul A. Roche**	407
Identification of Retinoic Acid Receptor Element in Human Cholesteryl Ester Transfer Protein Gene	**Nam Ho Jeoung, Won Gu Jang, Jung Il Nam, Youngmi Kim Pak, and Yong Bok Park**	411
Analysis of DNA Compaction Profile and Intracellular Contents of Archaeal Histones from *Pyrococcus kodakaraensis* KOD1	**Hiroki Higashibata, Shinsuke Fujiwara, Masahiro Takagi, and Tadayuki Imanaka**	416
Association of Heterotrimeric G-Proteins with Bovine Aortic Phospholipase C γ	**Elizabeth A. M. Hodson, Christopher C. Ashley, and Joanne S. Lymn**	425
Thiazolidinediones Down-Regulate Plasminogen Activator Inhibitor Type 1 Expression in Human Vascular Endothelial Cells: A Possible Role for PPARγ in Endothelial Function	**Ken Kato, Hiroaki Satoh, Yuichi Endo, Daishiro Yamada, Sanae Midorikawa, Wakano Sato, Kenji Mizuno, Teizo Fujita, Kazuhisa Tsukamoto, and Tsuyoshi Watanabe**	431
Full Length cDNA Cloning, Promoter Sequence, and Genomic Organization of the Human Adrenoleukodystrophy Related (ALDR) Gene Functionally Redundant to the Gene Responsible for X-Linked Adrenoleukodystrophy	**Andreas Holzinger, Peter Mayerhofer, Johannes Berger, Peter Lichtner, Stefan Kammerer, and Adelbert A. Roscher**	436
Thioredoxin Negatively Regulates p38 MAP Kinase Activation and IL-6 Production by Tumor Necrosis Factor-α	**Shu Hashimoto, Ken Matsumoto, Yasuhiro Gon, Sachiko Furuichi, Shuichiro Maruoka, Ikuko Takeshita, Kiichi Hirota, Junji Yodoi, and Takashi Horie**	443
Glucose Starvation and Hypoxia Induce Nuclear Accumulation of Proteasome in Cancer Cells	**Yasunari Ogiso, Akihiro Tomida, Hong-Duck Kim, and Takashi Tsuruo**	448
Hyperglycemia Increases Vascular Adrenomedullin Expression	**Michio Hayashi, Tatsuo Shimosawa, and Toshiro Fujita**	453
Sea Urchin TgBMP2/4 Gene Encoding a Bone Morphogenetic Protein Closely Related to Vertebrate BMP2 and BMP4 with Maximal Expression at the Later Stages of Embryonic Development	**S.-P. L. Hwang, C. A. Chen, and C.-P. Chen**	457
Up-Regulation of Uncoupling Protein-3 by Fatty Acid in C2C12 Myotubes	**Cheng-Shine Hwang and M. Daniel Lane**	464

Cell-Lysate Conversion of Prion Protein into Its Protease-Resistant Isoform Suggests the Participation of a Cellular Chaperone — **Gabriela P. Saborío, Claudio Soto, Richard J. Kascsak, Efrat Levy, Regina Kascsak, David A. Harris, and Blas Frangione** 470

Changes of Nuclear Membrane Lipid Composition Affect RNA Nucleocytoplasmic Transport — **Maria-Letizia Tomassoni, Dante Amori, and Mariapia Viola Magni** 476

Characterization of Telomere-Binding Activity of Replication Factor C Large Subunit p140 — **Fumiaki Uchiumi, Mayumi Watanabe, and Sei-ichi Tanuma** 482

Bone Morphogenetic Protein-2 Inhibits MAPK-Dependent Elk-1 Transactivation and DNA Synthesis Induced by EGF in Mesangial Cells — **Goutam Ghosh Choudhury, Dong-Chan Jin, Yong-soo Kim, Anthony Celeste, Nandini Ghosh-Choudhury, and Hanna E. Abboud** 490

ERRATUM

Volume **255,** Number 1 (1999), in Article ID bbrc.1999.0153, “Regulation of ProMMP-1 and ProMMP-3 Activation by Tissue Factor Pathway Inhibitor-2/Matrix-Associated Serine Protease Inhibitor,” by C. N. Rao, S. Mohanam, A. Puppala, and Jasti S. Rao, pages 94–98 497

Number 3, May 19, 1999

Identification of a Novel Promoter and Exons of the c-*ERBB-2* Gene — **Masahiko Nezu, Hiroki Sasaki, Yoshitaka Kuwahara, Takahiro Ochiya, Yukishige Yamada, Hiromi Sakamoto, Hiroyuki Tashiro, Masaaki Yamazaki, Tatsuro Ikeuchi, Yasushi Saito, and Masaaki Terada** 499

Niemann–Pick Human Lymphoblasts Are Resistant to Phthalocyanine 4-Photodynamic Therapy-Induced Apoptosis — **Duska Separovic, John J. Pink, Nancy A. Oleinick, Mark Kester, David A. Boothman, Maureen McLoughlin, Louis A. Peña, and Adriana Haimovitz-Friedman** 506

Reversal of MRP-Mediated Multidrug Resistance in Human Lung Cancer Cells by the Antiprogestatin Drug RU486 — **Léa Payen, Laurence Delugin, Arnaud Courtois, Yolande Trinquart, André Guillouzo, and Olivier Fardel** 513

Carboxy-Terminally Truncated Form of a Coactivator UTF1 Stimulates Transcription from a Variety of Gene Promoters through the TATA Box — **Akiko Fukushima, Masazumi Nishimoto, Akihiko Okuda, and Masami Muramatsu** 519

The Human Retina and Retinal Pigment Epithelium Are Abundant Sources of Vitronectin mRNA — **S. Ozaki, L. V. Johnson, R. F. Mullins, G. S. Hageman, and D. H. Anderson** 524

Human Ribosomal Protein L7 Carries Two Nucleic Acid-Binding Domains with Distinct Specificities	**Anna von Mikecz, Elli Neu, Ulrich Krawinkel, and Peter Hemmerich**	530
Molecular Cloning of Antisense Transcripts of the Mouse *Xist* Gene	**Nathan Mise, Yuji Goto, Noboru Nakajima, and Nobuo Takagi**	537
Characterization of Cleavage Enzymes for Sterol Regulatory Element Binding Protein in Hamster Liver Microsomes	**Mineko Yamaguchi, Heigoro Shirai, Ryuichiro Sato, Yoshiki Kawabe, Rie Fukuda, Tatsuhiko Kodama, and Takao Hamakubo**	542
Binding Affinity and Reactivity of Lecithin Cholesterol Acyltransferase with Native Lipoproteins	**Anne Burkybile Kosek, Diane Durbin, and Ana Jonas**	548
Characterization of Two Human β_1-Adrenergic Receptor Transcripts: Cloning and Alterations in the Failing Heart	**Christopher E. Ellis and Thomas Frielle**	552
Expression of c-erbB-4/HER4 Is Regulated in T47D Breast Carcinoma Cells by Retinoids and Vitamin D_3	**Martin Offterdinger, Sonja M. Schneider, Heinz Huber, and Thomas W. Grunt**	559
EGF-Induced Activation of Stat1, Stat3, and Stat5b Is Unrelated to the Stimulation of DNA Synthesis in Cultured Hepatocytes	**Tormod K. Guren, Hilde Abrahamsen, G. Hege Thoresen, Eshrat Babaie, Trond Berg, and Thoralf Christoffersen**	565
RIP-JIP60 Alters Conformation of Ribosomes *in Vivo*	**M. Dunaeva and E. Goerschen**	572
Changes in Hypothalamic Agouti-Related Protein (AGRP), but not α-MSH or Pro-Opiomelanocortin Concentrations in Dietary-Obese and Food-Restricted Rats	**Joanne A. Harrold, Gareth Williams, and Peter S. Widdowson**	574
Cloning and Functional Characterization of a Sodium-Dependent Phosphate Transporter Expressed in Human Lung and Small Intestine	**John A. Feild, Li Zhang, Kimberly A. Brun, David P. Brooks, and Richard M. Edwards**	578
Molecular Cloning and Characterization of a Surface Antigen Preferentially Overexpressed on Multiple Myeloma Cells	**Toshihiko Ohtomo, Yasuhiro Sugamata, Yasuko Ozaki, Koichiro Ono, Yasushi Yoshimura, Shigeto Kawai, Yasuo Koishihara, Shuji Ozaki, Masaaki Kosaka, Toshio Hirano, and Masayuki Tsuchiya**	583
Nickel(II) Acetate-Treated Chinese Hamster Ovary Cells Differentially Express Vimentin, hSNF2H Homologue, and H Ferritin	**Sang-Han Lee, Yih-Horng Shiao, Sergei Y. Plisov, and Kazimierz S. Kasprzak**	592
DP1 Phosphorylation in Multimeric Complexes: Weaker Interaction with Cyclin A through the E2F1 Cyclin A Binding Domain Leads to More Efficient Phosphorylation Than Stronger Interaction through the p107 Cyclin A Binding Domain	**Peter Guida and Liang Zhu**	596

Human MMH (OGG1) Type 1a Protein Is a Major Enzyme for Repair of 8-Hydroxyguanine Lesions in Human Cells — **Yoshiaki Monden, Tsuyoshi Arai, Midori Asano, Eiko Ohtsuka, Hiroyuki Aburatani, and Susumu Nishimura** — **605**

A Gene Coding for a Ribosomal Protein L41 in Cycloheximide-Resistant Ribosomes Has a Promoter Which Is Upregulated under the Growth-Inhibitory Conditions in Yeast, *Candida maltosa* — **Eishun Mutoh, Hiroaki Takaku, Akinori Ohta, and Masamichi Takagi** — **611**

Isolation and Characterization of Low Density Detergent-Insoluble Membrane (LD-DIM) Fraction from Sea Urchin Sperm — **Kaoru Ohta, Chihiro Sato, Tsukasa Matsuda, Masaru Toriyama, William J. Lennarz, and Ken Kitajima** — **616**

Nitric Oxide Inhibits the HIV-1 Reverse Transcriptase Activity — **Tiziana Persichini, Marco Colasanti, Maurizio Fraziano, Vittorio Colizzi, Claudio Medana, Fabio Polticelli, Giorgio Venturini, and Paolo Ascenzi** — **624**

Binding of Myosin Cross-Bridges to Thin Filaments of Rabbit Skeletal Muscle — **O. A. Andreev and J. Borejdo** — **628**

Age-Related Degradation of βA3/A1-Crystallin in Human Lenses — **O. P. Srivastava, K. Srivastava, and V. Harrington** — **632**

Biochemical and MALDI Analysis of the Human Sperm Antigen gp20, Homologue of Leukocyte CD52 — **Riccardo Focarelli, Cinzia Della Giovampaola, Roberta Seraglia, Cecilia Brettoni, Laura Sabatini, Monica Pescaglini, and Floriana Rosati** — **639**

Repression of the IL-6 Gene Is Associated with Hypermethylation — **Franca Armenante, Marcello Merola, Adriana Furia, and Marta Palmieri** — **644**

MAPKK-Dependent Growth Factor-Induced Upregulation of $P2Y_2$ Receptors in Vascular Smooth Muscle Cells — **Mingyan Hou, Sebastian Möller, Lars Edvinsson, and David Erlinge** — **648**

Human Pancreatic Thread Protein, an Exocrine Thread Protein with Possible Implications to Alzheimer's Disease: Secondary Structure in Solution at Acid pH — **V. Renugopalakrishnan, J. C. Dobbs, T. W. Collette, L. A. Carreira, T. B. Hutson, and R. Garduño-Juarez** — **653**

Interaction Cloning and Characterization of the cDNA Encoding the Human Prenylated Rab Acceptor (PRA1) — **Cecilia Bucci, Mario Chiariello, Daniela Lattero, Monica Maiorano, and Carmelo B. Bruni** — **657**

Retinoic Acid Synergizes with Cyclic AMP to Enhance MMP-2 Basal Promoter Activity — **Shahid Hasan and Motowo Nakajima** — **663**

Kringle 5 Causes Cell Cycle Arrest and Apoptosis of Endothelial Cells — **Hua Lu, Mohanraj Dhanabal, Ruediger Volk, Matthew J. F. Waterman, Ramani Ramchandran, Bertrand Knebelmann, Mark Segal, and Vikas P. Sukhatme** — **668**

Inhibition of Hepatic Stellate Cell Contraction during Activation *in Vitro* by Vascular Endothelial Growth Factor in Association with Upregulation of FLT Tyrosine Kinase Receptor Family, *FLT-1* — **Shouji Mashiba, Satoshi Mochida, Keiko Ishikawa, Mie Inao, Atsushi Matsui, Akihiko Ohno, Hitoshi Ikeda, Sumiko Nagoshi, Masabumi Shibuya, and Kenji Fujiwara** **674**

A Family of Mammalian Proteins Homologous to Yeast Sec24p — **Bor Luen Tang, Jaya Kausalya, Delphine Y. H. Low, Mei Ling Lock, and Wanjin Hong** **679**

Genistein Is Neuroprotective in Murine Models of Familial Amyotrophic Lateral Sclerosis and Stroke — **Vuong N. Trieu and Fatih M. Uckun** **685**

Structural Basis for the Binding Specificity of a SSTR1-Selective Analog of Somatostatin — **Longchuan Chen, Carl Hoeger, Jean Rivier, V. Danial Fitzpatrick, Richard L. Vandlen, and Armen H. Tashjian, Jr.** **689**

Direct Visualization of HIV-1 Entry: Mechanisms and Role of Cell Surface Receptors — **Roland H. Stauber, Shen Rulong, Gottfried Palm, and Nadya I. Tarasova** **695**

Thiamine Deficiency *in Vivo* Produces Fiber Cell Degeneration in Mouse Lenses — **Peter H. Frederikse, Patricia Farnsworth, and J. Samuel Zigler, Jr.** **703**

Thromboxane A_2 Receptor Linked with the Ca^{2+} Pathway in Rat Colonic Crypt Cells — **Akira Ikari, Hideki Sakai, Takahiro Sato, and Noriaki Takeguchi** **708**

Lipocortin V May Function as a Signaling Protein for Vascular Endothelial Growth Factor Receptor-2/Flk-1 — **Yi Wen, Jeffrey L. Edelman, Tao Kang, and George Sachs** **713**

Enhanced Expression of Osteopontin by High Glucose in Cultured Rat Aortic Smooth Muscle Cells — **Minoru Takemoto, Koutaro Yokote, Masashi Yamazaki, Amy L. Ridall, William T. Butler, Taro Matsumoto, Ken Tamura, Yasushi Saito, and Seijiro Mori** **722**

Molecular Cloning and Expression of Mouse Brain Sialidase — **Christian L. Fronda, Guichao Zeng, Luoyi Gao, and Robert K. Yu** **727**

Immunolocalization of Betaine Aldehyde Dehydrogenase in Porcine Kidney — **Ciria G. Figueroa-Soto, Guillermo Lopez-Cervantes, and Elisa M. Valenzuela-Soto** **732**

Isolation of ALP, a Novel Divergent Murine CC Chemokine with a Unique Carboxy Terminal Extension — **Robert Hromas, Hal E. Broxmeyer, Chang Kim, Kent Christopherson II, and Yong-Hao Hou** **737**

Enzymatic Reconstruction of a Hybrid Glycosaminoglycan Containing 6-Sulfated, 4-Sulfated, and Unsulfated *N*-Acetylgalactosamine — **Keiichi Takagaki, Hidekazu Munakata, Mitsuo Majima, and Masahiko Endo** **741**

BCL-2 Is Upregulated in Human SH-SY5Y Neuroblastoma Cells Differentiated by Overexpression of Fibroblast Growth Factor 1 — **Gilda Raguenez, Laurent Desire, Valérie Lantrua, and Yves Courtois** **745**

Dihydropteroate Synthase from *Streptococcus pneumoniae:* Characterization of Substrate Binding Order and Sulfonamide Inhibition	**Helen G. Vinnicombe and Jeremy P. Derrick**	**752**
The Adhesion Function on Acetylcholinesterase Is Located at the Peripheral Anionic Site	**Glynis Johnson and Samuel W. Moore**	**758**
Collagen Remodeling in the Anterior Cruciate Ligament Associated with Developing Spontaneous Murine Osteoarthritis	**Janet M. Anderson-MacKenzie, Michael E. Billingham, and Allen J. Bailey**	**763**
Cloning and Expression of a New Isotype of the Peroxiredoxin Gene of Chinese Cabbage and Its Comparison to 2Cys-Peroxiredoxin Isolated from the Same Plant	**Yeon Ok Choi, Na Eun Cheong, Kyun Oh Lee, Bae Gyo Jung, Chang Hui Hong, Jin Hee Jeong, Young Hoon Chi, Kanghwa Kim, Moo Je Cho, and Sang Yeol Lee**	**768**
The Expression of the Melatonin Synthesis Enzyme: Arylalkylamine *N*-Acetyltransferase in the Suprachiasmatic Nucleus of Rat Brain	**Toshiyuki Hamada, Michiko Ootomi, Kazumasa Horikawa, Tomoko Niki, Hisanori Wakamatu, and Norio Ishida**	**772**
Liver Mitochondria, Confirmed as Intact by Complete Suppression of Succinate Uptake and Oxidation, Possess a Carnitine Palmitoyltransferase I That Is Totally Inhibited by Malonyl CoA	**Khaled A. H. Abo-Hashema, Max H. Cake, and Ian C. Potter**	**778**
Sequence Features and Phylogenetic Analysis of the Stress Protein Hsp90α in Chinook Salmon (*Oncorhynchus tshawytscha*), a Poikilothermic Vertebrate	**Aldo N. Palmisano, James R. Winton, and Walton W. Dickhoff**	**784**
Relative Abundance of Thrombospondin 2 and Thrombospondin 3 mRNAs in Human Tissues	**Kenneth W. Adolph**	**792**
Synthesis of the Quinoline-Linked Triazolopyrimidine Analogues and Their Interactions with the Recombinant Tobacco Acetolactate Synthase	**Sung Keon Namgoong, Hyun Jung Lee, Young Sook Kim, Jung-Hyu Shin, Jong-Khn Che, Do Young Jang, Gun Sung Kim, Jae Won Yoo, Moon-Kyeong Kang, Mee-Wha Kil, Jung-Do Choi, and Soo-Ik Chang**	**797**
A Heterozygous Splice Site Mutation in COL6A1 Leading to an In-Frame Deletion of the α1(VI) Collagen Chain in an Italian Family Affected by Bethlem Myopathy	**Guglielmina Pepe, Betti Giusti, Enrico Bertini, Tamara Brunelli, Biagio Saitta, Paolo Comeglio, Angela Bolognese, Luciano Merlini, Giorgio Federici, Rosanna Abbate, and Mon-Li Chu**	**802**
Manganese Is Essential for Catalytic Activity of *Escherichia coli* Agmatinase	**Nelson Carvajal, Vasthi López, Mónica Salas, Elena Uribe, Paula Herrera, and Juan Cerpa**	**808**
Sphingosylphosphorylcholine Activates G_q, $G_{i\text{-}2}$, and $G_{i\text{-}3}$ in Thyroid FRTL-5 Cells: Implications for the Activation of Calcium Fluxes and Na^+-H^+ Exchange	**Anne Nikmo, Sonja Björklund, Minna Vainio, Elina Ekokoski, and Kid Törnquist**	**812**

ERRATUM

Volume **255,** Number 3 (1999), in Article ID bbrc.1999.0245, "Direct Interaction between a Quinoline Derivative, MS-209, and Multidrug Resistance Protein (MRP) in Human Gastric Cancer Cells," by Takashi Nakamura, Mikio Oka, Kikuo Aizawa, Hiroshi Soda, Minoru Fukuda, Kenji Terashi, Koki Ikeda, Yohei Mizuta, Yuji Noguchi, Yoshimitsu Kimura, Takashi Tsuruo, and Shigeru Kohno, pages 618–624 **816**

Author Index for Volume 258 **817**

Volume 259, Number 1, May 27, 1999

BREAKTHROUGHS AND VIEWS

Cartilage-Derived Growth Factor and Antitumor Factor: Past, Present, and Future Studies	**Fujio Suzuki**	1

REGULAR ARTICLES

Pulsatile Stretch Activates Mitogen-Activated Protein Kinase (MAPK) Family Members and Focal Adhesion Kinase ($p125^{FAK}$) in Cultured Rat Cardiac Myocytes	**Yoshinori Seko, Yuko Seko, Naoyuki Takahashi, Kazuyuki Tobe, Takashi Kadowaki, and Yoshio Yazaki**	8
HSF1 Activation Occurs at Different Temperatures in Somatic and Male Germ Cells in the Poikilotherm Rainbow Trout	**Pascale Le Goff and Denis Michel**	15
Phosphorylation/Dephosphorylation of Androgen Receptor as a Determinant of Androgen Agonistic or Antagonistic Activity	**Long G. Wang, Xiao M. Liu, Willi Kreis, and Daniel R. Budman**	21
Developmentally Regulated Expression of a Nonmuscle Myosin Heavy Chain IIB Inserted Isoform in Rat Brain	**Masayuki Takahashi, Takaaki Hirano, Keiji Uchida, and Akihiko Yamagishi**	29
Identification of Three Alternatively Spliced Variants of Human CD28 mRNA	**Giovanni Magistrelli, Pascale Jeannin, Greg Elson, Jean-François Gauchat, Thien NGoc NGuyen, Jean-Yves Bonnefoy, and Yves Delneste**	34
Phosphorylation Induces Conformational Changes in the Leukocyte NADPH Oxidase Subunit $p47^{phox}$	**Hee-Sae Park, In Soo Kim, and Jeen-Woo Park**	38
Multidrug-Resistant Phenotype Influences the Differentiation of a Human Colon Carcinoma Cell Line	**Odile Rimet, Aline Mirrione, and Yves Barra**	43
The Requirement of both Intracellular Reactive Oxygen Species and Intracellular Calcium Elevation for the Induction of Heparin-Binding EGF-like Growth Factor in Vascular Endothelial Cells and Smooth Muscle Cells	**Yoshiro Kayanoki, Shigeki Higashiyama, Keiichiro Suzuki, Michio Asahi, Sumio Kawata, Yuji Matsuzawa, and Naoyuki Taniguchi**	50
A Detailed Study on the Role of Sex Steroid Milieu in Determining Plasma Leptin Concentrations in Adult Male and Female Rats	**Hajime Watanobe and Toshihiro Suda**	56

Cloning and Characterization of SOB1, a New Testis-Specific cDNA Encoding a Human Sperm Protein Probably Involved in Oocyte Recognition	**A. Lefevre, C. Duquenne, M. F. Rousseau-Merck, E. Rogier, and C. Finaz**	**60**
Loss of the Bcl-2 Phosphorylation Loop Domain Increases Resistance of Human Leukemia Cells (U937) to Paclitaxel-Mediated Mitochondrial Dysfunction and Apoptosis	**Shujie Wang, Zhiliang Wang, Lawrence Boise, Paul Dent, and Steven Grant**	**67**
Direct Microsensor Measurement of Nitric Oxide Production by the Osteoclast	**Susan F. Silverton, Olugbenga A. Adebanjo, Baljit S. Moonga, Emmanuel M. Awumey, Tadeusz Malinski, and Mone Zaidi**	**73**
Activation of G_{i1} by Lysophosphatidic Acid Receptor without Ligand in the Baculovirus Expression System	**Akira Yoshida and Hiroshi Ueda**	**78**
Increased Uncoupling Protein2 mRNA in White Adipose Tissue, and Decrease in Leptin, Visceral Fat, Blood Glucose, and Cholesterol in KK-A^y Mice Fed with Eicosapentaenoic and Docosahexaenoic Acids in Addition to Linolenic Acid	**Cha Seung Hun, Kyoko Hasegawa, Terue Kawabata, Miyuki Kato, Teruhiko Shimokawa, and Yasuo Kagawa**	**85**
Induction of Heme Oxygenase-1 in the Rat Brain by Kainic Acid-Mediated Excitotoxicity: The Dissociation of mRNA and Protein Expression in Hippocampus	**Kazuhiro Nakaso, Michio Kitayama, Koji Kimura, Toru Yanagawa, Eisaku Ohama, Kenji Nakashima, Tetsuro Ishii, and Kazuo Yamada**	**91**
Bone Morphogenetic Protein-2 Enhances Osteoclast Formation Mediated by Interleukin-1α through Upregulation of Osteoclast Differentiation Factor and Cyclooxygenase-2	**Masanori Koide, Yoshiyuki Murase, Kenji Yamato, Toshihide Noguchi, Nobuo Okahashi, and Tatsuji Nishihara**	**97**
In Vivo Interaction of AF-6 with Activated Ras and ZO-1	**Takaharu Yamamoto, Naozumi Harada, Yoji Kawano, Shinichiro Taya, and Kozo Kaibuchi**	**103**
Fragments from Actin Binding Protein (ABP-280; Filamin) Insert into Reconstituted Lipid Layers	**Wolfgang H. Goldmann, Jens M. Teodoridis, C. Pal Sharma, Bin Hu, and Gerhard Isenberg**	**108**
Sequence Analysis Identifies a Ras-Associating (RA)-like Domain in the N-Termini of Band 4.1/JEF Domains and in the Grb7/10/14 Adapter Family	**Jérôme Wojcik, Jean-Antoine Girault, Gilles Labesse, Jacques Chomilier, Jean-Paul Mornon, and Isabelle Callebaut**	**113**
Mapping Regions of the β1 Integrin Cytoplasmic Domain Involved in Migration and Survival in Primary Oligodendrocyte Precursors Using Cell-Permeable Homeopeptides	**Philip C. Buttery, Chandike M. Mallawaarachchi, Richard Milner, Patrick Doherty, and Charles ffrench-Constant**	**121**
Glycated Serum Albumin-Induced Nitric Oxide Production in Vascular Smooth Muscle Cells by Nuclear Factor κB-Dependent Transcriptional Activation of Inducible Nitric Oxide Synthase	**Yoshiyuki Hattori, Nobuyuki Banba, Steven S. Gross, and Kikuo Kasai**	**128**

No Metal Cofactor in Orotidine 5′-Monophosphate Decarboxylase	**Weidong Cui, Jane G. DeWitt, Susan M. Miller, and Weiming Wu**	**133**
Role of Tryptophanyl Residues in Tobacco Acetolactate Synthase	**Chom-Kyu Chong, Hee-Jee Shin, Soo-Ik Chang, and Jung Do Choi**	**136**
Porcine Guanylin and Uroguanylin: cDNA Sequences, Deduced Amino Acid Sequences, and Biological Activity of the Chemically Synthesized Peptides	**Hans-Jürgen Mägert, Oliver Hill, Hans-Dieter Zucht, Silke Martin, Markus Meyer, Wolf-Georg Forssmann, and Knut Adermann**	**141**
Molecular and Histological Evaluation of Pancreata from Patients with a Mitochondrial Gene Mutation Associated with Impaired Insulin Secretion	**Shuichi Otabe, Kazuki Yasuda, Yasumichi Mori, Kotaro Shimokawa, Hiroko Kadowaki, Atsuo Jimi, Kyohei Nonaka, Yasuo Akanuma, Yoshio Yazaki, and Takashi Kadowaki**	**149**
γ-Tocopherol Decreases Ox-LDL-Mediated Activation of Nuclear Factor-κB and Apoptosis in Human Coronary Artery Endothelial Cells	**Dayuan Li, Tom Saldeen, and Jawahar L. Mehta**	**157**
Mapping of the Antigenic Regions of Streptokinase in Humans after Streptokinase Therapy	**Isis Torréns, Osvaldo Reyes, Ariana G. Ojalvo, Alina Seralena, Glay Chinea, Luis J. Cruz, and José de la Fuente**	**162**
Complexation of 1,2,4-Benzenetriol with Inorganic and Ferritin-Released Iron *in Vitro*	**Sarfaraz Ahmad and G. S. Rao**	**169**
Interleukin-17 Induces Rapid Tyrosine Phosphorylation and Activation of Raf-1 Kinase in Human Monocytic Progenitor Cell Line U937	**S. Vaidyanathan Subramaniam, LaTanya L. Pearson, and Samuel E. Adunyah**	**172**
Regulation of Angiogenin Expression in Human HepG2 Hepatoma Cells by Mediators of the Acute-Phase Response	**Sigitas J. Verselis, Karen A. Olson, and James W. Fett**	**178**
Reduction of Lipid Hydroperoxides by Apolipoprotein B-100	**Ryuichi Mashima, Shinichi Yoshimura, and Yorihiro Yamamoto**	**185**
Transcribed Dinucleotide Microsatellites and Their Associated Genes from Channel Catfish *Ictalurus punctatus*	**Zhanjiang Liu, Guo Tan, Ping Li, and Rex A. Dunham**	**190**
Glutathione-Dependent Oxidative Modification of Protoporphyrin and Other Dicarboxylic Porphyrins by Mammalian and Plant Peroxidases	**N. J. Jacobs, H. G. Kruszyna, J. S. L. Hier, F. E. Dayan, S. O. Duke, F. Pont, and F. P. Montforts**	**195**
Interindividual Differences in Hepatic Expression of CYP3A4: Relationship to Genetic Polymorphism in the 5′-Upstream Regulatory Region	**Anna Westlind, Lena Löfberg, Niclas Tindberg, Tommy B. Andersson, and Magnus Ingelman-Sundberg**	**201**
Cloning and Characterization of the Promoter Region of the Wilson Disease Gene	**Won Jun Oh, Eun Kyung Kim, Kee Don Park, Si Houn Hahn, and Ook Joon Yoo**	**206**

Coupling of Manganese Peroxidase-Mediated Lipid Peroxidation with Destruction of Nonphenolic Lignin Model Compounds and ^{14}C-Labeled Lignins	**Alexander Kapich, Martin Hofrichter, Tamara Vares, and Annele Hatakka**	**212**
Allylic or Benzylic Stabilization Is Essential for Catalysis by Bacterial Benzyl Alcohol Dehydrogenases	**Abigale J. Curtis, Megan C. Shirk, and Ray Fall**	**220**
Overexpression of Wild-Type and Catalytically Inactive Forms of GRK2 and GRK6 Fails to Alter the Agonist-Induced Phosphorylation of the C5a Receptor (CD88): Evidence That GRK6 Is Autophosphorylated in COS-7 Cells	**Marie Danielle Milcent, Thierry Christophe, Marie-Josèphe Rabiet, Marianne Tardif, and François Boulay**	**224**

ERRATA

Volume **256,** Number 1 (1999), in Article ID bbrc.1999.0263, “SEA-scFv as a Bifunctional Antibody: Construction of a Bacterial Expression System and Its Functional Analysis,” by Naoki Sakurai, Toshio Kudo, Masanori Suzuki, Kouhei Tsumoto, Shin-ichi Takemura, Hideaki Kodama, Shinji Ebara, Atsushi Teramae, Yu Katayose, Masao Shinoda, Tadashi Kurokawa, Yuji Hinoda, Kohzoh Imai, Seiki Matsuno, and Izumi Kumagai, pages 223–230 **230**

Volume **257,** Number 2 (1999), in Article ID bbrc.1999.0493, “Expression of *TRAIL* and Its Receptors in Human Brain Tumors,” by Stephan Frank, Uta Köhler, Gabriele Schackert, and Hans K. Schackert, pages 454–459 **230**

Volume **257,** Number 3 (1999), in Article ID bbrc.1999.0537, “Repression of Hepatitis B Virus X Gene Expression by Hammerhead Ribozymes,” by Young Kyeung Kim, Ensung Junn, Inwon Park, Younghoon Lee, Changwon Kang, and Jeong Keun Ahn, pages 759–765 **231**

Volume **257,** Number 3 (1999), in Article ID bbrc.1999.0561, “A Two-Component Tetrachlorohydroquinone Reductive Dehalogenase System from the Lignin-Degrading Basidiomycete *Phanerochaete chrysosporium,*” by G. Vijay Bhasker Reddy and Michael H. Gold, pages 901–905 **232**

Number 2, June 7, 1999

Determination of a Putative Phosphate-Containing Peptide in Calreticulin	**Steven E. Cala**	**233**
Superoxide Anion-Induced Formation of Inositol Phosphates Involves Tyrosine Kinase Activation in Smooth Muscle Cells from Rat Mesenteric Artery	**Lingyun Wu and Jacques de Champlain**	**239**
Selenocysteine-Containing Thioredoxin Reductase in *C. elegans*	**Vadim N. Gladyshev, Michael Krause, Xue-Ming Xu, Konstantin V. Korotkov, Gregory V. Kryukov, Qi-An Sun, Byeong Jae Lee, John C. Wootton, and Dolph L. Hatfield**	**244**

M-Type 6-Phosphofructo-2-kinase/Fructose-2,6-bisphosphatase Is the Product of a Late Muscle Differentiation Gene	**Pascale Vandoolaeghe, Marie-Agnès Gueuning, and Guy G. Rousseau**	**250**
Subclass Specificity of Autoantibodies against Myosin in Patients with Idiopathic Dilated Cardiomyopathy: Pro-inflammatory Antibodies in DCM Patients	**Rahat S. Warraich, Michael J. Dunn, and Magdi H. Yacoub**	**255**
Characterization of a 3′–5′ Exonuclease Associated with VDJP	**Lei Zhu and Brian D. Halligan**	**262**
Mass Spectrometric Determination of a Novel Modification of the N-Terminus of Histidine-Tagged Proteins Expressed in Bacteria	**Z. Yan, G. W. Caldwell, P. A. McDonell, W. J. Jones, A. August, and J. A. Masucci**	**271**
Calcium-Induced $p56^{Lck}$ Phosphorylation in Human T Lymphocytes via Calmodulin Dependent Kinase	**R. A. Franklin, A. Mcleod, and P. J. Robinson**	**283**
Engagement of Spectrin and Actin in Capping of FcγRII Revealed by Studies on Permeabilized U937 Cells	**Katarzyna Kwiatkowska and Andrzej Sobota**	**287**
Unique Features of Dendritic Cells in IFN-γ Transgenic Mice: Relevance to Cancer Development and Therapeutic Implications	**Sk. Md. Fazle Akbar, Kazunori Kajino, Kenji Tanimoto, Ken-ichi Yamamura, Morikazu Onji, and Okio Hino**	**294**
Role of the 78-kDa Glucose-Regulated Protein as an Activity Modulator of Protein Phosphatase 1γ2	**Yang-Sook Chun, Jong-Wan Park, Myung-Suk Kim, Hiroshi Shima, Minako Nagao, Seung-Hoon Lee, Sang-Woon Park, and Myung-Hee Chung**	**300**
Cloning of a cDNA Encoding a Novel Cytochrome P450 from the Insect *Locusta migratoria:* CYP6H1, a Putative Ecdysone 20-Hydroxylase	**Jochen Winter, Graeme Bilbe, Hanny Richener, Bernd Sehringer, and Hartmut Kayser**	**305**
Detection of Apolipoprotein B mRNA Editing by Peptide Nucleic Acid Mediated PCR Clamping	**Shaobin Zhong, Nga Yen Nguyen, and Thomas L. Eggerman**	**311**
Monocytic Differentiation of HL-60 Cells Is Characterized by the Nuclear Translocation of Phosphatidylinositol 3-Kinase and of Definite Phosphatidylinositol-Specific Phospholipase C Isoforms	**Luca M. Neri, Marco Marchisio, Maria Luisa Colamussi, and Valeria Bertagnolo**	**314**
Stimulation of Prolactin Release by Prolactin-Releasing Peptide in Rats	**Hirokazu Matsumoto, Jiro Noguchi, Yasuko Horikoshi, Yuji Kawamata, Chieko Kitada, Shuji Hinuma, Haruo Onda, Osamu Nishimura, and Masahiko Fujino**	**321**
Modulation of Cytochrome *c*-Mediated Extramitochondrial NADH Oxidation by Contact Site Density	**D. Marzulli, G. La Piana, E. Fransvea, and N. E. Lofrumento**	**325**

Detection of Multiple Patterns of Oscillatory Oxygen Consumption in Single Mouse Islets of Langerhans	**Sung-Kwon Jung, Craig A. Aspinwall, and Robert T. Kennedy**	331
Clusterin Prevents Aggregation of Neuropeptide 106-126 *in Vitro*	**S. McHattie and N. Edington**	336
Platelet Surface Membranes Are Highly Mitogenic for Coronary Artery Smooth Muscle Cells–A Novel Mechanism for Sustained Proliferation after Vessel Injury?	**Artur-Aron Weber, Tom-Philipp Zucker, and Karsten Schrör**	341
A Novel Polymorphism in the MCP-1 Gene Regulatory Region That Influences MCP-1 Expression	**Brad H. Rovin, Ling Lu, and Ramesh Saxena**	344
A Novel Gene (Oculomedin) Induced by Mechanical Stretching in Human Trabecular Cells of the Eye	**Yukiko Sato, Toshihiko Matsuo, and Hiroshi Ohtsuki**	349
Selective Oxidation of Methionine Residues in Prion Proteins	**Boon-Seng Wong, Hui Wang, David R. Brown, and Ian M. Jones**	352
Identification of Phosphorylation Sites in the PKD1-Encoded Protein C-Terminal Domain	**Hsi-Ping Li, Lin Geng, Christopher R. Burrow, and Patricia D. Wilson**	356
Synergistic Activation of the Human Btk Promoter by Transcription Factors Sp1/3 and PU.1	**Susanne Müller, Alex Maas, Tahmina Choudhuri Islam, Paschalis Sideras, Guntram Suske, Sjaak Philipsen, Kleanthis G. Xanthopoulos, Rudolf W. Hendriks, and C. I. Edvard Smith**	364
Activity in Monomers of Human Cytomegalovirus Protease	**Barry Holwerda**	370
Discrepancies in the Measurement of UVC-Induced 8-Oxo-2′-deoxyguanosine: Implications for the Analysis of Oxidative DNA Damage	**Mark D. Evans, Marcus S. Cooke, Ian D. Podmore, Qinguo Zheng, Karl E. Herbert, and Joseph Lunec**	374
Antiproliferative and GH-Inhibitory Activity of Chimeric Peptides Consisting of GHRP-6 and Somatostatin	**P. Dasgupta, A. T. Singh, and R. Mukherjee**	379
Two Divergent Signaling Pathways for TGF-β Separated by a Mutation of Its Type II Receptor Gene	**Shi-Long Lu, Masahiro Kawabata, Takeshi Imamura, Kohei Miyazono, and Yasuhito Yuasa**	385
RNase Treatment of Yeast and Mammalian Cell Extracts Affects *in Vitro* Substrate Methylation by Type I Protein Arginine *N*-Methyltransferases	**Adam Frankel and Steven Clarke**	391
Human Cathepsins F and W: A New Subgroup of Cathepsins	**Th. Wex, B. Levy, H. Wex, and D. Brömme**	401

Precise Identification of Gene Products in Hearts after *in Vivo* Gene Transfection, Using Sendai Virus-Coated Proteoliposomes	**Tomie Kawada, Wee Soo Shin, Yoko Nakatsuru, Toshiyuki Koizumi, Aiji Sakamoto, Toshiyuki Nakajima, Yoko Okai-Matsuo, Mikio Nakazawa, Hiroshi Sato, Takatoshi Ishikawa, and Teruhiko Toyo-Oka**	**408**
A HMG-CoA Reductase Inhibitor Improved Regression of Atherosclerosis in the Rabbit Aorta without Affecting Serum Lipid Levels: Possible Relevance of Up-Regulation of Endothelial NO Synthase mRNA	**Hatsuyo Kano, Toshio Hayashi, Daigo Sumi, Teiji Esaki, Yukako Asai, Navin Kumar Thakur, Muthuvel Jayachandran, and Akihisa Iguchi**	**414**
A Model of the Complex between Cyclin-Dependent Kinase 5 and the Activation Domain of Neuronal Cdk5 Activator	**Kuo-Chen Chou, Keith D. Watenpaugh, and Robert L. Heinrikson**	**420**
Alteration of hMSH2 and DNA Polymerase β Genes in Breast Carcinomas and Fibroadenomas	**Nandan Bhattacharyya, Huan-Chao Chen, Sharon Grundfest-Broniatowski, and Sipra Banerjee**	**429**
Posttranscriptional Regulation of Mammalian Methionine Synthase by B_{12}	**Sumedha Gulati, Lawrence C. Brody, and Ruma Banerjee**	**436**
Effects of Promoter Mutations on the *in Vivo* Regulation of the *cop* Operon of *Enterococcus hirae* by Copper(I) and Copper(II)	**Haibo Wunderli-Ye and Marc Solioz**	**443**
Reactivation and Refolding of a Partially Folded Creatine Kinase Modified by 5,5′-Dithio-bis(2-nitrobenzoic Acid)	**Yi Yang, Yong-Doo Park, Tian Wei Yu, and Hai Meng Zhou**	**450**
Tentative Novel Mechanism of the Bystander Effect in Glioma Gene Therapy with HSV-TK/GCV System	**Shaochun Bai, Liping Du, Wanqing Liu, Ian R. Whittle, and Lin He**	**455**
Peroxynitrite Reacts with Biological Nitrogen-Containing Cyclic Molecules by a Radical Pathway, as Demonstrated by Ultraweak Luminescence Coupled with ESR Technique	**Ange Mouithys-Mickalad, Stephan Kohnen, Carol Deby, Alfred F. Noels, Maurice Lamy, and Ginette Deby-Dupont**	**460**
Activation of the Neutrophil NADPH Oxidase Is Inhibited by SB 203580, a Specific Inhibitor of SAPK2/p38	**Aroon S. Lal, Andrew D. Clifton, John Rouse, Anthony W. Segal, and Philip Cohen**	**465**
Functional Domains of Template-Activating Factor-I as a Protein Phosphatase 2A Inhibitor	**Shoko Saito, Mary Miyaji-Yamaguchi, Tae Shimoyama, and Kyosuke Nagata**	**471**
Regulation by Interleukin-1β of Gene Expression of Bradykinin B_1 Receptor in MH-S Murine Alveolar Macrophage Cell Line	**Hideo Tsukagoshi, Yuji Shimizu, Takeo Horie, Yoshitatsu Fukabori, Yasuo Shimizu, Shigenori Iwamae, Takeshi Hisada, Tamotsu Ishizuka, Kunihiko Iizuka, Kunio Dobashi, and Masatomo Mori**	**476**

Escherichia coli cafA Gene Encodes a Novel RNase, Designated as RNase G, Involved in Processing of the 5′ End of 16S rRNA — **Masaaki Wachi, Genryou Umitsuki, Miwa Shimizu, Ayako Takada, and Kazuo Nagai** — **483**

Human Estrogenic 17β-Hydroxysteroid Dehydrogenase: Predominance of Estrone Reduction and Its Induction by NADPH — **Jiu-Zhen Jin and Sheng-Xiang Lin** — **489**

ERRATA

Volume **257,** Number 2 (1999), in Article ID bbrc.1999.0421, “Genotoxicity of Human Milk Extracts and Detection of DNA Damage in Exfoliated Cells Recovered from Breast Milk,” by Francis L. Martin, Kathleen J. Cole, Gillian Weaver, Philip L. Grover, and David H. Phillips, pp. 319–326 — **494**

Volume **257,** Number 3 (1999), in Article ID bbrc.1999.0557, “Ca^{2+} and Protein Kinase C Signaling for Histamine and Sulfidoleukotrienes Released from Human Cultured Mast Cells,” by Masahiro Kimata, Michitaka Shichijo, Toru Miura, Isao Serizawa, Naoki Inagaki, and Hiroichi Nagai, pp. 895–900 — **503**

Number 3, June 16, 1999

Pyrithione, a Zinc Ionophore, Inhibits NF-κB Activation — **Chul Hoon Kim, Joo Hee Kim, Seok Jun Moon, Kwang Chul Chung, Chung Y. Hsu, Jeong Taeg Seo, and Young Soo Ahn** — **505**

DNA Binding and Transactivating Properties of the Paired and Homeobox Protein Pax4 — **Anna Kalousová, Vladimír Beneš, Jan Pačes, Václav Pačes, and Zbyněk Kozmik** — **510**

Geraniol Is a Potent Inducer of Apoptosis-like Cell Death in the Cultured Shoot Primordia of *Matricaria chamomilla* — **Shunsuke Izumi, Osamu Takashima, and Toshifumi Hirata** — **519**

Direct Comparison of GAPDH, β-Actin, Cyclophilin, and 28S rRNA as Internal Standards for Quantifying RNA Levels under Hypoxia — **Hua Zhong and Jonathan W. Simons** — **523**

Detection of Exon Skipping and Retained Introns in Transcription of the Human Thrombospondin 2 Gene — **Kenneth W. Adolph** — **527**

Identification and Characterization of a Myristylated and Palmitylated Serine/Threonine Protein Kinase — **Amy E. Berson, Chi Young, Sherie L. Morrison, Gregory H. Fujii, Julie Sheung, Bonnie Wu, Joseph B. Bolen, and Anne L. Burkhardt** — **533**

Identification of the Major Site of *in Vitro* PKA Phosphorylation in the Polycystin-1 C-Terminal Cytosolic Domain — **Stephen C. Parnell, Brenda S. Magenheimer, Robin L. Maser, and James P. Calvet** — **539**

Attenuation of Haptoglobin Gene Expression by TGFβ Requires the MAP Kinase Pathway	**Shun-Jiang Yu, François Boudreau, Antoine Désilets, Mathieu Houde, Nathalie Rivard, and Claude Asselin**	**544**
Regulators of G-Protein Signaling (RGS) 1 and 16 Are Induced in Response to Bacterial Lipopolysaccharide and Stimulate c-fos Promoter Expression	**Rosemarie Panetta, Yang Guo, Sheldon Magder, and Michael T. Greenwood**	**550**
Identification of Eukaryotic Parvulin Homologues: A New Subfamily of Peptidylprolyl *cis–trans* Isomerases	**Stuart Rulten, Julian Thorpe, and John Kay**	**557**
Chromogranin A Alters Ductal Morphogenesis and Increases Deposition of Basement Membrane Components by Mammary Epithelial Cells *in Vitro*	**Jesus V. Soriano, Michael S. Pepper, Laurent Taupenot, Marie-France Bader, Lelio Orci, and Roberto Montesano**	**563**
Purification of Multisubunit Membrane Protein Complexes: Isolation of Chloroplast F_oF_1-ATP Synthase, CF_o and CF_1 by Blue Native Electrophoresis	**Dirk Neff and Norbert A. Dencher**	**569**
Functional Interaction of Poly(ADP-ribose) with the 20S Proteasome *in Vitro*	**Philipp Mayer-Kuckuk, Oliver Ullrich, Mathias Ziegler, Tilman Grune, and Manfred Schweiger**	**576**
Smt3, a SUMO-1 Homolog, Is Conjugated to Cdc3, a Component of Septin Rings at the Mother-Bud Neck in Budding Yeast	**Yoshimitsu Takahashi, Masayuki Iwase, Mineko Konishi, Masato Tanaka, Akio Toh-e, and Yoshiko Kikuchi**	**582**
Characterization of Lectin Resistant Cell Populations Derived from Human Colon Carcinoma: Correlation of K-Ras with β1-6 Branching of N-Linked Carbohydrate and CEA Production	**Donald C. Wojciechowicz, Robert G. Mallon, Antonio Picon, and Philip B. Paty**	**588**
Intracellular Localization of the Fanconi Anemia Complementation Group A Protein	**Christopher E. Walsh, Marcus R. Yountz, and Dennis A. Simpson**	**594**
Selective Potentiation of Drug Cytotoxicity by NSAID in Human Glioma Cells: The Role of COX-1 and MRP	**Arnd Roller, Oliver R. Bähr, Johannes Streffer, Stephan Winter, Michael Heneka, Martin Deininger, Richard Meyermann, Ulrike Naumann, Erich Gulbins, and Michael Weller**	**600**
Acetate and Formate Uptake into Vesicles Isolated from the Basolateral Region of the Plasma Membrane of Ovine Parotid Acinar Cells	**Ha-Van Nguyen and R. Brian Beechey**	**606**
CHK Down-Regulates SCF/KL-Activated Lyn Kinase Activity in Mo7e Megakaryocytic Cells	**Daniel J. Price, Benjamin Rivnay, and Hava Avraham**	**611**

Activation of Telomerase Is Induced by a Natural Antigen in Allergen-Specific Memory T Lymphocytes in Bronchial Asthma	**Yoshinori Haruta, Keiko Hiyama, Shinichi Ishioka, Soichiro Hozawa, Hiroyuki Maeda, and Michio Yamakido**	**617**
Regulation of Leptin by Steroid Hormones in Rat Adipose Tissue	**Kurt Kristensen, Steen B. Pedersen, and Bjørn Richelsen**	**624**
A TSH/Dibutyryl cAMP Activated Cl^-/I^- Channel in FRTL-5 Cells	**Akio Yoshida, Kimihiko Hattori, Ichiro Hisatome, Shinichi Taniguchi, Yoshihiko Ueta, Hiroko Hukui, Yuka Santo, Osamu Igawa, Chiaki Shigemasa, Shinji Kosugi, and Evelyn F. Grollman**	**631**
Effect of Steroidal Saponins of *Anemarrhenae* Rhizoma on Superoxide Generation in Human Neutrophils	**Jianying Zhang, Meiying Zhang, Kazunori Sugahara, Yasuhiro Sagara, Zhizun Meng, Suixu Xu, and Hiroyuki Kodama**	**636**
X-Ray Structure of Glycerol Kinase Complexed with an ATP Analog Implies a Novel Mechanism for the ATP-Dependent Glycerol Phosphorylation by Glycerol Kinase	**Chen Mao, Zahide Ozer, Min Zhou, and Fatih M. Uckun**	**640**
Single Integrin Molecule Adhesion Forces in Intact Cells Measured by Atomic Force Microscopy	**P. P. Lehenkari and M. A. Horton**	**645**
Matrix-Mediated Changes in the Expression of HNF-4α Isoforms and in DNA-Binding Activity of ARP-1 in Primary Cultures of Rat Hepatocytes	**Dieter Runge, Dorothee M. Runge, Nikki Daskalakis, Kimberly A. Lubecki, William C. Bowen, and George K. Michalopoulos**	**651**
Millisecond Analyses of Ca^{2+} Initiation Sites Evoked by Muscarinic Receptor Stimulation in Exocrine Acinar Cells	**Haruo Takemura, Shohei Yamashina, and Akihisa Segawa**	**656**
Store Ca^{2+} Depletion Enhances NMDA Responses in Cultured Human Astrocytes	**Tomoyuki Nishizaki, Toshiyuki Matsuoka, Tamotsu Nomura, Takeshi Kondoh, Norihiko Tamaki, and Yasuhiro Okada**	**661**
Characterization of DNA Binding Properties and Sequence Specificity of the Human 52 kDa Ro/SS-A (Ro52) Zinc Finger Protein	**Mark Barton Frank**	**665**
The Endothelial Cell Protein C Receptor (EPCR) Functions as a Primary Receptor for Protein C Activation on Endothelial Cells in Arteries, Veins, and Capillaries	**Xiaofen Ye, Kenji Fukudome, Naoko Tsuneyoshi, Toshimi Satoh, Osamu Tokunaga, Keishin Sugawara, Hiroshi Mizokami, and Masao Kimoto**	**671**
3,4-Methylenedioxymethamphetamine ("Ecstasy") Stimulates the Expression of $\alpha 1$(I) Procollagen mRNA in Hepatic Stellate Cells	**M. Varela-Rey, C. Montiel-Duarte, G. Beitia, E. Cenarruzabeitia, and M. J. Iraburu**	**678**
Effects of Exogenous Human Heparin-Binding Epidermal Growth Factor-Like Growth Factor on DNA Synthesis of Hepatocytes in Normal Mouse Liver	**Shinichi Kiso, Sumio Kawata, Shinji Tamura, Shinobu Umeki, Nobuyuki Ito, Hirofumi Tsushima, Akira Yamada, Jun-ichiro Miyagawa, Shigeki Higashiyama, Naoyuki Taniguchi, and Yuji Matsuzawa**	**683**

HMG CoA Reductase and LDL Receptor Genes Are Regulated Differently by 15-Ketosterols in Hep G2 Cells — **Anastassia F. Kisseleva, Ludmila E. Goryunova, Richard Planells, Huguette Lafont, and Christian Alquier** **688**

Presence of Leptin in Breast Cell Lines and Breast Tumors — **Susan N. O'Brien, Brenda H. Welter, and Thomas M. Price** **695**

Male Sterility in Transgenic Mice Expressing Activin βA Subunit Gene in Testis — **Yoko Tanimoto, Keiji Tanimoto, Fumihiro Sugiyama, Hisashi Horiguchi, Kazuo Murakami, Ken-ichi Yagami, and Akiyoshi Fukamizu** **699**

Lens Proteins Block the Copper-Mediated Formation of Reactive Oxygen Species during Glycation Reactions *in Vitro* — **B. J. Ortwerth and Hongying L. James** **706**

ERRATUM

Volume **190,** Number 2 (1993), in the article “Isolation of a cDNA for Chicken Liver 6-Phosphofructo-2-kinase/Fructose-2,6-bisphosphatase,” by Lin Li, Alex J. Lange, and Simon J. Pilkis, pages 397–405 **711**

Author Index for Volume 259 **712**

Volume 260, Number 1, June 24, 1999

Heterologous Overexpression of Human NEFA and Studies on the Two EF-Hand Calcium-Binding Sites **Katja A. Kroll, Stefan Otte, Gregor Hirschfeld, Shitsu Barnikol-Watanabe, Hilde Götz, Hans Sternbach, Hartmut D. Kratzin, Heinz Ulrich Barnikol, and Norbert Hilschmann** 1

A G-CSF Receptor–Gyrase B Fusion Gene: A New Type of Molecular Switch for Expansion of Genetically Modified Hematopoietic Cells **Akihiro Kume, Keiko Ito, Yasuji Ueda, Mamoru Hasegawa, Masashi Urabe, Hiroyuki Mano, and Keiya Ozawa** 9

Tetracyclines Reduce Na$^+$/K$^+$ Pump Capacity in Calu-3 Human Airway Cells **Yasushi Ito, Hiroaki Kume, Kenichi Yamaki, and Kenzo Takagi** 13

Heterogeneous Nuclear Ribonucleoprotein A2 Interacts with Protein Kinase CK2 **Floria Pancetti, Ramon Bosser, Andreas Krehan, Walter Pyerin, Emilio Itarte, and Oriol Bachs** 17

Quantitative Analysis of Expression of Mouse Sialyltransferase Genes by Competitive PCR **Shou Takashima, Yuriko Tachida, Takatoshi Nakagawa, Toshiro Hamamoto, and Shuichi Tsuji** 23

Preliminary Characterization of Yor180Cp: Identification of a Novel Peroxisomal Protein of *Saccharomyces cerevisiae* Involved in Fatty Acid Metabolism **Brian V. Geisbrecht, Kerstin Schulz, Katja Nau, Michael T. Geraghty, Horst Schulz, Ralf Erdmann, and Stephen J. Gould** 28

The Incipient Stage in Thrombin-Induced Fibrin Polymerization Detected by FCS at the Single Molecule Level **Niklas Bark, Zeno Földes-Papp, and Rudolf Rigler** 35

Antibodies against the PH Domain of Phospholipase C-δ1 Inhibit Ins(1,4,5)P$_3$-Mediated Ca^{2+} Release from the Endoplasmic Reticulum **Nori-aki Matsuki, Kayoko Tateishi, Hiroshi Takeuchi, Hitoshi Yagisawa, Takashi Kanematsu, Masamichi Oishi, and Masato Hirata** 42

Functional Dissociation of Anoikis-like Cell Death and Activity of Stress Activated Protein Kinase **Julia K. Krestow, Janusz Rak, Jorge Filmus, and Robert S. Kerbel** 48

Isolation and Functional Characterization of the 5′-Upstream Region of Mouse P/Q-Type Ca^{2+} Channel α_{1A} Subunit Gene **Eiki Takahashi, Yoshiyuki Murata, Tohru Oki, Norimasa Miyamoto, Yasuo Mori, Naoyuki Takada, Hiroshi Wanifuchi, Nobuko Wanifuchi, Ken-ichi Yagami, Tetsuhiro Niidome, Isao Tanaka, and Koichi Katayama** 54

The Formation of Oxidatively Induced High-Molecular-Weight Aggregate of α-/γ-Crystallins **Fu-Yung Huang, Chin-Min Chia, and Yuh Ho** 60

Hox Gene Complexity in Medaka Fish May Be Similar to That in Pufferfish Rather Than Zebrafish	**Gene Kurosawa, Kouji Yamada, Hiroshi Ishiguro, and Hiroshi Hori**	**66**
Modulatory Effect of HCO_3^- on Rat Mast Cell Exocytosis: Cross-Talks between Bicarbonate and Calcium	**Natalia Vilariño, Mercedes R. Vieytes, Juan M. Vieites, and Luis M. Botana**	**71**
Bistratene A Induces a Microtubule-Dependent Block in Cytokinesis and Altered Stathmin Expression in HL60 Cells	**W. Eustace B. Johnson, Dianne J. Watters, Ravinder K. Suniara, Geoffrey Brown, and Christopher M. Bunce**	**80**
The Glu Residue in the Conserved Asn-Glu-Pro Sequence of Endoglycoceramidase Is Essential for Enzymatic Activity	**Keishi Sakaguchi, Nozomu Okino, Hiroyuki Izu, and Makoto Ito**	**89**
Impaired Galactosylation of Core 2 O-Glycans in Erythrocytes of β1,4-Galactosyltransferase Knockout Mice	**Norihiro Kotani, Masahide Asano, Yoichiro Iwakura, and Seiichi Takasaki**	**94**
Secretory Phospholipase A_2 Induces Phospholipase Cγ-1 Activation and Ca^{2+} Mobilization in the Human Astrocytoma Cell Line 1321N1 by a Mechanism Independent of Its Catalytic Activity	**Marita Hernández, Maria José Barrero, Javier Alvarez, Mayte Montero, Mariano Sánchez Crespo, and María Luisa Nieto**	**99**
Induction of Cell Proliferation and Apoptosis: Dependence on the Dose of the Inducer	**Tanya Das, Gaurisankar Sa, Pratima Sinha, and Prasanta K. Ray**	**105**
Functional Mimicry of Protein A of *Staphylococcus aureus* by a Proteolytically Cleaved Fragment	**Pratima Sinha, Jayati Sengupta, and Prasanta K. Ray**	**111**
Effects of Antisense Oligonucleotides to the Cardiac Na^+/Ca^{2+} Exchanger on Calcium Dynamics in Cultured Cardiac Myocytes	**Kyoko Takahashi, Mitsuhiro Azuma, Jana Huschenbett, Mary L. Michaelis, and Junichi Azuma**	**117**
Association of Bone Mineral Density with a Polymorphism of the Peroxisome Proliferator-Activated Receptor γ Gene: PPARγ Expression in Osteoblasts	**Sumito Ogawa, Tomohiko Urano, Takayuki Hosoi, Mariko Miyao, Shinjiro Hoshino, Masayo Fujita, Masataka Shiraki, Hajime Orimo, Yasuyoshi Ouchi, and Satoshi Inoue**	**122**
α-SNAP Functions in Insulin Exocytosis from Mature, but Not Immature Secretory Granules in Pancreatic β Cells	**Yoko Nakamichi and Shinya Nagamatsu**	**127**
Abnormal Dentatorubral-Pallidoluysian Atrophy (DRPLA) Protein Complex Is Pathologically Ubiquitinated in DRPLA Brains	**Ikuru Yazawa, Hirofumi Nakase, and Hiroshi Kurisaki**	**133**
Activation of Caspase-3 Apoptotic Pathways in Skeletal Muscle Fibers in Laminin α2-Deficient Mice	**Takeshi Mukasa, Takashi Momoi, and Mariko Y. Momoi**	**139**

Constitutive hsp70 Is Essential to Mitosis during Early Cleavage of *Paracentrotus lividus* Embryos: The Blockage of Constitutive hsp70 Impairs Mitosis	**Gabriella Sconzo, Franco Palla, Cecilia Agueli, Giovanni Spinelli, Giovanni Giudice, Domenico Cascino, and Fabiana Geraci**	143
The Length of Polyglutamine Tract, Its Level of Expression, the Rate of Degradation, and the Transglutaminase Activity Influence the Formation of Intracellular Aggregates	**Tiziana de Cristofaro, Adelina Affaitati, Lucio Cariello, Enrico V. Avvedimento, and Stelio Varrone**	150
TNFα-Induced IEC-6 Cell Apoptosis Requires Activation of ICE Caspases whereas Complete Inhibition of the Caspase Cascade Leads to Necrotic Cell Death	**Frank M. Ruemmele, Serge Dionne, Emile Levy, and Ernest G. Seidman**	159
Fas/Fas Ligand System in Prolactin-Induced Apoptosis in Rat Corpus Luteum: Possible Role of Luteal Immune Cells	**Erina Kuranaga, Hirotaka Kanuka, Makoto Bannai, Masatoshi Suzuki, Masugi Nishihara, and Michio Takahashi**	167
Cloning and Characterization of a Novel Orphan G-Protein-Coupled Receptor Localized to Human Chromosome 2p16	**Emma E. Tarttelin, Lawrence S. Kirschner, James Bellingham, Judit Baffi, Susan E. Taymans, Kevin Gregory-Evans, Karl Csaky, Constantine A. Stratakis, and Cheryl Y. Gregory-Evans**	174
cis-2,3-Dihydro-2,3-dihydroxybiphenyl Dehydrogenase and *cis*-1,2-Dihydro-1,2-dihydroxynaphathalene Dehydrogenase Catalyze Dehydrogenation of the Same Range of Substrates	**D. Barriault, M. Vedadi, J. Powlowski, and M. Sylvestre**	181
Substitution of the Two Carboxyl-terminal Serines by Alanine Causes Retention of MAL, a Component of the Apical Sorting Machinery, in the Endoplasmic Reticulum	**Rosa Puertollano and Miguel A. Alonso**	188
Phosphorylation of the Cyclosome Is Required for Its Stimulation by Fizzy/cdc20	**Michal Shteinberg, Yana Protopopov, Tamar Listovsky, Michael Brandeis, and Avram Hershko**	193
Glucuronidation of 7-Ethyl-10-hydroxycamptothecin (SN-38) by the Human UDP-Glucuronosyltransferases Encoded at the *UGT1* Locus	**Marco Ciotti, Nikhil Basu, Mariafiorella Brangi, and Ida S. Owens**	199
EDG3 Is a Functional Receptor Specific for Sphingosine 1-Phosphate and Sphingosylphosphorylcholine with Signaling Characteristics Distinct from EDG1 and AGR16	**Hiroyuki Okamoto, Noriko Takuwa, Yutaka Yatomi, Koichi Gonda, Hiroshi Shigematsu, and Yoh Takuwa**	203
Biochemical and Spectroscopic Characterization of Overexpressed Fuscoredoxin from *Escherichia coli*	**Alice S. Pereira, Pedro Tavares, Carsten Krebs, Boi Hanh Huynh, Frank Rusnak, Isabel Moura, and José J. G. Moura**	209

Identification of cDNAs for Sox-4, an HMG-Box Protein, and a Novel Human Homolog of Yeast Splicing Factor SSF-1 Differentially Regulated during Apoptosis Induced by Prostaglandin A_2/Δ^{12}-PGJ_2 in Hep3B Cells	**Sang-Gun Ahn, Gyeong-Ho Cho, Seong-Yun Jeong, Hyangshuk Rhim, Ju-Youn Choi, and In-Kyung Kim**	**216**
Protease-Sensitive Urinary Pheromones Induce Region-Specific Fos-Expression in Rat Accessory Olfactory Bulb	**Kenji Tsujikawa and Makoto Kashiwayanagi**	**222**
Hepatocyte Growth Factor/Scatter Factor (HGF/SF) Is a Regulator of Fibronectin Splicing in MDCK Cells: Comparison between the Effects of HGF/SF and TGF-β1 on Fibronectin Splicing at the EDA Region	**Teruhiko Inoue, Kazuki Nabeshima, Yoshiya Shimao, and Masashi Koono**	**225**
Differentiation of U937 Cells Enables a Phospholipase D-Dependent Pathway of Cytosolic Phospholipase A_2 Activation	**James R. Burke, Lynda B. Davern, Kurt R. Gregor, and Lisa M. Owczarczak**	**232**
Noggin and Bone Morphogenetic Protein-4 Coordinately Regulate the Progression of Chondrogenic Differentiation in Mouse Clonal EC Cells, ATDC5	**Hiromu Ito, Haruhiko Akiyama, Chohei Shigeno, and Takashi Nakamura**	**240**
Cloning, Expression of the *psb*U Gene, and Functional Studies of the Recombinant 12-kDa Protein of Photosystem II from a Red Alga *Cyanidium caldarium*	**Hisataka Ohta, Akinori Okumura, Satoshi Okuyama, Ai Akiyama, Masako Iwai, Shizue Yoshihara, Jian-Ren Shen, Masaharu Kamo, and Isao Enami**	**245**
Denervation of Chicken Skeletal Muscle Causes an Increase in Acetylcholinesterase mRNA Synthesis	**Mendell Rimer and William R. Randall**	**251**
Apoptosis and Mitotic Arrest Are Two Independent Effects of the Protein Phosphatases Inhibitor Okadaic Acid in K562 Leukemia Cells	**Ana Lerga, Carlos Richard, M. Dolores Delgado, Matilde Cañelles, Pilar Frade, M. Angeles Cuadrado, and Javier León**	**256**
Molecular Cloning of Rat SH2-Containing Inositol Phosphatase 2 (SHIP2) and Its Role in the Regulation of Insulin Signaling	**Hajime Ishihara, Toshiyasu Sasaoka, Hiroyuki Hori, Tsutomu Wada, Hiroki Hirai, Tetsuro Haruta, W. John Langlois, and Masashi Kobayashi**	**265**
Characterization of Five Human cDNAs with Homology to the Yeast SIR2 Gene: Sir2-like Proteins (Sirtuins) Metabolize NAD and May Have Protein ADP-Ribosyltransferase Activity	**Roy A. Frye**	**273**
A New Allele, *DNASE1*6*, of Human Deoxyribonuclease I Polymorphism Encodes an Arg to Cys Substitution Responsible for Its Instability	**Toshihiro Yasuda, Haruo Takeshita, Reiko Iida, Shinya Kogure, and Koichiro Kishi**	**280**

Secondary Structure Formation Is the Earliest Structural Event in the Refolding of an All β-Sheet Protein — **T. Sivaraman, T. K. S. Kumar, Y. T. Tu, W. Wang, W. Y. Lin, H. M. Chen, and C. Yu** — 284

MAP Kinase-Independent Induction of Proto-oncogene *c-fos* mRNA by Hemin in Human Cells — **Yoshiro Masuya, Isamu Kameshita, Hitoshi Fujisawa, Hirao Kohno, Koshiro Hioki, Rikio Tokunaga, and Shigeru Taketani** — 289

Identification of Two Human WAVE/SCAR Homologues as General Actin Regulatory Molecules Which Associate with the Arp2/3 Complex — **Shiro Suetsugu, Hiroaki Miki, and Tadaomi Takenawa** — 296

Number 2, July 5, 1999

BREAKTHROUGHS AND VIEWS

Molecular Basis Underlying Functional Pleiotropy of Cytokines and Growth Factors — **Toshio Hirano** — 303

REGULAR ARTICLES

BCR Binds to the Xeroderma Pigmentosum Group B Protein — **Yoshiro Maru, Takehiro Kobayashi, Kiyoji Tanaka, and Masabumi Shibuya** — 309

Inosine$^{15.1}$ Hammerhead Ribozymes for Targeting the Transthyretin-30 Mutation — **Marcus J. Pröpsting, Martina Blaschke, Regina E. Haas, Janine Genschel, H. J. Hedrich, Michael P. Manns, and Hartmut H.-J. Schmidt** — 313

Expression of ADAMTS Homologues in Articular Cartilage — **Carl R. Flannery, Chris B. Little, Clare E. Hughes, and Bruce Caterson** — 318

Conjugation of Plasmid DNAs with Lactose via Diazocoupling Enhances Resistance to Restriction Enzymes and Acquires Binding Affinity to Galactose-Specific Lectin — **Tsukasa Akasaka, Kazunori Matsuura, Nobuhiko Emi, and Kazukiyo Kobayashi** — 323

ICSAT Overexpression Is Not Sufficient to Cause Adult T-Cell Leukemia or Multiple Myeloma — **Toshiki Saito, Tetsuya Yamagata, Tsuyoshi Takahashi, Hiroaki Honda, and Hisamaru Hirai** — 329

Protein Aging by Carboxymethylation of Lysines Generates Sites for Divalent Metal and Redox Active Copper Binding: Relevance to Diseases of Glycoxidative Stress — **Amit K. Saxena, Poonam Saxena, Xinle Wu, Mark Obrenovich, Miriam F. Weiss, and Vincent M. Monnier** — 332

Structure of Mouse Calpastatin Isoforms: Implications of Species-Common and Species-Specific Alternative Splicing	**Jiro Takano, Toshimi Kawamura, Maki Murase, Kiyotaka Hitomi, and Masatoshi Maki**	**339**
Tumor Vascular Targeting Using a Tumor-Tissue Endothelium-Specific Monoclonal Antibody as an Effective Strategy for Cancer Chemotherapy	**Hiroo Makimoto, Kei-ichi Koizumi, Shin-ichi Tsunoda, Yukiko Wakai, Junji Matsui, Yasuo Tsutsumi, Shinsaku Nakagawa, Iwao Ohizumi, Kenji Taniguchi, Hiroyuki Saito, Naoki Utoguchi, Yoshiyuki Ohsugi, and Tadanori Mayumi**	**346**
GTPase and Transglutaminase Are Associated in the Secretion of the Rat Anterior Prostate	**A. M. Spina, C. Esposito, M. Pagano, E. Chiosi, L. Mariniello, A. Cozzolino, R. Porta, and G. Illiano**	**351**
Structure, Genetic Localization, and Identification of the Cardiac and Skeletal Muscle Transcripts of the Human Integrin $\alpha 7$ Gene (*ITGA7*)	**Nicolas Vignier, Behzad Moghadaszadeh, Françoise Gary, Jacques Beckmann, Ulrike Mayer, and Pascale Guicheney**	**357**
Hypoxia Up-Regulates Telomerase Activity via Mitogen-Activated Protein Kinase Signaling in Human Solid Tumor Cells	**Hiroyuki Seimiya, Masanori Tanji, Tomoko Oh-hara, Akihiro Tomida, Imad Naasani, and Takashi Tsuruo**	**365**
Regulation of Endothelial Cell Adherens Junctions by a Ras-Dependent Signal Transduction Pathway	**Donald D. Hegland, Daniel M. Sullivan, Ilsa I. Rovira, Arthur Li, Imre Kovesdi, Joseph T. Bruder, and Toren Finkel**	**371**
Evidence for the Presence of a Functional Pregnane X Receptor Response Element in the CYP3A7 Promoter Gene	**Jean-Marc Pascussi, Youssef Jounaidi, Lionel Drocourt, Jacques Domergue, Charles Balabaud, Patrick Maurel, and Marie-Josée Vilarem**	**377**
Expression of the Heterogenous Nuclear Ribonucleoprotein Complex K Protein and the Prolyl-4-hydroxylase α-Subunit in Atherosclerotic Arterial Smooth Muscle Cells	**Lisa D. Laury-Kleintop, Marie Gleason, and Thomas N. Tulenko**	**382**
Characterization *in Vitro* and *in Vivo* of Hammerhead Ribozymes Directed against Murine Tumor Necrosis Factorα	**Sally L. D. MacKay, Cynthia L. Tannahill, Troy Auffenberg, Riadh Ksontini, Edward M. Copeland III, and Lyle L. Moldawer**	**390**
APOBEC-2, a Cardiac- and Skeletal Muscle-Specific Member of the Cytidine Deaminase Supergene Family	**Wei Liao, Seung-Ho Hong, Benny Hung-Junn Chan, Frederick B. Rudolph, Sandra C. Clark, and Lawrence Chan**	**398**
MBP-1 Physically Associates with Histone Deacetylase for Transcriptional Repression	**Asish K. Ghosh, Robert Steele, and Ratna B. Ray**	**405**
Differential Membrane Antioxidant Effects of Immediate and Long-Term Estradiol Treatment of MCF-7 Breast Cancer Cells	**Nina Felice Schor, Yulia Y. Tyurina, Vladimir A. Tyurin, and Valerian E. Kagan**	**410**

The Human apM-1, an Adipocyte-Specific Gene Linked to the Family of TNF's and to Genes Expressed in Activated T Cells, Is Mapped to Chromosome 1q21.3–q23, a Susceptibility Locus Identified for Familial Combined Hyperlipidaemia (FCH)	**A. Schäffler, E. Orsó, K.-D. Palitzsch, C. Büchler, W. Drobnik, A. Fürst, J. Schölmerich, and G. Schmitz**	**416**
Neural Network in Planarian Revealed by an Antibody against Planarian Synaptotagmin Homologue	**Akira Tazaki, Silvana Gaudieri, Kazuho Ikeo, Takashi Gojobori, Kenji Watanabe, and Kiyokazu Agata**	**426**
Tooth-Specific Expression Conferred by the Regulatory Sequences of Rat Dentin Sialoprotein Gene in Transgenic Mice	**Hidetoshi Yamazaki, Takahiro Kunisada, Akitomo Miyamoto, Hisashi Tagaya, and Shin-Ichi Hayashi**	**433**
Cytodifferentiation Potentiates aFGF-Induced $p21^{ras}$/Erk Signaling Pathway in Rat Cultured Astrocytes	**Sachie Asada, Yoshitoshi Kasuya, Hiroshi Hama, Tomoh Masaki, and Katsutoshi Goto**	**441**
Association of Prokaryotic and Eukaryotic Chaperone Proteins with the Human 1α,25-Dihydroxyvitamin D_3 Receptor	**Theodore A. Craig, Ward H. Lutz, and Rajiv Kumar**	**446**
Pokeweed Antiviral Protein Isoforms PAP-I, PAP-II, and PAP-III Depurinate RNA of Human Immunodeficiency Virus (HIV)-1	**Francis Rajamohan, Taracad K. Venkatachalam, James D. Irvin, and Fatih M. Uckun**	**453**
Identification and Expression of a Novel Family of bHLH cDNAs Related to *Drosophila* Hairy and Enhancer of Split	**Hiroki Kokubo, Yi Lun, and Randy L. Johnson**	**459**
Genomic Organization and Chromosomal Localization of the Human CD163 (M130) Gene: A Member of the Scavenger Receptor Cysteine-Rich Superfamily	**Mirko Ritter, Christa Buechler, Thomas Langmann, and Gerd Schmitz**	**466**
Hematopoietic Development of Primordial Germ Cell-Derived Mouse Embryonic Germ Cells in Culture	**Takahiko Ohtaka, Yasuhisa Matsui, and Masuo Obinata**	**475**
EGF-Induced Receptor Autophosphorylation in Primary Hepatocytes Isolated from Phenobarbitone-Treated Mice	**Karin Fletcher, Peter G. Lord, Terry C. Orton, J. Kevin Chipman, and Alastair J. Strain**	**483**
Loss of Function Mutations of the Human Melanocortin 1 Receptor Are Common and Are Associated with Red Hair	**Helgi B. Schiöth, Siôn R. Phillips, Richard Rudzish, Mark A. Birch-Machin, Jarl E. S. Wikberg, and Jonathan L. Rees**	**488**
Characterization of a Novel Form of Angiopoietin-2 (Ang-2B) and Expression of VEGF and Angiopoietin-2 during Chicken Testicular Development and Regression	**Jovita Mezquita, Belén Mezquita, Montserrat Pau, and Cristóbal Mezquita**	**492**

Alteration of SREBP Activation in Liver of Trisomy 21 Fetuses — **Luisa Diomede, Mario Salmona, Diego Albani, Marco Bianchi, Alessandra Bruno, Sarah Salmona, and Umberto Nicolini** — 499

A Serpentine Receptor-Dependent, Gβ- and Ca^{2+} Influx-Independent Pathway Regulates Mitogen-Activated Protein Kinase ERK2 in *Dictyostelium* — **Paul W. Schenk, Thomas Nebl, Paul R. Fisher, and B. Ewa Snaar-Jagalska** — 504

Multiple Splicing Variants of cdc25B Regulate G2/M Progression — **A. R. R. Forrest, A. K. McCormack, C. P. C. DeSouza, J. M. Sinnamon, I. D. Tonks, N. K. Hayward, K. A. O. Ellem, and B. G. Gabrielli** — 510

Cross-Linking of Plasmalemmal Cholesterol in Lymphocytes Induces Capping, Membrane Shedding, and Endocytosis through Coated Pits — **Haruo Hagiwara, Shin-ya Kogure, Megumi Nakamura, Yukiko Shimada, Yoshiko Ohno-Iwashita, and Toyoshi Fujimoto** — 516

Regulation of Bcl-2 Protein Expression during Oxidative Stress in Neuronal and in Endothelial Cells — **Biancamaria Longoni, Elena Boschi, Gian Carlo Demontis, Pier Lorenzo Marchiafava, and Franco Mosca** — 522

Real Time Analysis of Interaction between Inositol 1,4,5-Trisphosphate Receptor Type I and Its Ligand — **Tohru Natsume, Junji Hirota, Fumio Yoshikawa, Teiichi Furuichi, and Katsuhiko Mikoshiba** — 527

L-Asparaginase Inhibits the Rapamycin-Targeted Signaling Pathway — **Yasuhiko Iiboshi, Philip J. Papst, Stephen P. Hunger, and Naohiro Terada** — 534

Inhibition of EGF-Dependent Calcium Influx by Annexin VI is Splice Form-Specific — **Amanda Fleet, Rachel Ashworth, Helmut Kubista, Helena Edwards, Stephen Bolsover, Peter Mobbs, and Stephen E. Moss** — 540

Uncoupling Protien-3 mRNA Levels Are Increased in White Adipose Tissue and Skeletal Muscle of Bezafibrate-Treated Rats — **Àgatha Cabrero, Gemma Llaverías, Núria Roglans, Marta Alegret, Rosa Sánchez, Tomás Adzet, Juan Carlos Laguna, and Manuel Vázquez** — 547

Characterization of an Oxygen/Redox-Dependent Degradation Domain of Hypoxia-Inducible Factor α (HIF-α) Proteins — **Vickram Srinivas, Li-Ping Zhang, Xiao-Hong Zhu, and Jaime Caro** — 557

Doxycycline Induces Fas/Fas Ligand-Mediated Apoptosis in Jurkat T Lymphocytes — **Jian Liu, Charles A. Kuszynski, and B. Timothy Baxter** — 562

Flavonoids Are Potential Inhibitors of Glucose Uptake in U937 Cells — **Jae B. Park** — 568

ERRATUM

Volume **258,** Number 2 (1999), in the Breakthroughs and Views Article ID bbrc.1999.0449, “Function and Evolution of Otx Proteins,” by William H. Klein and Xiaotao Li, pages 229–233 — 575

Number 3, July 14, 1999

Cell-Specific Differences in the Regulation of IL-6 Expression by PMA	**C. Costanzo, G. Piacentini, L. Vicentini, F. Armenante, P. Mazzi, C. Savio, L. Faggioli, A. Boner, and M. Palmieri**	**577**
The C-Terminus of bax Is Not a Membrane Addressing/Anchoring Signal	**Karine Tremblais, Lisa Oliver, Philippe Juin, Marie Thérese Le Cabellec, Khaled Meflah, and François Vallette**	**582**
Nociceptin Binding Sites in Frog (*Rana esculenta*) Brain Membranes	**Sándor Benyhe, Krisztina Monory, Judit Farkas, Géza Tóth, Remo Guerrini, Severo Salvadori, György Orosz, Mária Wollemann, and Anna Borsodi**	**592**
Rotation of *Escherichia coli* F_1-ATPase	**Hiroyuki Noji, Katrin Häsler, Wolfgang Junge, Kazuhiko Kinosita, Jr., Masasuke Yoshida, and Siegfried Engelbrecht**	**597**
Transcription Factor NF1 Mediates Repression of the GLUT4 Promoter by Cyclic-AMP	**David W. Cooke and M. Daniel Lane**	**600**
Nuclear Localization of C-Terminal Domains of the Kinesin-like Protein MKLP-1	**B. E. Deavours and R. A. Walker**	**605**
Evidence for Direct Binding of Fatty Acids and Eicosanoids to Human Peroxisome Proliferators-Activated Receptor α	**Koji Murakami, Tomohiro Ide, Masahiro Suzuki, Toshiro Mochizuki, and Takashi Kadowaki**	**609**
Sphingosine and Phorbol Ester Modulate Protein Kinase C Activity and Modify ATP-Evoked Calcium Mobilization in Glioma C6 Cells	**Rafał Czajkowski and Jolanta Barańska**	**614**
Heat Shock Proteins 70 and 90 Increase Calcineurin Activity *in Vitro* through Calmodulin-Dependent and Independent Mechanisms	**James S. Someren, Lee E. Faber, Janet D. Klein, and James A. Tumlin**	**619**
A Factor from Pancreatic and Colonic Cancer Cells Stimulates Glucose Uptake and Lactate Production in Myoblasts	**Jianzhong Li and Thomas E. Adrian**	**626**
Involvement of the 92-kDa Gelatinase (Matrix Metalloproteinase-9) in the Ceramide-Mediated Inhibition of Human Keratinocyte Growth	**Nathalie Buisson-Legendre, Philippe Bernard, Hélène Bobichon, Hervé Emonard, Christophe Schneider, François-Xavier Maquart, Bernard Haye, and William Hornebeck**	**634**
Protocadherin 2C: A New Member of the Protocadherin 2 Subfamily Expressed in a Redundant Manner with OL-Protocadherin in the Developing Brain	**Shinji Hirano, Takao Ono, Qiong Yan, Xiaopeng Wang, Shin-ichi Sonta, and Shintaro T. Suzuki**	**641**

Neuronal Expression of a *Caenorhabditis elegans elav*-like Gene and the Effect of Its Ectopic Expression	**Masaki Fujita, Taizo Kawano, Atsunori Ohta, and Hiroshi Sakamoto**	646
Hyperleptinemia Depletes Fat from Denervated Fat Tissue	**Zhuo-Wei Wang, Yan-Ting Zhou, Young Lee, Moritake Higa, Satya P. Kalra, and Roger H. Unger**	653
Casein Kinase 2 Binds to and Phosphorylates BRCA1	**Kathryn A. O'Brien, Stephanie J. Lemke, Kimberley S. Cocke, R. Nagaraja Rao, and Richard P. Beckmann**	658
Purification and Characterization of Brevinase, a Heterogeneous Two-Chain Fibrinolytic Enzyme from the Venom of Korean Snake, *Agkistrodon blomhoffii brevicaudus*	**Je-Wook Lee, Jung-Hwn Seu, In-Koo Rhee, Ingnyol Jin, Yoshiharu Kawamura, and Wan Park**	665
CAPN 8: Isolation of a New Mouse Calpain-Isoenzyme	**Christian Braun, Matthias Engel, Birgit Theisinger, Cornelius Welter, and Markus Seifert**	671
Human Prostate *CYP3A5:* Identification of a Unique 5′-Untranslated Sequence and Characterization of Purified Recombinant Protein	**Yasuo Yamakoshi, Taketoshi Kishimoto, Kazunobu Sugimura, and Hidenori Kawashima**	676
Daphnetin, One of Coumarin Derivatives, Is a Protein Kinase Inhibitor	**Er Bin Yang, Yin Nong Zhao, Kai Zhang, and Peter Mack**	682
Lipopolysaccharides Induce p8 mRNA Expression *in Vivo* and *in Vitro*	**Yong-Feng Jiang, Maria Inés Vaccaro, Fritz Fiedler, Ezequiel Luis Calvo, and Juan Lucio Iovanna**	686
Functional Characterization of a Purified, Recombinant NF-κB/IκB Complex	**Christopher J. Larson, Yian Wu Li, Frank Mercurio, and Rolf Müller**	691
Epidermal Growth Factor Stimulates 3-Hydroxy-3-Methylglutaryl-coenzyme A Reductase Expression via the ErbB-2 Pathway in Human Breast Adenocarcinoma Cells	**Raghda Asslan, Anne Pradines, Corélia Pratx, Cuider Allal, Gilles Favre, and Francis Le Gaillard**	699
Dynamic Expression Pattern of Ca^{2+}/Calmodulin-Dependent Protein Kinase II Gene in the Central Nervous System of *Drosophila* throughout Development	**Mohammed Rachidi, Carmela Lopes, Yoshiki Takamatsu, Shunji Ohsako, Jean-Claude Benichou, and Jean-Maurice Delabar**	707
Is Green Fluorescent Protein Toxic to the Living Cells?	**Hsiao-Sheng Liu, Ming-Shiou Jan, Chao-Kai Chou, Ping-Hong Chen, and Nir-Jihn Ke**	712
Insulin Receptor Substrate 4 Supports Insulin- and Interleukin 4-Stimulated Proliferation of Hematopoietic Cells	**Valeria R. Fantin, Susanna R. Keller, Gustav E. Lienhard, and Ling-Mei Wang**	718

Expression, Purification, and Characterization of the Cytoplasmic Domain of the Human IGF-1 Receptor Using a Baculovirus Expression System	**Norbert Tennagels, Claudia Hube-Magg, Angela Wirth, Volker Noelle, and Helmut W. Klein**	724
9-*cis*-Retinoic Acid Decreases the Level of Its Cognate Receptor, Retinoid X Receptor, through Acceleration of the Turnover	**Yoshio Nomura, Takashi Nagaya, Yoshitaka Hayashi, Fukushi Kambe, and Hisao Seo**	729
Release of Soluble ICAM-1 from Human Lung Fibroblasts, Aortic Smooth Muscle Cells, Dermal Microvascular Endothelial Cells, Bronchial Epithelial Cells, and Keratinocytes	**Kam H. Leung**	734
Marked Expression of Glutathione *S*-Transferase A4-4 Detoxifying 4-Hydroxy-2(*E*)-nonenal in the Skin of Rats Irradiated by Ultraviolet B-Band Light (UVB)	**Akira Hiratsuka, Hiroshi Saito, Kenichiro Hirose, and Tadashi Watabe**	740
Decrease in GTP Cyclohydrolase I Gene Expression Caused by Inactivation of One Allele in Hereditary Progressive Dystonia with Marked Diurnal Fluctuation	**Hidehito Inagaki, Tamae Ohye, Takahiro Suzuki, Masaya Segawa, Yoshiko Nomura, Toshiharu Nagatsu, and Hiroshi Ichinose**	747
Influence of a Cap Site Element on Tissue-Restricted Expression of the Glycoprotein Hormone α-Subunit Gene	**G. Stanley Cox and Wanfen Xiong**	752
Characterization of Three Splice Variants and Genomic Organization of the Mouse BMAL1 Gene	**Wangjie Yu, Masaaki Ikeda, Hiroshi Abe, Sato Honma, Takashi Ebisawa, Toshio Yamauchi, Ken-ichi Honma, and Masahiko Nomura**	760
Characterization of Novel Inhibitors of Cyclin-Dependent Kinases	**Lorraine L. Kent, Nicolina E. Hull-Campbell, Ted Lau, John C. Wu, Stewart A. Thompson, and Mukund Nori**	768
Redistribution of Activated Caspase-3 to the Nucleus during Butyric Acid-Induced Apoptosis	**Mahitosh Mandal, Liana Adam, and Rakesh Kumar**	775
Snare Protein Expression and Adenoviral Transfection of Amphicrine AR42J	**Herbert Y. Gaisano, Xiaohang Huang, Laura Sheu, Menisha Ghai, Christopher B. Newgard, Khiet Y. Trinh, and William S. Trimble**	781
DNA Binding Activity of the Fetal Alz-50 Clone 1 (FAC1) Protein Is Enhanced by Phosphorylation	**Kelly L. Jordan-Sciutto, Joanna M. Dragich, and Robert Bowser**	785
Selective Association of the Tyrosine Kinases Src, Fyn, and Lyn with Integrin-Rich Actin Cytoskeletons of Activated, Nonaggregated Platelets	**Maria E. Bertagnolli, Lynsee A. Hudson, and Galina Y. Stetsenko**	790
Oligomerized Ced-4 Kills Budding Yeast through a Caspase-Independent Mechanism	**Weikang Tao, Daniel W. Walke, and James I. Morgan**	799

A Novel Apoptotic Cascade Mediated by CDK4 in Rat Pheochromocytoma PC12 Cells — **Yoh Dobashi, Mitsuhiko Shoji, Takashi Noguchi, Eisaku Kondo, Kazuhiro Katayama, and Toru Kameya** — **806**

Reactive Oxygen Species as a Risk Factor in Verotoxin-1-Exposed Rats — **Toshiyuki Matsunaga, Takanori Nakajima, Masaru Sonoda, Shin-ichiroh Kawai, Jun Kobayashi, Ikuo Inoue, Akira Satomi, Shigehiro Katayama, Akira Hara, Shigeru Hokari, Takeshi Honda, and Tsugikazu Komoda** — **813**

Ontogeny and Species Differences in the Pancreatic Expression and Localization of the CCK_A Receptors — **Judith Bourassa, Jean Lainé, Marie-Luise Kruse, Marie-Claude Gagnon, Ézéquiel Calvo, and Jean Morisset** — **820**

Hepatocyte Nuclear Factor 1 Binds to and Transactivates the Human but Not the Rat CYP7A1 Promoter — **Jean Chen, Allen D. Cooper, and Beatriz Levy-Wilson** — **829**

ERRATUM

Volume **258,** Number 2 (1999), in Article ID bbrc.1999.0618, “Ricin RCA_{60}: Evidence of Its Phospholipase Activity,” by M. Helmy, S. Lombard, and G. Piéroni, pages 252–255 — **835**

Author Index for Volume 260 — **836**

Volume 261, Number 1, July 22, 1999

Distinct Effects on the Conformation of Estrogen Receptor α and β by Both the Antiestrogens ICI 164,384 and ICI 182,780 Leading to Opposite Effects on Receptor Stability **Gert-Jan C. M. Van Den Bemd, George G. J. M. Kuiper, Huibert A. P. Pols, and Johannes P. T. M. Van Leeuwen** 1

Flow Stimulates Nitric Oxide Release in Guinea Pig Heart: Role of Stretch-Activated Ion Channels **Jorge Suárez, Carlos Torres, Lourdes Sánchez, Leonardo del Valle, and Gustavo Pastelín** 6

Arginine Deiminase Inhibits Cell Proliferation by Arresting Cell Cycle and Inducing Apoptosis **Hong Gong, Friedo Zölzer, Gottfried von Recklinghausen, Jochen Rössler, Stephen Breit, Werner Havers, Theodore Fotsis, and Lothar Schweigerer** 10

Gastric Mucosal Inflammatory Responses to *Helicobacter pylori* Lipopolysaccharide: Down-regulation of Nitric Oxide Synthase-2 and Caspase-3 by Sulglycotide **Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany** 15

Cloning, Expression, and Chromosomal Mapping of a Human Ganglioside Sialidase **Tadashi Wada, Yuko Yoshikawa, Satoru Tokuyama, Masaaki Kuwabara, Hirotoshi Akita, and Taeko Miyagi** 21

The Antioxidant Defense Protein Ferritin Is a Novel and Specific Target for Pentaerithrityl Tetranitrate in Endothelial Cells **Stefanie Oberle, Petra Schwartz, Aida Abate, and Henning Schröder** 28

Cloning of Differentially Expressed Genes in Highly and Low Metastatic Rat Osteosarcomas by a Modified cDNA-AFLP Method **Tomokazu Fukuda, Akira Kido, Kazunori Kajino, Masahiro Tsutsumi, Yoshizumi Miyauchi, Toshifumi Tsujiuchi, Yoichi Konishi, and Okio Hino** 35

Retinol, a Probe of Conformational Changes in Protein Disulfide Isomerase **Jorge E. Churchich** 41

Molecular Analyses of Five New Chimpanzee MHC Class I Alleles: Implications for Differences between Evolutional Mechanisms of HLA-A, -B, and -C Loci **Masanori Matsui, Sanae Machida, Stephen M. Feinstone, and Toshitaka Akatsuka** 46

Identification of the Region of *mi* Transcription Factor Which Is Responsible for the Synergy with PEBP2/CBF **Eiichi Morii, Hideki Ogihara, Tomohiko Kanno, Dae-Ki Kim, Shintaro Nomura, Yoshiaki Ito, and Yukihiko Kitamura** 53

Thrombopoietin Potentiates Agonist-Stimulated Activation of p38 Mitogen-Activated Protein Kinase in Human Platelets **Yasuharu Ezumi, Eisuke Nishida, Takashi Uchiyama, and Hiroshi Takayama** 58

A Novel Human Gene Encoding an F-box/WD40 Containing Protein Maps in the SHFM3 Critical Region on 10q24	**Peter Ianakiev, Michael W. Kilpatrick, Caroline Dealy, Robert Kosher, Julie R. Korenberg, Xiao-Ning Chen, and Petros Tsipouras**	**64**
Cytochrome c Is Dispensable for Fas-Induced Caspase Activation and Apoptosis	**Juliane Vier, Georg Linsinger, and Georg Häcker**	**71**
Functional Consequences of a Carboxyl Terminal Missense Mutation Arg278Cys in Human Cardiac Troponin T	**Sachio Morimoto, Hiroyuki Nakaura, Fumi Yanaga, and Iwao Ohtsuki**	**79**
The MUC3 Gene Encodes a Transmembrane Mucin and Is Alternatively Spliced	**Stephanie J. Williams, David J. Munster, Rachel J. Quin, David C. Gotley, and Michael A. McGuckin**	**83**
HIV-1 Tat Protein Is Poly(ADP-ribosyl)ated *in Vitro*	**Masanori Kameoka, Yasuharu Tanaka, Katsuya Ota, Asako Itaya, Keizo Yamamoto, and Koichiro Yoshihara**	**90**
Inhibitory Effect of Phosphorylated Myosin Light Chain Kinase on the ATP-Dependent Actin-Myosin Interaction	**Koichi Samizo, Tsuyoshi Okagaki, and Kazuhiro Kohama**	**95**
Expression and Localization of Human Alcohol and Aldehyde Dehydrogenase Enzymes in Skin	**Connie Cheung, Camilla K. Smith, Jan-Olov Hoog, and Sharon A. M. Hotchkiss**	**100**
Glial Cell Line-Derived Neurotrophic Factor Induces Barrier Function of Endothelial Cells Forming the Blood–Brain Barrier	**Yo Igarashi, Hiroyuki Utsumi, Hideki Chiba, Yumiko Yamada-Sasamori, Hirotoshi Tobioka, Yasuhiro Kamimura, Ken Furuuchi, Yasuo Kokai, Takashi Nakagawa, Michio Mori, and Norimasa Sawada**	**108**
High Mobility Group-like Protein in Bovine Milk Stimulates the Proliferation of Osteoblastic MC3T3-E1 Cells	**Jun-ichi Yamamura, Yukihiro Takada, Masaaki Goto, Masayoshi Kumegawa, and Seiichiro Aoe**	**113**
cAMP-Dependent Positive Control of Cyclin A2 Expression during G1/S Transition in Primary Hepatocytes	**Chantal Desdouets, G. Hege Thoresen, Catherine Senamaud-Beaufort, Thoralf Christoffersen, Christian Brechot, and Joëlle Sobczak-Thepot**	**118**
Reduced Mitochondrial Membrane Potential and Altered Responsiveness of a Mitochondrial Membrane Megachannel in p53-Induced Senescence	**Mary M. Sugrue, Yan Wang, Hardy J. Rideout, Ruth M. E. Chalmers-Redman, and William G. Tatton**	**123**
TAK-778, a Novel Synthetic 3-Benzothiepin Derivative, Promotes Chondrogenesis *in Vitro* and *in Vivo*	**Haruhiko Akiyama, Akira Fukumoto, Chohei Shigeno, Hiromu Ito, Shogo Mukai, Tetsuo Hoshino, Haruhiko Makino, and Takashi Nakamura**	**131**

Induction of Manganese-Superoxide Dismutase in MRC-5 Cells Persistently Infected with an *Alphavirus,* Sindbis	**Yoshiyuki Yoshinaka, Yoshie Takahashi, Satoru Nakamura, Iyoko Katoh, Koji Takio, and Yoji Ikawa**	139
High Extracellular Calcium Inhibits Osteoclast-like Cell Formation by Directly Acting on the Calcium-Sensing Receptor Existing in Osteoclast Precursor Cells	**Masanori Kanatani, Toshitsugu Sugimoto, Michiko Kanzawa, Shozo Yano, and Kazuo Chihara**	144
Endothelin Converting Enzyme Activity in Primary Rat Astrocytes Is Modulated by Endothelin B Receptors	**Hannelore Ehrenreich, Bernd-Michael Löffler, Martin Hasselblatt, Hanno Langen, Jan Oldenburg, Thomas Subkowski, Lothar Schilling, and Anna-Leena Sirén**	149
Cloning and Functional Characterization of CYP94A2, a Medium Chain Fatty Acid Hydroxylase from *Vicia sativa*	**Renaud Le Bouquin, Franck Pinot, Irène Benveniste, Jean-Pierre Salaün, and Francis Durst**	156
Identification and Localization of *MEP1A-like* Sequences (*MEP1AL1-4*) in the Human Genome	**Weiping Jiang and Barbara G. Beatty**	163
Gene Expression of a Novel Cytochrome P450 of the CYP4F Subfamily in Human Seminal Vesicles	**Johan Bylund, Niklas Finnström, and Ernst H. Oliw**	169
Experimental Induction of AGEs in Fetal L132 Lung Cells Changes the Level of Intracellular Cathepsin D	**Michael Kasper, Reinhard Schinzel, Toshimitsi Niwa, Gerald Münch, Martin Witt, Heinz Fehrenbach, Michaela Wilsch-Bräuninger, Kerstin Pehlke, Andreas Hofer, and Richard H. W. Funk**	175
Cloning and Functional Expression of a Human Heparanase Gene	**Paul H. Kussie, Jeffrey D. Hulmes, Dale L. Ludwig, Sheetal Patel, Elizabeth C. Navarro, Andrew P. Seddon, Nicholas A. Giorgio, and Peter Bohlen**	183
Pharbin, a Novel Inositol Polyphosphate 5-Phosphatase, Induces Dendritic Appearances in Fibroblasts	**Takuya Asano, Yasuhiro Mochizuki, Ken Matsumoto, Tadaomi Takenawa, and Takeshi Endo**	188
A Convenient Microscale Colorimetric Method for Terminal Galactose on Immunoglobulins	**T. Shantha Raju, Namita Nayak, John Briggs, John V. O'Connor, and Laura Lerner**	196
Hypertension Augments Ethanol-Induced Depression of Cell Shortening and Intracellular Ca^{2+} Transients in Adult Rat Ventricular Myocytes	**Jun Ren and Ricardo A. Brown**	202
Analogs of MTII, Lactam Derivatives of α-Melanotropin, Modified at the N-Terminus, and Their Selectivity at Human Melanocortin Receptors 3, 4, and 5	**Maria A. Bednarek, Tanya Macneil, Rubana N. Kalyani, Rui Tang, Lex H. T. Van der Ploeg, and David H. Weinberg**	209

Inhibition of Tumor Necrosis Factor α-Stimulated Aromatase Activity by Microtubule-Stabilizing Agents, Paclitaxel and 2-Methoxyestradiol **A. Purohit, A. Singh, M. W. Ghilchik, and M. J. Reed** 214

Lipoxygenase Inhibitors Abolish Proliferation of Human Pancreatic Cancer Cells **Xian-Zhong Ding, Patrick Iversen, Michael W. Cluck, Joseph A. Knezetic, and Thomas E. Adrian** 218

Number 2, August 2, 1999

BREAKTHROUGHS AND VIEWS

Molecular Mechanisms of Copper Homeostasis **J. Camakaris, I. Voskoboinik, and J. F. Mercer** 225

REGULAR ARTICLES

Silencer-Mediated Repression and Non-Mediated Activation of BDNF and c-*fos* Gene Promoters in Primary Glial or Neuronal Cells **Akiko Tabuchi, Chikako Nakatani, Ryuki Nakaoka, Yoshihisa Naruse, Takuya Kojima, Nozomu Mori, and Masaaki Tsuda** 233

Protein Expression in Liposomes **Thomas Oberholzer, Knud H. Nierhaus, and Pier Luigi Luisi** 238

σ Receptor Ligand-Induced Up-Regulation of the H^+/Peptide Transporter PEPT1 in the Human Intestinal Cell Line Caco-2 **Takuya Fujita, Yoshikatsu Majikawa, Sayoko Umehisa, Naoki Okada, Akira Yamamoto, Vadivel Ganapathy, and Frederick H. Leibach** 242

A Peptide of the $\alpha 3$ Chain of Type IV Collagen Protects Basement Membrane against Damage by PMN **Zahra Ziaie, Abdelilah Fawzi, Georges Bellon, Jean-Claude Monboisse, and Nicholas A. Kefalides** 247

Expression and Purification of Recombinant Human Granzyme B from *Pichia pastoris* **Jiuru Sun, Catherina H. Bird, Marguerite S. Buzza, Katherine E. McKee, James C. Whisstock, and Phillip I. Bird** 251

Inhibition of Mutant p53 Phosphorylation at Serine 15 or Serine 315 Partially Restores the Function of Wild-Type p53 **Emiko Sugikawa, Naoko Yazaki, Shiho Tsunoda, Noriyuki Nakanishi, and Motoaki Ohashi** 256

Unusual Self-Association Properties of Transthyretin Y114C Related to Familial Amyloidotic Polyneuropathy: Effects on Detection and Quantification **Yukio Ando, Maria do Rosário Almeida, Per-Ingvar Ohlsson, Eiko Ando, Akira Negi, Ole Suhr, Hisayasu Terazaki, Konen Obayashi, Masayuki Ando, and Maria J. M. Saraiva** 264

Recognition of Target DNA and Transcription Activation by the CO-Sensing Transcriptional Activator CooA **Shigetoshi Aono, Hidenori Takasaki, Hideaki Unno, Terue Kamiya, and Hiroshi Nakajima** 270

Elasticity of Mutant Myosin Subfragment-1 Arranged on a Functional Silver Surface	**Hitoshi Suda, Yuji C. Sasaki, Noboru Oishi, Nanae Hiraoka, and Kazuo Sutoh**	**276**
CD31 (PECAM-1) Exists as a Dimer and Is Heavily N-Glycosylated	**Justin P. Newton, Ann P. Hunter, David L. Simmons, Christopher D. Buckley, and David J. Harvey**	**283**
The Mode of Chaperoning of Dithiothreitol-Denatured α-Lactalbumin by α-Crystallin	**Frederick A. Bettelheim, Rafat Ansari, Qiu-Fang Cheng, and J. Samuel Zigler, Jr.**	**292**
Serum Amyloid A, an Acute-Phase Protein, Modulates Proteoglycan Synthesis in Cultured Murine Peritoneal Macrophages	**Rosemary Elliott-Bryant, Jeremiah E. Silbert, and Geetha Sugumaran**	**298**
Balloon Injury Does Not Induce Heme Oxygenase-1 Expression, but Administration of Hemin Inhibits Neointimal Formation in Balloon-Injured Rat Carotid Artery	**Toru Aizawa, Nobukazu Ishizaka, Jun-ichi Taguchi, Satoshi Kimura, Kiyoshi Kurokawa, and Minoru Ohno**	**302**
Inhibition of Vpr-Induced Cell Cycle Abnormality by Quercetin: A Novel Strategy for Searching Compounds Targeting Vpr	**Mari Shimura, Yu Zhou, Yoshihisa Asada, Takafumi Yoshikawa, Kiyohiko Hatake, Fumimaro Takaku, and Yukihito Ishizaka**	**308**
Targeting Double-Strand Breaks to Replicating DNA Identifies a Subpathway of DSB Repair That Is Defective in Ataxia-Telangiectasia Cells	**Robert T. Johnson, Eisuke Gotoh, Ann M. Mullinger, Anderson J. Ryan, Yosef Shiloh, Yael Ziv, and Shoshana Squires**	**317**
Elevated Expression of Free Deaminoneuraminic Acid in Mammalian Cells Cultured in Mannose-Rich Media	**Takashi Angata, Daisuke Nakata, Tsukasa Matsuda, and Ken Kitajima**	**326**
Polymorphisms in the *SOD2* and *HLA-DRB1* Genes Are Associated with Nonfamilial Idiopathic Dilated Cardiomyopathy in Japanese	**Shitoshi Hiroi, Haruhito Harada, Hirofumi Nishi, Manatsu Satoh, Ryozo Nagai, and Akinori Kimura**	**332**
Two Compounds Commonly Used for Phospholipase C Inhibition Activate the Nuclear Estrogen Receptors	**Bruno Cenni and Didier Picard**	**340**
Increased Vasoconstrictor Response of the Mouse Lacking Angiotensin II Type 2 Receptor	**Masahiro Akishita, Hiroyuki Yamada, Victor J. Dzau, and Masatsugu Horiuchi**	**345**
Targeted Disruption of CRE-Binding Factor TREB5 Gene Leads to Cellular Necrosis in Cardiac Myocytes at the Embryonic Stage	**Tamotsu Masaki, Mitsuaki Yoshida, and Shigeru Noguchi**	**350**
Heat Shock Cognate Protein 70 Is a Cell Fusion-Enhancing Factor but Not an Entry Factor for Human T-Cell Lymphotropic Virus Type I	**Deyu Fang, Yuji Haraguchi, Atsushi Jinno, Yasushi Soda, Nobuaki Shimizu, and Hiroo Hoshino**	**357**
Processing and Transport of ROMK1 Channel Is Temperature-Sensitive	**Manuel Brejon, Sophie Le Maout, Paul A. Welling, and Jean Merot**	**364**

Differential Regulation of 46 and 54 kDa Jun N-Terminal Kinases and p38 Mitogen-Activated Protein Kinase by Human α_{1A}-Adrenoceptors Expressed in Rat-1 Cells	**Alexander Alexandrov, Susanne Keffel, Mark Goepel, and Martin C. Michel**	**372**
Determination of Optimal Parameters for *in Vivo* Gene Transfer by Electroporation, Using a Rapid *in Vivo* Test for Cell Permeabilization	**Julie Gehl and Lluis M. Mir**	**377**
Characterization of the Promoter Region of the Human *RFP* Gene	**Yosuke Iwata, Atsuo Nakayama, Hideki Murakami, Ken-ichi Iida, Toshihide Iwashita, Naoya Asai, and Masahide Takahashi**	**381**
Tumor Necrosis Factor Induces Distinct Patterns of Caspase Activation in WEHI-164 Cells Associated with Apoptosis or Necrosis Depending on Cell Cycle Stage	**Paulo R. Faraco, Elizabeth C. Ledgerwood, Peter Vandenabeele, Johannes B. Prins, and John R. Bradley**	**385**
Molecular Cloning and Expression Analysis of a Mouse Phospholipase C-δ1	**Woon Kyu Lee, Jong Kee Kim, Min-Seok Seo, Jung-Ho Cha, Kyung Jin Lee, Hyoung Kyun Rha, Do Sik Min, Yang-Hyeok Jo, and Kweon-Haeng Lee**	**393**
Identification of a Novel Enhancer Sequence in the Distal Promoter of the Rat Fatty Acid Synthase Gene	**Caterina Rufo, Daniela Gasperikova, Steven D. Clarke, Margarita Teran-Garcia, and Manabu T. Nakamura**	**400**
Association of the HGF/SF Receptor, c-met, with the Cell-Surface Adhesion Molecule, E-Cadherin, and Catenins in Human Tumor Cells	**S. Hiscox and W. G. Jiang**	**406**
Molecular Cloning of Rat efp: Expression and Regulation in Primary Osteoblasts	**Satoshi Inoue, Tomohiko Urano, Sumito Ogawa, Tomoyuki Saito, Akira Orimo, Takayuki Hosoi, Yasuyoshi Ouchi, and Masami Muramatsu**	**412**
Regulation of Stretch-Activated Intracellular Calcium Transients by Actin Filaments	**Z. Wu, K. Wong, M. Glogauer, R. P. Ellen, and C. A. G. McCulloch**	**419**
Leptin Directly Stimulates Catecholamine Secretion and Synthesis in Cultured Porcine Adrenal Medullary Chromaffin Cells	**Kazuhiro Takekoshi, Masahiko Motooka, Kazumasa Isobe, Fumio Nomura, Toru Manmoku, Kiyoaki Ishii, and Toshiaki Nakai**	**426**
Isolation and Characterization of Kidney-Specific CLC-K2 Chloride Channel Gene Promoter	**Tatemitsu Rai, Shinichi Uchida, Sei Sasaki, and Fumiaki Marumo**	**432**
Regulation of Intracellular ATP Concentration under Conditions of Reduced ATP Consumption in Pancreatic Islets	**Yoshiyuki Tsuura, Shimpei Fujimoto, Mariko Kajikawa, Hitoshi Ishida, and Yutaka Seino**	**439**
Codon Optimization Effect on Translational Efficiency of DNA Vaccine in Mammalian Cells: Analysis of Plasmid DNA Encoding a CTL Epitope Derived from Microorganisms	**Toshi Nagata, Masato Uchijima, Atsushi Yoshida, Minae Kawashima, and Yukio Koide**	**445**

Interplay between the Efflux Pump and the Outer Membrane Permeability Barrier in Fluorescent Dye Accumulation in *Pseudomonas aeruginosa*	**Monika Germ, Eisaku Yoshihara, Hiroshi Yoneyama, and Taiji Nakae**	**452**
PPARγ Activation Induces the Expression of the Adipocyte Fatty Acid Binding Protein Gene in Human Monocytes	**Patricia D. Pelton, Lubing Zhou, Keith T. Demarest, and Thomas P. Burris**	**456**
A *Drosophila* CDK5α-like Molecule and Its Possible Role in Response to O_2 Deprivation	**Enbo Ma and Gabriel Haddad**	**459**
The p38MAPK Inhibitor SB203580 Alleviates Ultraviolet-Induced Phosphorylation at Serine 389 but Not Serine 15 and Activation of p53	**David Keller, Xiaoya Zeng, Xiaorong Li, Mini Kapoor, Mihail S. Iordanov, Yoichi Taya, Guillermina Lozano, Bruce Magun, and Hua Lu**	**464**
Study of the Relationship between Sticky Human Serum IgA1 and Its *O*-Glycan Glycoform	**Hitoo Iwase, Shinji Ohkawa, Ikuko Ishii-Karakasa, Yoshiyuki Hiki, Tohru Kokubo, Takashi Sano, Atsushi Tanaka, Kazunori Toma, Yutaka Kobayashi, and Kyoko Hotta**	**472**
Oxidative DNA Damage by Minor Metabolites of Toluene May Lead to Carcinogenesis and Reproductive Dysfunction	**Mariko Murata, Mayumi Tsujikawa, and Shosuke Kawanishi**	**478**
Carnitine Transporter OCTN2 Mutations in Systemic Primary Carnitine Deficiency: A Novel Arg169Gln Mutation and a Recurrent Arg282ter Mutation Associated with an Unconventional Splicing Abnormality	**Barbara Burwinkel, Joachim Kreuder, Susanne Schweitzer, Matthias Vorgerd, Klaus Gempel, Klaus-Dieter Gerbitz, and Manfred W. Kilimann**	**484**
The Epithelial Calcium Channel, ECaC, Is Activated by Hyperpolarization and Regulated by Cytosolic Calcium	**Joost G. J. Hoenderop, Annemiete W. C. M. van der Kemp, Anita Hartog, Carel H. van Os, Peter H. G. M. Willems, and René J. M. Bindels**	**488**
The Genomic Organization and Polymorphism Analysis of the Human Niemann-Pick C1 Gene	**Jill A. Morris, Dana Zhang, Katherine G. Coleman, James Nagle, Peter G. Pentchev, and Eugene D. Carstea**	**493**
Piceatannol, a Stilbene Phytochemical, Inhibits Mitochondrial F0F1-ATPase Activity by Targeting the F1 Complex	**Jianbiao Zheng and Victor D. Ramirez**	**499**
Inhibition of Calcium Signaling in Ultraviolet-Irradiated Fibroblasts: Role of Tyrosine Phosphorylation and Protein Kinase C	**Sebanti Bagchi, Gayaram Bhaumik, and Sanghamitra Raha**	**504**
Cellular Source(s) of Platelet-Activating-Factor Acetylhydrolase Activity in Plasma	**Koichiro Asano, Shinichiro Okamoto, Kouichi Fukunaga, Tetsuya Shiomi, Takehiko Mori, Makiko Iwata, Yasuo Ikeda, and Kazuhiro Yamaguchi**	**511**

Combined SSCP and Heteroduplex Analysis of the Human Plasma Membrane Ca^{2+}-ATPase Isoform 1 in Patients with Essential Hypertension — **C. Benkwitz, S. Oberdorf-Maass, and L. Neyses** — **515**

Functional Estrogen Receptor β in Colon Cancer Cells — **Gianna Fiorelli, Lucia Picariello, Valentina Martineti, Francesco Tonelli, and Maria Luisa Brandi** — **521**

Role of Phosphorylation and Physiological State in the Regulation of the Muscular Chloride Channel CIC-1: A Voltage-Clamp Study on Isolated *M. interosseus* Fibers — **Mei-Fang Chen and Harald Jockusch** — **528**

HIF1A Gene Transcription Is Dependent on a Core Promoter Sequence Encompassing Activating and Inhibiting Sequences Located Upstream from the Transcription Initiation Site and *cis* Elements Located within the 5′UTR — **E. Minet, I. Ernest, G. Michel, I. Roland, J. Remacle, M. Raes, and C. Michiels** — **534**

Identification of a Novel Splice Variant of Heat Shock Cognate Protein 70 after Chronic Antidepressant Treatment in Rat Frontal Cortex — **Misa Yamada, Mitsuhiko Yamada, Yuji Kiuchi, Keinosuke Nara, Yuko Kanda, Shigeru Morinobu, Kazutaka Momose, Katsuji Oguchi, Kunitoshi Kamijima, and Teruhiko Higuchi** — **541**

ERRATA

Volume **248,** Number 1 (1998), in Article No. RC988916, “The Localization of the Site of Arylalkylamine *N*-Acetyltransferase Circadian Expression in the Photoreceptor Cells of Mammalian Retina,” by Tomoko Niki, Toshiyuki Hamada, Michiko Ohtomi, Katsuhiko Sakamoto, Satoru Suzuki, Koichrou Kako, Yasuhiko Hosoya, Kazumasa Horikawa, and Norio Ishida, pages 115–120 — **546**

Volume **258,** Number 3 (1999), in Article ID bbrc.1999.0668, “The Expression of the Melatonin Synthesis Enzyme: Arylalkylamine *N*-Acetyltransferase in the Suprachiasmatic Nucleus of Rat Brain,” by Toshiyuki Hamada, Michiko Ootomi, Kazumasa Horikawa, Tomoko Niki, Hisanori Wakamatu, and Norio Ishida, pages 772–777 — **546**

Number 3, August 11, 1999

Increased Number of Caveolae and Caveolin-3 Overexpression in Duchenne Muscular Dystrophy — **Silvia Repetto, Massimo Bado, Paolo Broda, Giuseppe Lucania, Emiliana Masetti, Federica Sotgia, Ilaria Carbone, Antonio Pavan, Eduardo Bonilla, Giuseppe Cordone, Michael P. Lisanti, and Carlo Minetti** — **547**

Characterization and Phosphorylation of PDE10A2, a Novel Alternative Splice Variant of Human Phosphodiesterase That Hydrolyzes cAMP and cGMP — **Jun Kotera, Kotomi Fujishige, Keizo Yuasa, and Kenji Omori** — **551**

Identification of a Point Mutation in the *para*-Type Sodium Channel Gene from a Pyrethroid-Resistant Cattle Tick	**Haiqi He, Andrew C. Chen, Ronald B. Davey, G. Wayne Ivie, and John E. George**	558
Identification of an Extracellular Catalyst of Carbon Tetrachloride Dehalogenation from *Pseudomonas stutzeri* Strain KC as Pyridine-2,6-bis(thiocarboxylate)	**Chang-Ho Lee, Thomas A. Lewis, Andrzej Paszczynski, and Ronald L. Crawford**	562
An Immunoluminometric Assay for Cardiotrophin-1: A Newly Identified Cytokine Is Present in Normal Human Plasma and Is Increased in Heart Failure	**S. Talwar, P. F. Downie, I. B. Squire, D. B. Barnett, J. D. Davies, and L. L. Ng**	567
Retinoic Acid Receptor α Mediates Growth Inhibition by Retinoids in Human Colon Carcinoma HT29 Cells	**Barbara Nicke, Astrid Kaiser, Bertram Wiedenmann, Ernst-Otto Riecken, and Stefan Rosewicz**	572
Spontaneous Deamidation and Isomerization of Asn108 in Prion Peptide 106–126 and in Full-Length Prion Protein	**E. Sandmeier, P. Hunziker, B. Kunz, R. Sack, and P. Christen**	578
DNA Sequence Analysis of Spontaneous *tonB* Deletion Mutations in a *polA1* Strain of *Escherichia coli* K12	**Yumi Agemizu, Norio Uematsu, and Kazuo Yamamoto**	584
The Degradation of Nascent Fibrinogen Chains Is Mediated by the Ubiquitin Proteasome Pathway	**Hui Xia and Colvin Redman**	590
Rapid and Efficient Inactivation of IL-6 Gingipains, Lysine- and Arginine-Specific Proteinases from *Porphyromonas Gingivalis*	**Agnieszka Banbula, Marcin Bugno, Andrea Kuster, Peter C. Heinrich, James Travis, and Jan Potempa**	598
The 90-kDa Junctional Sarcoplasmic Reticulum Protein Forms an Integral Part of a Supramolecular Triad Complex in Skeletal Muscle	**Gabriele R. Froemming, Dirk Pette, and Kay Ohlendieck**	603
Characterization of Residues in Human IgE and IgG Binding Site by Chemical Modification of Ovomucoid Third Domain	**Jie Wei Zhang and Yoshinori Mine**	610
Human ZHX1: Cloning, Chromosomal Location, and Interaction with Transcription Factor NF-Y	**Kazuya Yamada, Richard L. Printz, Haruhiko Osawa, and Daryl K. Granner**	614
Isolation and Identification of Melanin-Concentrating Hormone as the Endogenous Ligand of the SLC-1 Receptor	**Yukio Shimomura, Masaaki Mori, Tsukasa Sugo, Yoshihiro Ishibashi, Michiko Abe, Tsutomu Kurokawa, Haruo Onda, Osamu Nishimura, Yasuhiro Sumino, and Masahiko Fujino**	622
The AU-Rich 3′ Untranslated Region of Human MDR1 mRNA Is an Inefficient mRNA Destabilizer	**Rebecca D. Prokipcak, Afshin Raouf, and Chunja Lee**	627

The Elastin-like Protein Matrix of Lamprey Branchial Cartilage Is Cross-Linked by Lysyl Pyridinoline	**Russell J. Fernandes and David R. Eyre**	**635**
JNK/SAPK Activation by Platelet-Derived Growth Factor in A431 Cells Requires Both the Phospholipase C-γ and the Phosphatidylinositol 3-Kinase Signaling Pathways of the Receptor	**Zerihun Assefa, Mindaugas Valius, Tibor Vántus, Patrizia Agostinis, Wilfried Merlevede, and Jackie R. Vandenheede**	**641**
hnRNP A2 and hnRNP L Bind the 3′UTR of Glucose Transporter 1 mRNA and Exist as a Complex *in Vivo*	**B. JoNell Hamilton, Ralph C. Nichols, Haruhisa Tsukamoto, Ruben J. Boado, William M. Pardridge, and William F. C. Rigby**	**646**
Multi-Site Modulation of Flux during Monolignol Formation in Loblolly Pine (*Pinus taeda*)	**Aldwin M. Anterola, Hendrik van Rensburg, Pieter S. van Heerden, Laurence B. Davin, and Norman G. Lewis**	**652**
CYP2A6 Gene Deletion Reduces Susceptibility to Lung Cancer	**Masami Miyamoto, Yuri Umetsu, Hirotoshi Dosaka-Akita, Yuichi Sawamura, Jun Yokota, Hideo Kunitoh, Nobuo Nemoto, Kunio Sato, Noritaka Ariyoshi, and Tetsuya Kamataki**	**658**
Up-Regulation of the Human γ-Glutamylcysteine Synthetase Regulatory Subunit Gene Involves Binding of Nrf-2 to an Electrophile Responsive Element	**Helen R. Moinova and R. Timothy Mulcahy**	**661**
Characterization of a Novel Allergen, a Major IgE-Binding Protein from *Aspergillus flavus,* as an Alkaline Serine Protease	**Chia-Jung Yu, Shyh-Horng Chiou, Wei-Yu Lai, Bor-Luen Chiang, and Lu-Ping Chow**	**669**
Minithioredoxin: A Folded and Functional Peptide Fragment of Thioredoxin	**Alokesh K. Ghoshal**	**676**
Glibenclamide Induces Apoptosis through Inhibition of Cystic Fibrosis Transmembrane Conductance Regulator (CFTR) Cl^- Channels and Intracellular Ca^{2+} Release in HepG2 Human Hepatoblastoma Cells	**Jung-Ae Kim, Young Shin Kang, Sun Hee Lee, Eun-Hee Lee, Byong Hoon Yoo, and Yong Soo Lee**	**682**
Effects of Exposure to Repetitive Pulsed Magnetic Stimulation on Cell Proliferation and Expression of Heat Shock Protein 70 in Normal and Malignant Cells	**Giichiro Tsurita, Shoogo Ueno, Nelson H. Tsuno, Hirokazu Nagawa, and Tetsuichiro Muto**	**689**
Spatial Organization of EGF Receptor Transmodulation by PDGF	**Pingsheng Liu and Richard G. W. Anderson**	**695**
Characterization of Cybrid Cell Lines Containing mtDNA from Huntington's Disease Patients	**Russell H. Swerdlow, Janice K. Parks, David S. Cassarino, A. Tanner Shilling, James P. Bennett, Jr., Madaline B. Harrison, and W. Davis Parker, Jr.**	**701**

The 5′-Flanking Sequence and Regulatory Elements of the Cystatin S Gene	**Phyllis A. Shaw and Orlando Chaparro**	705
The Trace and Subgrouping of Lymphocyte Activation by Dynamic Fluorescence Intensity and Polarization Measurements	**Merav Sunray, Menachem Kaufman, Naomi Zurgil, and Mordechai Deutsch**	712
Tyrosinase Folding and Copper Loading *in Vivo:* A Crucial Role for Calnexin and α-Glucosidase II	**N. Branza-Nichita, A. J. Petrescu, R. A. Dwek, M. R. Wormald, F. M. Platt, and S. M. Petrescu**	720
Cholecystokinin-Evoked Ca^{2+} Waves in Isolated Mouse Pancreatic Acinar Cells Are Modulated by Activation of Cytosolic Phospholipase A$_2$, Phospholipase D, and Protein Kinase C	**Antonio González, Andreas Schmid, Lutz Sternfeld, Elmar Krause, Ginés M. Salido, and Irene Schulz**	726
Activator-Specific Requirement for the General Transcription Factor IIE in Yeast	**Hiroshi Sakurai and Toshio Fukasawa**	734
Purification and Characterization of an RNA Dodecamer Sequence Binding Protein from Mitochondria of *Saccharomyces cerevisiae*	**Huilin Li and H. Peter Zassenhaus**	740
Three New Types of Apaf-1 in Mammalian Cells	**Corinna Hahn, Burkhard Hirsch, Diana Jahnke, Horst Dürkop, and Harald Stein**	746
Loss of Cytoplasmic Retention Ability of Mutant LKB1 Found in Peutz-Jeghers Syndrome Patients	**Jun-ichi Nezu, Asuka Oku, and Miyuki Shimane**	750
Characterization of a Novel Member of the FGF Family, XFGF-20, in *Xenopus laevis*	**Chie Koga, Naoki Adati, Katsunori Nakata, Katsuhiko Mikoshiba, Yoshiaki Furuhata, Shinji Sato, Hajime Tei, Yoshiyuki Sakaki, Tsutomu Kurokawa, Koichiro Shiokawa, and Kazunari K. Yokoyama**	756
Stress-Responsive and Developmental Regulation of Δ^1-Pyrroline-5-carboxylate Synthetase 1 (P5CS1) Gene Expression in *Arabidopsis thaliana*	**Yoshu Yoshiba, Tokihiko Nanjo, Setsuko Miura, Kazuko Yamaguchi-Shinozaki, and Kazuo Shinozaki**	766
A Point Mutation in a Plasma Membrane Ca^{2+}-ATPase Gene Causes Deafness in *Wriggle Mouse Sagami*	**Katsumasa Takahashi and Ken Kitamura**	773
Glutathione Transferase Zeta-Catalyzed Biotransformation of Deuterated Dihaloacetic Acids	**Michael F. Wempe, Wayne B. Anderson, Huey-fen Tzeng, Philip G. Board, and M. W. Anders**	779
Characterization of Liposomes Carrying von Willebrand Factor-Binding Domain of Platelet Glycoprotein Ibα: A Potential Substitute for Platelet Transfusion	**Tetsuya Kitaguchi, Mitsuru Murata, Kaori Iijima, Kaeko Kamide, Takashi Imagawa, and Yasuo Ikeda**	784

The Carboxyl Methyltransferase Modifying G Proteins Is a Metalloenzyme	**Richard R. Desrosiers, Quynh-Tran Nguyen, and Richard Béliveau**	**790**
Maize Transposable Element *Ds* Is Differentially Spliced from Primary Transcripts in Endosperm and Suspension Cells	**Shailesh K. Lal and L. Curtis Hannah**	**798**
Defining Functional Domains of Ku80: DNA End Binding and Survival after Radiation	**O. Osipovich, R. J. Duhe, P. Hasty, S. K. Durum, and K. Muegge**	**802**
Identification and Characterization of PNKβ, a Novel Isoform of Protein Kinase PKN: Expression and Arachidonic Acid Dependency Are Different from Those of PKNα	**Kumiko Oishi, Hideyuki Mukai, Hideki Shibata, Mikiko Takahashi, and Yoshitaka Ona**	**808**
Inhibition and Binding Studies of Coenzyme A and Bovine Phenol Sulfotransferase	**Michael Leach, Emily Cameron, Nathan Fite, Jerry Stassinopoulos, Neal Palmreuter, and Joe D. Beckmann**	**815**
Integrins Mediate the Inhibitory Effect of Focal Adhesion on Angiotensin II-Induced p44/42 Mitogen-Activated Protein (MAP) Kinase Activity in Human Mesangial Cells	**Yasushi Shikata, Kenichi Shikata, Mitsuhiro Matsuda, Keita Hiragushi, Daisuke Ogawa, Hikaru Sugimoto, Jun Wada, and Hirofumi Makino**	**820**
A Novel Vaccine Delivery System Using Immunopotentiating Fusogenic Liposomes	**Akira Hayashi, Tsuyoshi Nakanishi, Jun Kunisawa, Masuo Kondoh, Susumu Imazu, Yasuo Tsutsumi, Keiichi Tanaka, Hiromi Fujiwara, Toshiyuki Hamaoka, and Tadanori Mayumi**	**824**
An *Arabidopsis thaliana* cDNA Complements the *N*-Acetylglucosaminyltransferase I Deficiency of CHO Lec1 Cells	**Hans Bakker, Arjen Lommen, Wilco Jordi, Willem Stiekema, and Dirk Bosch**	**829**
Troglitazone Suppresses Cell Growth of Myeloid Leukemia Cell Lines by Induction of p21WAF1/CIP1 Cyclin-Dependent Kinase Inhibitor	**Atsushi Sugimura, Yoshimitsu Kiriyama, Hiromi Nochi, Hiroyuki Tsuchiya, Kouichi Tamoto, Yuhsuke Sakurada, Michio Ui, and Yukiko Tokumitsu**	**833**
Primary Structure of *Dioclea glabra* Trypsin Inhibitor, DgTI, a Bowman–Birk Inhibitor	**Norlene R. Bueno, Hans Fritz, Ennes A. Auerswald, Reinhart Mentele, Misako Sampaio, Claudio A. M. Sampaio, and Maria Luiza V. Oliva**	**838**
Mutagenic Activity and DNA Adduct Formation by 1,2-Epoxy-3-(*p*-nitrophenoxy)propane, an HIV-1 Protease Inhibitor and GST Substrate	**Boctor Said, Diane C. Matsumoto, Ali K. Hamade, and Ronald C. Shank**	**844**
Overexpression of c-Fos Enhances the Transcription of Human Arachidonate 12-Lipoxygenase in A431 Cells	**Ben-Kuen Chen and Wen-Chang Chang**	**848**
An Aldose Reductase Inhibitor Prevents the Glucose-Induced Increase in PDGF-β Receptor in Cultured Rat Aortic Smooth Muscle Cells	**Yasuhide Kasuya, Jiro Nakamura, Yoji Hamada, Mikihiro Nakayama, Hiromitu Sasaki, Taku Komori, Sadao Chaya, Genichi Watanabe, Keiko Naruse, Eitaro Nakashima, Koichi Kato, and Nihishi Hotta**	**853**

Transcriptional Activation of Apurinic/Apyrimidinic Endonuclease (Ape, Ref-1) by Oxidative Stress Requires CREB — **Sabine Grösch and Bernd Kaina** — **859**

Isolation of Differentially Expressed cDNAs from p53-Dependent Apoptotic Cells: Activation of the Human Homologue of the *Drosophila* Peroxidasin Gene — **Nobuo Horikoshi, Jainping Cong, Nikoli Kley, and Thomas Shenk** — **864**

Role of the β_3-Adrenergic Receptor and/or a Putative β_4-Adrenergic Receptor on the Expression of Uncoupling Proteins and Peroxisome Proliferator-Activated Receptor-γ Coactivator-1 — **Olivier Boss, Eric Bachman, Antonio Vidal-Puig, Chen-Yu Zhang, Odile Peroni, and Bradford B. Lowell** — **870**

Carbachol Activates IκB Kinase in Isolated Canine Gastric Parietal Cells — **Andrea Todisco, Saravanan Ramamoorthy, Nonthalee Pausawasdi, and Kristina Tacey** — **877**

A [2Fe–2S] Protein from the Hyperthermophilic Bacterium *Aquifex Aeolicus* — **Claire Chatelet, Jacques Gaillard, Yves Pétillot, Mathilde Louwagie, and Jacques Meyer** — **885**

p27 Modulates Cell Cycle Progression and Chemosensitivity in Human Malignant Glioma — **Ulrike Naumann, Simone Weit, Lorenz Rieger, Richard Meyermann, and Michael Weller** — **890**

Heregulin Regulation of Akt/Protein Kinase B in Breast Cancer Cells — **Wei Liu, Jinping Li, and Richard A. Roth** — **897**

Expression of Collagenase-3 (MMP-13) in Human Abdominal Aortic Aneurysms and Vascular Smooth Muscle Cells in Culture — **Dongli Mao, Jason K. Lee, Sarah J. VanVickle, and Robert W. Thompson** — **904**

TIP120B: A Novel TIP120-Family Protein That Is Expressed Specifically in Muscle Tissues — **Tsutomu Aoki, Nami Okada, Michiko Ishida, Shingo Yogosawa, Yasutaka Makino, and Taka-aki Tamura** — **911**

Hepatic Ischemia/Reperfusion in Rats Induces iNOS Gene Transcription by Activation of NF-κB — **Gang Min Hur, Young Sue Ryu, Hyo Yung Yun, Byeong Hwa Jeon, Yong Man Kim, Jeong Ho Seok, and Jae Heun Lee** — **917**

Insect Glycobiology: A Lectin Multigene Family in *Drosophila melanogaster* — **Ulrich Theopold, Michael Rissler, Marco Fabbri, Otto Schmidt, and Shunji Natori** — **923**

Author Index for Volume 261 — **928**

Volume 262, Number 1, August 19, 1999

BREAKTHROUGHS AND VIEWS

Cdc42, Rac1, and Their Effector IQGAP1 as Molecular Switches for Cadherin-Mediated Cell–Cell Adhesion — **Shinya Kuroda, Masaki Fukata, Masato Nakagawa, and Kozo Kaibuchi** 1

REGULAR ARTICLES

Quantification of the Human Granulocytic Ehrlichiosis Agent Based on Analysis of rRNA Isolated from Control and Infected HL-60 Cells — **Joseph M. Wu, Carol A. Whyzmuzis, Michael G. Bertone, Bao-sen Zhou, and Tze-chen Hsieh** 7

Evidence for the Involvement of JAK/STAT Pathway in the Signaling Mechanism of Interleukin-17 — **S. Vaidyanathan Subramaniam, Roland S. Cooper, and Samuel E. Adunyah** 14

Resveratrol Is a Selective Human Cytochrome P450 1A1 Inhibitor — **Young Jin Chun, Mie Young Kim, and F. Peter Guengerich** 20

$p130^{Cas}$, an Assembling Molecule of Actin Filaments, Promotes Cell Movement, Cell Migration, and Cell Spreading in Fibroblasts — **Hiroaki Honda, Tetsuya Nakamoto, Ryuichi Sakai, and Hisamaru Hirai** 25

CHOP/GADD153 and Methionyl-tRNA Synthetase (MetRS) Genes Overlap in a Conserved Region That Controls mRNA Stability — **Mariano Ubeda, Michel Schmitt-Ney, Jorge Ferrer, and Joel F. Habener** 31

Molecular Cloning of *Frizzled-10,* a Novel Member of the *Frizzled* Gene Family — **Jun Koike, Atsushi Takagi, Takeshi Miwa, Momoki Hirai, Masaaki Terada, and Masaru Katoh** 39

Characterization of *Acholeplasma laidlawii ftsZ* Gene and Its Gene Product — **A. V. Kukekova, A. Yu. Malinin, J. A. Ayala, and S. N. Borchsenius** 44

Serum Induction of the Collagen X Promoter Requires the Raf/MEK/ERK and p38 Pathways — **Frank Beier and Phyllis LuValle** 50

Repression of A $TAF_{II}32$ Isoform as Part of a Program of Genes Regulated during Mpl Ligand-Induced Megakaryocyte Differentiation — **Alexander Thompson and Katya Ravid** 55

The Lysine-Specific Proteinase from *Armillaria mellea* Is a Member of a Novel Class of Metalloendopeptidases Located in Basidiomycetes — **Vincent Healy, Joe O'Connell, Tommie V. McCarthy, and Shawn Doonan** 60

Inhibition of Crossbridge Function in the Normal Human Heart by Hypoxic Endothelial Superfusate — **Udo B. Zacharzowsky, Ajay M. Shah, Hannelore Haase, and Ingo Morano** 64

Enhanced Phosphatidylinositol 3-Kinase Activity and High Phosphorylation State of Its Downstream Signalling Molecules Mediated by Ret with the MEN 2B Mutation	**Hideki Murakami, Toshihide Iwashita, Naoya Asai, Yohei Shimono, Yosuke Iwata, Kumi Kawai, and Masahide Takahashi**	**68**
Adrenergic Stimulation of Hepatocyte Growth Factor Expression	**Jessica Broten, George Michalopoulos, Bryon Petersen, and Jennifer Cruise**	**76**
Biochemical Characterization of Lucigenin (Bis-*N*-methylacridinium) as a Chemiluminescent Probe for Detecting Intramitochondrial Superoxide Anion Radical Production	**Yunbo Li, Kevin H. Stansbury, Hong Zhu, and Michael A. Trush**	**80**
Developmental Expression of Sarcoglycan Gene Products in Cultured Myocytes	**Satoru Noguchi, Eriko Wakabayashi, Michihiro Imamura, Mikiharu Yoshida, and Eijiro Ozawa**	**88**
Construction of an Artificial Tandem Protein of the c-Myb DNA-Binding Domain and Analysis of Its DNA Binding Specificity	**Masayuki Oda, Koji Furukawa, Akinori Sarai, and Haruki Nakamura**	**94**
Characterization of Myosin V from PC12 Cells	**Philip Wolff, Patricia A. E. Abreu, Enilza M. Espreafico, M. Cristina R. Costa, Roy E. Larson, and Paulo Lee Ho**	**98**
Molecular Characterization of the First Heat Shock Protein 70 from a Reef Coral	**Moshe Tom, Jacob Douek, Irena Yankelevich, Thomas C. G. Bosch, and Baruch Rinkevich**	**103**
Lipid Peroxidation Is an Early Event in Necrosis of Wheat Hybrid	**Monika Dalal and Renu Khanna-Chopra**	**109**
ZBP-99 Defines a Conserved Family of Transcription Factors and Regulates Ornithine Decarboxylase Gene Expression	**David J. Law, Ming Du, G. Lynn Law, and Juanita L. Merchant**	**113**
Transport of Phosphatidylcholine in MDR3-Negative Epithelial Cell Lines via Drug-Induced MDR1 P-Glycoprotein	**Abedel-nasser Ghazi Abulrob and Mark Gumbleton**	**121**
Properties of Thiol-Specific Anti-oxidant Protein or Calpromotin in Solution	**Poul Kristensen, Daniel E. Rasmussen, and Berit I. Kristensen**	**127**
Computational EST Database Analysis Identifies a Novel Member of the Neuropoietic Cytokine Family	**Y. Shi, W. Wang, P. A. Yourey, S. Gohari, D. Zukauskas, J. Zhang, S. Ruben, and R. F. Alderson**	**132**
The Putative Apoptosis Inhibitor IEX-1L Is a Mutant Nonspliced Variant of $p22^{PRG1/IEX-1}$ and Is Not Expressed *in Vivo*	**Heiner Schäfer, Alexander Arlt, Anna Trauzold, Anke Hünermann-Jansen, and Wolfgang E. Schmidt**	**139**
The Significance of the Homozygous *CYP*2A6 Deletion on Nicotine Metabolism: A New Genotyping Method of *CYP*2A6 Using a Single PCR-RFLP	**Kyoko Kitagawa, Naoki Kunugita, Takahiko Katoh, Mihi Yang, and Toshihiro Kawamoto**	**146**

The Molecular Chaperone αB-crystallin Enhances Amyloid β Neurotoxicity	**G. J. J. Stege, K. Renkawek, P. S. G. Overkamp, P. Verschuure, A. F. van Rijk, A. Reijnen-Aalbers, W. C. Boelens, G. J. C. G. M. Bosman, and W. W. de Jong**	**152**
Phosphorylation by p44 MAP Kinase/ERK1 Stimulates CBP Histone Acetyl Transferase Activity *in Vitro*	**Slimane Ait-Si-Ali, Didier Carlisi, Sandra Ramirez, Lia-Cristina Upegui-Gonzalez, Arnaud Duquet, Philippe Robin, Brian Rudkin, Annick Harel-Bellan, and Didier Trouche**	**157**
Lipoamide Dehydrogenase Deficiency Due to a Novel Mutation in the Interface Domain	**Eilon Shany, Ann Saada, Daniella Landau, Avraham Shaag, Eli Hershkovitz, and Orly N. Elpeleg**	**163**
Preparation of Monoclonal Antibodies to Murine Platelet Glycoprotein IIb/IIIa (αIIbβ3) and Other Proteins from Hamster–Mouse Interspecies Hybridomas	**Stephan Lengweiler, Susan S. Smyth, Marketa Jirouskova, Lesley E. Scudder, Helen Park, Thomas Moran, and Barry S. Coller**	**167**
The G464S Amino Acid Substitution in *Candida albicans* Sterol 14α-Demethylase Causes Fluconazole Resistance in the Clinic through Reduced Affinity	**Steven L. Kelly, David C. Lamb, Juergen Loeffler, Herman Einsele, and Diane E. Kelly**	**174**
High Affinity Displacement of [^{3}H]NPY Binding to the Crude Venom of *Conus anemone* by Insect Neuropeptides	**Minh Tam Le, Patrick M. L. Vanderheyden, Jean-Paul De Backer, Georges Vanquelin, and Jozef Vanden Broeck**	**180**
Analysis of a 762-bp Proximal Leptin Promoter to Drive and Control Regulation of Transgene Expression of Growth Hormone Receptor in Mice	**X-L. Chen, D. L. Hartzell, R. A. McGraw, G. J. Hausman, R. G. Dean, K. Lee, and C. A. Baile**	**187**
Sulfated Tyrosines of Thyroglobulin Are Involved in Thyroid Hormone Synthesis	**Marie-Christine Nlend, David Cauvi, Nicole Venot, and Odile Chabaud**	**193**
The DNA-Binding and Transcriptional Activities of MAZ, a Myc-Associated Zinc Finger Protein, Are Regulated by Casein Kinase II	**Hatsumi Tsutsui, Christian Geltinger, Takehide Murata, Keiichi Itakura, Tadashi Wada, Hiroshi Handa, and Kazunari K. Yokoyama**	**198**
Enhanced GRK5 Expression in the Hearts of Cardiomyopathic Hamsters, J2N-k	**Chika Takagi, Kazushi Urasawa, Ichiro Yoshida, Yasushi Takagi, Satoshi Kaneta, Noritsugu Nakano, Hisao Onozuka, and Akira Kitabatake**	**206**
The Kinase Inhibitor Fasudil (HA-1077) Reduces Intimal Hyperplasia through Inhibiting Migration and Enhancing Cell Loss of Vascular Smooth Muscle Cells	**Nobuyuki Negoro, Masaaki Hoshiga, Minoru Seto, Eiko Kohbayashi, Masaaki Ii, Ryosuke Fukui, Nobuhiko Shibata, Takahiro Nakakoji, Futoshi Nishiguchi, Yasuharu Sasaki, Tadashi Ishihara, and Nakaaki Ohsawa**	**211**

PPARγ Ligand-Dependent Induction of STAT1, STAT5A, and STAT5B during Adipogenesis	**Jacqueline M. Stephens, Ron F. Morrison, Zhidan Wu, and Stephen R. Farmer**	216
Molecular Cloning and Genomic Organization of Mouse Homologue of *Drosophila germ cell-less* and Its Expression in Germ Lineage Cells	**Tohru Kimura, Kentaro Yomogida, Naomi Iwai, Yukiko Kato, and Toru Nakano**	223
Involvement of Receptor Aggregation and Reactive Oxygen Species in Osmotic Stress-Induced Syk Activation in B Cells	**Suofu Qin, Junyi Ding, Tomoko Takano, and Hirohei Yamamura**	231
Molecular Cloning and Functional Characterization of a Human Homologue of Centaurin-α	**Kanamarlapudi Venkateswarlu and Peter J. Cullen**	237
Helicobacter pylori Vacuolating Cytotoxin (VacA) Disorganizes the Cytoskeletal Architecture of Gastric Epithelial Cells	**Rama Pai, Timothy L. Cover, and Andrzej S. Tarnawski**	245
Lipopolysaccharide Inhibits the Expression of the Scavenger Receptor Cla-1 in Human Monocytes and Macrophages	**Christa Buechler, Mirko Ritter, Chinh Duong Quoc, Asu Agildere, and Gerd Schmitz**	251
Modification of the Mitochondrial Sulfonylurea Receptor by Thiol Reagents	**Adam Szewczyk, Grażyna Wójcik, Nikolai A. Lobanov, and Maciej J. Nałęcz**	255
Variants of Endothelin-1 and Its Receptors in Atopic Asthma	**Xiao-Quan Mao, Pei-Song Gao, Mark H. Roberts, Tadao Enomoto, Mitsuru Kawai, Sei Sasaki, Sarah R. Shaldon, Phillip Coull, Yasuhiro Dake, Chaker N. Adra, Akihito Hagihara, Taro Shirakawa, and Julian M. Hopkin**	259
Atypical Processing of Amyloid Precursor Fusion Protein by Proteolytic Activity in *Pichia pastoris*	**Adam Markaryan, Irina Morozova, Bao-Shiang Lee, and Arnold Kaplan**	263
Structural Organization of the 5′-End and Chromosomal Assignment of Human Placental Leucine Aminopeptidase/Insulin-Regulated Membrane Aminopeptidase Gene	**Jun Horio, Seiji Nomura, Mayumi Okada, Yoshinari Katsumata, Yutaka Nakanishi, Yoshiharu Kumano, Satoshi Takami, Moritoshi Kinoshita, Masafumi Tsujimoto, Hiroshi Nakazato, and Shigehiko Mizutani**	269
Unsaturated Long-Chain *N*-Acyl-vanillyl-amides (N-AVAMs): Vanilloid Receptor Ligands That Inhibit Anandamide-Facilitated Transport and Bind to CB1 Cannabinoid Receptors	**Dominique Melck, Tiziana Bisogno, Luciano De Petrocellis, Huai-hu Chuang, David Julius, Maurizio Bifulco, and Vincenzo Di Marzo**	275
Poly (ADP-ribose) Polymerase Is Involved in PMA-induced Activation of HIV-1 in U1 Cells by Modulating the LTR Function	**Masanori Kameoka, Yasuharu Tanaka, Katsuya Ota, Asako Itaya, and Koichiro Yoshihara**	285
Hypoxia Induces Activation and Subcellular Translocation of Focal Adhesion Kinase (p125^{FAK}) in Cultured Rat Cardiac Myocytes	**Yoshinori Seko, Naoyuki Takahashi, Hisataka Sabe, Kazuyuki Tobe, Takashi Kadowaki, and Ryozo Nagai**	290

Tryptophanless Recombinant Horseradish Peroxidase: Stability and Catalytic Properties — **I. G. Gazaryan, T. A. Chubar, O. V. Ignatenko, E. A. Mareeva, M. A. Orlova, Yu. L. Kapeliuch, P. A. Savitsky, A. M. Rojkova, and V. I. Tishkov** **297**

Molecular Cloning and Characterization of a Thioredoxin Gene from *Echinococcus granulosus* — **Cora Chalar, Claudio Martínez, Astrid Agorio, Gustavo Salinas, Jeannette Soto, and Ricardo Ehrlich** **302**

Conserved and Hybrid *meta*-Cleavage Operons from PAH-degrading *Burkholderia* RP007 — **Andrew D. Laurie and Gareth Lloyd-Jones** **308**

Number 2, August 27, 1999

Regulation of Complement Factor H Expression in L Cells — **Dennis P. Vik** **315**

Structure-Activity Relationships of Calcicludine and Dendrotoxin-I, Homologous Peptides Acting on Different Targets, Calcium and Potassium Channels — **Hideki Nishio, Etsuko Katoh, Toshimasa Yamazaki, Tatsuya Inui, Yuji Nishiuchi, and Terutoshi Kimura** **319**

Effects of β-Glucuronidase-Deficient and Lycopene-Producing *Escherichia coli* Strains on Formation of Azoxymethane-Induced Aberrant Crypt Foci in the Rat Colon — **Hideki Arimochi, Keiko Kataoka, Tomomi Kuwahara, Haruyuki Nakayama, Norihiko Misawa, and Yoshinari Ohnishi** **322**

Molecular Cloning and Sequence Analysis of a cDNA for Factor V Activating Enzyme, a Coagulant Protein from *Vipera lebetina* Snake Venom — **Ene Siigur, Anu Aaspõllu, and Jüri Siigur** **328**

Expression of the VEGF Gene Family during Retinal Vaso-Obliteration and Hypoxia — **David A. C. Simpson, Grainne M. Murphy, Tisha Bhaduri, Thomas A. Gardiner, Desmond B. Archer, and Alan W. Stitt** **333**

Interaction of the Retinal G-Protein Transducin with Uracil Nucleotides — **Jan F. Klinker and Roland Seifert** **341**

Differences in the Time Course of the Metabolic Response of B and Non-B Pancreatic Islet Cells to D-Glucose and Metabolized or Non-metabolized Hexose Esters — **Dany Mercan, Marcel M. Kadiata, and Willy J. Malaisse** **346**

Activation of Rac1 Increases c-Jun NH_2-Terminal Kinase Activity and DNA Fragmentation in a Calcium-Dependent Manner in Rat Myoblast Cell Line H9c2 — **Motohiro Nishida, Taku Nagao, and Hitoshi Kurose** **350**

Nitric Oxide Inhibits Ornithine Decarboxylase by S-Nitrosylation — **Philip M. Bauer, Jon M. Fukuto, Georgette M. Buga, Anthony E. Pegg, and Louis J. Ignarro** 355

Inorganic Phosphate Regulates CryIVA Protoxin Expression in *Bacillus thuringiensis israelensis* — **Nirupama Banerjee-Bhatnagar** 359

A Novel Strategy for Identifying Differential Gene Expression: An Improved Method of Differential Display Analysis — **Junya Kohroki, Mikako Tsuchiya, Sayaka Fujita, Tsuyoshi Nakanishi, Norio Itoh, and Keiichi Tanaka** 365

Cloning and Characterization of *psu1*$^{+}$, a New Essential Fission Yeast Gene Involved in Cell Wall Synthesis — **Kazuo Omi, Hikaru Sonoda, Kiyoshi Nagata, and Kenji Sugita** 368

Sesquiterpene Lactones Inhibit Inducible Nitric Oxide Synthase Gene Expression in Cultured Rat Aortic Smooth Muscle Cells — **Hector R. Wong and Ingrid Y. Menendez** 375

Differences in Expression of Pro-Caspases in Small Cell and Non-small Cell Lung Carcinoma — **Bertrand Joseph, Jessica Ekedahl, Florin Sirzen, Rolf Lewensohn, and Boris Zhivotovsky** 381

Identification and Characterization of Human Fas Associated Factor 1, hFAF1 — **Seung-Wook Ryu, Suhn-Kee Chae, Kong-Joo Lee, and Eunhee Kim** 388

Acquisition of Ordered Conformation by the N-terminal Domain of the Human Small Proline Rich 2 Protein — **Eleonora Candi, Gerry Melino, Marco Sette, Sergio Oddi, Pietro Guerrieri, and Maurizio Paci** 395

Anomeric Specificity and Protein–Substrate Interactions Support the 3D Model for the Hemagglutinin–Neuraminidase from Sendai Virus — **Tiziana Bellini, Claudia Pasti, Maria Cristina Manfrinato, Maurizio Tomasi, and Franco Dallocchio** 401

Fast Laser-Induced Solute Release from Liposomes Sensitized with Photochromic Lipid: Effects of Temperature, Lipid Host, and Sensitizer Concentration — **Roger H. Bisby, Carole Mead, Andrew C. Mitchell, and Christopher G. Morgan** 406

Structural Analysis of the Titin Gene in Hypertrophic Cardiomyopathy: Identification of a Novel Disease Gene — **Manatsu Satoh, Megumi Takahashi, Tsuguya Sakamoto, Michiaki Hiroe, Fumiaki Marumo, and Akinori Kimura** 411

Substance P Regulates the Function of Rabbit Cultured Osteoclast; Increase of Intracellular Free Calcium Concentration and Enhancement of Bone Resorption — **Takahisa Mori, Tadanori Ogata, Hideo Okumura, Taihoh Shibata, Yoichi Nakamura, and Kiyoshi Kataoka** 418

The Importance of L-Phenylalanine Transport and Its Autocrine Turnover to L-Tyrosine for Melanogenesis in Human Epidermal Melanocytes — **K. U. Schallreuter and J. M. Wood** 423

Human T-Cell Lymphotrophic Virus Type-I *tax* Gene Induces Secretion of Human Macrophage Inflammatory Protein-1α — **Venkatanarayanan Sharma and Cynthia C. May** 429

Hepatoma-Derived Growth Factor-Related Protein (HRP)-1 Gene in Spermatogenesis in Mice	**Toshifumi Kuroda, Hitomitsu Tanaka, Hideji Nakamura, Yoshitake Nishimune, and Tadamitsu Kishimoto**	**433**
Mouse Phosphoinositide 3-Kinase p110α Gene: Cloning, Structural Organization, and Localization to Chromosome 3 Band B	**Ibrahim A. Aksoy, Marilyn J. Ramsey, David A. Fruman, Saime Aksoy, Lewis C. Cantley, James D. Tucker, and Thomas M. Roberts**	**438**
Hedgehog Signaling Molecules in Bone Marrow Cells at the Initial Stage of Fracture Repair	**Hiromu Ito, Haruhiko Akiyama, Chohei Shigeno, Ken-ichi Iyama, Hideaki Matsuoka, and Takashi Nakamura**	**443**
Characterization of the Promoter Region of the Human Melanocortin-1 Receptor (MC1R) Gene	**Osamu Moro, Ritsuro Ideta, and Ohji Ifuku**	**452**
Substitution of the 2′-Hydroxyl Group at Position 2.1 by an Amino Group Interferes with Mg^{2+} Binding and Efficient Cleavage by Hammerhead Ribozyme	**Mouldy Sioud and Marianne Leirdal**	**461**
Differential Utilization of Cyclic ADP-Ribose Pathway by Chemokines to Induce the Mobilization of Intracellular Calcium in NK Cells	**Marit Inngjerdingen, Ala Al-Aoukaty, Bassam Damaj, and Azzam A. Maghazachi**	**467**
Influence of N-Glycan Chain Length on Chaperone Association and Intracellular Transport of Major Histocompatibility Complex Class I Proteins	**Michael J. Bennett and Kelly P. Kearse**	**473**
Regulation of Oscillations in Filamentous Actin Content in Polymorphonuclear Leukocytes Stimulated with Leukotriene B_4 and Platelet-Activating Factor	**Ramesh Rengan and Geneva M. Omann**	**479**
The Molecular Basis for the *B(A)* Allele: An Amino Acid Alteration in the Human Histoblood Group B α-(1,3)-Galactosyltransferase Increases Its Intrinsic α-(1,3)-*N*-Acetylgalactosaminyltransferase Activity	**Lung-Chih Yu, Hui-Lin Lee, Yung-Syu Chan, and Marie Lin**	**487**
Transcriptional Suppression of Rat Angiotensin AT1a Receptor Gene Expression by Interferon-γ in Vascular Smooth Muscle Cells	**Yukio Ikeda, Kazuhisa Takeuchi, Taro Kato, Yoshihiro Taniyama, Kazunori Sato, Nobuyuki Takahashi, Akira Sugawara, and Sadayoshi Ito**	**494**
Relationship between mRNA Levels Quantified by Reverse Transcription-Competitive PCR and Metabolic Activity of CYP3A4 and CYP2E1 in Human Liver	**Akihiko Sumida, Kayoko Kinoshita, Tsuyoshi Fukuda, Hideyasu Matsuda, Isamu Yamamoto, Tadanobu Inaba, and Junichi Azuma**	**499**
Functional Heterogeneity of C-Terminal Peroxisome Targeting Signal 1 in *PEX5*-Defective Patients	**Nobuyuki Shimozawa, Zhongyi Zhang, Yasuyuki Suzuki, Atsushi Imamura, Toshiro Tsukamoto, Takashi Osumi, Yukio Fujiki, Tadao Orii, Peter G. Barth, Ronald J. A. Wanders, and Naomi Kondo**	**504**

Characterization of *cis*-Elements Required for the Transcriptional Activation of the *rae28/mph1* Gene in F9 Cells — **Md. Abdul Motaleb, Yoshihiro Takihara, Hideaki Ohta, and Kazunori Shimada** 509

Involvement of c-Jun NH_2-Terminal Kinase Pathway in Differential Regulation of Heat Shock Proteins by Anticancer Drugs — **Sun Hee Kim, Dooha Kim, Gyoo Sik Jung, Jee Hyun Um, Byung Seon Chung, and Chi Dug Kang** 516

Sequences at the 3′ Side of the *c-fos* SRE Mediate Gene Expression via an Sob1-Dependent, TCF-Independent Pathway — **Obe I. Omoike, Beverly A. Benson, Marcia A. Chan, and Stephen H. Benedict** 523

Replication of Hepatitis B Virus Which Carries Foreign DNA *in Vitro* — **Tadashi Hanafusa, Yasuhiro Yumoto, Hajime Hada, Toshiyuki Shinji, Norio Koide, and Takao Tsuji** 530

Rb Independent Inhibition of Cell Growth by $p15^{INK4B}$ — **Ugur Aytac, Tamiko Konishi, Heldi David, Susana Mendoza, and Carl W. Miller** 534

Immunological Relatedness of Chicken and Human Riboflavin Carrier Protein — **Sarada Subramanian and P. Radhakantha Adiga** 539

Nitric Oxide Synthase Imunolabeling in the Molluscan CNS and Peripheral Tissues — **W. J. Hurst, L. L. Moroz, M. U. Gillette, and R. Gillette** 545

trans-Sialidase of *Trypanosoma cruzi:* Location of Galactose-Binding Site(s) — **Marina Chuenkova, Miercio Pereira, and Garry Taylor** 549

A New Member of the Leucyl Aminopeptidase Family Purified and Identified from a Marine Unicellular Algae — **Daniela Sankievicz and Pio Colepicolo** 557

Kinetic Analysis of Substrate Inhibition in Nitric Oxide Reductase of *Paracoccus denitrificans* — **Marek Koutný and Igor Kučera** 562

Inhibitory Effects of Vitamin A and Vitamin K on Rat Cytochrome P4501A1-Dependent Monooxygenase Activity — **Kuniyo Inouye, Toshio Mae, Shunya Kondo, and Hideo Ohkawa** 565

Number 3, September 7, 1999

BREAKTHROUGHS AND VIEWS

A New Role of Ran GTPase — **Takeharu Nishimoto** 571

REGULAR ARTICLES

Identification of Four New Members of the Rat Prolactin/Growth Hormone Gene Family — **Kenichi Ishibashi and Masashi Imai** 575

15-Deoxy-$\Delta^{12,14}$-prostaglandin J_2, a Ligand for Peroxisome Proliferator-Activated Receptor-γ, Induces Apoptosis in JEG3 Choriocarcinoma Cells	**Jeffrey A. Keelan, Timothy A. Sato, Keith W. Marvin, Janine Lander, R. Stewart Gilmour, and Murray D. Mitchell**	**579**
Protein-Induced Fusion of Phospholipid Vesicles of Heterogeneous Sizes	**B. F. de Arcuri, G. F. Vechetti, R. N. Chehín, F. M. Goñi, and R. D. Morero**	**586**
Compounds that Induce Isoforms of Glutathione S-transferase with Properties of a Critical Enzyme in Defense against Oxidative Stress	**Hawley Fiander and Henry Schneider**	**591**
CD39 as a Caveolar-Associated Ectonucleotidase	**A. Kittel, E. Kaczmarek, J. Sevigny, K. Lengyel, E. Csizmadia, and S. C. Robson**	**596**
Diethanolamine Inhibits Choline Uptake and Phosphatidylcholine Synthesis in Chinese Hamster Ovary Cells	**Lois D. Lehman-McKeeman and Elizabeth A. Gamsky**	**600**
Hydrogen Peroxide in Human Urine: Implications for Antioxidant Defense and Redox Regulation	**Lee Hua Long, Patrica J. Evans, and Barry Halliwell**	**605**
Migration of Exogenous Immature Hematopoietic Cells into Adult Mouse Brain Parenchyma under GFP-Expressing Bone Marrow Chimera	**Kenji Ono, Takemasa Takii, Kikuo Onozaki, Masahito Ikawa, Masaru Okabe, and Makoto Sawada**	**610**
Proteolytic Fragments of Anti-HIV and Anti-tumor Proteins MAP30 and GAP31 Are Biologically Active	**Philip Lin Huang, Yongtao Sun, Hao-Chia Chen, Hsiang-Fu Kung, Paul Lee Huang, and Sylvia Lee-Huang**	**615**
A Sensitive New Method for Rapid Detection of Abnormal Methylation Patterns in Global DNA and within CpG Islands	**Igor Pogribny, Ping Yi, and S. Jill James**	**624**
Sequencing the Gene Encoding *Desulfovibrio desulfuricans* ATCC 27774 Nine-Heme Cytochrome *c*	**Lígia M. Saraiva, Patrícia N. da Costa, and Jean LeGall**	**629**
Functional Analysis of Four CYP21 Mutations from Spanish Patients with Congenital Adrenal Hyperplasia	**B. Scott Nunez, M. Natividad Lobato, Perrin C. White, and Anna Meseguer**	**635**
Targeting of Green Fluorescent Protein Expression to the Cell Surface	**Maria Simonova, Ralph Weissleder, Nikolai Sergeyev, Natalia Vilissova, and Alexei Bogdanov, Jr.**	**638**
6-Methyl-3′-bromoflavone, a High-Affinity Ligand for the Benzodiazepine Binding Site of the $GABA_A$ Receptor with Some Antagonistic Properties	**Haydee Viola, Mariel Marder, Julian Nuñez, Luciana Izquierdo, Cristina Wasowski, Claudia Wolfman, Patricia Ardenghi, Daniela Barros, Jorge H. Medina, and Alejandro C. Paladini**	**643**
Singlet Oxygen ($^1\Delta_gO_2$) as the Principal Oxidant in Myeloperoxidase-Mediated Bacterial Killing in Neutrophil Phagosome	**Hidetaka Tatsuzawa, Tadashi Maruyama, Kazutoshi Hori, Yoshiaki Sano, and Minoru Nakano**	**647**

Novel Inhibitors of Advanced Glycation Endproducts	**Samuel Rahbar, Kiran Kumar Yernini, Stephen Scott, Noe Gonzales, and Iraj Lalezari**	**651**
Collateral Resistance of a Dideoxycytidine-Resistant Cell Line to 5-Fluoro-2′-deoxyuridine	**Ram P. Agarwal, Tieran Han, and Marilyn Fernandez**	**657**
The Hydroxyl Free Radical Reactions of Ascorbyl Palmitate as Measured in Various *in Vitro* Models	**N. Perricone, K. Nagy, F. Horváth, G. Dajkó, I. Uray, and I. Zs.-Nagy**	**661**
Cytoskeletal Reorganization Leads to Induction of the Urokinase-Type Plasminogen Activator Gene by Activating FAK and Src and Subsequently the Ras/Erk Signaling Pathway	**José Pedro Irigoyen and Yoshikuni Nagamine**	**666**
DNA Methylation Analysis Using Bisulfite Treatment and PCR–Single-Strand Conformation Polymorphism in Colorectal Cancer Showing Microsatellite Instability	**Masato Maekawa, Kokichi Sugano, Hidefumi Kashiwabara, Mineko Ushiama, Shin Fujita, Masayoshi Yoshimori, and Tadao Kakizoe**	**671**
Identification of a Differentially Expressed RNA Helicase by Gene Trapping	**Daniel S. Wagner, Lin Gan, and William H. Klein**	**677**
Effects of Exogenous Nitric Oxide and Hyperoxia on Lung Fibroblast Viability and DNA Fragmentation	**Nandkishore Raghuram, James D. Fortenberry, Marilyn L. Owens, and Lou Ann S. Brown**	**685**
Nuclear Membrane Sphingomyelin–Cholesterol Changes in Rat Liver after Hepatectomy	**Elisabetta Albi, Isabella Peloso, and Mariapia Viola Magni**	**692**
Transcriptional Regulation of C/EBPδ in G_0 Growth-Arrested Mouse Mammary Epithelial Cells	**John P. O'Rourke, Julie A. Hutt, and Jim DeWille**	**696**
Alkaline Protease Inhibitor: A Novel Class of Antifungal Proteins against Phytopathogenic Fungi	**Jui V. Vernekar, Mohini S. Ghatge, and Vasanti V. Deshpande**	**702**
Silica-Induced Generation of Reactive Oxygen Species in Rat2 Fibroblast: Role in Activation of Mitogen-Activated Protein Kinase	**Young-Jin Cho, Min-Seok Seo, Jong Kee Kim, Young Lim, Guetae Chae, Kwon-Soo Ha, and Kweon-Haeng Lee**	**708**
Laminin Stimulates Protein Tyrosine Dephosphorylation in PC12 Cells	**Benjamin S. Weeks, Paul J. Wilson, Cathleen C. Heffernan, Valeria A. Gorra, Laura E. White, and Ammar Ahmad**	**713**
Malignant Transformation of NIH3T3 Cells by Overexpression of Early Lymphocyte Activation Antigen CD98	**Kaori Hara, Hiroshi Kudoh, Takemi Enomoto, Yoshiyuki Hashimoto, and Takashi Masuko**	**720**
Functional Expression of the Tandem-Repeated Homodimer of the Mitochondrial ADP/ATP Carrier in *Saccharomyces cerevisiae*	**Takashi Hatanaka, Mitsuru Hashimoto, Eiji Majima, Yasuo Shinohara, and Hiroshi Terada**	**726**

Characterization of the VEGF Binding Site on the Flt-1 Receptor	**Mark T. Herley, Ying Yu, Ronald G. Whitney, and J. Denry Sato**	731
Expression of Bone Morphogenetic Protein-2 via Adenoviral Vector in C2C12 Myoblasts Induces Differentiation into the Osteoblast Lineage	**Yasunori Okubo, Kazuhisa Bessho, Kazuma Fujimura, Tadahiko Iizuka, and Shin-Ichi Miyatake**	739
Caveolin-1 Expression and Caveolae Biogenesis during Cell Transdifferentiation in Lung Alveolar Epithelial Primary Cultures	**Lee Campbell, Andrew J. Hollins, Ahmed Al-Eid, Geoff R. Newman, Chris von Ruhland, and Mark Gumbleton**	744
Inhibition of Glutathione *S*-Transferase ζ and Tyrosine Metabolism by Dichloroacetate: A Potential Unifying Mechanism for Its Altered Biotransformation and Toxicity	**Rachel Cornett, Margaret O. James, George N. Henderson, Jang Cheung, Albert L. Shroads, and Peter W. Stacpoole**	752
Mutation "Hot Spot" in HLA Class I-Restricted T Cell Epitope on Hepatitis B Surface Antigen in Chronic Carriers and Hepatocellular Carcinoma	**Wei Ning Chen and Chong Jin Oon**	757
Human Placental Sodium-Dependent Vitamin C Transporter (SVCT2): Molecular Cloning and Transport Function	**D. Prasanna Rajan, Wei Huang, Binita Dutta, Lawrence D. Devoe, Frederich H. Leibach, Vadivel Ganapathy, and Puttur D. Prasad**	762
Prevention of Quinone-Mediated DNA Arylation by Antioxidants	**Minoti Sharma and Harry K. Slocum**	769
Gene Expressions of Opioid Receptors and G-Proteins in Pineal Glands	**Banthit Chetsawang, Stefano O. Casalotti, Pansiri Phansuwan-Pujito, Naiphinich Kotchabhakdi, and Piyarat Govitrapong**	775
Formation and Loss of Nitrated Proteins in Peroxynitrite-Treated Rat Skin *in Vivo*	**S. A. B. Greenacre, P. Evans, B. Halliwell, and S. D. Brain**	781
Capacitation Induces Tyrosine Phosphorylation of Proteins in the Boar Sperm Plasma Membrane	**Frits M. Flesch, Ben Colenbrander, Lambert M. G. van Golde, and Barend M. Gadella**	787
Identification of a Gluconic Acid Derivative Attached to the N-Terminus of Histidine-Tagged Proteins Expressed in Bacteria	**Z. Yan, G. W. Caldwell, and P. A. McDonell**	793
Detection of Molecular Interactions by Using a New Peptide-Displaying Bacteriophage Biosensor	**E. Ramírez, J. M. Mas, X. Carbonell, F. X. Avilés, and A. Villaverde**	801
Cloning and Characterization of Rat Leukotriene B$_4$ Receptor	**Akiko Toda, Takehiko Yokomizo, Kazuyuki Masuda, Akihide Nakao, Takashi Izumi, and Takao Shimizu**	806
Association of Peptides with Heat Shock Protein gp96 Occurs *in Vivo* and Not after Cell Lysis	**Antoine Ménoret, Ping Peng, and Pramod K. Srivastava**	813

Allosteric Changes of Thrombin Catalytic Site Induced by Interaction of Bothrojaracin with Anion-Binding Exosites I and II — **Robson Q. Monteiro, Jurema G. Rapôso, Anne Wisner, Jorge A. Guimarães, Cassian Bon, and Russolina B. Zingali** **819**

Phosphorylation and Proteasome-Dependent Degradation of Bcl-2 in Mitotic-Arrested Cells after Microtubule Damage — **Philippe Chadebech, Laetitia Brichese, Véronique Baldin, Simone Vidal, and Annie Valette** **823**

Tomato Consumption Modulates Oxidative DNA Damage in Humans — **Almas Rehman, Louise C. Bourne, Barry Halliwell, and Catherine A. Rice-Evans** **828**

Alleic Variants of Human Melatonin 1a Receptor: Function and Prevalence in Subjects with Circadian Rhythm Sleep Disorders — **Takashi Ebisawa, Naofumi Kajimura, Makoto Uchiyama, Masaaki Katoh, Masanori Sekimoto, Tsuyoshi Watanabe, Yuji Ozeki, Masaaki Ikeda, Takako Jodoi, Mariko Sugishita, Toshio Iwase, Yuichi Kamei, Keiko Kim, Kayo Shibui, Yoshinao Kudo, Naoto Yamada, Ryoichi Toyoshima, Masako Okawa, Kiyohisa Takahashi, and Toshio Yamauchi** **832**

Interferon-α-Induced Inhibition of B16 Melanoma Cell Proliferation: Interference with the bFGF Autocrine Growth Circuit — **Maria Torcia, Maria Lucibello, Giovanna De Chiara, Danilo Labardi, Lucia Nencioni, Paolo Bonini, Enrico Garaci, and Federico Cozzolino** **838**

ERRATUM

Volume **252,** Number 3 (1998), in Article No. RC989688, "Reductive Assays for *S*-Nitrosothiols: Implications for Measurements in Biological Systems," by Kezhong Fang, N. Virginia Ragsdale, Robert M. Carey, Timothy MacDonald, and Benjamin Gaston, pages 535–540 **845**

Author Index for Volume 262 **846**

Volume 263, Number 1, September 16, 1999

Mutations at Position 277 Modify the DNA-Binding Specificity of Human p53 *in Vitro*	**Patrick Chène**	1
A Poly-γ-glutamate Synthetic System of *Bacillus subtilis* IFO 3336: Gene Cloning and Biochemical Analysis of Poly-γ-glutamate Produced by *Escherichia coli* Clone Cells	**Makoto Ashiuchi, Kenji Soda, and Haruo Misono**	6
Half-Lives of Ornithine Decarboxylase and *S*-Adenosylmethionine Decarboxylase Activities during the Cell Cycle of Chinese Hamster Ovary Cells	**Pia S. H. Berntsson, Kersti Alm, and Stina M. Oredsson**	13
Characterization of a B Cell Surface Antigen with Homology to the S100 Protein MRP8	**Marjorie A. Shapiro, Sean P. Fitzsimmons, and Kathleen J. Clark**	17
In Vitro Selective RNA Synthesis with L-A Virus Nanoparticles	**Takashi Ebihara, Yasuko Yanagida, Eiry Kobatake, and Masuo Aizawa**	23
Cloning and Characterization of the Murine PKC α Promoter: Identification of a Retinoic Acid Response Element	**Dinakar S. Desai, Syu-ichi Hirai, William E. Karnes, Jr., Richard M. Niles, and Shi-geo Ohno**	28
Direct Interaction of p21 Cyclin-Dependent Kinase Inhibitor with the Retinoblastoma Tumor Suppressor Protein	**Makoto Nakanishi, Yoko Kaneko, Hitoshi Matsushime, and Kyoji Ikeda**	35
DNA–Surfactant Interactions: Coupled Cooperativity in Ligand Binding Leads to Duplex Stabilization	**Mrunalini V. Pattarkine and Krishna N. Ganesh**	41
Heterologous Expression of *Mucor rouxii* Δ^{12}-Desaturase Gene in *Saccharomyces cerevisiae*	**Supapon Passorn, Kobkul Laoteng, Sansanaluck Rachadawong, Morakot Tanticharoen, and Supapon Cheevadhanarak**	47
Cyclic AMP Mediates EDHF-Type Relaxations of Rabbit Jugular Vein	**T. M. Griffith and H. J. Taylor**	52
Overlapping Sequences with High Homology to Functional Proteins Coexist on Complementary Strands of DNA in the Rumen Bacterium *Prevotella albensis*	**Nicola D. Walker, Neil R. McEwan, and R. John Wallace**	58
Ceramide Synergizes with Phorbol Ester or Okadaic Acid to Induce IκB Degradation	**Paula C. Fernandez and Dirk A. E. Dobbelaere**	63

Peflin, a Novel Member of the Five-EF-Hand-Protein Family, Is Similar to the Apoptosis-Linked Gene 2 (ALG-2) Protein but Possesses Nonapeptide Repeats in the N-Terminal Hydrophobic Region	**Yasuyuki Kitaura, Masanori Watanabe, Hirokazu Satoh, Tatsuya Kawai, Kiyotaka Hitomi, and Masatoshi Maki**	68
In Vivo Modulation of the Acidic *N*-Glycans from Rat Liver Dipeptidyl Peptidase IV by *N*-Propanoyl-D-mannosamine	**Peer Stehling, Sabine Grams, Rolf Nuck, Detlef Grunow, Werner Reutter, and Martin Gohlke**	76
Tissue-Specific Differences in the Role of RNA 3′ of the Apolipoprotein B mRNA Mooring Sequence in Editosome Assembly	**Michael F. Steinburg, Delores Schock, John W. Backus, and Harold C. Smith**	81
Etomoxir, Sodium 2-[6-(4-Chlorophenoxy)hexyl]-oxirane-2-carboxylate, Up-Regulates Uncoupling Protein-3 mRNA Levels in Primary Culture of Rat Preadipocytes	**Àgatha Cabrero, Marta Alegret, Rosa Sánchez, Tomás Adzet, Juan Carlos Laguna, and Manuel Vázquez**	87
Procaspase-3 and Poly(ADP)ribose Polymerase (PARP) Are Calpain Substrates	**Kim M. McGinnis, Margaret E. Gnegy, Yang Hae Park, Neeta Mukerjee, and Kevin K. W. Wang**	94
Growth Hormone Stimulates Tyrosine Phosphorylation of Focal Adhesion Kinase ($p125^{FAK}$) and Actin Stress Fiber Formation in Human Osteoblast-like Cells, Saos2	**Michiko Okazaki Takahashi, Yutaka Takahashi, Keiji Iida, Yasuhiko Okimura, Hidesuke Kaji, Hiromi Abe, and Kazuo Chihara**	100
IκBα Is Essential for Maintaining Basal c-Jun N-Terminal Kinase (JNK) Activation and Regulating JNK-Mediated Resistance to Tumor Necrosis Factor Cytotoxicity in L929 Cells	**Nan-Shan Chang**	107
Interaction between F Plasmid Partition Proteins SopA and SopB	**Sook-Kyung Kim and Jay Shim**	113
Rac1 Disrupts p67*phox*/p40*phox* Binding: A Novel Role for Rac in NADPH Oxidase Activation	**Lori A. Rinckel, Sima L. Faris, Nancy D. Hitt, and Michael E. Kleinberg**	118
Identification of a Mammalian Brain Sulfate Transporter	**Aven Lee, Laurent Beck, Richard J. Brown, and Daniel Markovich**	123
First Chromatographic Isolation of an Antifungal Thaumatin-like Protein from French Bean Legumes and Demonstration of Its Antifungal Activity	**X. Y. Ye, H. X. Wang, and T. B. Ng**	130
Human S100A11 Exhibits Differential Steady-State RNA Levels in Various Tissues and a Distinct Subcellular Localization	**Hiroyasu Inada, Michiko Naka, Toshio Tanaka, Gabriela E. Davey, and Claus W. Heizmann**	135
Acetylleucine Chloromethyl Ketone, an Inhibitor of Acylpeptide Hydrolase, Induces Apoptosis of U937 Cells	**Mitsune Yamaguchi, Dan Kambayashi, Jun Toda, Takehiro Sano, Satoshi Toyoshima, and Hiroshi Hojo**	139

Induction of Apoptosis in Luteinized Granulosa Cells by the MAP Kinase Kinase (MEK) Inhibitor PD98059	**Rush H. Oliver, Shan M. Khan, Benjamin S. Leung, and John Yeh**	**143**
Tip60 Interacts with Human Interleukin-9 Receptor α-Chain	**Daniel Sliva, Yuan Xiao Zhu, Schickwann Tsai, James Kamine, and Yu-Chung Yang**	**149**
Double–Stranded RNA Induces Specific Developmental Defects in Zebrafish Embryos	**Anna Wargelius, Ståle Ellingsen, and Anders Fjose**	**156**
Evidence That Physiological Levels of Circulating Leptin Exert a Stimulatory Effect on Luteinizing Hormone and Prolactin Surges in Rats	**Hajime Watanobe, Toshihiro Suda, Jarl E. S. Wikberg, and Helgi B. Schiöth**	**162**
Purification, Identification, and cDNA Cloning of Cha o 2, the Second Major Allergen of Japanese Cypress Pollen	**Takeshi Mori, Minehiko Yokoyama, Naoki Komiyama, Mitsuhiro Okano, and Kohsuke Kino**	**166**
Dominant and Shared T Cell Receptor β Chain Variable Regions of T Cells Inducing Synovial Hyperplasia in Rheumatoid Arthritis	**Toru Mima, Shiro Ohshima, Mitsuko Sasai, Katsuhiro Nishioka, Masatoshi Shimizu, Norikazu Murata, Reiko Yasunami, Hiroaki Matsuno, Masaki Suemura, Tadamitsu Kishimoto, and Yukihiko Saeki**	**172**
Specificity of Peptide-Induced Depolymerization of the Recombinant Carboxy-Terminal Fragment of BiP/GRP78	**LaShaunda King, Mathieu Chevalier, and Sylvie Y. Blond**	**181**
Isolation and Characterization of Angiogenin-1 and a Novel Protein Designated Lactogenin from Bovine Milk	**X. Y. Ye, K. J. Cheng, and T. B. Ng**	**187**
Antibodies Differentiate Desmosome-Form and Nucleus-Form Pinin: Evidence That Pinin Is a Moonlighting Protein with Dual Location at the Desmosome and within the Nucleus	**Pin Ouyang**	**192**
Stimulation of Lipolysis but Not of Leptin Release by Growth Hormone Is Abolished in Adipose Tissue from Stat5a and b Knockout Mice	**John N. Fain, James H. Ihle, and Suleiman W. Bahouth**	**201**
Spontaneous and Stimulated Transients in Cytoplasmic Free Ca^{2+} in Normal Human Osteoblast-like Cells: Aspects of Their Regulation	**Jon A. Tsai, Olof Larsson, and Henrik Kindmark**	**206**
Molecular Cloning and Expression of Human Carnitine Octanoyltransferase: Evidence for Its Role in the Peroxisomal β-Oxidation of Branched-Chain Fatty Acids	**Sacha Ferdinandusse, Joyce Mulders, Lodewijk IJlst, Simone Denis, Georges Dacremont, Hans R. Waterham, and Ronald J. A. Wanders**	**213**
An Improved Method for Exchanging Troponin Subunits in Detergent Skinned Rat Cardiac Fiber Bundles	**Murali Chandra, Jeffrey J. Kim, and R. John Solaro**	**219**

ITIH4 Serum Concentration Increases during Acute-Phase Processes in Human Patients and Is Up-Regulated by Interleukin-6 in Hepatocarcinoma HepG2 Cells	**Matilde Piñeiro, María A. Alava, Nieves González-Ramón, Jesús Osada, Pilar Lasierra, Luis Larrad, Andrés Piñeiro, and Fermín Lampreave**	**224**
Thrombopoietin Acts Synergistically on Ca^{2+} Mobilization in Platelets Caused by ADP or Thrombin Receptor Agonist Peptide	**Martin Eilers, Harald Schulze, Karl Welte, and Matthias Ballmaier**	**230**
The Pivotal Role of Phosphoinositide-3 Kinase in the Human Somatostatin sst$_4$ Receptor-Mediated Stimulation of p44/p42 Mitogen-Activated Protein Kinase and Extracellular Acidification	**Keiran S. M. Smalley, Wasyl Feniuk, Lynda A. Sellers, and Patrick P. A. Humphrey**	**239**
A 1.3-kb Upstream 5′ Region of the Rat Phosphoglycerate Mutase m Gene Confers Testis and Skeletal Muscle-Specific Expression in Transgenic Mice	**Cristina Broceño, Kenneth Walsh, and Gabriel Pons**	**244**
α-MSH Peptides Inhibit Production of Nitric Oxide and Tumor Necrosis Factor-α by Microglial Cells Activated with β-Amyloid and Interferon γ	**Daniela Galimberti, Pierluigi Baron, Lucia Meda, Elisabetta Prat, Elio Scarpini, René Delgado, Anna Catania, James M. Lipton, and Guglielmo Scarlato**	**251**
Nongenomic Stimulation of Nitric Oxide Release by Estrogen Is Mediated by Estrogen Receptor α Localized in Caveolae	**Hong Pyo Kim, Jee Young Lee, Jeongmi Kim Jeong, Sung Won Bae, Hong Kyu Lee, and Inho Jo**	**257**

ERRATA

Volume **57,** Number 1 (1999), in Article ID bbrc.1999.0396, “Structural and Functional Characterization of the *Drosophila* Glycogen Phosphorylase Gene,” by Gabriella Tick, Imre Cserpán, Viktor Dombrádi, Bernard M. Mechler, István Török, and István Kiss, pages 34–43	**263**
Volume **260,** Number 2 (1999), in Article ID bbrc.1999.0925, “APOBEC-2, a Cardiac- and Skeletal Muscle-Specific Member of the Cytidine Deaminase Supergene Family,” by Wei Liao, Seung-Ho Hong, Benny Hung-Junn Chang, Frederick B. Rudolph, Sandra C. Clark, and Lawrence Chan, pages 398–404	**264**

Number 2, September 24, 1999

BREAKTHROUGHS AND VIEWS

The Influence of mRNA Stability on Glucose Transporter (GLUT1) Gene Expression	**Chen Qi and Phillip H. Pekala**	**265**

REGULAR ARTICLES

Induction of the α_1-Antichymotrypsin Gene in the Brain Associated with TGF-β1 Deficiency or Systemic Administration of Endotoxin	**Hiroshi Saito, Leonard D. Shultz, Mala Sinha, and John Papaconstantinou**	**270**

Nonpeptidyl Somatostatin Agonists Demonstrate That sst2 and sst5 Inhibit Stimulated Growth Hormone Secretion from Rat Anterior Pituitary Cells — **R. M. Parmar, W. W.-S. Chan, M. Dashkevicz, E. C. Hayes, S. P. Rohrer, R. G. Smith, J. M. Schaeffer, and A. D. Blake** 276

EPR Detection of Protein-Derived Radicals in the Reaction of H_2O_2 with Fe Bound in Mitochondrial F_1ATPase — **Francesca Polizio, Giovanna Lippe, Francesca Di Pancrazio, Alessandro Desideri, and Irene Mavelli** 281

Structural and Functional Characterization of the 5′-Flanking Region of the Rat and Human Cytochrome P450 2E1 Genes: Identification of a Polymorphic Repeat in the Human Gene — **Yin Hu, Jukka Hakkola, Mikael Oscarson, and Magnus Ingelman-Sundberg** 286

Inhibition of Mitochondrial Function in HL60 Cells Is Associated with an Increased Apoptosis and Expression of CD14 — **K. I. Mills, L. J. Woodgate, A. F. Gilkes, V. Walsh, M. C. Sweeney, G. Brown, and A. K. Burnett** 294

Mechanism of Antibacterial and Degradation Behavior of a Chlorinated Isoxazolylnaphthoquinone — **Patricia M. Bogdanov, Viviana G. Dabbene, Inés Albesa, María M. de Bertorello, and Margarita C. Briñón** 301

Human Is a Unique Species among Primates in Terms of Telomere Length — **Shingo Kakuo, Kazuo Asaoka, and Toshinori Ide** 308

Chloride–Bicarbonate Exchangers in the Human Fetal Pancreas — **Karen Hyde, Deborah Harrison, Michael A. Hollingsworth, and Ann Harris** 315

D-Amino Acid Formation Induced by a Chiral Field within a Human Lens Protein during Aging — **Noriko Fujii, Kazuo Harada, Yuko Momose, Noriyuki Ishii, and Mitsuhiko Akaboshi** 322

Autocrine Induction of Substance P mRNA and Peptide in Cultured Normal Human Keratinocytes — **SangJae Bae, Yoshitaka Matsunaga, Yoichi Tanaka, and Ichiro Katayama** 327

Anti-dsDNA Autoantibody Cross-Reacts with the C-Terminal Hydrophobic Cluster Region Containing Phenylalanines in the Acidic Ribosomal Phosphoprotein P1 to Exert a Cytostatic Effect on the Cells — **Kuang-Hui Sun, Chih-Chen Hong, Shye-Jye Tang, Guang-Huan Sun, Wu-Tse Liu, Shou-Hwa Han, and Chia-Li Yu** 334

Inhibitory Effects of Full-Length Human Endostatin on *in Vitro* Angiogenesis — **Letizia Taddei, Paola Chiarugi, Laura Brogelli, Paolo Cirri, Lucia Magnelli, Giovanni Raugei, Marina Ziche, Harris J. Granger, Vincenzo Chiarugi, and Giampietro Ramponi** 340

Functional and Biochemical Characterization of a Recombinant 3-Deoxy-D-*manno*-octulosonic Acid 8-Phosphate Synthase from the Hyperthermophilic Bacterium *Aquifex aeolicus* — **Henry S. Duewel, Galina Ya. Sheflyan, and Ronald W. Woodard** 346

Induction of Apoptosis in *Herpesvirus saimiri*-Immortalized T Lymphocytes by Blocking Interaction of CD28 with CD80/CD86 — **Hirofumi Akari, Tomoharu Fukumori, Shinya Iida, and Akio Adachi** 352

Ligand Binding Sites on Guinea Pig C3aR: Point and Deletion Mutations in the Large Extracellular Loop and Vicinity	**Yoshihiro Fukuoka, Julia A. Ember, and Tony E. Hugli**	**357**
In Vivo and *in Vitro* Analyses of Myc for Differential Promoter Activities of the Human Telomerase (hTERT) Gene in Normal and Tumor Cells	**Sangtaek Oh, Young-Hwa Song, Ung-Jin Kim, Jeongbin Yim, and Tae Kook Kim**	**361**
The Human Luteinizing Hormone Receptor Gene Promoter: Activation by Sp1 and Sp3 and Inhibitory Regulation	**Yi Geng, Chon-Hwa Tsai-Morris, Ying Zhang, and Maria L. Dufau**	**366**
IL-10 Inhibits *Porphyromonas gingivalis* LPS-Stimulated Human Gingival Fibroblasts Production of IL-6	**Pao-Li Wang, Shinya Shirasu, Mitsuko Shinohar, Yasutaka Azuma, Michiharu Daito, Hideki Yasuda, and Kiyoshi Ohura**	**372**
Sequence Analysis of the Spacer Region between the RHD and RHCE Genes	**Hiroshi Okuda, Hiroshi Suganuma, Naoki Tsudo, Toshinori Omi, Sadahiko Iwamoto, and Eiji Kajii**	**378**
Identification of a Wnt-Responsive Signal Transduction Pathway in Primary Endothelial Cells	**Meredith Wright, Mina Aikawa, Wayne Szeto, and Jackie Papkoff**	**384**
Expression of Members of the Thrombospondin Family by Human Skeletal Tissues and Cultured Cells	**J. A. Carron, W. B. Bowler, S. C. Wagstaff, and J. A. Gallagher**	**389**
Involvement of Singlet Oxygen in Cytochrome P450-Dependent Substrate Oxidations	**Mayuko Osada, Yuhko Ogura, Hiroyuki Yasui, and Hiromu Sakurai**	**392**
The Mode of Action of Taxol: Apoptosis at Low Concentration and Necrosis at High Concentration	**Tai K. Yeung, Colin Germond, Xinmei Chen, and Zhixiang Wang**	**398**
Endothelial Cells Freshly Isolated from Resistance-Sized Pulmonary Arteries Possess a Unique K^+ Current Profile	**Dayle S. Hogg, Sulayma Albarwani, Andrew R. L. Davies, and Roland Z. Kozlowski**	**405**
Characterization and Binding of Intracellular Antibody Fragments to the Hepatitis C Virus Core Protein	**Tobias Heintges, Jasper zu Putlitz, and Jack R. Wands**	**410**
Deguanylation of Human Immunodeficiency Virus (HIV-1) RNA by Recombinant Pokeweed Antiviral Protein	**Francis Rajamohan, Igor V. Kurinov, Taracad K. Venkatachalam, and Fatih M. Uckun**	**419**
Nonpathogenic Common Variants of *IFNGR1* and *IFNGR2* in Association with Total Serum IgE Levels	**Pei-Song Gao, Xiao-Quan Mao, Emmanuelle Jouanguy, Annaick Pallier, Rainer Döffinger, Yosuke Tanaka, Hitoshi Nakashima, Takeshi Otsuka, Mark H. Roberts, Tadao Enomoto, Yasuhiro Dake, Mitsuru Kawai, Sei Sasaki, Sarah R. Shaldon, Phillip Coull, Chaker N. Adra, Yoshiyuki Niho, Jean-Laurent Casanova, Taro Shirakawa, and Julian M. Hopkin**	**425**

Cyclosporine Downregulates Fas Ligand Expression on Vascular Endothelial Cells: Implication for Accelerated Vasculopathy by Immunosuppressive Therapy	**Masataka Sata and Kenneth Walsh**	**430**
Prevention of Endotoxin-Induced Lethality, but Not of Liver Apoptosis in Poly(ADP-ribose) Polymerase-Deficient Mice	**Simone Kühnle, Pierluigi Nicotera, Albrecht Wendel, and Marcel Leist**	**433**
Detection of a New Variant of the Mitochondrial Glycerol-3-phosphate Dehydrogenase Gene in Spanish Type 2 DM Patients	**Mònica Gudayol, Jose M. Vidal-Taboada, Elena F. Usac, Angels Costa, Pilar Cristòbal, Carmen dell'Anna, Rafael Oliva, and Ramon Gomis**	**439**
Arsenic Disrupts Cellular Levels of p53 and mdm2: A Potential Mechanism of Carcinogenesis	**Hisham K. Hamadeh, Maricelly Vargas, Edward Lee, and Daniel B. Menzel**	**446**
Manifestation of Oxidative Stress in the Pathogenesis of Arterial Hypertension in ISIAH Rats	**Valentina I. Yelinova, Valery V. Khramtsov, and Arkady L. Markel**	**450**
Prevalence of Circulating Antibodies against a Streptokinase C-Terminal Peptide in Normal Blood Donors	**Ariana G. Ojalvo, Lilliam Pozo, Violeta Labarta, and Isis Torréns**	**454**
Purification and Partial Characterization of Caffeine Oxidase—A Novel Enzyme from a Mixed Culture Consortium	**K. M. Madyastha, G. R. Sridhar, Bhat B. Vadiraja, and Y. Sudha Madhavi**	**460**
Deletion of the *sep1*$^{+}$ Forkhead Transcription Factor Homologue Is Not Lethal but Causes Hyphal Growth in *Schizosaccharomyces pombe*	**B. Ribár, A. Grallert, É. Oláh, and Z. Szállási**	**465**
Phosphorylation of Ribosomal Protein L5 by Protein Kinase CKII Decreases Its 5S rRNA Binding Activity	**Jang-Woon Park and Young-Seuk Bae**	**475**
Cloning and Characterization of the Murine Histone Deacetylase (*HDAC3*)	**Ulrich Mahlknecht, Dieter Hoelzer, Richard Bucala, and Eric Verdin**	**482**
Direct Interaction of the β-Domain of VHL Tumor Suppressor Protein with the Regulatory Domain of Atypical PKC Isotypes	**Heiwa Okuda, Syu-ichi Hirai, Yasuyuki Takaki, Masayuki Kamada, Masaya Baba, Naoki Sakai, Takeshi Kishida, Shigeki Kaneko, Masahiro Yao, Shigeo Ohno, and Taro Shuin**	**491**
Influence of Homocysteine on Matrix Metalloproteinase-2: Activation and Activity	**Anne Bescond, Thierry Augier, Corinne Chareyre, Danielle Garçon, William Hornebeck, and Philippe Charpiot**	**498**
Mitogen-Activated Protein Kinase Pathway Mediates Peroxynitrite-Induced Apoptosis in Human Dopaminergic Neuroblastoma SH-SY5Y Cells	**Kentaro Oh-hashi, Wakako Maruyama, Hong Yi, Tsutomu Takahashi, Makoto Naoi, and Ken-ichi Isobe**	**504**

Inactivation of the ERG Current in NG108-15 Cells	**Hans Meves**	**510**
Effects of Calcium and Protons on the Secondary Structure of the Nodulation Protein NodO from *Rhizobium leguminosarum* biovar *viciae*	**Mauro Dalla Serra, J. Mark Sutton, Frank Höper, J. Alan Downie, and Gianfranco Menestrina**	**516**
Evidence for a Novel RasGAP-Associated Protein of 105 kDa in both Mature Trophoblasts and Differentiating Choriocarcinoma Cells	**Fei Ye, Yvon E. Cayre, and Ming-Nguy Thang**	**523**
Modulation of Mitogen-Activated Protein Kinase Activation and Cell Cycle Regulators by the Potent Skin Cancer Preventive Agent Silymarin	**Xiaolin Zi and Rajesh Agarwal**	**528**
Ursodeoxycholic Acid Protects Hepatocytes against Oxidative Injury via Induction of Antioxidants	**Hironori Mitsuyoshi, Toshiaki Nakashima, Yoshio Sumida, Takaharu Yoh, Yoshiki Nakajima, Hiroki Ishikawa, Koji Inaba, Yoshikuni Sakamoto, Takeshi Okanoue, and Kei Kashima**	**537**
Cloning and Characterization of a Mammalian *N*-Acetylglucosamine-6-sulfotransferase That Is Highly Restricted to Intestinal Tissue	**Jin Kyu Lee, Sunil Bhakta, Steven D. Rosen, and Stefan Hemmerich**	**543**
The Fluorescence Emission of the Apo-glucose Oxidase from *Aspergillus niger* as Probe to Estimate Glucose Concentrations	**Sabato D'Auria, Peter Herman, Mosé Rossi, and Joseph R. Lakowicz**	**550**
Species Dependence of Mitochondrial Calcium Transients during Excitation–Contraction Coupling in Isolated Cardiomyocytes	**Elinor J. Griffiths**	**554**
The E-Box Motif, Recognized by Tissue-Specific Nuclear Factor(s), Is Important for BMP-4 Gene Expression in Osteogenic Cells	**Satoshi Kawasaki, Sohei Ebara, Kohzo Nakayama, and Kunio Takaoka**	**560**
Human Insulin Gene Is a Target Gene of Hepatocyte Nuclear Factor-1α (HNF-1α) and HNF-1β	**Kohei Okita, Qin Yang, Kazuya Yamagata, Kerstin A. Hangenfeldt, Jun-ichiro Miyagawa, Yoshitaka Kajimoto, Hiromu Nakajima, Mitsuyoshi Namba, Claes B. Wollheim, Toshiaki Hanafusa, and Yuji Matsuzawa**	**566**
Bacterial Lipopolysaccharide Increases Prostaglandin Production by Rat Astrocytes via Inducible Cyclo-oxygenase: Evidence for the Involvement of Nuclear Factor κB	**Giuseppa Pistritto, Ornella Franzese, Giacomo Pozzoli, Cesare Mancuso, Giuseppe Tringali, Paolo Preziosi, and Pierluigi Navarra**	**570**
Distribution of Rho-Kinase in the Bovine Brain	**Ryota Hashimoto, Yu Nakamura, Hidetaka Kosako, Mutsuki Amano, Kozo Kaibuchi, Masaki Inagaki, and Masatoshi Takeda**	**575**

Transcription Factor CP2 Is Crucial in Hemoglobin Synthesis during Erythroid Terminal Differentiation *in Vitro* — **Ji Hyung Chae, Yeon Ho Lee, and Chul Geun Kim** — **580**

Cloning, Functional Characterization, and Expression of a Gonadotropin Receptor cDNA in the Ovary and Testis of Amago Salmon (*Oncorhynchus rhodurus*) — **Yuichi Oba, Toshiaki Hirai, Yasutoshi Yoshiura, Michiyasu Yoshikuni, Hiroshi Kawauchi, and Yoshitaka Nagahama** — **584**

Downregulation of Endothelin-1 by Interleukin-4 during Gastric Ulcer Healing — **Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany** — **591**

ERRATA

Volume **262,** Number 1 (1999), in Article ID bbrc.1999.1139, “Atypical Processing of Amyloid Precursor Fusion Protein by Proteolytic Activity in *Pichia pastoris,*” by Adam Markaryan, Irina Morozova, Bao-Shiang Lee, and Arnold Kaplan, pages 263–268 — **596**

Number 3, October 5, 1999

Tenascin Is Expressed in the Mesenchyme of the Embryonic Lung and Down-Regulated by Dexamethasone in Early Organogenesis — **Yun Zhao** — **597**

Differential Expression of Protein Kinase C Isoform Transcripts in Human Hematopoietic Progenitors Undergoing Differentiation — **Sergey Oshevski, Marie-Caroline Le Bousse-Kerdilès, Denis Clay, Zoia Levashova, Naget Debili, Natacha Vitral, Claude Jasmin, and Monique Castagna** — **603**

Isolation and Characterization of a Novel Proteinase Inhibitor from the Snake Serum of Taiwan Habu (*Trimeresurus mucrosquamatus*) — **Kai-Fa Huang, Lu-Ping Chow, and Shyh-Horng Chiou** — **610**

Wild-Type Enzyme as a Reporter of Inhibitor Binding by Catalytically Impaired Mutant Enzymes — **Gregory S. Basarab and Douglas B. Jordan** — **617**

Heparin Differentially Regulates the Interaction of Fibroblast Growth Factor-4 with FGF Receptors 1 and 2 — **David Aviezer, Michal Safran, and Avner Yayon** — **621**

Hepatocyte Isolation Stimulates Formation of Interferon Stimulatory Response Element DNA–Protein Complexes — **Claire L. Varley and Alan J. Dickson** — **627**

Sulfation of Iodothyronines by Recombinant Human Liver Steroid Sulfotransferases	**Xinying Li and Robert J. Anderson**	**632**
Xylanase II from an Alkaliphilic Thermophilic *Bacillus* with a Distinctly Different Structure from Other Xylanases: Evolutionary Relationship to Alkaliphilic Xylanases	**Neeta Kulkarni, Malathi Lakshmikumaran, and Mala Rao**	**640**
Isolation and Characterization of a Novel Antifungal Peptide from *Aspergillus niger*	**Dong Gun Lee, Song Yub Shin, Cheol-Young Maeng, Zhe Zhu Jin, Kil Lyong Kim, and Kyung-Soo Hahm**	**646**
Expression and Mutagenesis Studies of Cobrotoxin from Taiwan Cobra	**Long-sen Chang, Ku-chung Chen, Bin-nan Wu, Shu-kai Lin, Pei-fung Wu, Yi-ren Hong, and Chen-chung Yang**	**652**
Localization of the Linker Domain of Ca^{2+}/Calmodulin-Dependent Protein Kinase II	**Ayse Dosemeci, Thomas S. Reese, Jennifer D. Petersen, Calvin Choi, and Sven Beushausen**	**657**
Biochemical Characterization of a Truncated Form of CYP27A Purified from Rabbit Liver Mitochondria	**Catrin Furster, Tomas Bergman, and Kjell Wikvall**	**663**
HRC (Histidine-Rich Ca^{2+} Binding Protein) Resides in the Lumen of Sarcoplasmic Reticulum as a Multimer	**Ji Young Suk, Yeong Seon Kim, and Woo Jin Park**	**667**
Copper–Adenine Catalyst for O_2 Production from H_2O_2	**Francine Bruston, Jacques Vergne, Lydie Grajcar, Bruno Drahi, Régis Calvayrac, Marie-Hélène Baron, and Marie-Christine Maurel**	**672**
N-Terminal Truncated Cytochrome P450 2B4: Catalytic Activities and Reduction with Alternative Electron Sources	**Victoria V. Shumyantseva, Tatiana V. Bulko, Svetlana A. Alexandrova, Nicolai N. Sokolov, Rolf D. Schmid, Till Bachmann, and Alexander I. Archakov**	**678**
Oxidation of Tetrahydrobiopterin by Peroxynitrite: Implications for Vascular Endothelial Function	**Sheldon Milstien and Zvonimir Katusic**	**681**
Pharmacological and Signaling Analysis of Human Chemokine Receptor CCR-7 Stably Expressed in HEK-293 Cells: High-Affinity Binding of Recombinant Ligands MIP-3β and SLC Stimulates Multiple Signaling Cascades	**Susan K. Sullivan, Douglas A. McGrath, Dimitri Grigoriadis, and Kevin B. Bacon**	**685**
The Role of Positively Charged Residues in CXCR4 Recognition Probed with Synthetic Peptides	**Zhaowen Luo, Naiming Zhou, Jiansong Luo, James W. Hall, and Ziwei Huang**	**691**
Tissue Distribution of the Human Soluble Guanylate Cyclases	**Joanna Budworth, Sylvie Meillerais, Ian Charles, and Ken Powell**	**696**

IL1HY1: A Novel Interleukin-1 Receptor Antagonist Gene	**Julio J. Mulero, Ann M. Pace, Sarah T. Nelken, Deborah B. Loeb, Tanis R. Correa, Radoje Drmanac, and John E. Ford**	**702**
Minimal Promoter Components of the Human Growth/Differentiation Factor-5 Gene	**Takeyuki Sugiura, Gertrud Hötten, and Shinji Kawai**	**707**
Transmembrane and Water-Soluble Helix Bundles Display Reverse Patterns of Surface Roughness	**Robert Renthal**	**714**
PPARγ Agonists Enhance Human Vascular Endothelial Adhesiveness by Increasing ICAM-1 Expression	**Neng-Guin Chen, Stephen F. Sarabia, Peter J. Malloy, Xiao-Yan Zhao, David Feldman, and Gerald M. Reaven**	**718**
Molecular Cloning and Sequence Analysis of Aggretin, a Collagen-like Platelet Aggregation Inducer	**Ching-Hu Chung, Lo-Chun Au, and Tur-Fu Huang**	**723**
Genomic Organization and Structure of the 3′ Region of Human *MUC3:* Alternative Splicing Predicts Membrane-Bound and Soluble Forms of the Mucin	**Suzanne C. Crawley, James R. Gum, Jr., James W. Hicks, Wendy S. Pratt, Jean-Pierre Aubert, Dallas M. Swallow, and Young S. Kim**	**728**
Novel Related cDNAs (C184L, C184M, and C184S) from Developing Mouse Brain Encoding Two Apparently Unrelated Proteins	**Mitsuhiro Sakuma-Takagi, Yoko Tohyama, Hiromi Kasama-Yoshida, Hiroyuki Sakagami, Hisatake Kondo, and Tadashi Kurihara**	**737**
Protein Kinase CKII Interacts with and Phosphorylates the SAG Protein Containing Ring-H2 Finger Motif	**Mi-Young Son, Jang-Woon Park, Yun-Sook Kim, Sek-Won Kang, Daniel R. Marshak, Wan Park, and Young-Seuk Bae**	**743**
Peroxisome Proliferator-Activated Receptor γ1 Expression in Porcine White Blood Cells: Dynamic Regulation with Acute Endotoxemia	**Michael T. Leininger, Carla P. Portocarrero, and Karen L. Houseknecht**	**749**
Nitrogen-Containing Bisphosphonates as Carbocation Transition State Analogs for Isoprenoid Biosynthesis	**Michael B. Martin, William Arnold, Huel T. Heath III, Julio A. Urbina, and Eric Oldfield**	**754**
Critical Amino Acid Substitutions in the Src SH3 Domain That Convert c-Src to Be Oncogenic	**Kou Miyazaki, Takeshi Senga, Satoru Matsuda, Miho Tanaka, Kazuya Machida, Yasushi Takenouchi, Yuji Nimura, and Michinari Hamaguchi**	**759**
Dissociation of RalA from Synaptic Membranes by Ca^{2+}/Calmodulin	**Jae-Bong Park, Jae-Yong Lee, and Jung-Woo Kim**	**765**
Induction of Human β-Defensin-2 mRNA Expression by *Helicobacter pylori* in Human Gastric Cell Line MKN45 Cells on *cag* Pathogenicity Island	**Akihiro Wada, Naoki Mori, Kazunori Oishi, Hironobu Hojo, Yoshiaki Nakahara, Yoichi Hamanaka, Masahiro Nagashima, Ichiro Sekine, Ken-ichi Ogushi, Takuro Niidome, Tsuyoshi Nagatake, Joel Moss, and Toshiya Hirayama**	**770**

ATP-Binding Site of Annexin VI Characterized by Photochemical Release of Nucleotide and Infrared Difference Spectroscopy	**Joanna Bandorowicz-Pikuła, Antoni Wrzosek, Małgorzata Danieluk, Sławomir Pikula, and Rene Buchet**	**775**
Formation of PI 3-Kinase Products in Platelets by Thrombin, but Not Collagen, Is Dependent on Synergistic Autocrine Stimulation, Particularly through Secreted ADP	**Frode Selheim, Randi Idsøe, Miriam H. Fukami, Holm Holmsen, and Flemming S. Vassbotn**	**780**
Mitogenic and Antiapoptotic Effects of Insulin-like Growth Factor Binding Protein-6 in the Human Osteoblastic Osteosarcoma Cell Line Saos-2/B-10	**Christoph Schmid, Claudia Keller, Martina Gosteli-Peter, and Jürgen Zapf**	**786**
The Putative Morphogen, DIF-1, of *Dictyostelium discoideum* Activates Akt/PKB in Human Leukemia K562 Cells	**Yuzuru Kubohara and Kohei Hosaka**	**790**
The Cytoplasmic Domain of C-CAM1 Tumor Suppressor Is Necessary and Sufficient for Suppressing the Tumorigenicity of Prostate Cancer Cells	**Vicky T. Estrera, Weiping Luo, Dillon Phan, Karen Earley, Douglas C. Hixson, and Sue-Hwa Lin**	**797**
Oxidized Low-Density Lipoprotein Induces Macrophage Respiratory Burst via Its Protein Moiety: A Novel Pathway in Atherogenesis?	**Thao Nguyen-Khoa, Ziad A. Massy, Véronique Witko-Sarsat, Sandrine Canteloup, Messeret Kebede, Bernard Lacour, Tilman Drüeke, and Béatrice Descamps-Latscha**	**804**
Isolation of Two Novel Metalloproteinase-Disintegrin (ADAM) cDNAs That Show Testis-Specific Gene Expression	**Douglas Pat Cerretti, Robert F. DuBose, Roy A. Black, and Nicole Nelson**	**810**
Role of Arg182 in the Second Extracellular Loop of Angiotensin II Receptor AT2 in Ligand Binding	**Jayson Kurfis, Dieter Knowle, and Lakshmidevi Pulakat**	**816**
Spectral Properties of Trp182, Trp194, and Trp250 on the α Subunit of Bacterial Luciferase	**Zhi Li, Nelly Valkova, and Edward Meighen**	**820**
Pyridinylimidazole Compound SB 203580 Inhibits the Activity but Not the Activation of p38 Mitogen-Activated Protein Kinase	**Sanjay Kumar, Ming S. Jiang, Jerry L. Adams, and John C. Lee**	**825**
Identification and Cloning of Odorant Binding Proteins from the Scarab Beetle *Phyllopertha diversa*	**Hubert Wojtasek, Jean-François Picimbon, and Walter Soares Leal**	**832**
Cytochrome P450105D1 (CYP105D1) from *Streptomyces griseus:* Heterologous Expression, Activity, and Activation Effects of Multiple Xenobiotics	**Mark Taylor, David C. Lamb, Rick Cannell, Michael Dawson, and Steven L. Kelly**	**838**
Congenic Diabetes-Prone BB.Sa and BB.Xs Rats Differ from Their Progenitor Strain BB/OK in Frequency and Severity of Insulin-Dependent Diabetes Mellitus	**Jens van den Brandt, Peter Kovács, and Ingrid Klöting**	**843**

Characterization of a Novel cDNA Sequence Encoding Invertebrate Tachykinin-Related Peptides Isolated from the *Echiuroid* Worm, *Urechis unicinctus* — **Tsuyoshi Kawada, Honoo Satake, Hiroyuki Minakata, Yojiro Muneoka, and Kyosuke Nomoto** — **848**

Author Index for Volume 263 — **853**

Volume 264, Number 1, October 14, 1999

Protection of MLV Vector Particles from Human Complement	**Sabine Breun, Brian Salmons, Walter H. Günzburg, and Jörg G. Baumann**	1
Real-Time Study of Interactions between a Composite DNA Regulatory Region (HIV-1 LTR NRE) and Several Transcription Factors of Nuclear Extracts	**Laurent Galio, Sylvie Briquet, and Catherine Vaquero**	6
Presence and Expression of a Novel Variant Form of ST2 Gene Product in Human Leukemic Cell Line UT-7/GM	**Shin-ichi Tominaga, Kenji Kuroiwa, Kenji Tago, Hiroyuki Iwahana, Ken Yanagisawa, and Norio Komatsu**	14
Bovine Lactoferrin Peptidic Fragments Involved in Inhibition of Herpes Simplex Virus Type 1 Infection	**Rosa Siciliano, Barbara Rega, Magda Marchetti, Lucilla Seganti, Giovanni Antonini, and Piera Valenti**	19
Cloning, Sequencing, and Characterization of Ribosomal Protein and RNA Polymerase Genes from the Region Analogous to the α-Operon of *Escherichia coli* in Halophilic Archaea, *Halobacterium halobium*	**Kazuyoshi Sano, Atsuo Taguchi, Hiromi Furumoto, Taizo Uda, and Takuzi Itoh**	24
Expression of Cholecystokinin Type A Receptor Gene Correlates with DNA Demethylation during Postnatal Development of Rat Pancreas	**Kimihiko Matsusue, Soichi Takiguchi, Yutaka Takata, Akihiro Funakoshi, Kyoko Miyasaka, and Akira Kono**	29
Cocaine Potentiates the Switch between Latency and Replication of Epstein–Barr Virus in Raji Cells	**Paolo Di Francesco, Antonella Lisi, Sabrina Rieti, Vanessa Manni, Settimio Grimaldi, and Enrico Garaci**	33
Unique Characteristics of Ubiquitin-Bonded Complex Play a Pathological Role in Dentatorubral–Pallidoluysian Atrophy	**Ikuru Yazawa**	37
Attachment of C-Terminus of SDF-1 Enhances the Biological Activity of Its N-Terminal Peptide	**Jiansong Luo, Zhaowen Luo, Naiming Zhou, James W. Hall, and Ziwei Huang**	42
Association between an α_2 Macroglobulin DNA Polymorphism and Late-Onset Alzheimer's Disease	**Victoria Alvarez, Ruth Alvarez, C. H. Lahoz, C. Martínez, J. Peña, L. M. Guisasola, J. Salas-Puig, G. Morís, D. Uría, B. B. Menes, R. Ribacoba, J. A. Vidal, J. M. Sánchez, and Eliecer Coto**	48
Era, an Essential *Escherichia coli* Small G-Protein, Binds to the 30S Ribosomal Subunit	**Abu Sayed, Shin-ichi Matsuyama, and Masayori Inouye**	51
BSMAP, a Novel Protein Expressed Specifically in the Brain Whose Gene Is Localized on Chromosome 19p12	**Greg C. A. Elson, Amelie Benoit de Coignac, Jean-Pierre Aubry, Yves Delneste, Giovanni Magistrelli, James Holzwarth, Jean-Yves Bonnefoy, and Jean-François Gauchat**	55

Selective Lysis of Virus-Infected Cells by Cobra Snake Cytotoxins: A Sendai Virus, Human Erythrocytes, and Cytotoxin Model	**Gadi Borkow and Michael Ovadia**	63
Hierarchical Order of Critical Residues on the Immunity-Determining Region of the Im7 Protein Which Confer Specific Immunity to Its Cognate Colicin	**Fong-Ming Lu, Hanna S. Yuan, Ya-Chein Hsu, Ssi-Jean Chang, and Kin-Fu Chak**	69
An Expanded CTG Trinucleotide Repeat Causes *trans* RNA Interference: A New Hypothesis for the Pathogenesis of Myotonic Dystrophy	**Noboru Sasagawa, Nobuhiro Takahashi, Koichi Suzuki, and Shoichi Ishiura**	76
A Tetratricopeptide Repeat-Containing Protein Gene, *tpis,* Whose Expression Is Induced with Differentiation of Spermatogenic Cells	**Mikiro Takaishi and Nam-ho Huh**	81
Molecular Cloning of a Human MafF Homologue, Which Specifically Binds to the Oxytocin Receptor Gene in Term Myometrium	**Tadashi Kimura, Richard Ivell, Werner Rust, Yoshifumi Mizumoto, Kazuhide Ogita, Chika Kusui, Yoko Matsumura, Chihiro Azuma, and Yuji Murata**	86
Inhibition of Adipogenesis by a COOH-Terminally Truncated Mutant of PPARγ2 in 3T3-L1 Cells	**Jiro Masugi, Yoshikazu Tamori, and Masato Kasuga**	93
Hemolysate Induces Tyrosine Phosphorylation and Collagen-Lattice Compaction in Cultured Fibroblasts	**Anita Patlolla, Kotaro Ogihara, Kazuya Aoki, Alexander Zubkov, Eva Bengten, Andrew D. Parent, and John H. Zhang**	100
Farnesyl Pyrophosphate Synthase Is the Molecular Target of Nitrogen-Containing Bisphosphonates	**Ermond van Beek, Elsbet Pieterman, Louis Cohen, Clemens Löwik, and Socrates Papapoulos**	108
Molecular Cloning of the Gene for p85 That Regulates the Initiation of Cytokinesis in *Tetrahymena*	**Kohsuke Gonda, Kimiko Nishibori, Hiroyoshi Ohba, Atsushi Watanabe, and Osamu Numata**	112
Human Chromosomal Localization, Tissue/Tumor Expression, and Regulatory Function of the *ets* Family Gene *EHF*	**Laurie A. Kleinbaum, Catherine Duggan, Elisabeth Ferreira, Greg P. Coffey, Giovanna Butticè, and Frank H. Burton**	119
The β4 Integrin Subunit Rescues A431 Cells from Apoptosis through a PI3K/Akt Kinase Signaling Pathway	**Keqin Tang, Daotai Nie, Yinlong Cai, and Kenneth V. Honn**	127
In Vitro Effects of Angiopoietins and VEGF on Hematopoietic and Endothelial Cells	**Xu-Ling Huang, Nobuyuki Takakura, and Toshio Suda**	133
The Cell Death Regulatory Protein Bak Is Expressed in Endothelial Cells in Inflamed Tissues and Is Induced by IFN-γ *in Vitro*	**J. Pammer, W. Weninger, J. Ban, J. Wojta, and E. Tschachler**	139
CRM1 Mediates Nuclear Export of Nonstructural Protein 2 from Parvovirus Minute Virus of Mice	**Takayuki Ohshima, Toshihiro Nakajima, Takayuki Oishi, Naoko Imamoto, Yoshihiro Yoneda, Akiyoshi Fukamizu, and Ken-ichi Yagami**	144

Molecular Cloning of a Novel *Xenopus spalt* Gene (*Xsal-3*)	**Yasuko Onuma, Ryuichi Nishinakamura, Shuji Takahashi, Takashi Yokota, and Makoto Asashima**	**151**
Identification of Aquaporin 5 (AQP5) within the Cochlea: cDNA Cloning and *in Situ* Localization	**Anand N. Mhatre, Silke Steinbach, Kambridge Hribar, A. T. M. Shamsul Hoque, and Anil K. Lalwani**	**157**
Novel Association of the Src Family Kinases, Hck and c-Fgr, with CCR3 Receptor Stimulation: A Possible Mechanism for Eotaxin-Induced Human Eosinophil Chemotaxis	**Amr El-Shazly, Naoto Yamaguchi, Keisuke Masuyama, Toshio Suda, and Takeru Ishikawa**	**163**
Phenylalanine 138 in the Second Intracellular Loop of Human Thromboxane Receptor Is Critical for Receptor-G-Protein Coupling	**Huiping Zhou, Fengxiang Yan, Shuichi Yamamoto, and Hsin-Hsiung Tai**	**171**
Study of DFF45 in Its Role of Chaperone and Inhibitor: Two Independent Inhibitory Domains of DFF40 Nuclease Activity	**John S. McCarty, Shen Yon Toh, and Peng Li**	**176**
Multiple Domains of DFF45 Bind Synergistically to DFF40: Roles of Caspase Cleavage and Sequestration of Activator Domain of DFF40	**John S. McCarty, Shen Yon Toh, and Peng Li**	**181**
Regulated Expression of the *nifM* of *Azotobacter vinelandii* in Response to Molybdenum and Vanadium Supplements in Burk's Nitrogen-Free Growth Medium	**Shi Lei, Lakshmidevi Pulakat, and Narasaiah Gavini**	**186**
Identification of Two Penicillin-Binding Multienzyme Complexes in *Haemophilus influenzae*	**Armin Alaedini and Richard A. Day**	**191**
Evidence That Histidine-163 Is Critical for Catalytic Activity, but Not for Substrate Binding to *Escherichia coli* Agmatinase	**Nelson Carvajal, Juan Olate, Mónica Salas, Vasthi López, Juan Cerpa, Paula Herrera, and Elena Uribe**	**196**
Characterization of Recombinant Fungal Phytase (*phyA*) Expressed in Tobacco Leaves	**Abul H. J. Ullah, Kandan Sethumadhavan, Edward J. Mullaney, Thomas Ziegelhoffer, and Sandra Austin-Phillips**	**201**
Conversion of Lysine to N^{ϵ}-(Carboxymethyl)lysine Increases Susceptibility of Proteins to Metal-Catalyzed Oxidation	**Jesús R. Requena and Earl R. Stadtman**	**207**
EPR Detection of Reactive Oxygen Species in Hemolymph of *Galleria mellonella* and *Dendrolimus superans sibiricus* (Lepidoptera) Larvae	**I. A. Slepneva, V. V. Glupov, S. V. Sergeeva, and V. V. Khramtsov**	**212**
A Key Driving Force in Determination of Protein Structural Classes	**Kuo-Chen Chou**	**216**

Fragments from α-Actinin Insert into Reconstituted Lipid Bilayers	**Wolfgang H. Goldmann, Jens M. Teodoridis, C. Pal Sharma, Jose Luis Alonso, and Gerhard Isenberg**	225
Estradiol-17β Stimulates the Renewal of Spermatogonial Stem Cells in Males	**Takeshi Miura, Chiemi Miura, Takashi Ohta, Manal R. Nader, Takashi Todo, and Kohei Yamauchi**	230
Molecular Cloning of Chick UCH-6 Which Shares High Similarity with Human UCH-L3: Its Unusual Substrate Specificity and Tissue Distribution	**Sung Hee Baek, Yung Joon Yoo, Keiji Tanaka, and Chin Ha Chung**	235
Serine Phosphorylation of the Sarcoplasmic Reticulum Ca^{2+}-ATPase in the Intact Beating Rabbit Heart	**Ande Xu, Thomas Netticadan, Douglas L. Jones, and Njanoor Narayanan**	241
Proline-Rich Synapse-Associated Proteins ProSAP1 and ProSAP2 Interact with Synaptic Proteins of the SAPAP/GKAP Family	**Tobias M. Boeckers, Carsten Winter, Karl-Heinz Smalla, Michael R. Kreutz, Juergen Bockmann, Constanze Seidenbecher, Craig C. Garner, and Eckart D. Gundelfinger**	247
Enhancement of Dendrimer-Mediated Transfection Using Synthetic Lung Surfactant Exosurf Neonatal *in Vitro*	**Jolanta F. Kukowska-Latallo, Chunling Chen, Jon Eichman, Anna U. Bielinska, and James R. Baker, Jr.**	253
Formation of Oxygen Radicals in Solutions of 7,8-Dihydroneopterin	**Karl Oettl, Barbara Wirleitner, Gabriele Baier-Bitterlich, Tanja Grammer, Dietmar Fuchs, and Gilbert Reibnegger**	262
Interaction of Measles Virus (Hallé Strain) with CD46: Evidence That a Common Binding Site on CD46 Facilitates Both CD46 Downregulation and MV Infection	**Valérie Lecouturier, Alexandra Rizzitelli, Joël Fayolle, Laurent Daviet, Fabian T. Wild, and Robin Buckland**	268
Stimulation of Macrophages by Mucins through a Macrophage Scavenger Receptor	**Mizue Inoue, Hironori Fujii, Hiromi Kaseyama, Ikuo Yamashina, and Hiroshi Nakada**	276
Effects of Tryptophan Residues of Porcine Myeloid Antibacterial Peptide PMAP-23 on Antibiotic Activity	**Joo Hyun Kang, Song Yub Shin, So Yun Jang, Kil Lyong Kim, and Kyung-Soo Hahm**	281
Residues within the HFRIGC Sequence of HIV-1 Vpr Involved in Growth Arrest Activities	**Janette M. Berglez, Laura A. Castelli, Sonia A. Sankovich, Stuart C. Smith, Cyril C. Curtain, and Ian G. Macreadie**	287
Cloning and Immunolocalization of a Rat Pancreatic Na^+ Bicarbonate Cotransporter	**Frank Thévenod, Eleni Roussa, Bernhard M. Schmitt, and Michael F. Romero**	291
Identification and cDNA Cloning of *headpin,* a Novel Differentially Expressed Serpin That Maps to Chromosome 18q	**Paul Spring, Torahiko Nakashima, Mitchell Frederick, Ying Henderson, and Gary Clayman**	299

The N-Terminal Half of NPM Dissociates from Nucleoli of HeLa Cells after Anticancer Drug Treatments **Pui K. Chan, David A. Bloom, and Thomas T. Hoang** 305

Number 2, October 22, 1999

PPARα Activation by Wy 14643 Induces Transactivation of the Rat UCP-1 Promoter without Increasing UCP-1 mRNA Levels and Attenuates PPARγ-Mediated Increases in UCP-1 mRNA Levels Induced by Rosiglitazone in Fetal Rat Brown Adipocytes **Teresa Teruel, John C. Clapham, and Stephen A. Smith** 311

Identification of Two Serine Residues Involved in Catalysis by Fatty Acid Amide Hydrolase **Romelda L. Omeir, Gladys Arreaza, and Dale G. Deutsch** 316

Immunosuppressive Effect of Leukotriene B_4 Receptor Antagonist *in Vitro* **Hiroaki Morita, Kazuyoshi Takeda, Hideo Yagita, and Ko Okumura** 321

Intramolecular Quadruplex Formation of the G-Rich Strand of the Mouse Hypervariable Minisatellite Pc-1 **Masato Katahira, Hirokazu Fukuda, Hiroshi Kawasumi, Takashi Sugimura, Hitoshi Nakagama, and Minako Nagao** 327

A Novel DIDS-Sensitive, Anion-Dependent Mg^{2+} Efflux Pathway in Rat Ventricular Myocytes **Maria P. Ödblom and Richard D. Handy** 334

Characterization of Multiple Nuclear Localization Signals in Herpes Simplex Virus Type 1 Thymidine Kinase **Bart Degrève, Robert Esnouf, Erik De Clercq, and Jan Balzarini** 338

Loss of Molecular Interaction between Cytochrome *c* and Cardiolipin Due to Lipid Peroxidation **Yoshihiro Shidoji, Katsuhiro Hayashi, Sadaaki Komura, Nobuko Ohishi, and Kunio Yagi** 343

Cell Wall-Affecting Antibiotics Induce Expression of a Novel Gene, *drp35,* in *Staphylococcus aureus* **Hiroyuki Murakami, Hiroyuki Matsumaru, Mutsumi Kanamori, Hideo Hayashi, and Toshiko Ohta** 348

Proteasome Inhibitors Lactacystin and MG132 Inhibit the Dephosphorylation of HSF1 after Heat Shock and Suppress Thermal Induction of Heat Shock Gene Expression **Dooha Kim and Gloria C. Li** 352

p53 Down-Regulates ER-Responsive Genes by Interfering with the Binding of ER to ERE **G. Liu, J. A. Schwartz, and S. C. Brooks** 359

A Novel Compound Heterozygote (FAP ATTR Arg104His/ATTR Val30Met) with High Serum Transthyretin (TTR) and Retinol Binding Protein (RBP) Levels **H. Terazaki, Y. Ando, S. Misumi, M. Nakamura, E. Ando, N. Matsunaga, S. Shoji, M. Okuyama, H. Ideta, K. Nakagawa, T. Ishizaki, M. Ando, and M. J. M. Saraiva** 365

Contribution of Mitogen-Activated Protein Kinase to Stimulation of Phospholipase D by the Chemotactic Peptide fMet-Leu-Phe in Human Neutrophils	**Bahia Djerdjouri, Monique Lenoir, Jean-Paul Giroud, and Axel Périanin**	371
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin-Mediated Oxidative Stress in CYP1A2 Knockout (CYP1A2−/−) Mice	**Brian P. Slezak, Janet J. Diliberto, and Linda S. Birnbaum**	376
Cytochrome *c*-553 from the Alkalophilic Bacterium *Bacillus pasteurii* Has the Primary Structure Characteristics of a Lipoprotein	**Isabel H. M. Vandenberghe, Yves Guisez, Stefano Ciurli, Stefano Benini, and Jozef J. Van Beeumen**	380
Single-Strand Breaks in Agarose-Embedded Chromatin of Nonapoptotic Cells	**Tamás Varga, Ildikó Szilágyi, and Gábor Szabó, Jr.**	388
An Upstream Repressor Element That Contributes to Hepatocyte-Specific Expression of the Rat Serum Amyloid A1 Gene	**Lei Li and Warren S.-L. Liao**	395
Characterization of the *MEN1* Ortholog in Zebrafish	**Shideh Khodaei, Kevin P. O'Brien, Jan Dumanski, Fung Ki Wong, and Günther Weber**	404
Rapamycin Inhibits Activation of Ryanodine Receptors from Skeletal Muscle by the Fatty Acyl CoA–Acyl CoA Binding Protein Complex	**Rosella Fulceri, Roberta Giunti, Jens Knudsen, Rosanna Leuzzi, Tamas Kardon, and Angelo Benedetti**	409
Cloning of a Novel Cytochrome P450 (CYP4C15) Differentially Expressed in the Steroidogenic Glands of an Arthropod	**Chantal Dauphin-Villemant, Detlef Böcking, Moshe Tom, Martine Maïbèche, and René Lafont**	413
Characterization and cDNA Cloning of Androgenic Gland Hormone of the Terrestrial Isopod *Armadillidium vulgare*	**Atsuro Okuno, Yuriko Hasegawa, Tsuyoshi Ohira, Yasutosi Katakura, and Hiromichi Nagasawa**	419
Human Serum Immunoglobulin G3 Subclass Bound Preferentially to Asialo-, Agalactoimmunoglobulin A1/Sepharose	**Hitoo Iwase, Yuhichiro Yokozeki, Yoshiyuki Hiki, Atsushi Tanaka, Tohru Kokubo, Takashi Sano, Ikuko Ishii-Karakasa, Kunio Hisatani, Yutaka Kobayashi, and Kyoko Hotta**	424
Identification of Autoantibodies Associated with Rippling Muscles and Myasthenia Gravis That Recognize Skeletal Muscle Proteins: Possible Relationship of Antigens and Stretch-Activated Ion Channels	**Gary R. Walker, Thomas Watkins, and Carl F. Ansevin**	430
Hypoxic Stress Induces Cardiotrophin-1 Expression in Cardiac Myocytes	**Shigemichi Hishinuma, Masanobu Funamoto, Yasushi Fujio, Keita Kunisada, and Keiko Yamauchi-Takihara**	436

Advanced Glycation End Product-Induced Peroxisome Proliferator-Activated Receptor γ Gene Expression in the Cultured Mesangial Cells	**Yasunori Iwashima, Masaaki Eto, Seikoh Horiuchi, and Hiroaki Sano**	**441**
Activity and Substrate Specificity of the Murine STK2 Serine/Threonine Kinase That Is Structurally Related to the Mitotic Regulator Protein NIMA of *Aspergillus nidulans*	**Kouji Hayashi, Hideya Igarashi, Michio Ogawa, and Nobuo Sakaguchi**	**449**
Cloning and Characterization of a Novel $p21^{Cip1/Waf1}$-Interacting Zinc Finger Protein, Ciz1	**Kaoru Mitsui, Akira Matsumoto, Satoshi Ohtsuka, Motoaki Ohtsubo, and Akihiko Yoshimura**	**457**
Reconstituted HDL Containing Human Apolipoprotein A-1 Reduces VCAM-1 Expression and Neointima Formation Following Periadventitial Cuff-Induced Carotid Injury in apoE Null Mice	**Paul Dimayuga, Jenny Zhu, Sumito Oguchi, Kuang-Yuh Chyu, Xiao-Ou Helen Xu, Juliana Yano, P. K. Shah, Jan Nilsson, and Bojan Cercek**	**465**
The Tumor-Suppressing Activity of Angiostatin Protein Resides within Kringles 1 to 3	**Nicholas J. MacDonald, Amy Chang Murad, William E. Fogler, Yingyu Lu, and B. K. L. Sim**	**469**
The Importance of the Putative Helices 4 and 5 of Human Vitamin D_3 Receptor for Conformation and Ligand Binding	**Sami Väisänen, Carole Duchier, Juha Rouvinen, and Pekka H. Mäenpää**	**478**
Identification of Two Novel Mutations in the Hypoglycemic Phenotype of Very Long Chain Acyl-CoA Dehydrogenase Deficiency	**Guocheng He, Bing-Zhi Yang, Diane S. Roe, Roy Teramoto, Kirk Aleck, Theresa A. Grebe, Charles R. Roe, and Jia-Huan Ding**	**483**
Decreased Contraction of Glycated Collagen Lattices Coincides with Impaired Matrix Metalloproteinase Production	**Laure Rittié, Alix Berton, Jean-Claude Monboisse, William Hornebeck, and Philippe Gillery**	**488**
Photoaffinity Labeling of the Herpes Simplex Virus Type-1 Single-Strand DNA-Binding Protein (ICP8) with Oligodeoxyribonucleotides	**Eric J. White and Paul E. Boehmer**	**493**
Biophysical Characterization of Betabellin 16D: A β-Sandwich Protein That Forms Narrow Fibrils Which Associate into Broad Ribbons	**Amareth Lim, Alexander M. Makhov, Matthew J. Saderholm, Jack D. Griffith, and Bruce W. Erickson**	**498**
Trypsinogen Stabilization by Mutation Arg117→His: A Unifying Pathomechanism for Hereditary Pancreatitis?	**Miklós Sahin-Tóth, László Gráf, and Miklós Tóth**	**505**
Increased Susceptibility to Apoptosis of Human Hepatocarcinoma Cells Transfected with Antisense *N*-Acetylglucosaminyltransferase V cDNA	**Hua-Bei Guo, Fei Liu, and Hui-Li Chen**	**509**
Chromosomal Instability of Fanconi Anemia Cells Is Not the Consequence of a Defective Repair Activity of the Ribosomal Protein S3	**Maria Helena Ramirez, Werner Ruppitsch, Monica Hirsch-Kauffmann, and Manfred Schweiger**	**518**

Overproduction of the Outer-Membrane Proteins FepA and FhuE Responsible for Iron Transport in *Escherichia coli hfq::cat* Mutant	**Masaaki Wachi, Ayako Takada, and Kazuo Nagai**	**525**
Phosphorylation/Dephosphorylation Steps Are Crucial for the Induction of CYP2B1 and CYP2B2 Gene Expression by Phenobarbital	**Akino Kawamura, Yukiko Yoshida, Noriko Kimura, Hiroaki Oda, and Atsushi Kakinuma**	**530**
In Vitro Transcriptional and Translational Block of the bcl-2 Gene Operated by Peptide Nucleic Acid	**Luca Mologni, Peter E. Nielsen, and Carlo Gambacorti-Passerini**	**537**
N^2-(1-Carboxyethyl)deoxyguanosine, a Nonenzymatic Glycation Adduct of DNA, Induces Single-Strand Breaks and Increases Mutation Frequencies	**Monika Pischetsrieder, Wolfgang Seidel, Gerald Münch, and Reinhard Schinzel**	**544**
Akt Phosphorylation Site Found in Human Caspase-9 Is Absent in Mouse Caspase-9	**Eriko Fujita, Atsushi Jinbo, Hidenori Matuzaki, Hiroaki Konishi, Ushio Kikkawa, and Takashi Momoi**	**550**
A Novel Mutant of Green Fluorescent Protein with Enhanced Sensitivity for Microanalysis at 488 nm Excitation	**Yoichiro Ito, Miho Suzuki, and Yuzuru Husimi**	**556**
Nuclear Factor κB Activity Is Essential for Matrix Metalloproteinase-1 and -3 Upregulation in Rabbit Dermal Fibroblasts	**Mark Bond, Andrew H. Baker, and Andrew C. Newby**	**561**
Molecular Cloning of Macrophin, a Human Homologue of *Drosophila* Kakapo with a Close Structural Similarity to Plectin and Dystrophin	**Takahito Okuda, Satoru Matsuda, Shigekazu Nakatsugawa, Yasukatu Ichigotani, Naoko Iwahashi, Masahide Takahashi, Takeo Ishigaki, and Michinari Hamaguchi**	**568**
Secretory IgA-Mediated Basophil Activation. II. Roles of GTP-Binding Regulatory Proteins and Phosphatidylinositol 3-Kinase	**Motoyasu Iikura, Masao Yamaguchi, Misato Miyamasu, Yutaka Morita, Takashi Iwase, Itaru Moro, Kazuhiko Yamamoto, and Koichi Hirai**	**575**
Vitellogenin-6 Is a Major Carbonylated Protein in Aged Nematode, *Caenorhabditis elegans*	**Akihiro Nakamura, Kayo Yasuda, Hirosi Adachi, Yoshihiko Sakurai, Naoaki Ishii, and Sataro Goto**	**580**
The Expression of *Escherichia coli* SOS Genes *recA* and *uvrA* Is Inducible by Polyamines	**Tae Jeong Oh and In Gyu Kim**	**584**
1,25-Dihydroxyvitamin D_3 and Prostaglandin E_2 Act Directly on Circulating Human Osteoclast Precursors	**Ichiro Itonaga, Afsie Sabokbar, Susan D. Neale, and Nicholas A. Athanasou**	**590**
Recovery of Catalytic Activity from an Inactive Aggregated Mutant of L-Aspartase	**Maithri M. K. Jayasekera and Ronald E. Viola**	**596**

Protection by Protein A of Apoptotic Cell Death Caused by Anti-AIDS Drug Zidovudine — **Amiya Kumar Ghosh, Srikanta Jana, Tanya Das, Gaurisankar Sa, Nripendranath Mandal, and Prasanta Kumar Ray** 601

Combined Enhancement of Microtubule Assembly and Glucose Metabolism in Neuronal Systems *in Vitro:* Decreased Sensitivity to Copper Toxicity — **Károly Liliom, Gábor Wágner, János Kovács, Begoña Comin, Marta Cascante, Ferenc Orosz, and Judit Ovádi** 605

Number 3, November 2, 1999

BREAKTHROUGHS AND VIEWS

Masking and Reduction of the Galactose-α1,3-Galactose (α-Gal) Epitope, the Major Xenoantigen in Swine, by the Glycosyltransferase Gene Transfection — **Shuji Miyagawa, Masahiro Tanemura, Souichi Koyota, Masaru Koma, Yoshitaka Ikeda, Ryota Shirakura, and Naoyuki Taniguchi** 611

REGULAR ARTICLES

Expression of the Calcium-Sensing Receptor in Pancreatic Islet B-Cells — **Joanne Rasschaert and Willy J. Malaisse** 615

Overexpression of the α2,6-Sialyltransferase, ST6Gal I, in a Low Metastatic Variant of a Murine Lymphoblastoid Cell Line Is Associated with Appearance of a Unique ST6Gal I mRNA — **Neng-Wen Lo, James W. Dennis, and Joseph T. Y. Lau** 619

The Antioxidant 4b,5,9b,10-Tetrahydroindeno[1,2-*b*]indole Inhibits Apoptosis by Preventing Caspase Activation Following Mitochondrial Depolarization — **G. P. Devitt, E. M. Creagh, and T. G. Cotter** 622

Characteristics of Fibrinogen Binding to the Domain of CD11c, an α Subunit of p150,95 — **Sang-Uk Nham** 630

Structural Characterization of a Highly Stable Cysteine Protease Ervatamin C — **Suman Kundu, Monica Sundd, and Medicherla V. Jagannadham** 635

Involvement of ppGpp, Ribosome Modulation Factor, and Stationary Phase-Specific Sigma Factor σ^S in the Decrease in Cell Viability Caused by Spermidine — **Auayporn Apirakaramwong, Keiko Kashiwagi, V. Samuel Raj, Kaori Sakata, Yoshimi Kakinuma, Akira Ishihama, and Kazuei Igarashi** 643

Profound and Selective Loss of Catalytic TrkB Immunoreactivity in Alzheimer's Disease — **Shelley J. Allen, Gordon K. Wilcock, and David Dawbarn** 648

Insulin-like Growth Factor Binding Proteins in Cerebrospinal Fluid during Human Development and Aging — **Paul M. Arnold, Jianxin Y. Ma, Bruce A. Citron, and Barry W. Festoff** 652

Effect of Faradic Products on Direct Current-Stimulated Calvarial Organ Culture Calcium Levels	**T. Bodamyali, J. M. Kanczler, B. Simon, D. R. Blake, and C. R. Stevens**	**657**
Genomic Organization and Genetic Mapping of the Bovine PREF-1 Gene	**Scott C. Fahrenkrug, Brad A. Freking, and Timothy P. L. Smith**	**662**
Involvement of the Sp1 Site in *ras*-Mediated Downregulation of the *RECK* Metastasis Suppressor Gene	**Regina M. Sasahara, Chiaki Takahashi, and Makoto Noda**	**668**
p38MAP Kinase Is a Negative Regulator for ERK1/2-Mediated Growth of AIDS-Associated Kaposi's Sarcoma Cells	**Kaoru Murakami-Mori, Shunsuke Mori, and Shuji Nakamura**	**676**
Non-methylene-Interrupted Polyunsaturated Fatty Acids: Effective Substitute for Arachidonate of Phosphatidylinositol	**Tamotsu Tanaka, Tatsunori Takimoto, Jun-ichi Morishige, Yasushi Kikuta, Takayuki Sugiura, and Kiyoshi Satouchi**	**683**
Unusual Phosphatase Activity Resistant to SDS and Pronase Treatments in *Xenopus* Ovary	**Toshihiko Sugimoto, Moriyoshi Amano, Toshinobu Tokumoto, and Katsutoshi Ishikawa**	**689**
Dual Potential of Extracellular Signal-Regulated Kinase for the Control of Cell Survival	**Yoshihisa Ishikawa and Masanori Kitamura**	**696**
Lack of Dependence on p53 for DNA Double Strand Break Repair of Episomal Vectors in Human Lymphoblasts	**Manu Kohli and Timothy J. Jorgensen**	**702**
Screening of Transcriptionally Regulated Genes Following Iron Chelation in Human Astrocytoma Cells	**Zheng Ye and James R. Connor**	**709**
Isolation of a New Ribonuclease from Fresh Fruiting Bodies of the Straw Mushroom	**Hexiang Wang and Tze Bun Ng**	**714**
Synergistic Effect of PTH on the Mechanical Responses of Human Alveolar Osteocytes	**Hideki Sekiya, Yuko Mikuni-Takagaki, Toshiroh Kondoh, and Kan-ichi Seto**	**719**
Bad Overexpression Sensitizes NIH/3T3 Cells to Undergo Apoptosis Which Involves Caspase Activation and ERK Inactivation	**Ming-Shiou Jan, Hsiao-Sheng Liu, and Yee-Shin Lin**	**724**
The Fourth Immunoglobulin-like Loop in the Extracellular Domain of FLT-1, a VEGF Receptor, Includes a Major Heparin-Binding Site	**Mikyoung Park and Seung-Taek Lee**	**730**
Transcriptional Induction of Metallothionein-I and -II Genes in the Livers of Cu,Zn-Superoxide Dismutase Knockout Mice	**Kalpana Ghoshal, Sarmila Majumder, Zhiling Li, Tamy M. Bray, and Samson T. Jacob**	**735**
Sphingosine 1-Phosphate Induces Angiogenesis: Its Angiogenic Action and Signaling Mechanism in Human Umbilical Vein Endothelial Cells	**Ok-Hee Lee, Young-Mi Kim, You Mie Lee, Eun-Joung Moon, Doo-Jae Lee, Jae-Hong Kim, Kyu-Won Kim, and Young-Guen Kwon**	**743**

High Expression of Macrophage Migration Inhibitory Factor in Human Melanoma Cells and Its Role in Tumor Cell Growth and Angiogenesis	**Tadamichi Shimizu, Riichiro Abe, Hideki Nakamura, Akira Ohkawara, Masaki Suzuki, and Jun Nishihira**	**751**
Orexins, Orexigenic Hypothalamic Neuropeptides, Suppress the Pulsatile Secretion of Luteinizing Hormone in Ovariectomized Female Rats	**Takao Tamura, Minoru Irahara, Michiko Tezuka, Machiko Kiyokawa, and Toshihiro Aono**	**759**
Bioconjugation of Laminin-Related Peptide YIGSR with Polyvinyl Pyrrolidone Increases Its Antimetastatic Effect Due to a Longer Plasma Half-Life	**Yu Mu, Haruhiko Kamada, Hiroshi Kodaira, Keiko Sato, Yasuo Tsutsumi, Mistuko Maeda, Koichi Kawasaki, Motoyoshi Nomizu, Yoshihiko Yamada, and Tadanori Mayumi**	**763**
Selective Expression and Function of Granzyme D in Lymphohematopoietic Stromal Cells	**Akiko Yokoi, Tatsuo Kina, and Nagahiro Minato**	**768**
Alteration of the Increase in Intracellular [Ca^{2+}] in Proliferating Smooth Muscle Cells	**Tomoyasu Sugiyama, Kazuhide Hasegawa, Nobuaki Yanai, Katsuhiko Mikoshiba, Masuo Obinata, and Yuzuru Matsuda**	**774**
VAMP-1 Has a Highly Variable C-Terminus Generated by Alternative Splicing	**Lars Berglund, Hans Jürgen Hoffmann, Ronald Dahl, and Torben Ellebæk Petersen**	**777**
Marked Induction of the IAP Family Antiapoptotic Proteins Survivin and XIAP by VEGF in Vascular Endothelial Cells	**Jennifer Tran, Janusz Rak, Capucine Sheehan, Samuel D. Saibil, Eric LaCasse, Robert G. Korneluk, and Robert S. Kerbel**	**781**
Identification and Gene Structure of a Novel Human PLZF-Related Transcription Factor Gene, TZFP	**Wen-chang Lin, Chun-Hung Lai, Chieh-Ju C. Tang, Chang-Jen Huang, and Tang K. Tang**	**789**
Energy Deficits Suppress Both Systemic and Gut Immunity during Infection	**Kristine G. Koski, Zhong Su, and Marilyn E. Scott**	**796**
DNA Sequences Responsible for Reduced Promoter Activity of Human Phospholipid Transfer Protein by Fibrate	**An-Yue Tu and John J. Albers**	**802**
Heparin Binding Epidermal Growth Factor-like Growth Factor Is a Transforming Growth Factor β-Regulated Gene in Intestinal Epithelial Cells	**Nada Bulus and John A. Barnard**	**808**
Tumor Necrosis Factor-α and Interferon-γ Induce Expression of Functional Fas Ligand on HT29 and MCF7 Adenocarcinoma Cells	**Cord Naujokat, Orhan Sezer, and Kurt Possinger**	**813**
Construction and Characterization of Mutant Water-Soluble PQQ Glucose Dehydrogenases with Altered K_m Values—Site-Directed Mutagenesis Studies on the Putative Active Site	**Satoshi Igarashi, Takafumi Ohtera, Hiromi Yoshida, Arief Budi Witarto, and Koji Sode**	**820**
Molecular Modeling of Human Procathepsin E: Analysis of Salt-Bridge Interactions between Propeptide and Enzyme Segment	**M. Kamran Azim and Zafar H. Zaidi**	**825**

Identification of Three New Alternate Human Kallikrein 2 Transcripts: Evidence of Long Transcript and Alternative Splicing — **Xiu Fen Liu, Magnus Essand, George Vasmatzis, Byungkook Lee, and Ira Pastan** 833

Opposing Effects of Protein Kinase C δ and Protein Kinase B α on H_2O_2-Induced Apoptosis in CHO Cells — **Hiroaki Konishi, Hidenori Matsuzaki, Hiroshi Takaishi, Toshiyoshi Yamamoto, Mizuho Fukunaga, Yoshitaka Ono, and Ushio Kikkawa** 840

A Human IAP-Family Gene, *Apollon,* Expressed in Human Brain Cancer Cells — **Zhihong Chen, Mikihiko Naito, Satoko Hori, Tetsuo Mashima, Takao Yamori, and Takashi Tsuruo** 847

Metabolism of D-Glucose and Its Pentaacetate Ester in Muscles and Pancreatic Islets of GLUT4 Null Mice — **L. Ladrière, M. J. Charron, and W. J. Malaisse** 855

Activation of p53 in MDM2-Overexpressing Cells through Phosphorylation — **Chongfeng Gao, Takuma Nakajima, Yoichi Taya, and Nobuo Tsuchida** 860

Transcriptional Regulation of the Cyclooxygenase-2 Gene by Diverse Ligands in Murine Osteoblasts — **David J. Wadleigh and Harvey R. Herschman** 865

The Leukemia-Associated Gene TEL Encodes a Transcription Repressor Which Associates with SMRT and mSin3A — **Subhra R. Chakrabarti and Giuseppina Nucifora** 871

Less Repair of Pyrimidine Dimers and Single-Strand Breaks in Genes by Scid Cells — **Rudaina H. Alrefai, E. Jeffrey Beecham, Vilhelm A. Bohr, and Patricia J. Gearhart** 878

Mass Spectrometric Characterization of *Limulus polyphemus* Hemocyanin — **Jacques Maddaluno and Kym F. Faull** 883

Comparative Gene Expression Profiling in Response to p53 in a Human Lung Cancer Cell Line — **Suisui Song, Timothy K. MacLachlan, Raymond D. Meng, and Wafik S. El-Deiry** 891

Phosphorylation of Bcl-2 and Mitochondrial Changes Are Associated with Apoptosis of Lymphoblastoid Cells Induced by Normal Immunoglobulin G — **Sooryanarayana, Nagendra Prasad, Emmanuelle Bonnin, Anastas Pashov, Kamal Ben Jilani, Jean-Claude Ameisen, Michel D. Kazatchkine, and Srini V. Kaveri** 896

Structural Requirements for Tyr in the Consensus Sequence Y-E-N of a Novel Nonphosphorylated Inhibitor to the Grb2-SH2 Domain — **Ya-Qiu Long, Zhu-Jun Yao, Johannes H. Voigt, Feng-Di T. Lung, Juliet H. Luo, Terrence R. Burke, Jr., C. Richter King, Dajun Yang, and Peter P. Roller** 902

GFP–Human High-Affinity Carnitine Transporter OCTN2 Protein: Subcellular Localization and Functional Restoration of Carnitine Uptake in Mutant Cell Lines with the Carnitine Transporter Defect — **Anne-Marie Lamhonwah and Ingrid Tein** 909

Manumycin A, Inhibitor of ras Farnesyltransferase, Inhibits Proliferation and Migration of Rat Vascular Smooth Muscle Cells	**Hirosuke Kouchi, Kazufumi Nakamura, Kazuo Fushimi, Masakiyo Sakaguchi, Masahiro Miyazaki, Tohru Ohe, and Masayoshi Namba**	**915**
Genetic Selection of Phage Engineered for Receptor-Mediated Gene Transfer to Mammalian Cells	**Paul D. Kassner, Michael A. Burg, Andrew Baird, and David Larocca**	**921**
Voltage-Dependent Large Conductance Channels in Visceral Smooth Muscle	**Fivos Vogalis**	**929**
Induction of Mouse Ca^{2+}-Sensitive Chloride Channel 2 Gene during Involution of Mammary Gland	**Daeyeon Lee, Seckho Ha, Yoonjung Kho, Jaeyoung Kim, Kwangkeun Cho, Myunggi Baik, and Yunjaie Choi**	**933**
Construction of Epstein–Barr Virus-Based Expression Vector Containing Mini-OriP	**Junko Tanaka, Yoshihiro Miwa, Keiko Miyoshi, Akemichi Ueno, and Hideo Inoue**	**938**
Site-Specific Mutagenesis of Mistletoe Lectin: The Role of RIP Activity in Apoptosis	**Martin Langer, Babette Möckel, Jürgen Eck, Holger Zinke, and Hans Lentzen**	**944**
A Highly Mobile C-Terminal Tail of the *Escherichia coli* Protein Export Chaperone SecB	**Thomas L. Volkert, James D. Baleja, and Carol A. Kumamoto**	**949**
Molecular Cloning and Characterization of Human *Frizzled-4* on Chromosome 11q14-q21	**Hiroyuki Kirikoshi, Norihiko Sagara, Jun Koike, Katsuaki Tanaka, Hisahiko Sekihara, Momoki Hirai, and Masaru Katoh**	**955**
Reduced mRNA Expression of the DNA Demethylase, MBD2, in Human Colorectal and Stomach Cancers	**Yae Kanai, Saori Ushijima, Yukihiro Nakanishi, and Setsuo Hirohashi**	**962**
Cytosolic Ca^{2+} Controls the Loading Dependence of IP$_3$-Induced Ca^{2+} Release	**Ludwig Missiaen, Humbert De Smedt, Jan B. Parys, Kristel Van Acker, Patrick De Smet, and Geert Callewaert**	**967**
Structural Dependence of the Cellular Isoform of Prion Protein on Solvent: Spectroscopic Characterization of an Intermediate Conformation	**Paola Pergami, Emilia Bramanti, and Giorgio A. Ascoli**	**972**
The Effects of 2-Aminoethoxydiphenyl Borate, a Novel Inositol 1,4,5-Trisphosphate Receptor Modulator on Myometrial Contractions	**Jessica Ascher-Landsberg, Trevania Saunders, Michal Elovitz, and Mark Phillippe**	**979**
Identification of a DNA Binding Protein Cooperating with Estrogen Receptor as RIZ (Retinoblastoma Interacting Zinc Finger Protein)	**Nicola Medici, Ciro Abbondanza, Vincenzo Nigro, Valentina Rossi, Giulio Piluso, Angela Belsito, Luigi Gallo, Annarita Roscigno, Paola Bontempo, Annibale A. Puca, Anna Maria Molinari, Bruno Moncharmont, and Giovanni A. Puca**	**983**

Cloning and Functional Characterization of the Promoter Region of the Gene Encoding Human Adenylate Kinase Isozyme 3	**Takafumi Noma, Naoto Adachi, and Atsushi Nakazawa**	**990**
Identification of Two Distinct Transcripts for the Neuronal Apoptosis Inhibitory Protein Gene	**Kenji Yamamoto, Harumi Sakai, Shinji Hadano, Yoichi Gondo, and Joh-E Ikeda**	**998**

ERRATA

Volume **258,** Number 1 (1999), in Article ID bbrc.1999.0573, “Functional Expression of Components of the Natriuretic Peptide System in Human Ocular Nonpigmented Ciliary Epithelial Cells,” by Javier Ortego and Miguel CocaPrados, pages 21–28 **1007**

Volume **262,** Number 3 (1999), in Article ID bbrc.1999.1275, “Novel Inhibitors of Advanced Glycation Endproducts,” by Samuel Rahbar, Kiran Kumar Yernini, Stephen Scott, Noe Gonzales, and Iraj Lalezari, pages 651–656 **1008**

Author Index for Volume 264 **1009**

Volume 265, Number 1, November 11, 1999

BREAKTHROUGHS AND VIEWS

p53-Induced Apoptosis as a Safeguard against Cancer — **Charlotte Asker, Klas G. Wiman, and Galina Selivanova** — 1

REGULAR ARTICLES

Isolation of Oncogenes from Rat Mammary Tumors by a Highly Efficient Retrovirus Expression Cloning System — **Tetsuya Tsukamoto, Tony Huang, Raphael C. Guzman, Xiaoyan Chen, Rhett V. Pascual, Toshio Kitamura, and Satyabrata Nandi** — 7

Expression of an mNSC1 in Mammalian Cells — **Taku Miyoshi, Gaku Ooki, Mitsunobu Murata, Hiroshi Hayakawa, Kimio Tomita, Masashi Imai, and Makoto Suzuki** — 13

Negative Regulation of Rat GST-Ya Gene via Antioxidant/Electrophile Response Element Is Directed by a C/EBP-like Site — **Y.-H. Chen and K. S. Ramos** — 18

Phosphate Depletion Enhances Tissue-Nonspecific Alkaline Phosphatase Gene Expression in a Cultured Mouse Marrow Stromal Cell Line ST2 — **Masae Goseki-Sone, Asako Yamada, Kumiko Asahi, Arisa Hirota, Ikuko Ezawa, and Tadahiro Iimura** — 24

Reconstitution of GTPγS-Induced NADPH Oxidase Activity in Streptolysin-O-Permeabilized Neutrophils by Specific Cytosol Fractions — **Lasse Leino, Louisa Forbes, Anthony Segal, and Shamshad Cockcroft** — 29

nRap GEP: A Novel Neural GDP/GTP Exchange Protein for Rap1 Small G Protein That Interacts with Synaptic Scaffolding Molecule (S-SCAM) — **Toshihisa Ohtsuka, Yutaka Hata, Nobuyuki Ide, Takeo Yasuda, Eiji Inoue, Takahiro Inoue, Akira Mizoguchi, and Yoshimi Takai** — 38

Basic Fibroblast Growth Factor Inhibits Osteoclast Formation Induced by 1α,25-Dihydroxyvitamin D_3 through Suppressing the Production of Osteoclast Differentiation Factor — **Nobuaki Nakagawa, Hisataka Yasuda, Kazuki Yano, Shin-ichi Mochizuki, Naoki Kobayashi, Hitoshi Fujimoto, Kyoji Yamaguchi, Nobuyuki Shima, Tomonori Morinaga, and Kanji Higashio** — 45

Enzymatic Activity of Endogenous Telomerase Associated with Intact Nuclei from Human Leukemia CEM Cells — **Terace M. Fletcher, Alex Trevino, and Jan M. Woynarowski** — 51

In Vitro Heat Effect of Functional and Conformational Changes of Cyclodextrin Glucanotransferase from Hyperthermophilic Archaea — **Tomoko Yamamoto, Kentaro Shiraki, Shinsuke Fujiwara, Masahiro Takagi, Kiichi Fukui, and Tadayuki Imanaka** — 57

The Synergistic Transactivation of the Hepatitis B Viral (HBV) Pregenomic Promoter by the E6 Protein of Human Papillomavirus Type 16 (HPV-16 E6) with HBV X Protein Was Mediated through the AP1 Site of E Element in the Enhancer I (EnI) in Human Liver Cell	**Dong Hoon Lee, Byung Hyune Choi, and Hyune Mo Rho**	**62**
Inhibition of Glutamate Uptake by Unconjugated Bilirubin in Cultured Cortical Rat Astrocytes: Role of Concentration and pH	**Rui Silva, Lucinda R. Mata, Sérgio Gulbenkian, Maria A. Brito, Claudio Tiribelli, and Dora Brites**	**67**
Electromagnetic Fields in Combination with Elevated Temperatures Affect Embryogenesis of *Drosophila*	**Anja Michel and Herwig O. Gutzeit**	**73**
Biochemical Characterization and Expression Analysis of Neural Thrombospondin-1-like Proteins NELL1 and NELL2	**Shun'ichi Kuroda, Miho Oyasu, Masakatsu Kawakami, Norihiro Kanayama, Katsuyuki Tanizawa, Naoaki Saito, Teruo Abe, Sachiko Matsuhashi, and Kang Ting**	**79**
Cloning and Expression of Pleckstrin 2, a Novel Member of the Pleckstrin Family	**Tetsuya Inazu, Kazuya Yamada, and Kaoru Miyamoto**	**87**
α_1-Adrenoceptor-Induced Trafficking of Aquaporin-5 to the Apical Plasma Membrane of Rat Parotid Cells	**Yasuko Ishikawa, Mariusz T. Skowronski, Noriko Inoue, and Hajime Ishida**	**94**
Steroid Hormone-Inducible Expression of the GLT-1 Subtype of High-Affinity L-Glutamate Transporter in Human Embryonic Kidney Cells	**John Dunlop, Zhuangwei Lou, and H. Beal McIlvain**	**101**
Two Separate Transhydrogenase Activities Are Present in Plant Mitochondria	**Natalia V. Bykova, Allan G. Rasmusson, Abir U. Igamberdiev, Per Gardeström, and Ian M. Møller**	**106**
The Effect of AMP-Activated Protein Kinase and Its Activator AICAR on the Metabolism of Human Umbilical Vein Endothelial Cells	**Zeina Dagher, Neil Ruderman, Keith Tornheim, and Yasuo Ido**	**112**
Cellular Enrichment with Polyunsaturated Fatty Acids Induces an Oxidative Stress and Activates the Transcription Factors AP1 and NFκB	**Cécile Mazière, Marie-Alix Conte, James Degonville, Dany Ali, and Jean-Claude Mazière**	**116**
Urotensin II Is the Endogenous Ligand of a G-Protein-Coupled Orphan Receptor, SENR (GPR14)	**Masaaki Mori, Tsukasa Sugo, Michiko Abe, Yukio Shimomura, Mika Kurihara, Chieko Kitada, Kuniko Kikuchi, Yasushi Shintani, Tsutomu Kurokawa, Haruo Onda, Osamu Nishimura, and Masahiko Fujino**	**123**
TRAIL Causes Cleavage of Bid by Caspase-8 and Loss of Mitochondrial Membrane Potential Resulting in Apoptosis in BJAB Cells	**Hiroyuki Yamada, Saeko Tada-Oikawa, Atsumasa Uchida, and Shosuke Kawanishi**	**130**

The Monoclonal Antibody SH-2, Rasied against Human Mesenchymal Stem Cells, Recognizes an Epitope on Endoglin (CD105)	**Frank P. Barry, Raymond E. Boynton, Stephen Haynesworth, J. Mary Murphy, and Joseph Zaia**	134
Visualization of a Specific Sequence on a Single Large DNA Molecule Using Fluorescence Microscopy Based on a New DNA-Stretching Method	**Hidehiro Oana, Masanori Ueda, and Masao Washizu**	140
Activated T Lymphocytes Support Osteoclast Formation *in Vitro*	**Nicole J. Horwood, Vicky Kartsogiannis, Julian M. W. Quinn, Evangelos Romas, T. John Martin, and Matthew T. Gillespie**	144
Pleckstrin Homology Domains of Tec Family Protein Kinases	**Michael P. Okoh and Mauno Vihinen**	151
Basic Fibroblast Growth Factor Induces Osteoclast Formation by Reciprocally Regulating the Production of Osteoclast Differentiation Factor and Osteoclastogenesis Inhibitory Factor in Mouse Osteoblastic Cells	**Nobuaki Nakagawa, Hisataka Yasuda, Kazuki Yano, Shin-ichi Mochizuki, Naoki Kobayashi, Hitoshi Fujimoto, Nobuyuki Shima, Tomonori Morinaga, Daichi Chikazu, Hiroshi Kawaguchi, and Kanji Higashio**	158
Disruption of β_2-Integrin–Cytoskeleton Coupling Abolishes the Signaling Capacity of These Integrins on Granulocytes	**Carina Hellberg, Liselotte Ydrenius, Lena Axelsson, and Tommy Andersson**	164
The E-Box of the Human Glycophorin B Promoter Is Involved in the Erythroid-Specific Expression of the GPB Gene	**Valérie Camara-Clayette, Cécile Rahuel, Olivier Bertrand, and Jean-Pierre Cartron**	170
The *cbbQ* Genes, Located Downstream of the Form I and Form II RubisCO Genes, Affect the Activity of Both RubisCOs	**Nobuhiro R. Hayashi, Hiroyuki Arai, Tohru Kodama, and Yasuo Igarashi**	177
Rapid Kinetic Studies of Electron Transfer in the Three Isoforms of Nitric Oxide Synthase	**R. Timothy Miller, Pavel Martásek, Tsuneo Omura, and Bettie Sue Siler Masters**	184
Heat Shock Suppresses Membrane Type 1-Matrix Metalloproteinase Production and Progelatinase A Activation in Human Fibrosarcoma HT-1080 Cells and Thereby Inhibits Cellular Invasion	**Takashi Sato, Yasunobu Sawaji, Norimitsu Matsui, Hiroshi Sato, Motoharu Seiki, Yo Mori, and Akira Ito**	189
Regulatory Role of Endogenous Interleukin-10 in Cutaneous Inflammatory Response of Murine Wound Healing	**Yasunori Sato, Tohru Ohshima, and Toshikazu Kondo**	194
Lipocortin (Annexin) I Heterotetramer Binds to Purine RNA and Pyrimidine DNA	**Aiko Hirata and Fusao Hirata**	200
Genetic Evidence for Distinct Roles of COX-1 and COX-2 in the Immediate and Delayed Phases of Prostaglandin Synthesis in Mast Cells	**Srinivasa T. Reddy, Howard F. Tiano, Robert Langenbach, Scott G. Morham, and Harvey R. Herschman**	205

Ornithine Decarboxylase Activity in Developing Chick Embryos after Exposure to 60-Hertz Magnetic Fields — **Abiy B. Desta, Russell D. Owen, and Larry W. Cress** — **211**

Differential Regulation of EGF-like Growth Factor Genes in Human Keratinocytes — **S. W. Stoll and J. T. Elder** — **214**

Transcriptional Activation of the Myogenin Gene by MEF2-Mediated Recruitment of Myf5 Is Inhibited by Adenovirus E1A Protein — **Malin Johanson, Heiko Meents, Karsten Ragge, Astrid Buchberger, Hans Henning Arnold, and Andrea Sandmöller** — **222**

TGF-β Enhances Osteoclast Differentiation in Hematopoietic Cell Cultures Stimulated with RANKL and M-CSF — **Rachelle J. Sells Galvin, Cindy L. Gatlin, Jeffrey W. Horn, and Tina R. Fuson** — **233**

Selective Induction of Glial Glutamate Transporter GLT-1 by Hypertonic Stress in C6 Glioma Cells — **Tetsuya Imura, Shun Shimohama, Takashi Kageyama, and Jun Kimura** — **240**

Serial Passage of MC3T3-E1 Cells Alters Osteoblastic Function and Responsiveness to Transforming Growth Factor-β1 and Bone Morphogenetic Protein-2 — **Chi Y. Chung, Akiko Iida-Klein, Lance E. Wyatt, George H. Rudkin, Kenji Ishida, Dean T. Yamaguchi, and Timothy A. Miller** — **246**

Telomerase Repeat Amplification Protocol (TRAP): A New Molecular Marker for Parathyroid Carcinoma — **Alberto Falchetti, Lucia Becherini, Valentina Martineti, Annamaria Morelli, Susanna Benvenuti, Lucia Picariello, Luigi Gennari, Rinaldo Lampugnani, Cesare Bordi, and Maria Luisa Brandi** — **252**

Fine Mapping and Genomic Structure of ACTN2, the Human Gene Coding for the Sarcomeric Isoform of α-Actinin-2, Expressed in Skeletal and Cardiac Muscle — **N. Tiso, M. Majetti, F. Stanchi, A. Rampazzo, R. Zimbello, A. Nava, and G. A. Danieli** — **256**

Calcitonin-Suppressed Expression of Parathyroid Hormone-Related Protein in Breast Cancer Cells — **Haiqin Rong, Hong Ji, Jon A. Tsai, Ylva Pernow, and Elisabet Bucht** — **260**

Regulation of Gene Expression by Activation of the Peroxisome Proliferator-Activated Receptor γ with Rosiglitazone (BRL 49653) in Human Adipocytes — **Jennifer Rieusset, Johan Auwerx, and Hubert Vidal** — **265**

ERRATUM

Volume **262,** Number 2 (1999), in Article ID bbrc.1999.1211, "A Novel Strategy for Identifying Differential Gene Expression: An Improved Method of Differential Display Analysis," by Junya Kohroki, Mikako Tsuchiya, Sayaka Fujita, Tsuyoshi Nakanishi, Norio Itoh, and Keiichi Tanaka, pages 365–367 — **272**

Number 2, November 19, 1999

The Emitting Species Dissociated from the Enzyme Can Emit the Light in *Photinus pyralis* Luciferase System — **Kyung-Lyum Min and Jean-Paul Steghens** — **273**

Constitutive hsp70 Attenuates Hydrogen Peroxide-Induced Membrane Lipid Peroxidation	**Ching-Yuan Su, Kowit-Yu Chong, Kerry Edelstein, Sean Lille, Romesh Khardori, and Chen-Ching Lai**	**279**
Identification and Characterization of a Transcriptional Silencer Upstream of the Human BRCA2 Gene	**Chakradhari Sharan, Nalo M. Hamilton, Angelika K. Parl, Pramod K. Singh, and Gautam Chaudhuri**	**285**
Protein Domain Mapping by λ Phage Display: The Minimal Lactose-Binding Domain of Galectin-3	**Takanori Moriki, Ichiro Kuwabara, Fu-Tong Liu, and Ichi N. Maruyama**	**291**
An FT-IR Study of the β-Amyloid Conformation: Standardization of Aggregation Grade	**Z. Szabó, É. Klement, K. Jost, M. Zarándi, K. Soós, and B. Penke**	**297**
Protective Effect of Prostaglandin I_2 Analogs on Ischemic Delayed Neuronal Damage in Gerbils	**Yilong Cui, Yosky Kataoka, Takumi Satoh, Aya Yamagata, Noriyuki Shirakawa, Yumiko Watanabe, Masaaki Suzuki, Hisato Yanase, Kiyoshi Kataoka, and Yasuyoshi Watanabe**	**301**
Expression of the Csp Protein Family upon Cold Shock and Production of Tetracycline in *Streptomyces aureofaciens*	**Karel Mikulík, Quoc Khanh-Hoang, Petr Halada, Silvie Bezoušková, Oldȓich Benada, and Vladislav Bêhal**	**305**
Interaction of Schiff Base with Bovine Serum Albumin: Site-Specific Photocleavage	**H. Yamini Shrivastava, Mookandi Kanthimathi, and Balachandran Unni Nair**	**311**
Relationship of δ-Aminolevulinic Acid-Induced Protoporphyrin IX Levels to Mitochondrial Content in Neoplastic Cells *in Vitro*	**Scott L. Gibson, My Lien Nguyen, James J. Havens, Ayana Barbarin, and Russell Hilf**	**315**
Interaction of Tear Lipocalin with Lysozyme and Lactoferrin	**Oktay K. Gasymov, Adil R. Abduragimov, Taleh N. Yusifov, and Ben J. Glasgow**	**322**
Molecular Cloning and Functional Characterization of the Promoter Region of the Human Uncoupling Protein-2 Gene	**Naxin Tu, Hongmei Chen, Ulrike Winnikes, Irmtraud Reinert, Gabriele Marmann, Karl Martin Pirke, and Klaus-Ulrich Lentes**	**326**
Association of the Estrogen Receptor *α* Gene Polymorphisms with Sporadic Alzheimer's Disease	**Maria Luisa Brandi, Lucia Becherini, Luigi Gennari, Marco Racchi, Angelo Bianchetti, Benedetta Nacmias, Sandro Sorbi, Patrizia Mecocci, Umberto Senin, and Stefano Govoni**	**335**
SURFEIT-1 Gene Analysis and Two-Dimensional Blue Native Gel Electrophoresis in Cytochrome *c* Oxidase Deficiency	**Marieke J. H. Coenen, Lambert P. van den Heuvel, Leo G. J. Nijtmans, Eva Morava, I. Marquardt, Hermann J. Girschick, Frans J. M. Trijbels, Leslie A. Grivell, and Jan A. M. Smeitink**	**339**
Lens-Specific Regulation of the Thioredoxin-1 Gene, but Not Thioredoxin-2, upon *in Vivo* Photochemical Oxidative Stress in the Emory Mouse	**Pabbathi G. Reddy, Durga K. Bhuyan, and Kailash C. Bhuyan**	**345**

The Roles of Side Chain and Backbone in Protein Structure Probed with Glycine- and Sarcosine-Rich Synthetic Leucine Zipper Peptides	**Daniel J. Butcher, Zhaowen Luo, and Ziwei Huang**	**350**
Valine 108, a Chain-Folding Initiation Site-Belonging Residue, Crucial for the Ribonuclease A Stability	**M. G. Coll, I. I. Protasevich, J. Torrent, M. Ribó, V. M. Lobachov, A. A. Makarov, and M. Vilanova**	**356**
Differentiation-Induced Insulin Secretion from Nonendrocrine Cells with Engineered Human Proinsulin cDNA	**Koichiro Yamasaki, Takashi Sasaki, Masami Nemoto, Yoshikatsu Eto, and Naoko Tajima**	**361**
The Duality of Fish Gonadotropin Receptors: Cloning and Functional Characterization of a Second Gonadotropin Receptor cDNA Expressed in the Ovary and Testis of Amago Salmon (*Oncorhynchus rhodurus*)	**Yuichi Oba, Toshiaki Hirai, Yasutoshi Yoshiura, Michiyasu Yoshikuni, Hiroshi Kawauchi, and Yoshitaka Nagahama**	**366**
Neuroglian and DE-Cadherin Activate Independent Cytoskeleton Assembly Pathways in *Drosophila* S2 Cells	**Ronald R. Dubreuil and Tatyana Grushko**	**372**
STAT 1α/1β, STAT 3 and STAT 5: Expression and Association with c-MET and EGF-Receptor in Long-Term Cultures of Human Hepatocytes	**Dorothee M. Runge, Dieter Runge, Heidi Foth, Stephen C. Strom, and George K. Michalopoulos**	**376**
Hypoxia Regulates the Expression of the Adrenomedullin and HIF-1 Genes in Cultured HL-1 Cardiomyocytes	**Son V. Nguyen and William C. Claycomb**	**382**
Structural Characterization of the Human Interleukin-13 Receptor α1 Gene Promoter	**Tomoko Ise, Hiroto Izumi, Gunji Nagatani, Hiroshi Takano, Morimasa Wada, Michihiko Kuwano, and Kimitoshi Kohno**	**387**
Cloning of a cDNA Encoding a Rat DNase II-like Acid DNase	**Sei-ichi Tanuma and Daisuke Shiokawa**	**395**
Effect of Arsenic Trioxide on Cell Cycle Arrest in Head and Neck Cancer Cell Line PCI-1	**Jae G. Seol, Woo H. Park, Eun S. Kim, Chul W. Jung, Jung M. Hyun, Byoung K. Kim, and Young Y. Lee**	**400**
Potentiation by Chronic Ethanol Treatment of the Mitochondrial Permeability Transition	**John G. Pastorino, Ausra Marcineviciute, Alan Cahill, and Jan B. Hoek**	**405**
Interactions of the Flavonoid Naringenin in the Gastrointestinal Tract and the Influence of Glycosylation	**Ruksana Choudhury, George Chowrimootoo, Kaila Srai, Edward Debnam, and Catherine A. Rice-Evans**	**410**
Interaction between Ellagic Acid and Calf Thymus DNA Studied with Flow Linear Dichroism UV–VIS Spectroscopy	**Peter W. Thulstrup, Thorsten Thormann, Jens Spanget-Larsen, and Hanne Cathrine Bisgaard**	**416**
Salicylic Acid Influences Hsp70/Hsc70 Expression in *Lycopersicon esculentum:* Dose- and Time-Dependent Induction or Potentiation	**Marianne J. Cronjé and Liza Bornman**	**422**

Binding of Soluble Recombinant HIV Envelope Glycoprotein, rgp120, Induces Conformational Changes in the Cellular Membrane-Anchored CD4 Molecule — **Abdelkader Yachou and Rafick-Pierre Sékaly** 428

Involvement of β-1,4-Galactosyltransferase V in Malignant Transformation-Associated Changes in Glycosylation — **Katsunori Shirane, Takeshi Sato, Kaoru Segawa, and Kiyoshi Furukawa** 434

Sp1 and CTF/NF-1 Transcription Factors Are Involved in the Basal Expression of the *Hmgi-c* Proximal Promoter — **Alessandra Rustighi, Fiamma Mantovani, Alfredo Fusco, Vincenzo Giancotti, and Guidalberto Manfioletti** 439

A Two-Step Computer-Assisted Method for Deriving Steady-State Rate Equations — **Stephen J. Fromm and Herbert J. Fromm** 448

PPARγ Inhibits the Expression of c-*MET* in Human Gastric Cancer Cells through the Suppression of *Ets* — **Shinji Kitamura, Yoshiji Miyazaki, Shintaro Hiraoka, Miyuki Toyota, Yutaka Nagasawa, Shinya Kondo, Tatsuya Kiyohara, Yasuhisa Shinomura, and Yuji Matsuzawa** 453

Peripheral Benzodiazepine Receptor Agonists Exhibit Potent Antiapoptotic Activities — **F. Bono, I. Lamarche, V. Prabonnaud, G. Le Fur, and J. M. Herbert** 457

rDLG6: A Novel Homolog of *Drosophila* DLG Expressed in Rat Brain — **H. Inagaki, S. Maeda, K. H. Lin, N. Shimizu, and T. Saito** 462

Formation of Indigo by Recombinant Mammalian Cytochrome P450 — **Elizabeth M. J. Gillam, Anna Marie A. Aguinaldo, Lisa M. Notley, Donghak Kim, Ralf G. Mundkowski, Alexander A. Volkov, Frances H. Arnold, Pavel Souček, James J. DeVoss, and F. Peter Guengerich** 469

Localization of Phospholipase Cβ Isozymes in the Mouse Cerebellum — **Takashi Sugiyama, Moritoshi Hirono, Kaoru Suzuki, Yukihiro Nakamura, Atsu Aiba, Kenji Nakamura, Kazuki Nakao, Motoya Katsuki, and Tohru Yoshioka** 473

Locoregional Apo2L/TRAIL Eradicates Intracranial Human Malignant Glioma Xenografts in Athymic Mice in the Absence of Neurotoxicity — **Wilfried Roth, Stefan Isenmann, Ulrike Naumann, Sebastian Kügler, Mathias Bähr, Johannes Dichgans, Avi Ashkenazi, and Michael Weller** 479

Effect of Extracellular Calcium Concentrations on Osteoclast Differentiation *in Vitro* — **Yoichi Shirai, Yoshitaka Yoshimura, Yasutaka Yawaka, Tomokazu Hasegawa, Takashi Kikuiri, Sadaaki Takeyama, Akira Matsumoto, and Haruhisa Oguchi** 484

The Use of Fluorescein 5′-Isothiocyanate for Studies of Structural and Molecular Mechanisms of Soybean Lipoxygenase — **J. A. García-Barrado, J. L. Gata, E. Santano, J. I. Solís, M. C. Pinto, and P. Macías** 489

Induction of Hsp70 in the Fungus *Rhizopus nigricans*	**Boštjan Černila, Bronislava Črešnar, and Katja Breskvar**	494
N^6-Furfuryladenine, Kinetin, Protects against Fenton Reaction-Mediated Oxidative Damage to DNA	**Anders Olsen, Gunhild E. Siboska, Brian F. C. Clark, and Suresh I. S. Rattan**	499
In Vivo Gene Transfer of an Extracellular Domain of Platelet-Derived Growth Factor β Receptor by the HVJ-Liposome Method Ameliorates Bleomycin-Induced Pulmonary Fibrosis	**Mitsuhiro Yoshida, Junko Sakuma-Mochizuki, Kin'ya Abe, Toru Arai, Masahide Mori, Sho Goya, Hiroto Matsuoka, Seiji Hayashi, Yasufumi Kaneda, and Tadamitsu Kishimoto**	503
Molecular Cloning of Rat *ATX1* Homologue Protein	**Makoto Hiromura and Hiromu Sakurai**	509
Affinity Labeling of δ Opioid Receptors by an Enkephalin-Derivative Alkylating Agent, DSLET-Mal	**Ildikó Szatmári, György Orosz, Kálmán Medzihradszky, and Anna Borsodi**	513
Detergent Effect on Anion Exchange Perfusion Chromatography and Gel Filtration of Intact Chloroplast H$^+$-ATP Synthase	**Ansgar Poetsch, Holger Seelert, Jürgen Meyer zu Tittingdorf, and Norbert A. Dencher**	520
NAD$^+$ Consumption in Carcinogen-Treated Hamster Cells Overexpressing a Dominant Negative Mutant of Poly(ADP-ribose) Polymerase	**Jan-Heiner Küpper, Marcus Müller, and Ivo Wolf**	525
Purification, Characterization, and cDNA Cloning of a New Fibrinogenlytic Venom Protein, Agkisacutacin, from *Agkistrodon acutus* Venom	**Xin Cheng, Yawen Qian, Qingdu Liu, Benjamin X. Y. Li, Mingwu Zhang, and Jing Liu**	530
Differential Inhibition of HMG-CoA Synthase and Pancreatic Lipase by the Specific Chiral Isomers of β-Lactone DU-6622	**Hiroshi Tomoda, Naomi Ohbayashi, Hidetoshi Kumagai, Hirokazu Hashizume, Toshiaki Sunazuka, and Satoshi Ōmura**	536
Rapid Degradation of PrxI and PrxII Induced by Silica in Rat2 Cells	**Min-Seok Seo, Jong Kee Kim, Young Lim, Sang Won Kang, Young Jin Cho, Woon Kyu Lee, Hyung Jung Kim, Kyung-Keun Cho, Kweon-Haeng Lee, and Sue Goo Rhee**	541
Cyclooxygenase-2 Transcription Is Stimulated and Amylase Secretion Is Inhibited in Pancreatic Acinar Cells after Induction of Acute Pancreatitis	**Alexander Zabel-Langhennig, Babett Holler, Kurt Engeland, and Joachim Mössner**	545
Hepatoma-Specific Gene Therapy through Retrovirus-Mediated and Targeted Gene Transfer Using an Adenovirus Carrying the Ecotropic Receptor Gene	**Hirofumi Uto, Akio Ido, Takeshi Hori, Shuichi Hirono, Katsuhiro Hayashi, Taiki Tamaoki, and Hirohito Tsubouchi**	550
Function of Human Factor H and I on Xenosurface	**Masao Yoshitatsu, Shuji Miyagawa, Shoki Mikata, Katsuyoshi Matsunami, Mako Yamada, Ayako Murase, Yoshiki Sawa, Shigeaki Ohtake, Hikaru Matsuda, and Ryota Shirakura**	556

Genetic Analysis of MMP3, MMP9, and PAI-1 in Finnish Patients with Abdominal Aortic or Intracranial Aneurysms	**Sungpil Yoon, Gerard Tromp, Sompong Vongpunsawad, Antti Ronkainen, Tatu Juvonen, and Helena Kuivaniemi**	**563**
Disproportional Body Growth in Female Estrogen Receptor-α-Inactivated Mice	**O. Vidal, M. Lindberg, L. Sävendahl, D. B. Lubahn, E. M. Ritzen, J. Å. Gustafsson, and C. Ohlsson**	**569**
Ca^{2+}-Independent Phospholipase A2 Is Required for α2-Adrenergic-Induced Preadipocyte Spreading	**Céline Pagès, Astrid Rey, Max Lafontan, Philippe Valet, and Jean Sébastien Saulnier-Blache**	**572**
Regulation of Ferritin Light Chain Gene Expression by Oxidized Low-Density Lipoproteins in Human Monocytic THP-1 Cells	**Moon Kyoo Jang, Myung-Sook Choi, and Yong Bok Park**	**577**
Okadaic Acid Stimulates the Expression of Vascular Endothelial Growth Factor Gene	**Kenji Wakiya and Masabumi Shibuya**	**584**
Protein Synthesis Inhibition by Flavonoids: Roles of Eukaryotic Initiation Factor 2α Kinases	**Takahiko Ito, Sarah P. Warnken, and W. Stratford May**	**589**
An Artificial Lipid Bilayer Formed on an Agarose-Coated Glass for Simultaneous Electrical and Optical Measurement of Single Ion Channels	**Toru Ide and Toshio Yanagida**	**595**
Xanthurenic Acid Provokes Formation of Unfolded Proteins in Endoplasmic Reticulum of the Lens Epithelial Cells	**Halina Z. Malina**	**600**
Mechanical Strain Increases PDGF-B and PDGF β Receptor Expression in Vascular Smooth Muscle Cells	**Yunn-Hwa Ma, Shanhong Ling, and Harlan E. Ives**	**606**

Number 3, November 30, 1999

BREAKTHROUGHS AND VIEWS

Mitochondrial Processing Peptidase: Multiple-Site Recognition of Precursor Proteins	**Akio Ito**	**611**

REGULAR ARTICLES

5-Lipoxygenase Upregulation by Dexamethasone in Human Mast Cells	**Teresa Colamorea, Roberto Di Paola, Filomena Macchia, Maria-Carmela Guerrese, Alfredo Tursi, Joseph H. Butterfield, Maria F. Caiaffa, Jesper Z. Haeggström, and Luigi Macchia**	**617**

Two Interaction Modes of the gp41-Derived Peptides with gp41 and Their Correlation with Antimembrane Fusion Activity	**Jae-Ryeon Ryu, Bong-Suk Jin, Moo-Jin Suh, Young-Sook Yoo, Seung Hee Yoon, Eun-Rhan Woo, and Yeon Gyu Yu**	**625**
SNX5, a New Member of the Sorting Nexin Family, Binds to the Fanconi Anemia Complementation Group A Protein	**Tetsuya Otsuki, Sachiko Kajigaya, Keiya Ozawa, and Johnson M. Liu**	**630**
A Novel Function of VEGF Receptor-2 (KDR): Rapid Release of Nitric Oxide in Response to VEGF-A Stimulation in Endothelial Cells	**Jens Kroll and Johannes Waltenberger**	**636**
Phosphatidylcholine-Dependent Phospholipase C in Rat Liver Chromatin	**Elisabetta Albi and Mariapia Viola Magni**	**640**
Inhibition of Transcription of Class II, but Not Class III and I, Genes in *Xenopus* Postblastular Embryos Overexpressed with the TBP-Binding Protein, Dr1 (NC2β)	**Michiyo Nagano and Koichiro Shiokawa**	**644**
New Insight into Abnormal Prion Protein Using Monoclonal Antibodies	**Séverine Demart, Jean-Guy Fournier, Christophe Creminon, Yveline Frobert, François Lamoury, Dominique Marce, Corinne Lasmézas, Dominique Dormont, Jacques Grassi, and Jean-Philippe Deslys**	**652**
Mice Lacking Pin1 Develop Normally, but Are Defective in Entering Cell Cycle from G_0 Arrest	**Fumihiro Fujimori, Katsuhiko Takahashi, Chiyoko Uchida, and Takafumi Uchida**	**658**
Differential Regulation of Immediate Early Gene Expression in Preadipocyte Cells through Multiple Signaling Pathways	**Hiroyuki Inuzuka, Rika Nanbu-Wakao, Yasuhiko Masuho, Masa-aki Muramatsu, Hideaki Tojo, and Hiroshi Wakao**	**664**
Suppression of Activin-Induced Apoptosis by Novel Antisense Strategy in Human Prostate Cancer Cells	**Shao-Yao Ying, Cheng-Ming Chuong, and Shilung Lin**	**669**
Constitutive Secretion of an Endogenous Insulin-like Peptide Binding Protein with High Affinity for Insulin in *Spodoptera frugiperda* (Sf9) Cell Cultures	**Magnus Doverskog, Michael Tally, and Lena Häggström**	**674**
Localization of Glycosaminoglycan Substitution Sites on Domain V of Mouse Perlecan	**Pairath Tapanadechopone, John R. Hassell, Brian Rigatti, and John R. Couchman**	**680**
Transfection Analysis of Functional Roles of Complexin I and II in the Exocytosis of Two Different Types of Secretory Vesicles	**Makoto Itakura, Hidemi Misawa, Mariko Sekiguchi, Seiichi Takahashi, and Masami Takahashi**	**691**
Increased Cytosolic Ca^{2+} Concentration in Endothelial Cells by Calmodulin Antagonists	**Hiroshi Watanabe, Reiko Takahashi, Quang-Kim Tran, Kazuhiko Takeuchi, Kazuhiro Kosuge, Hiroshi Satoh, Akihiko Uehara, Hajime Terada, Hideharu Hayashi, Ryuzo Ohno, and Kyoichi Ohashi**	**697**

Isolation and Characterization of a Mannan-Binding Lectin from the Freshwater Cyanobacterium (Blue-Green Algae) *Microcystis viridis*	**Masato Yamaguchi, Tomohisa Ogawa, Koji Muramoto, Yoshiyuki Kamio, Mitsuru Jimbo, and Hisao Kamiya**	**703**
Annexin V Counteracts Apoptosis While Inducing Ca^{2+} Influx in Human Lymphocytic T Cells	**Carole Gidon-Jeangirard, Egle Solito, Andreas Hofmann, Françoise Russo-Marie, Jean-Marie Freyssinet, and M. Carmen Martínez**	**709**
Expression of Full-Length NBS1 Protein Restores Normal Radiation Responses in Cells from Nijmegen Breakage Syndrome Patients	**Atsushi Ito, Hiroshi Tauchi, Junya Kobayashi, Kenichi Morishima, Asako Nakamura, Yutaka Hirokawa, Shinya Matsuura, Katsuhide Ito, and Kenshi Komatsu**	**716**
The Regulation of Caveolin Expression and Localization by Serum and Heparin in Vascular Smooth Muscle Cells	**Timothy E. Peterson, Laurel S. Kleppe, Noel M. Caplice, Shuchong Pan, Cheryl S. Mueske, and Robert D. Simari**	**722**
Phorbol Ester Reduces Phosphorylation of Epidermal Growth Factor Receptor in Pancreatic Cancer Cells by Activation of a Tyrosine Phosphatase	**Jenny J. L. Ho, Ellyn R. Farrelly, and Young S. Kim**	**728**
Synthetic Phytanyl-Chained Glycolipid Vesicle Membrane as a Novel Matrix for Functional Reconstitution of Cyanobacterial Photosystem II Complex	**Teruhiko Baba, Hiroyuki Minamikawa, Masakatsu Hato, Akihiro Motoki, Masahiko Hirano, Deshan Zhou, and Kazunori Kawasaki**	**734**
Novel Exons Located More Than 200 kb Downstream of the Previously Described 3′ Exon of the K-*sam* Gene for Generating Activated Forms of KGF Receptor	**Tetsuya Ueda, Hiroki Sasaki, Kazuhiko Aoyagi, Michihiro Narikiyo, Yasuhiro Tsubosa, Yoshitaka Kuwahara, Hiromi Sakamoto, Ken-ichi Mafune, Teruhiko Yoshida, Masatoshi Makuuchi, and Masaaki Terada**	**739**
Formation of Four Isomers at the Asp-151 Residue of Aged Human αA-Crystallin by Natural Aging	**Noriko Fujii, Larry J. Takemoto, Yuko Momose, Sawako Matsumoto, Kosuke Hiroki, and Mitsuhiko Akaboshi**	**746**
Involvement of Epidermal Growth Factor-like Domain of NELL Proteins in the Novel Protein–Protein Interaction with Protein Kinase C	**Shun'ichi Kuroda and Katsuyuki Tanizawa**	**752**
The Early Phase of Apoptosis in Human Neuroblastoma CHP100 Cells Is Characterized by Lipoxygenase-Dependent Ultraweak Light Emission	**Mauro Maccarrone, Maria Luisa Salucci, Gerry Melino, Nicola Rosato, and Alessandro Finazzi-Agro**	**758**
Differential Temperature Dependency of Chemical Stressors in HSF1-Mediated Stress Response in Mammalian Cells	**Takumi Hatayama and Megumi Hayakawa**	**763**

ERRATA

Volume **259,** Number 1 (1999), in Article ID bbrc.1999.0703, "Direct Microsensor Measurement of Nitric Oxide Production by the Osteoclast," by Susan F. Silverton, Olugbenga A. Adebanjo, Baljit S. Moonga, Emmanuel M. Awumey, Tadeusz Malinski, and Mone Zaidi, pp. 73–77 **770**

Volume **261,** Number 3 (1999), in Article ID bbrc.1999.1077, "Identification of an Extracellular Agent of Carbon Tetrachloride Dehalogenation from *Pseudomonas stutzeri* Strain KC as Pyridine-2,6-bis(thiocarboxylate)," by Chang-Ho Lee, Thomas A. Lewis, Andrzej Paszczynski, and Ronald L. Crawford, pp. 562–566 **770**

Volume **263,** Number 1 (1999), in Article ID bbrc.1999.1258, "Heterologous Expression of *Mucor rouxii* Δ^{12}-Desaturase Gene in *Saccharomyces cerevisiae,*" by Supapon Passorn, Kobkul Laoteng, Sansanaluck Rachadawong, Morakot Tanticharoen, and Supapon Cheevadhanarak, pp. 47–51 **771**

Author Index for Volume 265 **772**

Volume 266, Number 1, December 9, 1999

BREAKTHROUGHS AND VIEWS

Regulation of Stearoyl-CoA Desaturase Genes: Role in Cellular Metabolism and Preadipocyte Differentiation — **Young-Cheul Kim and James M. Ntambi** 1

REGULAR ARTICLES

Identification of a Mineralocorticoid/Glucocorticoid Response Element in the Human Na/K ATPase $\alpha1$ Gene Promoter — **Venkatadri Kolla, Noreen M. Robertson, and Gerald Litwack** 5

TSH Control of PKA Catalytic Subunit Activity in Thyroid Cell Cultures — **M. Ben Abdelkhalek, A. Mamoune, P. Crisanti, B. Omri, B. Haye, and M. Pavlovic-Hournac** 15

Recombinant Soluble Human CD69 Dimer Produced in *Escherichia coli:* Reevaluation of Saccharide Binding — **Robert A. Childs, Christine Galustian, Alexander M. Lawson, Gordon Dougan, Karen Benwell, Gad Frankel, and Ten Feizi** 19

Interaction between GPIbα and FcγIIA Receptor in Human Platelets — **Bing Sun, Jess Li, and Jun-ichi Kambayashi** 24

A GSK3β Phosphorylation Site in Axin Modulates Interaction with β-Catenin and Tcf-Mediated Gene Expression — **Eek-hoon Jho, Stavros Lomvardas, and Frank Costantini** 28

Platelet-Activating Factor Induction of Secreted Phosphatase Activity in *Trypanosoma cruzi* — **C. O. Rodrigues, P. M. L. Dutra, F. S. Barros, T. Souto-Padrón, J. R. Meyer-Fernandes, and A. H. C. S. Lopes** 36

An Important von Hippel-Lindau Tumor Suppressor Domain Mediates Sp1-Binding and Self-Association — **Herbert T. Cohen, Mi Zhou, Adam M. Welsh, Sharzad Zarghamee, Holger Scholz, Debabrata Mukhopadhyay, Takeshi Kishida, Berton Zbar, Bertrand Knebelmann, and Vikas P. Sukhatme** 43

Internalization of Factor J and Cellular Signalization after Factor J–Cell Interaction — **Susana Larrucea, Rosario Cambronero, Carolina González-Rubio, Benito Fraile, Carlos Gamallo, Gumersindo Fontán, and Margarita López-Trascasa** 51

Nucleotide Binding Drives Conformational Changes in the Isolated α and β Subunits of the F_1-ATPase from *Escherichia coli* — **Hugo Nájera Peña, Edgar Vázquez-Contreras, Marietta Tuena de Gómez-Puyou, and Gerardo Pérez-Hernández** 58

Efficient Discovery of Inhibitory Ligands for Diverse Targets from a Small Combinatorial Chemical Library of Chimeric Molecules	**David S. Thorpe, A. W. Edith Chan, Alan Binnie, L. Charlie Chen, Anna Robinson, James Spoonamore, David Rodwell, Shelly Wade, Sydney Wilson, Martha Ackerman-Berrier, Helen Yeoman, Stefan Walle, Qinyuan (Quincey) Wu, and Kenneth F. Wertman**	**62**
Compositional Correlation Studies among the Three Different Codon Positions in 12 Bacterial Genomes	**S. Majumdar, S. K. Gupta, V. S. Sundararajan, and T. C. Ghosh**	**66**
Oxalate-Induced and Cell-Cycle-Dependent Expression of Nuclear Pore Complex Oxalate Binding Protein gp210	**R. Vijaya, M. Kannapiran, and R. Selvam**	**72**
Modulation of cIAP-1 by Novel Antitubulin Agents When Combined with Bryostatin 1 Results in Increased Apoptosis in the Human Early Pre-B Acute Lymphoblastic Leukemia Cell Line Reh	**Nathan R. Wall, Ramzi M. Mohammad, Sanaa M. Nabha, George R. Pettit, and Ayad M. Al-Katib**	**76**
A New Member of a Hepatoma-Derived Growth Factor Gene Family Can Translocate to the Nucleus	**Kazuhiro Ikegame, Mitsunari Yamamoto, Yoshihiko Kishima, Hirayuki Enomoto, Kenya Yoshida, Masaki Suemura, Tadamitsu Kishimoto, and Hideji Nakamura**	**81**
The Novel Neuropeptide Y Y_1 Receptor Antagonist J-104870: A Potent Feeding Suppressant with Oral Bioavailability	**Akio Kanatani, Tetsuya Kanno, Akane Ishihara, Mikiko Hata, Aya Sakuraba, Takeshi Tanaka, Yoshimi Tsuchiya, Toshiaki Mase, Takahiro Fukuroda, Takehiro Fukami, and Masaki Ihara**	**88**
A Switching System Regulating Subcellular Localization of Nuclear Proteins Using a Viral Protease	**Masashi Urabe, Akihiro Kume, Tohru Takahashi, Nobufusa Serizawa, Kiyotake Tobita, and Keiya Ozawa**	**92**
Identification and Characterization of a New Phospholipase C-like Protein, PLC-L_2	**Makiko Otsuki, Kiyoko Fukami, Takashi Kohno, Jun Yokota, and Tadaomi Takenawa**	**97**
Up-Regulated Uridine Kinase Gene Identified by RLCS in the Ventral Horn after Crush Injury to Rat Sciatic Nerves	**Inhaeng Yuh, Takeshi Yaoi, Sachihiko Watanabe, Seiichiro Okajima, Yasusuke Hirasawa, and Shinji Fushiki**	**104**
Genomic Organization of the Human γ Adducin Gene	**Lorena Citterio, Tiziana Azzani, Stefano Duga, and Giuseppe Bianchi**	**110**
A Novel Human Gene Encoding HECT Domain and RCC1-like Repeats Interacts with Cyclins and Is Potentially Regulated by the Tumor Suppressor Proteins	**Kaoru Mitsui, Makoto Nakanishi, Satoshi Ohtsuka, Thomas H. Norwood, Ken Okabayashi, Chikara Miyamoto, Keiji Tanaka, Akihiko Yoshimura, and Motoaki Ohtsubo**	**115**

Induced Expression, Localization, and Chromosome Mapping of a Gene for the TBP-Interacting Protein 120A	**Shingo Yogosawa, Kentaro Kayukawa, Takefumi Kawata, Yasutaka Makino, Satoshi Inoue, Akihiko Okuda, Masami Muramatsu, and Taka-aki Tamura**	**123**
Cyclic AMP Inhibits the Activity of c-Jun N-Terminal Kinase (JNKp46) but Not JNKp55 and ERK2 in Human Helper T Lymphocytes	**Yoshio Harada, Shoichiro Miyatake, Ken-ichi Arai, and Sumiko Watanabe**	**129**
Functional Genomic Analysis Reveals the Utility of the I/LWEQ Module as a Predictor of Protein:Actin Interaction	**Richard O. McCann and Susan W. Craig**	**135**
Identification of a Mammalian Mitochondrial Homolog of Ribosomal Protein S7	**Emine Cavdar Koc, Kevin Blackburn, William Burkhart, and Linda L. Spremulli**	**141**
MIDA1, an Id-Associating Protein, Has Two Distinct DNA Binding Activities That Are Converted by the Association with Id1: A Novel Function of Id Protein	**Toshiaki Inoue, Wataru Shoji, and Masuo Obinata**	**147**
Mechanisms Involved in Desensitization of Particulate Guanylyl Cyclase in Human Airway Smooth Muscle: The Role of Protein Kinase C	**Ahmed M. Hamad and Alan J. Knox**	**152**
Hypoxia Increases Glyceraldehyde-3-phosphate Dehydrogenase Transcription in Rat Alveolar Epithelial Cells	**Brigitte Escoubet, Carole Planès, and Christine Clerici**	**156**
Mutations in Two Distinct Regions of Acetolactate Synthase Regulatory Subunit from *Streptomyces cinnamonensis* Result in the Lack of Sensitivity to End-Product Inhibition	**Jan Kopecký, Jiří Janata, Stanislav Pospíšil, Jürgen Felsberg, and Jaroslav Spížek**	**162**
Treatment of Multidrug Resistant (*MDR*1) Murine Leukemia with P-Glycoprotein Substrates Accelerates the Course of the Disease	**Jin-Ming Yang, Guang-Yu Yang, Daniel J. Medina, Andrew D. Vassil, Jie Liao, and William N. Hait**	**167**
Identification of Urotensin II as the Endogenous Ligand for the Orphan G-Protein-Coupled Receptor GPR14	**Qingyun Liu, Sheng-Shung Pong, Zhizhen Zeng, Qing Zhang, Andrew D. Howard, David L. Williams, Jr., Michael Davidoff, Ruiping Wang, Christopher P. Austin, Terrence P. McDonald, Chang Bai, Susan R. George, Jilly F. Evans, and C. Thomas Caskey**	**174**
Long-Term Analysis of Differentiation in Human Myoblasts Repopulated with Mitochondria Harboring mtDNA Mutations	**Cláudia Sobreira, Michael P. King, Mercy M. Davidson, Hyejeong Park, Yasutoshi Koga, and Armand F. Miranda**	**179**
Spectral Properties of the Oxyferrous Complex of the Heme Domain of Cytochrome P450 BM-3 (CYP102)	**Nicole Bec, Pavel Anzenbacher, Eva Anzenbacherová, Antonius C. F. Gorren, Andrew W. Munro, and Reinhard Lange**	**187**

Difference in Strength of Autonomously Replicating Sequences among Repeats in the rDNA Region of *Saccharomyces cerevisiae*	**Sjur Reppe, Rune Jemtland, and Tordis B. Øyen**	190
Structure/Function Studies of Hepatocyte Nuclear Factor-1α, a Diabetes-Associated Transcription Factor	**Qin Yang, Kazuya Yamagata, Koji Yamamoto, Jun-ichiro Miyagawa, Jun Takeda, Naoko Iwasaki, Hiromi Iwahashi, Issei Yoshiuchi, Mitsuyoshi Namba, Jun-ichi Miyazaki, Toshiaki Hanafusa, and Yuji Matsuzawa**	196
Inhibition of Cell Death in Human Mammary Epithelial Cells by the Cooked Meat-Derived Carcinogen 2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine	**Meenakshi Venugopal, Rajiv Agarwal, Andrew Callaway, Herman A. J. Schut, and Elizabeth G. Snyderwine**	203
Identification of New Genes *Ndr2* and *Ndr3* Which Are Related to *Ndr1/RTP/Drg1* but Show Distinct Tissue Specificity and Response to N-myc	**Tomohiko Okuda and Hisato Kondoh**	208
Identification of EPS8 as a Dvl1-Associated Molecule	**Manabu Inobe, Ken-ichi Katsube, Yuko Miyagoe, Yo-ichi Nabeshima, and Shin'ichi Takeda**	216
Induction of Tight Junctions in Human Connexin 32 (hCx32)-Transfected Mouse Hepatocytes: Connexin 32 Interacts with Occludin	**Takashi Kojima, Norimasa Sawada, Hideki Chiba, Yasuo Kokai, Masao Yamamoto, Marcia Urban, Gang-Hong Lee, Elliot L. Hertzberg, Yohichi Mochizuki, and David C. Spray**	222
A Mutant Streptokinase Lacking the C-Terminal 42 Amino Acids Is Less Reactive with Preexisting Antibodies in Patient Sera	**Isis Torréns, Ariana G. Ojalvo, Alina Seralena, Elder Pupo, Victoria Lugo, and Rolando Páez**	230
Identification of a New Tachykinin from the Midgut of the Desert Locust, *Schistocerca gregaria,* by ESI-Qq-oa-TOF Mass Spectrometry	**Dirk Veelaert, Geert Baggerman, Rita Derua, Etienne Waelkens, Tom Meeusen, Geert Vande Water, Arnold De Loof, and Liliane Schoofs**	237
A Genetic Screen to Identify Sequences That Mediate Protein Oligomerization in *Escherichia coli*	**Roberto Jappelli and Sydney Brenner**	243
In Vivo Modification of Porin Activity Conferring Antibiotic Resistance to *Enterobacter aerogenes*	**Jacqueline Chevalier, Jean-Marie Pagès, and Monique Malléa**	248
Hyperglycemia Impairs the Insulin Signaling Step between PI 3-Kinase and Akt/PKB Activations in ZDF Rat Liver	**Masao Nawano, Kiichiro Ueta, Akira Oku, Kenji Arakawa, Akira Saito, Makoto Funaki, Motonobu Anai, Masatoshi Kikuchi, Yoshitomo Oka, and Tomoichiro Asano**	252
Rapid Nongenomic Effects of Aldosterone in Mineralocorticoid-Receptor-Knockout Mice	**Karin Haseroth, Dirk Gerdes, Stefan Berger, Martin Feuring, Andreas Günther, Christel Herbst, Michael Christ, and Martin Wehling**	257

Cytochrome P450 and Steroid Hydroxylase Activity in Mouse Olfactory and Vomeronasal Mucosa — **Jun Gu, Carol Dudley, Ting Su, David C. Spink, Qing-Yu Zhang, Robert L. Moss, and Xinxin Ding** — 262

Hyaluronidase Expression in Human Skin Fibroblasts — **Susan Stair-Nawy, Antonei Benjamin Csóka, and Robert Stern** — 268

Structural and Functional Analysis of the N-Terminal Extracellular Region of β-Dystroglycan — **Enrico Di Stasio, Francesca Sciandra, Bruno Maras, Francesca Di Tommaso, Tamara C. Petrucci, Bruno Giardina, and Andrea Brancaccio** — 274

Protein Phosphatase-1 Activation and Association with the Retinoblastoma Protein in Colcemid-Induced Apoptosis — **Franca Puntoni and Emma Villa-Moruzzi** — 279

Identification of Two Distinct Regions of p38 MAPK Required for Substrate Binding and Phosphorylation — **Rebecca J. Gum and Peter R. Young** — 284

Number 2, December 20, 1999

BREAKTHROUGHS AND VIEWS

Distantly Related Cousins of MAP Kinase: Biochemical Properties and Possible Physiological Functions — **Yoshihiko Miyata and Eisuke Nishida** — 291

Eukaryotic Initiation Factor 4B from Wheat and *Arabidopsis thaliana* Is a Member of a Multigene Family — **Anneke M. Metz, Karen C. H. Wong, Susanna A. Malmström, and Karen S. Browning** — 314

Characterization of 2,6-Dichloro-*p*-hydroquinone 1,2-Dioxygenase (PcpA) of *Sphingomonas chlorophenolica* ATCC 39723	**Luying Xun, Jan Bohuslavek, and Mian Cai**	**322**
Purification and Characterization of a Benzo[*a*]pyrene Hydroxylase from *Pleurotus pulmonarius*	**Segula Maspahy, David C. Lamb, and Steven L. Kelly**	**326**
Incorporation of MAL, an Integral Protein Element of the Machinery for the Glycolipid and Cholesterol-Mediated Apical Pathway of Transport, into Artificial Membranes Requires Neither of These Lipid Species	**Rosa Puertollano, Margarita Menéndez, and Miguel A. Alonso**	**330**
Inframolecular Studies of the Protonation of Adenophostin A: Comparison with 1-D-*myo*-Inositol 1,4,5-Trisphosphate	**Marc Felemez, Rachel D. Marwood, Barry V. L. Potter, and Bernard Spiess**	**334**
Inflammatory Cytokines Induced Down-Regulation of m-Calpain mRNA Expression in Fibroblastic Synoviocytes from Patients with Osteoarthritis and Rheumatoid Arthritis	**Hiroshi Ishikawa, Yasuaki Nakagawa, Katsuji Shimizu, Hideki Nishihara, Yoshitaka Matsusue, and Takashi Nakamura**	**341**
Identification and Characterization of SorCS, a Third Member of a Novel Receptor Family	**Guido Hermey, I. Björn Riedel, Wolfgang Hampe, H. Chica Schaller, and Irm Hermans-Borgmeyer**	**347**
Nitric Oxide Donors Selectively Potentiate Thrombin-Stimulated $p70^{S6k}$ Activity and Morphological Changes in Swiss 3T3 Cells	**Leise A. Berven, Ian J. Frew, and Michael F. Crouch**	**352**
Adriamycin Inhibits Human RH II/Gu RNA Helicase Activity by Binding to Its Substrate	**Kuichun Zhu, Dale Henning, Tomoo Iwakuma, Benigno C. Valdez, and Harris Busch**	**361**
Lysozyme Association with Nucleic Acids	**L. K. Steinrauf, David Shiuan, Wen-jen Yang, and Michael Y. Chiang**	**366**
Chimeric Virus-like Particle Formation of Adeno-Associated Virus	**Mainul Hoque, Noriaki Shimizu, Ken-ichiro Ishizu, Hiroaki Yajima, Fumio Arisaka, Kenji Suzuki, Hajime Watanabe, and Hiroshi Handa**	**371**
Heat-Induced G1 Arrest Is Dependent on p53 Function but Not on RB Dephosphorylation	**Mana Miyakoda, Keiji Nakahata, Keiji Suzuki, Seiji Kodama, and Masami Watanabe**	**377**
Angiotensin II and Retinal Pericytes Migration	**J. A. Nadal, G. M. Scicli, L. A. Carbini, J. J. Nussbaum, and A. G. Scicli**	**382**
Structural Analysis and Disulfide-Bridge Pairing of Two Odorant-Binding Proteins from *Bombyx mori*	**Andrea Scaloni, Maria Monti, Sergio Angeli, and Paolo Pelosi**	**386**

Lipoxygenase Inhibition Induced Apoptosis, Morphological Changes, and Carbonic Anhydrase Expression in Human Pancreatic Cancer Cells	**Xian-Zhong Ding, Charles A. Kuszynski, Tarek H. El-Metwally, and Thomas E. Adrian**	392
Identical Primary Sequence but Different Conformations of the Bioactive Regions of Canine CCK-8 and CCK-58	**David A. Keire, Travis E. Solomon, and Joseph R. Reeve, Jr.**	400
Sas3 Is a Histone Acetyltransferase and Requires a Zinc Finger Motif	**Shinji Takechi and Tatsuo Nakayama**	405
Inhibition Mechanism of Cathepsin L-Specific Inhibitors Based on the Crystal Structure of Papain–CLIK148 Complex	**Hideaki Tsuge, Tomohiro Nishimura, Yukio Tada, Tetsuji Asao, Dusan Turk, Vito Turk, and Nobuhiko Katunuma**	411
Hypernuclear Acetylation in Atherosclerotic Lesions and Activated Vascular Smooth Muscle Cells	**Ko-ichi Kawahara, Shinichi Watanabe, Takayuki Ohshima, Yasuko Soejima, Takayuki Oishi, Satoko Aratani, Masanori Nakata, Masao Shibata, Katsumi Inoue, Tetsuya Amano, Ryouji Fujii, Kazuyuki Yanai, Masatoshi Hagiwara, Akiyoshi Fukamizu, Ikuro Maruyama, and Toshihiro Nakajima**	417
Transient Increase of a Protein Kinase Activity Identified to CK2 during Sea Urchin Development	**Christelle Delalande, Robert Bellé, Patrick Cormier, and Odile Mulner-Lorillon**	425
Enhanced Expression and Autoimmunity of Recombination Signal Binding Protein-jκ in Human Dilated Cardiomyopathy	**Georg Nickenig, Marc Wolff, Alexander Stäblein, Herbert Pfister, and Michael Böhm**	432
Glycosaminoglycans Promote HARP/PTN Dimerization	**Isabelle Bernard-Pierrot, Mélanie Héroult, Gilles Lemaître, Denis Barritault, José Courty, and Pierre Emmanuel Milhiet**	437
Involvement of Vesicle–Cytoskeleton Interaction in AQP5 Trafficking in AQP5-Gene-Transfected HSG Cells	**Jun Tada, Takamasa Sawa, Naoki Yamanaka, Masayuki Shono, Tetsuya Akamatsu, Keio Tsumura, Most. Nahid Parvin, Norio Kanamori, and Kazuo Hosoi**	443
Ca^{2+} and Extracellular Acidification Rate Responses to Parathyroid Hormone Fragments in Rat ROS 17/2 and Human SaOS-2 Cells	**Glenn S. Belinsky, Paul Morley, James F. Whitfield, and Armen H. Tashjian, Jr.**	448
Expression of the Human Cholesterol 7α-Hydroxylase Gene in Transgenic Mice	**Sheryl A. Goodart, Cathy Huynh, Wei Chen, Allen D. Cooper, and Beatriz Levy-Wilson**	454
The Role of Calcium in Pre- and Postmitochondrial Events in Tributyltin-Induced T-Cell Apoptosis	**Hélène Stridh, Dulceaydee Gigliotti, Sten Orrenius, and Ian Cotgreave**	460
Inhibition of Biotin Carboxylase by a Reaction Intermediate Analog: Implications for the Kinetic Mechanism	**Carol Z. Blanchard, David Amspacher, Robert Strongin, and Grover L. Waldrop**	466

Identification and Characterization of Genes Whose Expressions Are Altered in Rat 6 Fibroblasts Transformed by Mutant $p53^{val135}$	**Judy Wai Ping Yam, Jian Yu Zheng, and Wen Luan Wendy Hsiao**	472
c-Src Activates the DNA Binding and Transcriptional Activity of Stat3 Molecules: Serine 727 Is Not Required for Transcriptional Activation under Certain Circumstances	**Laura K. Schaefer, Shuguang Wang, and Timothy S. Schaefer**	481
Hannahpep: A Novel Fibrinolytic Peptide from the Indian King Cobra (*Ophiophagus hannah*) Venom	**A. Gomes and Pallabi De**	488
Inhibition of P-Glycoprotein Activity and Chemosensitization of Multidrug-Resistant Ovarian Carcinoma 2780AD Cells by Hexanoylglucosylceramide	**Robert Jan Veldman, Hannie Sietsma, Karin Klappe, Dick Hoekstra, and Jan Willem Kok**	492
Regulation of Phosphatidylserine Synthesis in Jurkat T Cell Clones: Caffeine Bypasses CD3/TCR-Induced Protein Tyrosine Kinases and Calcium Signals	**Claudette Pelassy, Jean-Philippe Breittmayer, and Claude Aussel**	497
Phosphatidylserine Exposure during Apoptosis Is a Cell-Type-Specific Event and Does Not Correlate with Plasma Membrane Phospholipid Scramblase Expression	**Bengt Fadeel, Bettina Gleiss, Kari Högstrand, Joya Chandra, Therese Wiedmer, Peter J. Sims, Jan-Inge Henter, Sten Orrenius, and Afshin Samali**	504
Functional Expression, Purification, and Characterization of Recombinant Human Pyruvate Carboxylase	**Sarawut Jitrapakdee, Michelle E. Walker, and John C. Wallace**	512
Muscle-Specific Up-Regulation of Rat UCP3 mRNA Expression by Long-Term Hindlimb Unloading	**Frédérique Denjean, Dominique Desplanches, Joël Lachuer, Frédérique Cohen-Adad, Marie-Hélène Mayet, and Claude Duchamp**	518
Characterization of Newly Identified Four Isoforms for a Putative Cytosolic Protein Tyrosine Phosphatase PTP36	**Koji Aoyama, Tsukasa Matsuda, and Naohito Aoki**	523
A Novel Paired Domain DNA Recognition Motif Can Mediate Pax2 Repression of Gene Transcription	**Bjarte Håvik, Erlend Ragnhildstveit, James B. Lorens, Kari Sælemyr, Oddbjørn Fauske, Lill K. Knudsen, and Anders Fjose**	532
Binding and Processing of ^{125}I-ACTH by Isolated Rat Splenic Lymphocytes	**Benjamin L. Clarke**	542
Cell Swelling Activates Stress-Activated Protein Kinases, p38 MAP Kinase and JNK, in Renal Epithelial A6 Cells	**Naomi Niisato, Martin Post, Willy Van Driessche, and Yoshinori Marunaka**	547

Mutations of the IL-12 Receptor β2 Chain Gene in Atopic Subjects **Eiko Matsui, Hideo Kaneko, Toshiyuki Fukao, Takahide Teramoto, Ryosuke Inoue, Mizuho Watanabe, Kimiko Kasahara, and Naomi Kondo** **551**

Distribution of D_5 Dopamine Receptor mRNA in Rat Ventromedial Hypothalamic Nucleus **Dan Zhou, Ede Marie Apostolakis, and Bert W. O'Malley** **556**

Mechanism of Aminobisphosphonate Action: Characterization of Alendronate Inhibition of the Isoprenoid Pathway **R. Kennedy Keller and Steven J. Fliesler** **560**

Structural Analysis of esp-1 Gene (PRSS 21) **Masahiro Inoue, Masaharu Isobe, Takahiro Itoyama, and Hiroshi Kido** **564**

Mutant Mice Lacking Crk-II Caused by the Gene Trap Insertional Mutagenesis: Crk-II Is Not Essential for Embryonic Development **Takashi Imaizumi, Kimi Araki, Katsutaka Miura, Masatake Araki, Misao Suzuki, Hidenori Terasaki, and Ken-ichi Yamamura** **569**

Prothoracicotropic Activity of SBRPs, the Insulin-like Peptides of the Saturniid Silkworm *Samia cynthia ricini* **Koji Nagata, Kazunori Maruyama, Kuniaki Kojima, Mamoru Yamamoto, Minoru Tanaka, Hiroshi Kataoka, Hiromichi Nagasawa, Akira Isogai, Hironori Ishizaki, and Akinori Suzuki** **575**

Negative Regulatory Role of the *Escherichia coli hfq* Gene in Cell Division **Ayako Takada, Masaaki Wachi, and Kazuo Nagai** **579**

Chloroplast Chaperonins: Evidence for Heterogeneous Assembly of α and β Cpn60 Polypeptides into a Chaperonin Oligomer **Kazuaki Nishio, Toshiya Hirohashi, and Masato Nakai** **584**

Involvement of Ryanodine Receptor Type 3 in Dopamine Release from the Striatum: Evidence from Mutant Mice Lacking This Receptor **Keiko Wan, Takahiro Moriya, Masashi Akiyama, Hiroshi Takeshima, and Shigenobu Shibata** **588**

A Novel Epidermal Growth Factor-like Molecule Containing Two Follistatin Modules Stimulates Tyrosine Phosphorylation of erbB-4 in MKN28 Gastric Cancer Cells **Tohru Uchida, Ken Wada, Tomonori Akamatsu, Masaoki Yonezawa, Hitoshi Noguchi, Akira Mizoguchi, Masato Kasuga, and Choitsu Sakamoto** **593**

Evidence of Two Populations of $GABA_A$ Receptors in Cerebellar Granule Cells in Culture: Different Desensitization Kinetics, Pharmacology, Serine/Threonine Kinase Sensitivity, and Localization **Mauro Robello, Carolina Amico, and Aroldo Cupello** **603**

Characterization of the Binding of the RNA-Binding Protein AUF1 to the Human AT_1 Receptor mRNA **Aldo Pende, Mara Giacchè, Lara Castigliola, Lidia Contini, Giancarlo Passerone, Mauro Patrone, J. David Port, and Gaetano Lotti** **609**

ERRATA

Volume **264,** Number 2 (1999), in Article ID bbrc.1999.1303, "Increased Susceptibility to Apoptosis of Human Hepatocarcinoma Cells Transfected with Antisense *N*-Acetylglucosaminyltransferase V cDNA," by Hua-Bei Guo, Fei Liu, and Hui-Li Chen, pages 509–517 **615**

Volume **265,** Number 1 (1999), in Article ID bbrc.1999.1635, "The Effect of AMP-Activated Protein Kinase and Its Activator AICAR on the Metabolism of Human Umbilical Vein Endothelial Cells," by Zeina Dagher, Neil Ruderman, Keith Tornheim, and Yasuo Ido, pages 112–115 **615**

Number 3, December 29, 1999

Introduction **617**
Forty Years Ago **618**
Editor Lists **619**
Editorial Board **620**
BBRC Journals Cited 500 Times or More during the Period 1960–1995 **621**

REGULAR ARTICLES

Calcium Controls the Transcription of Its Own Transporters and Channels in Developing Neurons	**Ernesto Carafoli, Armando Genazzani, and Danilo Guerini**	**624**
Deubiquitinating Enzymes: Their Diversity and Emerging Roles	**Chin Ha Chung and Sung Hee Baek**	**633**
Enhancement of Lipocalin-Type Prostaglandin D Synthase Enzyme Activity by Guanidine Hydrochloride	**Takashi Inui, Tadayasu Ohkubo, Yoshihiro Urade, and Osamu Hayaishi**	**641**
BCA, HGF, and Proteasomes	**Akira Ichihara**	**647**
Role of Actin in Regulated Exocytosis and Compensatory Membrane Retrieval: Insights from an Old Acquaintance	**Karine Valentijn, Jack A. Valentijn, and James D. Jamieson**	**652**
Regulation of Energy Metabolism in Human Cells in Aging and Diabetes: FoF_1, mtDNA, UCP, and ROS	**Yasuo Kagawa, Seung Hun Cha, Kyoko Hasegawa, Toshiro Hamamoto, and Hitoshi Endo**	**662**
Role of the CCAAT Enhancer Binding Proteins (C/EBPs) in Adipocyte Differentiation	**M. Daniel Lane, Qi-Qun Tang, and Man-Shiow Jiang**	**677**
Oligosaccharyltransferase: A Complex Multisubunit Enzyme of the Endoplasmic Reticulum	**Qi Yan and William J. Lennarz**	**684**
Forty Years of Cytochrome P450	**Tsuneo Omura**	**690**
Apoptosis in Human Disease: A New Skin for the Old Ceremony?	**Bengt Fadeel, Sten Orrenius, and Boris Zhivotovsky**	**699**

Angiogenesis: How a Tumor Adapts to Hypoxia — **Darren E. Richard, Edurne Berra, and Jacques Pouysségur** — **718**

Of Mice and Men: From Early NMR Studies of the Heart to Physiological Genomics — **George K. Radda** — **723**

Tn*5*: A Molecular Window on Transposition — **William S. Reznikoff, Archna Bhasin, Douglas R. Davies, Igor Y. Goryshin, Lisa A. Mahnke, Todd Naumann, Ivan Rayment, Mindy Steiniger-White, and Sally S. Twining** — **729**

Biochemical and Biophysical Research Communications
1999 Cumulative Subject Index, pp. 36–176
Article ID bbrc.2000.2191, available online at http://www.idealibrary.com on IDEAL®

Cumulative Subject Index
Volumes 254-266[1]

A

A23187
  histamine release induced by, effect of HCO$_3$ (rat mast cells), **260,** 71
Abdominal aortic aneurysm
  collagenase-3 expression (human), **261,** 904
  genetic analysis of MMP3, MMP9, and PAI-1 in Finnish patients, **265,** 563
Aberrant crypt foci
  azoxymethane-induced, formation, effect of mutant *Escherichia coli* (rat colon), **262,** 322
Acaricide
  pyrethroid, cattle tick resistant to, identification of point mutation in *para*-type sodium channel gene, **261,** 558
Accessory olfactory bulb
  region-specific Fos expression, induction by protease-sensitive urinary pheromones (rat), **260,** 222
Acetaldehyde dehydrogenase (acylating)
  phnIJ gene encoding, in *Pseudomonas* sp. DJ77, cloning and evolution, **256,** 469
Acetate
  uptake into vesicles isolated from basolateral region of plasma membrane of ovine parotid acinar cells, **259,** 606
Acetolactate synthase
  recombinant tobacco, interactions with quinoline-linked triazolopyrimidine analogues, **258,** 797
  regulatory subunit mutations, effect on sensitivity to end-product inhibition (*Streptomyces cinnamonensis*), **266,** 162
  tobacco, role of tryptophanyl residues, **259,** 136
3β-Acetoxyandrost-5-ene-7,17-dione
  acute oral gavage study in rats, **254,** 120
  escalating dose oral gavage study in rhesus monkeys, **254,** 124
Acetylation
  hypernuclear, detection in atherosclerotic lesions and activated vascular smooth muscle cells (human), **266,** 417
Acetylcholine
  smooth muscle hyperpolarization evoked by, role of heterocellular gap junctional communication (rabbit), **254,** 27
Acetylcholinesterase
  adhesion function localization at peripheral anionic site, **258,** 758
  mRNA synthesis, increase in chicken skeletal muscle after denervation, **260,** 251
Acetyl-CoA carboxylase β
  role in muscle cell differentiation and mitochondrial fatty acid oxidation (H9c2 cells), **254,** 657
N-Acetylcysteine
  prevention of quinone-mediated DNA arylation (HL-60 cells), **262,** 769
N-Acetylgalactosamine
  6-sulfated, 4-sulfated, and unsulfated, enzymatic reconstruction of hybrid glycosaminoglycan containing, **258,** 741
α-(1,3)-*N*-Acetylgalactosaminyltransferase
  histoblood group B α-(1,3)-galactosyltransferase activity as, role of amino acid (human), **262,** 487
N-Acetylglucosamine-6-sulfotransferase
  cloning and characterization (human, mouse), **263,** 543
N-Acetylglucosaminyltransferase I
  deficiency in CHO Lec1 cells, complementation by *Arabidopsis thaliana* cDNA, **261,** 829
N-Acetylglucosaminyltransferase V
  antisense cDNA, hepatocarcinoma cells transfected with, increased susceptibility to apoptosis (human), **264,** 509; *erratum,* **266,** 615
Acetylleucine chloromethyl ketone
  induction of apoptosis in U937 cells, **263,** 139
N-Acetylneuraminic acid α2,3-galactoside
  on cell surface, role in intercellular adhesion of colon cancer cells (human), **256,** 631
Acetylsalicylic acid
  effect on prostanoid and NO production in infarcted heart *in situ* (rabbit), **257,** 488
Achaete-scute genes
  human homologue HASH-1, downregulation in differentiating neuroblastoma cells, **256,** 557
Acholeplasma laidlawii
  ftsZ gene, and gene product, characterization, **262,** 44
α$_1$-Acid glycoprotein
  acute phase response element, nuclear protein binding to, interference mapping (mouse), **255,** 608
  gene induction by phenobarbital, role of NF-κB (rat liver), **254,** 93
Acidic fibroblast growth factor, *see* Fibroblast growth factor 1
Acidification
  extracellular
    human somatostatin sst$_4$ receptor-mediated stimulation, role of PI 3-kinase, **263,** 239
    rate of, response to parathyroid hormone fragments in ROS 17/2 and SaOS-2 cells, **266,** 448
  intracellular, during apoptosis, occurrence in absence of nucleus, **254,** 821
Acidity
  microenvironment of high-affinity ATP binding site of Na$^+$/K$^+$-ATPase, **254,** 215
Acid phosphatase/phytase
  E. coli appA2 gene isolated from pig colon, cloning, sequencing, and expression, **257,** 117
Acinar cells
  exocrine, Ca^{2+} initiation sites evoked by muscarinic receptor stimulation, millisecond analysis (rat parotid gland), **259,** 656
  pancreatic, *see* Pancreatic acinar cells
Acinetobacter calcoaceticus
  benzyl alcohol dehydrogenase from, catalysis by, role of allylic or benzylic stabilization, **259,** 220
ACTH, *see* Adrenocorticotropin
Actin
  ATP-dependent interaction with myosin, inhibitory effect of phosphorylated myosin light chain kinase, **261,** 95
  binding of long isoform of cell adhesion molecule C-CAM (rat), **256,** 404
  binding with myosin S1 *in vitro:* actin–S1–actin complexes (rabbit skeletal muscle), **258,** 628
  engagement in capping of FcγRII, in permeabilized U937 cells, **259,** 287
  interaction with proteins, prediction based on I/LWEQ module, **266,** 135

  polymerization, induction of FcγRIIIb shedding from human neutrophils, **255,** 568
  role in regulated exocytosis and compensatory membrane retrieval, **266,** 652
β-Actin
  as internal standard for quantification of RNA levels under hypoxia, comparison with GAPDH, cyclophilin, and 28S rRNA, **259,** 523
Actin binding protein
  fragments, insertion into reconstituted lipid layers, **259,** 108
Actin cytoskeleton
  human WAVE/SCAR homologues associating with Arp2/3 complex as regulatory molecules of, **260,** 296
  integrin-rich, of activated nonaggregated platelets, selective association of tyrosine kinases Src, Fyn, and Lyn with, **260,** 790
Actin filament bundles
  in characean internodal cell, reverse motion of organelles with myosin molecules along, **257,** 223
Actin filaments
  oscillation regulation in neutrophils (human), **262,** 479
  regulation of stretch-activated intracellular calcium transients (human), **261,** 419
α-Actinin
  fragments, insertion into reconstituted lipid bilayers, **264,** 225
α-Actinin-2
  sarcomeric isoform expressed in skeletal and cardiac muscle, ACTN2 gene encoding, fine mapping and genomic structure, **265,** 256
Actin stress fibers
  formation, stimulation by growth hormone in human osteoblast-like Saos2 cells, **263,** 100
Activator domain
  DFF40, sequestration, role in synergistic binding of multiple domains of DFF45 to DFF40, **264,** 181
Activin
  βA subunit gene in testis, male sterility in transgenic mice expressing, **259,** 699
  induced apoptosis, LNCaP cell
    differentially expressed genes in, **257,** 187
    suppression by antisense strategy (human), **265,** 669
Activin receptor-like kinase 7
  signal regulation by MH1 domains of Smad2 and Smad3, **254,** 707
ACTN2 gene
  encoding α-actinin-2 sarcomeric isoform expressed in skeletal and cardiac muscle, fine mapping and genomic structure, **265,** 256
Acute phase proteins
  ITIH4, increased serum level in acute-phase patients and upregulation by IL-6 in hepatocarcinoma HepG2 cells, **263,** 224
Acute phase response
  mediators, regulation of angiogenin expression in human HepG2 hepatoma cells, **259,** 178
Acute phase response element
  α_1 acid glycoprotein, nuclear protein binding to, interference mapping (mouse), **255,** 608
Acutin
  cDNA cloning and expression (*Agkistrodon acutus*), **255,** 412
Acyl CoA binding protein–fatty acyl CoA complex
  activation of ryanodine receptors from skeletal muscle, inhibition by rapamycin, **264,** 409
Acylpeptide hydrolase
  inhibitor acetylleucine chloromethyl ketone, induction of apoptosis in U937 cells, **263,** 139
N-Acyl-vanillyl-amides
  unsaturated long-chain, inhibition of anandamide facilitated transport and binding to CB1 cannabinoid receptors, **262,** 275
ADAM29
  testis-specific gene expression (human), **263,** 810
ADAM30
  testis-specific gene expression (human), **263,** 810
Adamantyl globotriaosyl ceramide
  synthesis: monovalent soluble mimic inhibiting verotoxin binding to glycolipid receptor, **257,** 391
ADAMTS
  homologues, expression in articular cartilage (human), **260,** 318
Adapter protein
  Grb7/10/14, sequence analysis: identification of Ras-associating-like domain, **259,** 113
Adapter protein complex
  binding to lysosomal targeting motif *in vitro,* **255,** 54
γ Adducin
  genomic organization (human), **266,** 110
Adenine
  copper–adenine complex, catalysis of O_2 production from H_2O_2, **263,** 672
Adenine nucleotides
  binding by isolated α and β subunits of F_1-ATPase, induction of subunit conformational changes (*Escherichia coli*), **266,** 58
Adeno-associated virus
  chimeric virus-like particles, formation, **266,** 371
Adenophostin A
  protonation, inframolecular studies: comparison with 1-D-*myo*-inositol 1,4,5-trisphosphate, **266,** 334
S-Adenosylmethionine
  5′-deoxyadenosyl radical generated by pyruvate formate-lyase-activating enzyme from, capture by dehydroalanyl residue, **254,** 306
S-Adenosylmethionine decarboxylase
  activity during cell cycle of CHO cells, half-life, **263,** 13
Adenovirus
  carrying ecotropic receptor gene, retrovirus-mediated targeted gene transfer with, for hepatoma-specific gene therapy, **265,** 550
  E1A
    induction of apoptosis in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
    inhibition of transcriptional activation of myogenin gene by MEF2-mediated recruitment of Myf5, **265,** 222
  replication-deficient vector, BMP-2 expression in C2C12 myoblasts via, induction of differentiation into osteoblast lineage, **262,** 739
  transfection of amphicrine AR42J cells with truncated mutant SNAP-25 using, **260,** 781
  type 5, IL-6 gene transfer in rat lung mediated by, enhancement of compartmentalized antiviral IgA and IgG responses, **258,** 332
Adenylate kinase
  isozyme 3, promoter region for, cloning and functional characterization (human), **264,** 990
  isozyme distribution and developmental changes in brain (rat), **254,** 618
5′-Adenyl-imido-triphosphate
  glycerol kinase complexed with, X-ray structure, implications for mechanism of ATP-dependent glycerol phosphorylation, **259,** 640
Adenylyl cyclase
  subtype expression in pancreatic beta cells (human, rat), **254,** 703
  type 3, full-length cDNA, molecular cloning and expression in human islets, **254,** 548
Adherens junctions
  endothelial cell, regulation by ras-dependent signal transduction pathway (human), **260,** 371
Adhesion forces
  single-molecule, in intact rat osteoclasts, AFM measurement, **259,** 645

- Adipocytes
  - adipogenesis inhibition by COOH-terminally truncated mutant of PPARγ2 (3T3-L1 cells), **264,** 93
  - apM-1 gene distribution and expression (human), **260,** 416
  - brown
    - fetal rat, PPARα and PPARγ effects on UCP-1, analysis with agonists Wy 14643 and rosiglitazone, **264,** 311
    - immortal, from *p53*-knockout mice, differentiation and expression of uncoupling proteins, **255,** 221
  - differentiation
    - early stage, identification of inducible genes (3T3-L1 cells), **254,** 299
    - induction of Id4 gene expression during, analysis (3T3-L1 cells), **256,** 614
    - role of CCAAT enhancer binding proteins (3T3-L1 cells), **266,** 677
  - fatty acid binding protein in, identification as caveolin (3T3-L1 cells), **255,** 34
  - gene expression, regulation by PPARγ activation with rosiglitazone (human), **265,** 265
  - insulin receptor substrate-1 expression, regulation by insulin-like growth factor 1 (3T3-L1 cells), **255,** 614
  - IRS-1 phosphorylation and GLUT4 expression, inhibition in isolated cells from cachectic tumor-bearing rats, **256,** 676
  - phospholipase D isoform expression in distinct subcellular compartments (3T3-L1 cells), **254,** 734
  - uncoupling protein-2 mRNA expression, increase by BRL49653 and bromopalmitate (human), **256,** 138
- Adipogenesis
  - associated PPARγ ligand-dependent induction of STAT1, STAT5A, and STAT5B (NIH-3T3 cells), **262,** 216
  - inhibition by COOH-terminally truncated mutant of PPARγ2 in 3T3-L1 cells, **264,** 93
- Adiponectin
  - adipose-specific, decrease in obesity (human), **257,** 79
- Adipose cells
  - GLUT4 translocation, inhibition by protein-tyrosine phosphatase-α overexpression (rat), **255,** 200
- Adipose tissue
  - carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  - denervated, fat depletion by hyperleptinemia (rat), **260,** 653
  - leptin expression, regulation by steroid hormones (rat), **259,** 624
  - lipolytic events, related leptin changes during acute exercise (rat), **255,** 698
  - specific protein adiponectin, decreased levels in obesity (human), **257,** 79
  - from Stat5a and b knockout mice, lipolysis and leptin release, effect of growth hormone, **263,** 201
  - white
    - FGF-10 as growth factor for preadipocytes (rat), **258,** 109
    - uncoupling protein-3 mRNA levels, increase in bezafibrate-treated rat, **260,** 547
    - uncoupling protein mRNAs, effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
- ADP
  - induced Ca^{2+} mobilization in platelets, synergistic effect of thrombopoietin (human), **263,** 230
  - secreted by platelets, role in formation of phosphatidylinositol 3-kinase products in platelets (human), **263,** 780
- ADP/ATP carrier
  - mitochondrial, tandem-repeated homodimer of, functional expression in *Saccharomyces cerevisiae,* **262,** 726
- ADP/ATP translocase inhibitor
  - atractyloside, inhibition of ryanodine receptor Ca^{2+}-release channel of skeletal muscle SR (rabbit), **258,** 247
- ADP-glucose pyrophosphorylase
  - potato tuber, heat stability, role of Cys-12 in small subunit, **257,** 782
- Adrenal hyperplasia
  - congenital, CYP21 mutations in, functional analysis in Spanish patients, **262,** 635
- Adrenal medulla
  - catecholamine secretion and synthesis by cultured chromaffin cells, stimulation by leptin (pig), **261,** 426
  - expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
- α_1-Adrenergic receptor
  - induction of aquaporin-5 trafficking to parotid cell apical plasma membrane (rat), **265,** 94
- α_{1A}-Adrenergic receptor
  - human, expressed in Rat-1 cells, differential regulation of 46- and 54-kDa Jun N-terminal kinases and p38 MAP kinase, **261,** 372
- α_2-Adrenergic receptor
  - preadipocyte spreading induced by, role of Ca^{2+}-independent phospholipase A2, **265,** 572
- β-Adrenergic receptor
  - receptor protein downregulation by amiodarone (AT-1 cells), **255,** 515
- β_1-Adrenergic receptor
  - cooperative binding of (−)isoproterenol (rat brain), **257,** 629
  - two transcripts, characterization: cloning and alterations in failing heart (human), **258,** 552
- β_2-Adrenergic receptor
  - Gln27Glu variant, effect on obesity and fat distribution in Japanese men, **258,** 138
- β_3-Adrenergic receptor
  - and/or putative β_4-adrenergic receptor, role in expression of uncoupling proteins and PPARγ coactivator-1 (murine skeletal muscle), **261,** 870
- β_4-Adrenergic receptor
  - putative, and/or β_3-adrenergic receptor, role in expression of uncoupling proteins and PPARγ coactivator-1 (murine skeletal muscle), **261,** 870
- Adrenocortical tumor cells
  - constitutive and cAMP-regulated expression of human ACTH receptor gene in H295R cells, steroidogenic factor-1 binding elements involved in, **255,** 28
- Adrenocorticotropin
  - ^{125}I-labeled, binding and processing by isolated splenic lymphocytes (rat), **266,** 542
- Adrenocorticotropin receptor gene
  - human, constitutive and cAMP-regulated expression, three steroidogenic factor-1 binding elements required for, **255,** 28
- Adrenodoxin
  - in comparative assignment approach for hyperfine-shifted ^{13}C and ^{15}N resonances in Fe$_2$S$_2$ ferredoxins (bovine), **258,** 54
  - mitochondrial, electron donor function toward hepatic microsomal cytochrome P450 2B4 (rabbit), **254,** 83
- Adrenoleukodystrophy related gene
  - functionally redundant to X-ALD gene, cDNA cloning, promoter sequence, and genomic organization (human), **258,** 436
- Adrenomedullin
  - gene expression in HL-1 cardiomyocytes, regulation by hypoxia, **265,** 382
  - vascular expression, increase in hyperglycemia (rat), **258,** 453
- Adriamycin, *see* Doxorubicin
- Advanced glycation end product inhibitors
  - analysis, **262,** 651; *erratum,* **264,** 1008
  - post-Amadori: amadorins, **257,** 251
- Advanced glycation end products
  - acceleration of calcification in bovine microvascular pericytes, **258,** 353
  - experimental induction in fetal L132 lung cells, effects on intracellular cathepsin D levels, **261,** 175
  - formation by *in vitro* glycation, copper-mediated ROS formation during, block by lens proteins, **259,** 706

  induction of PPARγ gene expression in cultured rat mesangial cells, **264,** 441
  modification of membrane proteins of human erythrocytes during aging in circulation, **258,** 123
  receptor for, complex in vascular endothelial cells, characterization (human), **256,** 549
AF-6
  in vivo interaction with activated Ras and ZO-1 (Rat1 cells), **259,** 103
Affinity chromatography
  thaumatin-like antifungal protein (French bean legumes), **263,** 130
Affinity labeling
  δ opioid receptors by DSLET-Mal, **265,** 513
Affinity photolabeling
  bovine NPR-A with *p*-benzoylbenzoylated [N,C,rANP(1–28)]pBNP32 derivatives, **258,** 81
Aflatoxin B_1-8,9-epoxide
  reactivity with guanines neighboring CpG sites, effect of CpG methylation status, **254,** 114
AFLP, *see* Amplified fragment length polymorphism
Agarose
  embedded chromatin, of nonapoptotic cells, single-strand breaks in, **264,** 388
  glass coated with, artificial lipid bilayer formed on, for simultaneous electrical and optical measurement of single ion channels, **265,** 595
Aggrecanase
  soluble, generation by coincubation of bovine synovial or capsular tissue with cartilage, **255,** 686
Aggregation grade
  β-amyloid peptides, standardization, **265,** 297
Aggretin
  molecular cloning and sequence analysis (Malayan pit viper), **263,** 723
Aging
  D-amino acid formation induction by chiral field in lens protein (human), **263,** 322
  apoptosis role (human), **266,** 699
  and development, caspase levels in rat during, comparison with Alzheimer's disease, **256,** 381
  energy metabolism in, regulation in human cells, **266,** 662
  erythrocytes in circulation, modification of membrane proteins by AGEs during, **258,** 123
  induction of formation of four isomers at Asp-151 residue of αA-crystallin (human), **265,** 746
  insulin-like growth factor binding proteins in cerebrospinal fluid during, analysis (human), **264,** 652
  major carbonylated protein in nematode associated with, vitellogenin-6 identification as, **264,** 580
  premature, and antioxidant enzymes: altered enzyme levels in progeria skin fibroblasts, **257,** 163
  protein susceptibility to metal-catalyzed oxidation associated with, relationship to conversion of lysine to N^{ϵ}-(carboxymethyl)lysine, **264,** 207
  related degradation of βA3/A1-crystallin in human lens, **258,** 632
  and spontaneous deamidation and isomerization of Asn108 in prion peptide 106–126 and full-length PrP, **261,** 578
Agkisacutacin
  purification, characterization, and cDNA cloning from *Agkistrodon acutus* venom, **265,** 530
Agmatinase
  catalytic activity, essential role of manganese (*Escherichia coli*), **258,** 808
  catalytic activity and substrate binding, role of His-163 (*Escherichia coli*), **264,** 196
Agouti-related protein
  and α-MSH and pro-opiomelanocortin, hypothalamic levels in dietary-obese and food-restricted rats, **258,** 574
AGR16
  related EDG3, identical agonist specificity with distinct signaling characteristics, **260,** 203
AIDS
  associated Kaposi's sarcoma cells, ERK1/2-mediated growth, negative regulation by p38 MAP kinase, **264,** 676
  cachectic patients, 24-kDA proteoglycan in urine from, isolation, characterization, and distribution, **254,** 642
Aire gene
  isolation and characterization (mouse), **255,** 483
Airway cells
  Na^+/K^+ pump capacity, inhibition by tetracyclines (human Calu-3 cells), **260,** 13
Akt
  activation in human leukemia K562 cells by DIF-1 from *Dictyostelium discoideum,* **263,** 790
  and phosphatidylinositol 3-kinase, activations in ZDF liver, insulin signaling between, impairment by hyperglycemia (rat), **266,** 252
  –phosphatidylinositol 3-kinase signaling pathway, β4 integrin subunit rescue of A431 cells from apoptosis via, **264,** 127
  phosphorylation of human caspase-9, site for, absence in mouse caspase-9, **264,** 550
  regulation by heregulin in breast cancer cells, **261,** 897
Akt1
  and protein kinase C δ, opposing effects on H_2O_2-induced apoptosis in CHO cells, **264,** 840
Akt3
  human, identification: regulatory serine phosphorylation site, **257,** 906
Alanine
  substitution in N-terminal basic region, dHGF mutant with, activity *in vivo* (mouse, rat), **254,** 363
Alanine racemase
  psychrophilic, from *Bacillus psychrosaccharolyticus,* characterization, **256,** 333
Alcaligenes xylosoxidans
  copper-containing nitrite reductase gene, cloning, sequencing, and transcriptional studies, **255,** 427
Alcohol
  chronic ingestion, effect on interplay of ET-1, IL-4, and TNF-α during buccal mucosal ulcer healing (rat), **257,** 373
Alcohol dehydrogenase
  expression and localization in skin (human), **261,** 100
Alcoholic cardiomyopathy
  deleted mitochondrial DNA in heart muscle from, detection by long-extension PCR, compromise by technical artifacts (human), **254,** 507
Aldehyde dehydrogenase
  expression and localization in skin (human), **261,** 100
Aldose reductase
  gene, cell-specific expression, genomic regions directing (mouse), **255,** 759
  osmotically induced expression in rat VSMC, control by cell kinases and phosphatases, **255,** 12
Aldose reductase inhibitor
  prevention of glucose-induced PDGF-β receptor increase in rat aortic SMC, **261,** 853
Aldosterone
  nongenomic effects in mineralocorticoid receptor knockout mouse, **266,** 257
Alendronate
  inhibition of isoprenoid pathway, characterization (rat liver), **266,** 560
Algae
  marine unicellular, leucyl aminopeptidase purification, **262,** 557
Alkaline phosphatase
  constitutive secretory protein, sorting to regulated secretory pathway of AR42J exocrine cells, **257,** 545

Alkaline phosphatase (*continued*)
  tissue-nonspecific gene expression in marrow stromal cell line ST2, enhancement by phosphate depletion, **265,** 24
Alkaline protease inhibitor
  from *Streptomyces* sp., with antifungal properties against phytopathogenic fungi, characterization, **262,** 702
Alkaline serine protease
  characterization of allergenic IgE-binding protein from *Aspergillus flavus* as, **261,** 669
Alkyl alcohols
  estrone sulfatase inhibitors based on, structure–activity relationship study, **254,** 811
All β-sheet protein
  refolding, secondary structure formation as earliest structural event in, **260,** 284
Allergens
  Cha o 2 purification, identification, and cDNA cloning: major allergen of Japanese cypress pollen, **263,** 166
  IgE-binding protein from *Aspergillus flavus,* characterization as alkaline serine protease, **261,** 669
Allylic alcohols
  oxidation by bacterial benzyl alcohol dehydrogenases, role of allylic or benzylic stabilization, **259,** 220
ALP
  divergent murine CC chemokine with unique C-terminal extension, isolation, **258,** 737
Alpha$_1$-antitrypsin
  oxidation by myeloperoxidase–hydrogen peroxide system, promotion of binding to IgA, **255,** 562
Alpha$_2$-macroglobulin
  DNA polymorphism, association with late-onset Alzheimer's disease, **264,** 48
Alternative splicing
  Baxϵ generated by, identification and characterization, **254,** 779
  BMAL1 gene: characterization of splice variants (mouse), **260,** 760
  CD28 mRNA: identification of three splice variants (human), **259,** 34
  CD44 fusion proteins: heparan sulfate composition, **257,** 839
  cdc25B, multiple variants produced by, regulation of G2/M progression, **260,** 510
  differential regulation of ligand-dependent and -independent functions of retinoid X receptor β, **255,** 625
  fibronectin in MDCK cells, regulation by HGF/scatter factor: comparison with effects of TGF-β1, **260,** 225
  kallikrein 2 transcripts (human), **264,** 833
  maize transposable element *Ds* from primary transcripts in endosperm and suspension cells, **261,** 798
  MFG-E8 mRNA: lactation-dependent expression of variant with exon for multiply O-glycosylated domain (mouse), **254,** 522
  MUC3 gene
    prediction of membrane-bound and soluble forms of mucin (human), **263,** 728
    two minor alternative splice forms (human), **261,** 83
  significance of additional exon of stress-inducible heat shock protein 70 gene HSP70-1 (human), **257,** 193
  species-common and species-specific, implications for structure of calpastatin isoforms (mouse), **260,** 339
  species-specific, transgenic RNA in mammary glands of pigs, rabbits, and mice, **257,** 843
  VAMP-1: generation of highly variable C-terminus, **264,** 777
Alveoli
  epithelial cells
    glyceraldehyde-3-phosphate dehydrogenase transcription, increase by hypoxia (rat), **266,** 156
    transdifferentiation in primary cultures, caveolin-1 expression and biogenesis of caveolae during, analysis (rat), **262,** 744
  structural development in whole-organ culture of mammary gland, effect of estrogen (mouse), **232,** 340; *corrigendum,* **257,** 249
Alzheimer's disease, *see also* β-Amyloid precursor protein; β-Amyloid protein
  associated FAC1, DNA-binding activity, enhancement by phosphorylation, **260,** 785
  brain cytoskeletal abnormalities in, relationship to presenilin-1 carboxyl-terminal fragments, **256,** 512
  caspase expression changes in, comparison with development and aging (human, rat), **256,** 381
  cyclooxygenase and PPARγ expression in brain, **254,** 582
  human pancreatic thread protein possibly implicated in, secondary structure in solution at acid pH, **258,** 653
  implications of S 17092-1 identification as potent specific cell-permeant inhibitor of human proline endopeptidase, **257,** 657
  late-onset, association with α_2-macroglobulin DNA polymorphism, **264,** 48
  loss of catalytic TrkB immunoreactivity in, analysis (human), **264,** 648
  sporadic, associated estrogen receptor α gene polymorphisms, **265,** 335
Amadorins
  post-Amadori inhibitors of advanced glycation reactions, **257,** 251
Amidase
  Rhodococcus rhodochrous J1, catalysis of hydrazide synthesis, **256,** 415
Amides
  hydrolysis by nitrilase (*Rhodococcus rhodochrous*), **253,** 662; *erratum,* **255,** 549
Amino acid composition
  components in, relationship to protein structural class, **264,** 216
Amino acids
  branched chain, relationship to hepatocyte growth factor and proteasomes, **266,** 647
  restriction, cancer cells subjected to, increased spermidine transport in, antizyme-dependent and -independent mechanisms (human), **256,** 646
  role in α-(1,3)-*N*-acetylgalactosaminyltransferase activity of histoblood group B α-(1,3)-galactosyltransferase (human), **262,** 487
Amino acid sequence, *see* Sequence studies
Amino acid transporters
  MCAT-1, adenovirus carrying gene for, in hepatoma-specific gene therapy via retrovirus-mediated targeted gene transfer, **265,** 550
  system L, LAT1 subunit, molecular cloning and transport function (human), **255,** 283
Aminoacylation
  by human phenylalanyl-tRNA synthetase α- and β-subunits expressed in COS cells, **255,** 765
Aminobisphosphonates
  mechanism of action: characterization of alendronate inhibition of isoprenoid pathway (rat liver), **266,** 560
γ-Aminobutyric acid receptor
  for GABA$_A$, *see* GABA$_A$ receptor
2-Aminoethoxydiphenyl borate
  effects on myometrial contractions (rat), **264,** 979
Amino groups
  substitution at hammerhead position 2.1, effect on Mg^{2+} binding by ribozyme and cleavage activity, **262,** 461
5-Aminoimidizole-4-carboxamide riboside
  effect on metabolism of human umbilical vein endothelial cells, **265,** 112; *erratum,* **266,** 615
δ-Aminolevulinic acid
  protoporphyrin IX levels induced by, relationship to mitochondrial content in neoplastic cells *in vitro,* **265,** 315
2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine
  cooked meat-derived, inhibition of death of mammary epithelial cells (human), **266,** 203

Aminophospholipid translocase
- bovine and murine, human ATPase II orthologous to, cloning, expression, and chromosomal mapping, **257,** 333

Amino terminus
- SDF-1, attachment of C-terminus to, enhancement of biological activity of N-terminal peptide, **264,** 42
- SPR2, ordered conformation (human), **262,** 395

Amiodarone
- downregulation of β-adrenergic receptor protein (AT-1 cells), **255,** 515

AMP-activated protein kinase
- and activator AICAR, effects on metabolism of human umbilical vein endothelial cells, **265,** 112; *erratum,* **266,** 615

Ampicillin
- susceptibility of human granulocytic ehrlichiosis agent in HL-60 cells, p44 expression changes as measure of, **257,** 351

Amplified fragment length polymorphism
- modified method for cDNA subtraction, in cloning of differentially expressed genes in metastatic osteosarcomas (rat), **261,** 35

Amygdala
- corticotropin-releasing factor receptor 2α, short variant cloning and characterization (rat), **256,** 692

Amylase
- and constitutive secretory protein, co-secretion from regulated secretory pathway of exocrine cells, **257,** 545
- secretion in pancreatic acinar cells, inhibition after induction of acute pancreatitis (rat), **265,** 545

Amyloidosis
- cardiac and cutaneous, associated apolipoprotein A-I variant Arg173Pro (human), **257,** 584
- compound heterozygote in TTR gene with high serum transthyretin and retinol binding protein levels, **264,** 365

β-Amyloid precursor protein
- association with Hsc73, induction by proteasome inhibitors, **254,** 804
- cytoplasmic domain, phosphorylation at Ser655 by APP kinase I from rat brain, **258,** 300
- fusion protein, atypical processing by proteolytic activity in *Pichia pastoris,* **262,** 263; *erratum,* **263,** 596
- gene for human Fe65L2 interacting with, genome structure and chromosomal mapping, **258,** 385
- interaction of X11L2 with, **255,** 663
- mRNA, hairpin ribozyme targeted to, in study of ribozyme specificity, **257,** 356

β-Amyloid protein
- conformation, FT-IR study: standardization of aggregation grade, **265,** 297
- gelsolin binding (human), **258,** 241
- high levels of circulating Aβ42 sequestered by plasma proteins in Alzheimer's disease, **257,** 787
- microglial cells activated with, NO and TNF-α production, inhibition by α-MSH peptides, **263,** 251
- neurotoxicity, enhancement by αB-crystallin (rat), **262,** 152

Amyotrophic lateral sclerosis
- familial, murine model, neuroprotective effects of genistein, **258,** 685

Anandamide
- brain regional distribution, implications for biosynthesis and biological function (rat), **256,** 377
- facilitated transport, inhibition by unsaturated long-chain *N*-acyl-vanillylamides, **262,** 275

Anaphylatoxin C3a receptor
- ligand binding sites (guinea pig), **263,** 357

Androgenic gland hormone
- terrestrial isopod *Armadillidium vulgare,* characterization and cDNA cloning, **264,** 419

Androgen receptor
- eel, cDNA cloning, steroid activation of transcription in transfected mammalian cells, and tissue mRNA levels, **254,** 378
- phosphorylation/dephosphorylation, as determinant of androgen agonistic or antagonistic activity, **259,** 21

Androgens
- activation of transcription of eel androgen receptor in transfected mammalian cells, **254,** 378

Aneurysms
- abdominal aortic, collagenase-3 expression (human), **261,** 904
- abdominal aortic and intracranial, Finnish patients with, genetic analysis of MMP3, MMP9, and PAI-1, **265,** 563

Angiogenesis
- heparin-induced, role of hepatocyte growth factor (human), **255,** 80
- induction by sphingosine 1-phosphate in human umbilical vein endothelial cells, **264,** 743
- *in vitro,* inhibitory effect of full-length human endostatin, **263,** 340
- and morphological change, in ovary, role of angiogenin (bovine), **257,** 182
- receptor genes in renal cell carcinoma associated with, identification by differential hybridization (human), **257,** 855
- role of VEGF: failure of oncogenic *ras* to restore *in vivo* tumorigenic phenotype in ES cells lacking VEGF, **254,** 480
- tumor
  - inhibition by γ-linolenic acid, role of inhibition of expression of VE-cadherin/catenin complex, **258,** 113
  - role of macrophage migration inhibitory factor overexpression (human), **264,** 751
  - suppression by apo(a): link between atherosclerosis and angiogenesis (mouse), **257,** 714
- tumor adaptation to hypoxia by, **266,** 718

Angiogenin
- expression in human HepG2 hepatoma cells, regulation by mediators of acute-phase response, **259,** 178
- role in morphological change and angiogenesis in ovary (bovine), **257,** 182

Angiogenin-1
- bovine milk, isolation and characterization, **263,** 187

Angiopoietin-1
- and VEGF, *in vitro* effects on hematopoietic and endothelial cells (mouse), **264,** 133

Angiopoietin-2
- expression during testicular development and regression (chicken), **260,** 492
- and VEGF, *in vitro* effects on hematopoietic and endothelial cells (mouse), **264,** 133

Angiopoietin-2B
- characterization and expression during testicular development and regression (chicken), **260,** 492

Angiostatin protein
- tumor-suppressing activity, role of kringles 1 to 3 (human), **264,** 469

Angiotensin II
- activation of NF-κB in human monocytes, **257,** 826
- binding of AT2 receptor to, role of His273 in sixth transmembrane domain of receptor (rat), **257,** 704
- effect on intracellular Ca^{2+} in smooth muscle cells (SVSC cells), **264,** 774
- effect on migration of retinal pericytes (bovine), **266,** 382
- increased vascular responsiveness in AT2 knockout mice, role of upregulation of AT1 receptor, **258,** 194
- induced p44/42 MAP kinase activity in human mesangial cells, inhibitory effect of focal adhesion, mediation by integrins, **261,** 820
- signal transduction pathways in human mesangial cells, role of focal adhesion and GTPase activating proteins, **257,** 234

Angiotensin II receptor
  AT1, mRNA, binding of RNA-binding protein AUF1 (human), **266,** 609
  AT1a, gene expression in vascular smooth muscle cells, transcriptional suppression by interferon-γ (rat), **262,** 494
  AT2
   knockout mice, increased vascular responsiveness to Ang II in, role of AT1 upregulation, **258,** 194
   ligand binding by, role of Arg182 in second extracellular loop (rat), **263,** 816
   ligand–receptor interaction, role of His273 in sixth transmembrane domain (rat), **257,** 704
   modulation of vasoconstrictor response (mouse), **261,** 345
Anion exchange perfusion chromatography
  intact chloroplast H$^+$-ATP synthase, detergent effect (spinach), **265,** 520
Anions
  Mg^{2+} efflux pathway dependent on, DIDS-sensitive, in rat ventricular myocytes, **264,** 334
Ankhzn
  cloning: cytoplasmic protein with ankyrin repeats hooked to zinc finger motif (mouse), **257,** 206
Ankyrin
  distribution in *Drosophila* S2 cells, effects of neuroglian and DE-cadherin, **265,** 372
Ankyrin repeats
  hooked to zinc finger motif, cloning of cytoplasmic protein ankhzn with, **257,** 206
Annexin I
  heterotetramer, binding to purine RNA and pyrimidine DNA, **265,** 200
Annexin IV
  truncated, cloning and functional activity (murine macrophages), **258,** 162
Annexin V
  inhibition of T cell apoptosis, association with induction of Ca^{2+} influx (human), **265,** 709
  membrane interaction, role of Trp-187, molecular mechanics analysis, **254,** 484
Annexin V-ferrofluid
  detection of phosphatidylserine surface exposure on human erythrocytes using, **258,** 199
Annexin VI
  ATP-binding site, characterization by photochemical release of nucleotide and by IR difference spectroscopy (porcine liver), **263,** 775
  large splice form, inhibition of EGF-dependent calcium influx (A431 cells), **260,** 540
Anoikis
  cell death, dissociation from activity of stress-activated protein kinase (rat IEC-18, IEC-*ras*3 cells), **260,** 48
Anomeric specificity
  hemagglutinin–neuraminidase from Sendai virus, **262,** 401
Anterior cruciate ligament
  collagen remodeling in, associated with developing spontaneous murine osteoarthritis, **258,** 763
Antiangiogenic activity
  restin, comparison with endostatin: NC10 domain of human collagen XV, **255,** 735
Antibiotic resistance
  Enterobacter aerogenes, conferral *in vivo* by modification of porin activity, **266,** 248
Antibiotics
  cell wall-affecting, induction of expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
  porcine myeloid antibacterial peptide PMAP-23 activity, effects of tryptophan residues, **264,** 281
Antibodies
  autoantibodies, *see* Autoantibodies
  circulating, against streptokinase C-terminal peptide, in normal blood donors, **263,** 454
  cloned fragments, intracellular expression, interference with hepatitis B virus surface antigen secretion, **255,** 785
  internalizing, selection from phage libraries, **255,** 386
  intracellular fragments, characterization and binding to HCV core protein, **263,** 410
  monoclonal, *see* Monoclonal antibodies
  in patient sera, reactivity with mutant streptokinase lacking C-terminal 42 amino acids, **266,** 230
  to planarian synaptotagmin homologue, in analysis of planarian neural network, **260,** 426
  to pleckstrin homology domain of PLC-δ1, inhibition of Ins(1,4,5)P$_3$-mediated Ca^{2+} release from endoplasmic reticulum (RBL cells), **260,** 42
  proinflammatory, in dilated cardiomyopathy patients: subclass specificity of myosin autoantibodies, **259,** 255
  recombinant single-chain fragment, processing in insect cells, enhancement by bacterial signal peptidase, **255,** 444
  SEA-scFv bifunctional antibody, construction of bacterial expression system for, and functional analysis, **256,** 223; *erratum,* **259,** 230
Antibody responses
  antiviral IgA and IgG, compartmentalized, enhancement by adenoviral-mediated IL-6 gene transfer in rat lung, **258,** 332
Anticancer drugs
  differential regulation of heat shock proteins, role of c-Jun N-terminal kinase, **262,** 516
  retinoids, effects in pancreatic adenocarcinoma model, optimization of treatment conditions for, **257,** 596
  treatments, dissociation of N-terminal half of NPM from HeLa cell nucleoli after, **264,** 305
α_1-Antichymotrypsin
  gene induction in brain (mouse), **263,** 270
Antifungal protein
  thaumatin-like, first chromatographic isolation from French bean legumes and demonstration of antifungal activity, **263,** 130
Anti-gene activity
  peptide nucleic acid targeted to *bcl-2* gene, *in vitro* evaluation, **264,** 537
Antigenic regions
  streptokinase, mapping in humans after streptokinase therapy, **259,** 162
Antigen presentation
  MHC class I antigen, role of thimet oligopeptidase, **255,** 591
Antigens
  B cell surface antigen with homology to S100 protein MRP8 (mouse), **263,** 17
  CDR3 of TCR/Vβ, analysis in T cells inducing synovial hyperplasia in rheumatoid arthritis, **263,** 172
  hepatitis B surface, *see* Hepatitis B surface antigen
  HM1.24, preferentially overexpressed on multiple myeloma cells, cloning and characterization (human), **258,** 583
  outer surface membrane, 44-kDa, of human granulocytic ehrlichiosis agent, expression changes as measure of infection and antimicrobial susceptibility in HL-60 cells, **257,** 351
  relationship to stretch-activated ion channels: rippling muscle/MG-associated autoantibodies recognizing skeletal muscle proteins, **264,** 430
Antimicrobial activity
  chlorinated isoxazoylnaphthoquinone, mechanism, **263,** 301
  synthetic peptides corresponding to β-hairpin loop of rabbit defensin NP-2, **254,** 281

- Antioxidant activity
  - implications of hydrogen peroxide in urine (human), **262,** 605
  - manganese dipyridoxyl diphosphate, assessment *in vitro* and in *ex vivo* rat model, **254,** 768
  - melatonin deactivation of hypochlorous acid, factors affecting rate of, **257,** 431
- Antioxidant/electrophile response element
  - negative regulation of GST-Ya gene, direction by C/EBP-like site, **265,** 18
- Antioxidant enzymes
  - altered levels in progeria skin fibroblasts, **257,** 163
- Antioxidant protein 1
  - homologue Rah1p, molecular cloning (rat), **265,** 509
- Antioxidants
  - induction in ursodeoxycholic acid protection of hepatocyte against oxidative injury, **263,** 537
  - plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
  - prevention of quinone-mediated DNA arylation (HL-60 cells), **262,** 769
- Antiprogestatin drug
  - RU486, reversal of MRP-mediated multidrug resistance in human lung cancer cells, **258,** 513
- Antisense activity
  - peptide nucleic acid targeted to *bcl-2* gene, *in vitro* evaluation, **264,** 537
- Antisense cDNA
  - *N*-acetylglucosaminyltransferase V, hepatocarcinoma cells transfected with, increased susceptibility to apoptosis (human), **264,** 509; *erratum,* **266,** 615
- Antisense oligonucleotides
  - to cardiac Na$^+$/Ca$^+$ exchanger, effects on calcium dynamics in cultured cardiac myocytes (rat), **260,** 117
- Antisense RNA
  - mouse insulin-like growth factor II receptor, lack of reciprocal genomic imprinting in CNS, **257,** 604
  - mouse *Xist* gene, molecular cloning, **258,** 537
  - to *SMAD5,* expressed in fetal and tumor tissues: *DAMS* (human), **255,** 668
  - telomerase, transfection, effect on growth of human gastric cancer cell lines, **255,** 753
- Antisense techniques
  - suppression of activin-induced apoptosis of prostate cancer cells (human), **265,** 669
- α_1-Antitrypsin
  - oxidation by myeloperoxidase–hydrogen peroxide system, promotion of binding to IgA, **255,** 562
- Antitumor effect
  - tumor necrosis factor α conjugated with polyvinyl pyrrolidone, **257,** 448
- Antiviral activity
  - bovine lactoferrin peptidic fragments toward herpes simplex virus type 1, **264,** 19
- Antizyme
  - role in increased spermidine transport in amino acid-restricted cancer cells (human), **256,** 646
- Aorta
  - abdominal aneurysm, genetic analysis of MMP3, MMP9, and PAI-1 in Finnish patients, **265,** 563
  - atherosclerosis regression, effect of HMG-CoA reductase inhibitor fluvastatin and role of NO (rabbit), **259,** 414
  - diabetic rats, increased adrenomedullin expression, **258,** 453
  - RGS 1 and RGS 16 induced in response to bacterial LPS, stimulation of c-fos promoter expression (pig), **259,** 550
  - superoxide production and basal NO production, monitoring, validation of lucigenin as chemiluminescent probe for, **254,** 319
- Aortic endothelial cells
  - bFGF and TGF-β_1 production, regulation by nicotine (bovine), **257,** 306
  - cytosolic Ca^{2+} concentration, increase by calmodulin antagonists (pig), **265,** 697
  - exposed to cyclic strain, PI 3-kinase-dependent MAP kinase activation via p21ras (bovine), **257,** 668
  - ferritin targeting by pentaerythrityl tetranitrate (pig), **261,** 28
  - myosin phosphatase 130-kDa regulatory subunit, expression, subcellular localization, and cloning (pig), **254,** 490
  - nitric-oxide synthase mRNA induction by shear stress, role of intracellular Ca^{2+} and G-protein signals and modulation by PI 3-kinase (bovine), **254,** 231; *erratum,* **256,** 255
  - nongenomic stimulation of NO release by estrogen, mediation by estrogen receptor α localized in caveolae (bovine), **263,** 257
  - nuclear translocation of caveolin-1, endothelial NO synthase, and Flk-1/KDR, induction by VEGF (bovine), **256,** 192
  - stimulation by vascular endothelial growth factor-A, associated induction of NO release by VEGF receptor-2 (pig), **265,** 636
  - verotoxin-1-induced ROS generation (human), **260,** 813
- AP1
  - activation by cellular enrichment with polyunsaturated fatty acids (human), **265,** 116
  - site in E element in enhancer I in human liver cell, mediation of transactivation of HBV pregenomic promoter by HPV-16 E6 with HBV X protein, **265,** 62
- Apaf-1
  - three new types in mammalian cells, **261,** 746
- Apical sorting machinery
  - MAL component
    - intracellular distribution and incorporation into GEMs, role of last two C-terminal serines, **260,** 188
    - targeting to glycolipid-enriched membranes, requirement of pre-Golgi sorting event for, **254,** 689
- Apigenin
  - activation of Cl$^-$ channel and Na$^+$/K$^+$/2Cl$^-$ cotransporter in renal epithelial A6 cells, **254,** 368
  - inhibition of glucose uptake in U937 cells, **260,** 568
- apM-1 gene
  - mapping to chromosome 1q21.3-q23 locus for familial combined hyperlipidemia and distribution and expression in adipocytes (human), **260,** 416
- Apo2 ligand, *see* TRAIL
- APOBEC-2
  - cloning and properties (human, mouse), **260,** 398; *erratum,* **263,** 264
- Apo-glucose oxidase
  - fluorescence emission, as glucose concentration probe (*Aspergillus niger*), **263,** 550
- Apolipoprotein (a)
  - human, transgenic rabbits expressing, assembly of lipoprotein(a) in, **255,** 639
  - suppression of tumor angiogenesis: link between atherosclerosis and angiogenesis (mouse), **257,** 714
- Apolipoprotein A-I
  - human, reconstituted HDL containing, reduction of VCAM-1 expression and neointima formation after carotid cuff injury in apoE null mice, **264,** 465
  - variant Arg173Pro associated with cardiac and cutaneous amyloidosis (human), **257,** 584
- Apolipoprotein B
  - mRNA editing
    - detection by peptide nucleic acid-mediated PCR clamping, **259,** 311

Apolipoprotein B (*continued*)
    enhancement activity from chicken enterocytes, sequence elements required for, **254,** 744
  mRNA mooring sequence, RNA 3′ of, tissue-specific differences in role in editosome assembly (rat enterocytes, liver), **263,** 81
Apolipoprotein B-100
  reduction of lipid hydroperoxides in human plasma, **259,** 185
Apolipoprotein E
  apoE null mice, carotid cuff injury in, VCAM-1 expression and neointima formation after, reduction by reconstituted HDL containing human apoA-1, **264,** 465
Apolipoprotein repressor protein-1
  expression in rat hepatocytes and DNA-binding activity, matrix-mediated changes, **259,** 651
Apollon protein
  expression in brain cancer cells (human), **264,** 847
Apoptosis
  A431 cells, rescue by β4 integrin subunit via PI3 kinase/Akt kinase signaling pathway, **264,** 127
  acetylleucine chloromethyl ketone induction of, in U937 cells, **263,** 139
  activin-induced, LNCaP prostate cancer cell
    differentially expressed genes in, **257,** 187
    suppression by antisense strategy (human), **265,** 669
  anoikis-like, dissociation from activity of stress-activated protein kinase (rat IEC-18, IEC-*ras*3 cells), **260,** 48
  antiapoptotic effects of IGF binding protein-6 in osteoblastic osteosarcoma Saos-2/B-10 cells, **263,** 786
  arginine deiminase-induced, inhibitory effect on cell proliferation, **261,** 10
  butyric acid-induced, in colorectal carcinoma cells, redistribution of activated caspase-3 to nucleus during, **260,** 775
  bystander effect in glioma gene therapy with HSV-TK/GCV system, tentative mechanism, **259,** 455
  carcinoma cell lines resistant to retinoic acid, induction by 4-hydroxyphenylretinamide, **254,** 636
  caspase-3 pathways, activation in skeletal muscle fibers in laminin α2-deficient mice, **260,** 139
  caspase-independent killing of budding yeast by oligomerized Ced-4, **260,** 799
  CDK4-mediated signaling cascade in PC12 cells, **260,** 806
  cerebellar neuronal cells, induction by cholestanol (rat), **256,** 198
  choriocarcinoma JEG3 cells, induction by 15-deoxy-$\Delta^{12,14}$-prostaglandin J_2, **262,** 579
  colcemid-induced, protein phosphatase-1 activation and association with retinoblastoma protein in, analysis (HeLa cells), **266,** 279
  colon cancer cells, induction by transfection with human IFN-β gene, **257,** 771
  2-deoxy-D-ribose-induced, in HL-60 cells, association with cell cycle progression by spermidine, **257,** 460
  DNA fragmentation
    DFF45 in role of chaperone and inhibitor (293T cells), **264,** 176
    synergistic binding of multiple domains of DFF45 to DFF40, **264,** 181
  early pre-B acute lymphoblastic leukemia Reh cells, effect of cIAP-1 modulation by antitubulin agents and bryostatin 1, **266,** 76
  endothelial cells, induction
    by mouse recombinant kringle 5, **258,** 668
    by yeast-expressed human endostatin, **258,** 345
  17β-estradiol-induced, in preosteoclastic FLG 29.1 cell line, **255,** 680
  execution in Jurkat cells, distinct ATP-dependent steps upstream and downstream of mitochondrial cytochrome *c* release, inhibition by NO, **258,** 215
  Fas-induced, role of cytochrome *c* (Jurkat, SKW6 cells), **261,** 71
  fibroblasts
    from lung, effects of exogenous NO and hyperoxia (human), **262,** 685
    overexpressing Bad, with caspase activation and ERK inactivation (NIH/3T3 cells), **264,** 724
  glibenclamide induction of, in HepG2 cells, role of CFTR Cl^- channel inhibition and intracellular Ca^{2+} release, **261,** 682
  glioma cells in intracranial malignant glioma xenografts in athymic mice, induction by locoregional Apo2L/TRAIL without neurotoxicity, **265,** 479
  green fluorescent protein-expressing cells, **260,** 712
  hepatic, in poly(ADP-ribose) polymerase-deficient mouse, **263,** 433
  hepatocyte, markers of, implication of resistance of liver poly(ADP-ribose) polymerase to cleavage by caspases, **256,** 436
  Herpesvirus saimiri-immortalized T lymphocytes, induction, **263,** 352
  hydrogen peroxide-induced, opposing effects of protein kinase C δ and protein kinase B α (CHO cells), **264,** 840
  hydrogen peroxide induction of, via caspase 3 activation in HL-60 cells, **255,** 477
  implications of *N*-oleoylethanolamine inhibition of glucosylation of natural ceramides in CHP-100 neuroepithelioma cells, **255,** 456
  increased susceptibility in human hepatocarcinoma cells transfected with antisense *N*-acetylglucosaminyltransferase V cDNA, **264,** 509; *erratum,* **266,** 615
  induction, p53 activity for, partial restoration in p53 mutants by inhibition of phosphorylation at Ser-15 or Ser-315, **261,** 256
  induction by adenovirus E1A, c-Myc, Bax, and Nip3 in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
  inhibition by 4b,5,9b,10-tetrahydroindeno[1,2-*b*]indole via prevention of caspase activation after mitochondrial depolarization (Jurkat cells), **264,** 622
  interferon-γ-induced, in primary cultured hepatocytes, role of IRF-1, **257,** 672
  intracellular acidification during, occurrence in absence of nucleus, **254,** 821
  lymphoblastoid cells
    effects of peripheral benzodiazepine receptor agonists (U937 cells), **265,** 457
    induced by IgG, associated phosphorylation of Bcl-2 and mitochondrial changes (CEM cells), **264,** 896
  mammary epithelial cells, inhibition by cooked meat-derived 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (human), **266,** 203
  MAP kinase kinase inhibitor PD98059-induced, in human luteinized granulosa cells, **263,** 143
  mesangial cells, role of transient and constitutive activation of extracellular signal-regulated kinase (rat), **264,** 696
  and mitochondrial dysfunction, paclitaxel-mediated, resistance of human leukemia cells to, increase due to loss of Bcl-2 phosphorylation loop domain, **259,** 67
  and mitotic arrest, as independent effects of okadaic acid in K562 leukemia cells, **260,** 256
  MPP^+-induced, glucose protection from, role of mitochondrial membrane potential and ATP synthase (PC12 cells), **257,** 440
  and necrosis, comparative study in HepG2 cells, **255,** 6
  neuroblastoma CHP100 cells, early phase, lipoxygenase-dependent ultraweak light emission in, **265,** 758
  in neurodegenerative disorders, extended polyglutamine associated with, relationship to caspases, **257,** 724
  neurons, identification of kinase-like gene induced during, **258,** 260
  nitric oxide enhancement of, in bovine glomerular endothelial cells, associated upregulation of ceramide formation, **258,** 60
  nuclear, associated changes, control by DNA-fragmenting factor, **254,** 552
  or cell proliferation, dose-dependent induction by bacterial protein A in mouse splenic lymphocytes, **260,** 105
  ox-LDL-induced, in human coronary artery endothelial cells, reduction by γ-tocopherol, **259,** 157

p53-dependent, isolation of differentially expressed cDNAs from human colon cancer cells undergoing, **261,** 864
p53-induced, as safeguard against cancer, **265,** 1
pancreatic cancer cells, induction by lipoxygenase inhibition (human), **266,** 392
peroxynitrite-induced, in dopaminergic neuroblastoma SH-SY5Y cells, effect of mitogen-activated protein kinase (human), **263,** 504
phosphatidylserine exposure during, cell-type specificity and correlation with plasma membrane phospholipid scramblase expression, **266,** 504
phthalocyanine 4 photodynamic therapy induced
  in mouse lymphoma cells, role of cytochrome *c* leakage, **255,** 673
  resistance in Niemann–Pick human lymphoblasts, **258,** 506
prolactin-induced, in rat corpus luteum, Fas/Fas ligand system in, **260,** 167
prostaglandin A_2/Δ^{12}-PGJ_2-induced, in Hep3B cells, Sox-4 and human homolog of yeast Ssf-1 differentially regulated during, cDNAs for, **260,** 216
putative inhibitor IEX-1L, characterization as mutant nonspliced $p22^{PRG1/IEX\text{-}1}$ variant not expressed *in vivo* (Jurkat cells), **262,** 139
role in human disease, **266,** 699
role in inhibition of mitochondrial function in HL-60 cells, **263,** 294
role of loss of molecular interaction between cytochrome *c* and cardiolipin due to lipid peroxidation, **264,** 343
role of ribosome-inactivating protein, study involving site-specific mutagenesis of mistletoe lectin, **264,** 944
in shoot primordia of *Matricaria chamomilla,* induction by geraniol, **259,** 519
signal, sensitivity of HL-60 cells transfected with bax or bax C-terminus, **260,** 582
stimuli related to, induction of p53-dependent Fas expression, relationship to JNK activation, **256,** 595
taxol-induced, cancer cells at low concentration, **263,** 398
T cells
  Fas/Fas ligand-mediated, induction by doxycycline (Jurkat cells), **260,** 562
  inhibition by annexin V, association with induction of Ca^{2+} influx (human), **265,** 709
  tributyltin-induced, pre- and postmitochondrial events in, role of calcium (Jurkat cells), **266,** 460
TNF-α-induced, in rat intestinal epithelial cells, and signaling mechanisms involved, **260,** 159
TRAIL-induced, mechanism (BJAB cells), **265,** 130
TRAIL receptors mediating, expression in human brain and brain tumors, **257,** 454; *erratum,* **259,** 230
tumor cells, induced by growth factor withdrawal, enhancement by human *TFAR19* gene, **254,** 203
WEHI-164 cells, induction by TNF, association with cell cycle stage-dependent patterns of caspase activation, **261,** 385
zidovudine-induced, in bone marrow cells, protection by protein A (mouse), **264,** 601

Apoptosis-linked gene 2
  similarity of five-EF-hand protein peflin to, **263,** 68
appA2 gene
  acid phosphatase/phytase of *E. coli,* isolated from pig colon, cloning, sequencing, and expression, **257,** 117
APP kinase I
  phosphorylation of cytoplasmic domain of Alzheimer's β-amyloid precursor protein at Ser655 (rat brain), **258,** 300
Apurinic/apyrimidinic endonuclease
  transcriptional activation by oxidative stress, role of CREB, **261,** 859
Apurinic site lyase
  hMMH type 1a as major repair enzyme for 8-hydroxyguanine lesions in human cells, **258,** 605
Aquaporin
  homologous *AQY1* from *Saccharomyces cerevisiae,* molecular and functional study, **257,** 139
Aquaporin 1
  expression in proximal tubule epithelial cells, regulation by hyperosmolarity and contrast agents (human), **256,** 240
Aquaporin 5
  α_1-adrenoceptor-induced trafficking to parotid cell apical plasma membrane (rat), **265,** 94
  identification in cochlea: cDNA cloning and *in situ* localization (rat), **264,** 157
  trafficking in AQP5 gene-transfected salivary gland cells, role of vesicle–cytoskeleton interaction (human), **266,** 443
Aquifex aeolicus
  3-deoxy-D-*manno*-octulosonic acid 8-phosphate synthase, characterization, **263,** 346
  hyperthermophilic bacterium, [2Fe–2S] protein from, **261,** 885
AQY1
  Saccharomyces cerevisiae, molecular and functional study, **257,** 139
Arachidonate 12-lipoxygenase
  transcription in A431 cells, enhancement by c-Fos overexpression, **261,** 848
Arachidonic acid
  dependency, PKNβ differing from PKNα in, **261,** 808
  in phosphatidylinositol, substitution of non-methylene-interrupted polyunsaturated fatty acids for, analysis (HepG2 cells), **264,** 683
  release, PLA_2-mediated, required for NIH-3T3 cell spreading, role of β1-integrin cytosolic domain, **258,** 306
  role in expression of long-term potentiation, *in vitro* studies (guinea pig, rat), **254,** 446
2-Arachidonoylglycerol
  brain regional distribution, implications for biosynthesis and biological function (rat), **256,** 377
N-Arachidonoyl-phosphatidylethanolamine
  brain regional distribution, implications for biosynthesis and biological function (rat), **256,** 377
Arbitrarily primed PCR fingerprinting
  detection of DNA abnormalities: *MDM2* amplification in mediastinum fibrosarcoma, **258,** 271
Archaea
  hyperthermophilic, cyclodextrin glucanotransferase from, function and conformation, *in vitro* heat effect, **265,** 57
Arginine
  oxygenation to N^G-hydroxyarginine, reactivity of flavin semiquinone of nitric-oxide synthase in, **250,** 36; *erratum,* **256,** 447
  stoichiometric binding in oxygenase domain of iNOS, requirement for single molecule of tetrahydrobiopterin per dimer, **257,** 344
L-Arginine
  reduction of right heart hypertrophy in hypoxia-induced pulmonary hypertension (rat), **254,** 100
Arginine deiminase
  inhibition of cell proliferation by arrest of cell cycle and induction of apoptosis, **261,** 10
Armillaria mellea
  lysine-specific proteinase, identification as member of metalloendopeptidase class located in basidiomycetes, **262,** 60
Aromatase
  TNF-α-stimulated, inhibition by paclitaxel and 2-methoxyestradiol (human), **261,** 214
ARP-1, *see* Apolipoprotein repressor protein-1
Arp2/3 complex
  human WAVE/SCAR homologues associating with, as general regulatory molecules of actin cytoskeleton, **260,** 296

Arsenic
  effect on p53 and mdm2 cellular levels, **263,** 446
Arsenic trioxide
  effect on cell cycle arrest in head and neck cancer cell line PCI-1, **265,** 400
Arsenite
  c-*fos* induction by, mediation by heat shock element in c-*fos* promoter, **254,** 566
Arteries
  carotid
    balloon injury, neointimal formation in, inhibition by hemin administration (rat), **261,** 302
    periadventitial cuff injury in apoE null mice, VCAM-1 expression and neointima formation after, reduction by reconstituted HDL containing human apoA-1, **264,** 465
  middle cerebral, myogenic tone, nonspecific inhibition by MEK1 inhibitor PD98059 (rat), **257,** 523
  pulmonary, resistance-sized, endothelial cells, K$^+$ current profile (rat), **263,** 405
  renal, permeabilized, Ca^{2+} sensitivity of contractile apparatus in, effects of smooth muscle myosin phosphatase small subunit (pig), **254,** 158
Arylalkylamine *N*-acetyltransferase
  expression in suprachiasmatic nucleus of rat brain: melatonin synthesis enzyme, **258,** 772; *erratum,* **261,** 546
  site of circadian expression in rat retinal photoreceptor cells, **248,** 115; *erratum,* **261,** 546
Arylation
  DNA, quinone-mediated, prevention by antioxidants (HL-60 cells), **262,** 769
Aryl carboxamidophenoxyisobutyric acids
  inhibition of advanced glycation end products, **262,** 651; *erratum,* **264,** 1008
Aryl ureidophenoxyisobutyric acids
  inhibition of advanced glycation end products, **262,** 651; *erratum,* **264,** 1008
Ascites hepatoma
  growth, effect of resveratrol (rat), **254,** 739
Ascorbic acid
  plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
Ascorbyl palmitate
  scavenging of hydroxyl radicals, measurement in *in vitro* models, **262,** 661
L-Asparaginase
  inhibition of rapamycin-targeted signaling pathway in human leukemia cells, **260,** 534
Asparagine
  spontaneous deamidation and isomerization of Asn108 in prion peptide 106–126 and full-length PrP, **261,** 578
L-Aspartase
  inactive aggregated mutant, recovery of catalytic activity (*Escherichia coli*), **264,** 596
Aspartic acid
  mechanism of Ret activation by Asp 631 mutation identified in sporadic pheochromocytoma, **255,** 587
D-Aspartic acid
  residue 151, formation induction by chiral field in lens protein during aging (human), **263,** 322
Aspergillus ficuum
  recombinant phytase from, expressed in tobacco leaves, characterization, **264,** 201
Aspergillus flavus
  allergenic IgE-binding protein, characterization as alkaline serine protease, **261,** 669
Aspergillus nidulans
  mitotic regulator protein NIMA, related murine STK2 serine/threonine kinase, activity and substrate specificity, **264,** 449
Aspergillus niger
  antifungal peptide isolation and characterization, **263,** 646
Asphyxia
  newborn infants with/without, oxidative stress as measured by plasma antioxidants and free fatty acids, **257,** 244
Aspirin
  effect on prostanoid and NO production in infarcted heart *in situ* (rabbit), **257,** 488
Asthma
  association with nonpathogenic common variants of *IFNGR1* and *IFNGR2* (human), **263,** 425
  atopic, endothelin-1 and ET-1 receptor variants in, analysis (human), **262,** 259
  bronchial, allergen-specific memory T cells in, house dust mite-induced telomerase activation (human), **259,** 617
Astrocytes
  cortical, glutamate uptake *in vitro,* inhibition by unconjugated bilirubin, role of concentration and pH (rat), **265,** 67
  endothelin converting enzyme-1 expression in primary culture, modulation by endothelin B receptors (rat), **261,** 149
  N-methyl-D-aspartate responses in culture, enhancement by store Ca^{2+} depletion (human), **259,** 661
  p21^{ras}/Erk signaling pathway induced by acidic FGF, potentiation by cytodifferentiation *in vitro* (rat), **260,** 441
  prostaglandin production, effect of bacterial lipopolysaccharide (rat), **263,** 570
Astrocytoma cells
  HIV-1 replication in, inhibition by NO (human), **254,** 200
  iron chelation in, screening of transcriptionally regulated genes after, in human cells, **264,** 709
  secretory phospholipase A$_2$-induced PLCγ-1 activation and Ca^{2+} mobilization, mechanism (human 1321N1 cells), **260,** 99
Ataxia-telangiectasia cells
  defective subpathway for double-strand break repair, identification (human), **261,** 317
Atherosclerosis
  apolipoprotein(a) promoting, suppression of tumor angiogenesis (mouse), **257,** 714
  apoptosis role (human), **266,** 699
  arterial smooth muscle cell expression of heterogeneous nuclear ribonucleoprotein complex K protein and prolyl-4-hydroxylase α subunit (rabbit), **260,** 382
  implication of Ang II activation of NF-κB in human monocytes, **257,** 826
  lesions in, detection of hypernuclear acetylation (human), **266,** 417
  macrophage respiratory burst in, induction by oxidized LDL via its protein moiety (human), **263,** 804
  regression in rabbit aorta, effect of HMG-CoA reductase inhibitor fluvastatin and role of NO, **259,** 414
Atomic force microscopy
  measurement of single integrin molecule adhesion forces in intact rat osteoclasts, **259,** 645
  skeletal muscle myofibril transverse elasticity, **256,** 13
Atopy
  association with nonpathogenic common variants of *IFNGR1* and *IFNGR2* (human), **263,** 425
  interleukin-12 receptor β2 chain gene mutations in, **266,** 551
ATP
  actin–myosin interaction dependent on, inhibitory effect of phosphorylated myosin light chain kinase, **261,** 95
  annexin VI binding site for, characterization by photochemical release of nucleotide and by IR difference spectroscopy (porcine liver), **263,** 775

  - apoptosis execution steps dependent on, upstream and downstream of mitochondrial cytochrome *c* release, inhibition by NO in Jurkat cells, **258,** 215
  - Ca^{2+} mobilization in C6 glioma cells evoked by, effects of sphingosine and phorbol ester, **260,** 614
  - Cdk5–Nck5a*–ATP complex, model, **259,** 420
  - extrusion system dependent on, modulation of isoniazid accumulation in *Mycobacterium smegmatis,* **256,** 682
  - glycerol kinase-catalyzed phosphorylation dependent on, mechanism, implications of X-ray structure of GK complexed with ATP analog, **259,** 640
  - hydrogen peroxide-induced depletion, effect of constitutive hsp70 (H9c2 cells), **265,** 279
  - inhibition of K$_{ATP}$ channels, modulation by N-terminus of K$_{IR}$6.2, **255,** 231
  - intracellular concentration, regulation under conditions of reduced consumption in pancreatic islets (rat), **261,** 439
  - MAPKK-dependent upregulation of P2Y$_2$ receptors in rat VSMC, **258,** 648
  - Na$^+$/K$^+$-ATPase high affinity binding site for, acidity of microenvironment of, **254,** 215
- ATPase, *see also* Ca^{2+}-ATPase; F$_1$-ATPase; Na$^+$,K$^+$-ATPase
  - F$_0$F$_1$-ATPase, mitochondrial, inhibition by piceatannol via targeting of F$_1$ complex (rat brain), **261,** 499
  - P-type
    - ATPase II, cloning, expression, and chromosomal mapping (human), **257,** 333
    - family member human ATPase II, cloning, expression, and chromosomal mapping, **257,** 333
    - role in copper homeostasis, **261,** 225
- ATP-binding cassette transporter 1
  - human, cloning and sterol-dependent regulation in macrophages, **257,** 29
- ATP synthase
  - chloroplast F$_0$F$_1$-ATP synthase, CF$_0$, and CF$_1$, isolation by blue native electrophoresis, **259,** 569
  - F$_0$F$_1$-ATP synthase, regulation in human cells in aging and diabetes, **266,** 662
  - H$^+$-ATP synthase, intact chloroplast, anion-exchange perfusion chromatography and gel filtration, detergent effect (spinach), **265,** 520
  - role in glucose protection from MPP$^+$-induced apoptosis (PC12 cells), **257,** 440
- Atractyloside
  - inhibition of ryanodine receptor Ca^{2+}-release channel of skeletal muscle SR (rabbit), **258,** 247
- Atrial natriuretic peptide, *see also* Natriuretic peptide system
  - gene encoding, environmental upregulation in *Limulus polyphemus,* **254,** 751
  - pro-protein, amino-terminal region oligomerization via leucine zipper-like coiled-coil motifs, **255,** 495
- *ATX1* homologue protein
  - molecular cloning (rat), **265,** 509
- AUF1
  - binding to AT$_1$ receptor mRNA (human), **266,** 609
- AURE binding proteins
  - hnRNP A2 and hnRNP L, binding to 3′UTR of glucose transporter 1 mRNA and formation of complex *in vivo* (human brain tumors), **261,** 646
- Auristatin PE
  - and bryostatin 1, modulation of cIAP-1, effect on apoptosis of early pre-B acute lymphoblastic leukemia Reh cells, **266,** 76
- Autoantibodies
  - anti-dsDNA, cross-reaction with phosphoprotein P1, role of phenylalanines in C-terminal hydrophobic cluster (human), **263,** 334
  - associated with rippling muscles and myasthenia gravis, recognition of skeletal muscle proteins (human), **264,** 430
  - myosin, subclass specificity in idiopathic dilated cardiomyopathy, **259,** 255
- Autoimmune disease
  - in human, role of apoptosis, **266,** 699
- Autoimmune regulator gene
  - expression in cells regulating immune tolerance in thymus medulla (human), **257,** 821
- Autoimmunity
  - recombination signal binding protein-jκ in dilated cardiomyopathy (human), **266,** 432
- Autonomously replicating sequences
  - among repeats in rDNA region, differences in strength of, analysis in *Saccharomyces cerevisiae,* **266,** 190
- Autophosphorylation
  - GRK6 in COS-7 cells, **259,** 224
  - receptor, EGF-induced, in primary hepatocytes isolated from phenobarbitone-treated mice, **260,** 483
- Autoxidation
  - hydrogen peroxide generation in urine (human), **262,** 605
- Axin
  - phosphorylation by glycogen synthase kinase 3β, site for, modulation of interaction with β-catenin and Tcf-mediated gene expression, **266,** 28
- Azaftig
  - in urine of cachectic cancer and AIDS patients, isolation, characterization, and distribution, **254,** 642
- Azide
  - effect on hypotaurine oxidation to taurine with photochemically generated singlet oxygen, **254,** 661
- *Azotobacter vinelandii*
  - *nifM,* regulated expression in response to molybdenum and vanadium supplements in Burk's nitrogen-free growth medium, **264,** 186
- Azoxymethane
  - induced ACF, effect of mutant *Escherichia coli* strains on formation (rat colon), **262,** 322

B

- B23 protein/nucleophosmin
  - mRNA changes during entry into mitosis (HeLa cells), **257,** 865
  - N-terminal half, dissociation from nucleoli of HeLa cells after anticancer drug treatments, **264,** 305
- *Bacillus*
  - alkalophilic thermophilic, xylanase II from, structure and evolutionary relationship to alkaliphilic xylanases, **263,** 640
- *Bacillus pasteurii*
  - alkalophilic, cytochrome *c*-553 from, primary structure characteristics of lipoprotein, **264,** 380
- *Bacillus psychrosaccharolyticus*
  - psychrophilic alanine racemase, characterization, **256,** 333
- *Bacillus subtilis*
  - histone-like protein HBsu, depletion, associated defective protein translocation and upregulation of small cytoplasmic RNA, **258,** 211
  - σ^B, stress-activated phosphatase/kinase cascade of, activity in *E. coli,* **257,** 106
  - strain IFO 3336, poly-γ-glutamate synthetic system, gene cloning and biochemical analysis of polymer produced by *E. coli* clone cells, **263,** 6
- *Bacillus thuringiensis israelensis*
  - CryIVA protoxin expression, regulation by inorganic phosphate, **262,** 359

- Bacitracin
  - effect on expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
- Bacteria
  - genomes, compositional correlation studies among the three different codon positions, **266,** 66
  - histidine-tagged proteins expressed in, gluconic acid derivative attached to N-terminus of, identification, **262,** 793
  - infection, human disease caused by, role of apoptosis, **266,** 699
  - myeloperoxidase-mediated killing in neutrophil phagosome, role of singlet oxygen, **262,** 647
- Bacterial luciferase
  - α subunit Trp182, Trp194, and Trp250 residues, spectral properties (*Xenorhabdus luminescens*), **263,** 820
- Bacteriophage
  - engineered for receptor-mediated gene transfer to mammalian cells, genetic selection, **264,** 921
  - λ phage display, protein domain mapping by, **265,** 291
  - libraries, selection of internalizing antibodies from, **255,** 386
  - peptide-displaying biosensor, in detection of molecular interactions, **262,** 801
  - peptide display library, in identification of substrate sequences for membrane type-1 matrix metalloproteinase, **266,** 308
  - phage display cDNA cloning of protein with carbohydrate affinity, **255,** 194
- Baculovirus expression system
  - High Five cells, processing of recombinant single chain antibody fragment in, enhancement by bacterial signal peptidase, **255,** 444
  - Sf9 cells, cytoplasmic domain of human IGF-1 receptor overexpressed in, purification and characterization, **260,** 724
  - Sf21 cells, G_{i1} activation by lysophosphatidic acid receptor without ligand in, **259,** 78
- Bad
  - overexpression, sensitization of NIH/3T3 cells to apoptosis with caspase activation and ERK inactivation, **264,** 724
- Bak
  - expression in endothelial cells in inflamed tissues and induction by IFN-γ *in vitro* (human), **264,** 139
- Balloon injury
  - to carotid artery, neointimal formation in, inhibition by hemin administration (rat), **261,** 302
- Band 4.1/JEF domains
  - sequence analysis: identification of Ras-associating-like domain in N-termini, **259,** 113
- *Bartonella bacilliformis*
  - *IalA* invasion gene, homologs in other invasive bacteria and encoding of di(nucleoside) polyphosphate hydrolase, **256,** 474
- Basement membrane
  - damage by neutrophils, protective effect of peptide from collagen type IV α3 chain (human), **261,** 247
  - deposition by mammary epithelial cells, promotion by chromogranin A, **259,** 563
- Basic fibroblast growth factor, *see* Fibroblast growth factor 2
- Basic helix-loop-helix proteins
  - related hesr-1 cDNAs, identification and expression (*Drosophila,* human, mouse), **260,** 459
- Basophilic leukemia cells
  - Ins(1,4,5)P_3-mediated Ca^{2+} release from ER, inhibition by antibodies to pleckstrin homology domain of PLC-δ1 (rat), **260,** 42
- Basophils
  - secretory IgA-mediated activation, roles of GTP-binding regulatory proteins and PI 3-kinase (human), **264,** 575
- Bax
  - C-terminus, interaction with mitochondria: bax not a membrane addressing/anchoring signal, **260,** 582
  - ε variant, identification and characterization, **254,** 779
  - induction of apoptosis in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
  - oligomeric state, biophysical characterization and complex formation with Bcl-X_L, **255,** 334
- B cells
  - splenic, CD19$^+$, increase by *Staphylococcus aureus* protein A, **256,** 142
  - surface antigen with homology to S100 protein MRP8 (mouse), **263,** 17
  - Syk activation induced by osmotic stress, role of receptor aggregation and reactive oxygen species, **262,** 231
- BCG vaccine
  - activation of human monocytes and downregulation of human MD-1 homologue, **256,** 325
- Bcl-2
  - expression during oxidative stress, regulation in frog neuronal and human endothelial cells, **260,** 522
  - expression in vessels of regular and inflamed tissues and regulation in endothelial cells by IFN-γ *in vitro* (human), **264,** 139
  - gene encoding, *in vitro* transcriptional and translational block by peptide nucleic acid, **264,** 537
  - phosphorylation, association with lymphoblastoid cell apoptosis induced by IgG (human), **264,** 896
  - phosphorylation loop deletant, associated increased resistance of human leukemia cells to paclitaxel-mediated mitochondrial dysfunction and apoptosis, **259,** 67
  - phosphorylation and proteasome-dependent degradation in mitotic-arrested cells after microtubule damage (NIH-OVCAR-3 cells), **262,** 823
  - upregulation in SH-SY5Y neuroblastoma cells differentiated by overexpression of FGF 1, **258,** 745
- Bcl-X_L
  - formation of complex with oligomeric state of Bax, **255,** 334
- BCNU
  - sensitivity of human colon cancer cells to, effect of GRP78 overexpression, **257,** 361
- BCR
  - binding to xeroderma pigmentosum group B protein, **260,** 309
- BDNF, *see* Brain-derived neurotrophic factor
- 1,2,4-Benzenetriol
  - complexation with inorganic and ferritin-released iron *in vitro,* **259,** 169
- Benzodiazepine
  - $GABA_A$ receptor site binding, 6-methyl-3′-bromoflavone binding to, analysis (mouse), **262,** 643
- Benzodiazepine receptor
  - peripheral, agonists of, antiapoptotic activities (U937 cells), **265,** 457
- Benzoic acid I
  - inhibition of cyclin D1–cdk4, **260,** 768
- Benzo[*a*]pyrene
  - genotoxicity, evaluation with reconstituted three-dimensional human skin, **254,** 49
  - oxidation by heterologously expressed *Streptomyces griseus* cytochrome P450 105D1, **263,** 838
- Benzo[*a*]pyrene hydroxylase
  - purification and characterization from *Pleurotus pulmonarius,* **266,** 326
- 3-Benzothiepin
  - derivative TAK-778, promotion of chondrogenesis *in vitro* and *in vivo* (ATDC5 cells, rabbit), **261,** 131
- Benzoyl ATP
  - antagonism of rat and human $P2Y_1$ receptors and platelet aggregation, **256,** 94
- Benzyl alcohol dehydrogenase
  - bacterial, catalysis by, role of allylic or benzylic stabilization, **259,** 220

Benzyl isothiocyanate
  temporal effects in HT29 colon cancer cells: activation of JNK prior to transcription factors AP-1 and NF-κB, **257,** 149
Benzyl mercaptan
  in direct preparation of long polypeptide benzyl thioester substrates of subtiligase, **254,** 147
Benzyl thioesters
  long polypeptides attached to, as substrates of subtiligase, direct preparation with benzyl mercaptan, **254,** 147
Betabellin 16D
  characterization: β-sandwich protein forming narrow fibrils associating into broad ribbons, **264,** 498
Betaine-aldehyde dehydrogenase
  immunolocalization in kidney (pig), **258,** 732
Beta oxidation
  peroxisomal, branched-chain fatty acids, role of carnitine octanoyltransferase (human), **263,** 213
Beta-sandwich proteins
  betabellin 16D forming narrow fibrils associating into broad ribbons, characterization, **264,** 498
Bethlem myopathy
  Italian family with, heterozygous splice site mutation in COL6A1 leading to in-frame deletion of α1(VI) collagen chain in, **258,** 802
Bezafibrate
  effect on uncoupling protein-3 mRNA levels in white adipose tissue and skeletal muscle (rat), **260,** 547
bHLH proteins
  related hesr-1 cDNAs, identification and expression (*Drosophila,* human, mouse), **260,** 459
Bicalutamide
  antagonist action, dependence on androgen receptor phosphorylation/dephosphorylation, **259,** 21
Bicarbonate
  modulation of mast cell histamine release, mechanisms (rat), **260,** 71
Bid
  cleavage by caspase-8 induced by TRAIL with subsequent loss of mitochondrial membrane potential resulting in apoptosis in BJAB cells, **265,** 130
Bile duct carcinoma cells
  lymphokine-activated killer cell toxicity against, enhancement by SEA-scFv bifunctional antibody (human), **256,** 223; *erratum,* **259,** 230
Bilirubin
  unconjugated, inhibition of glutamate uptake by cortical astrocytes *in vitro,* role of concentration and pH (rat), **265,** 67
Binding interference
  mapping of nuclear protein binding to acute phase response element of mouse α_1 acid glycoprotein gene using, **255,** 608
Biotin
  sulfur transfer from biotin synthase to, **254,** 632
Biotin carboxylase
  inhibition by reaction intermediate analog, implications for kinetic mechanism (*Escherichia coli*), **266,** 466
Biotin synthase
  sulfur transfer to biotin from, **254,** 632
BiP/GRP78
  recombinant C-terminal fragment, specificity of peptide-induced depolymerization, **263,** 181
1,3-Bis(2-chloroethyl)-1-nitrosourea
  sensitivity of human colon cancer cells to, effect of GRP78 overexpression, **257,** 361
Bis-*N*-methylacridinium
  chemiluminescent probe for detection of intramitochondrial superoxide radical production (human), **262,** 80
Bisphosphonates
  nitrogen-containing
    as carbocation transition state analogs for isoprenoid biosynthesis, **263,** 754
    farnesyl pyrophosphate synthase as molecular target (bovine brain homogenates), **264,** 108
    inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
Bistratene A
  inhibition of HL-60 cell cytokinesis, mechanism, **260,** 80
Bisulfite
  DNA treatment with, and PCR–SSCP, in analysis of DNA methylation in colorectal cancer with microsatellite instability (human), **262,** 671
Bleomycin
  pulmonary fibrosis induced by, amelioration by *in vivo* gene transfer of PDGF β extracellular domain via HVJ-liposome method (mouse), **265,** 503
Blood–brain barrier
  endothelial cells forming, barrier function, induction by glial cell-derived neurotrophic factor (pig), **261,** 108
Blood flow
  stimulation of NO release in heart, role of stretch-activated ion channels (guinea pig), **261,** 6
Blood pressure, *see also* Hypertension
  regulatory effects of interferon-γ and interleukin-4 (mouse), **254,** 816
Blue light
  signal transduction in coleoptile tips mediated by, role of superoxide, **256,** 293
B lymphoma cells
  TRAIL-induced Bid cleavage by caspase-8 and loss of mitochondrial membrane potential resulting in apoptosis (human), **265,** 130
BMAL1 gene
  splice variants and genomic organization (mouse), **260,** 760
Bmx
  and other Tec protein kinases, pleckstrin homology domain in, structural modeling, **265,** 151
Bombykol
  binding to odorant binding proteins cloned from *Phyllopertha diversa,* **263,** 832
Bombyxin-related peptides
  prothoracicotropic activity (*Samia cynthia ricini*), **266,** 575
Bone
  antiresorptive potencies of N-containing bisphosphonates, correlation with inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
  endothelial cells derived from, cyclooxygenase-2 expression, induction by basic FGF (mouse), **254,** 259
  resorption, *see* Bone resorption
  skeletal growth, effects of estrogen receptor α inactivation in female mouse, **265,** 569
  turnover, acceleration by parathyroid hormone, role of stem cell factor, **255,** 778
Bone cells
  thrombospondin expression (human), **263,** 389
Bone marrow
  Cbfa1-deficient mice with congenital lack of, excessive extramedullary hematopoiesis in, **255,** 352
  GFP-expressing chimera, immature hematopoietic cells from, migration into adult brain parenchyma (mouse), **262,** 610
Bone marrow cells
  CD34$^+$, increase by *Staphylococcus aureus* protein A, **256,** 142
  hedgehog signaling molecule, role in initial stage of fracture repair (mouse), **262,** 443

Bone marrow cells (*continued*)
  zidovudine-induced apoptotic cell death, protection by protein A (mouse), **264,** 601
Bone mineral density
  association with polymorphism of PPARγ gene (human), **260,** 122
Bone morphogenetic protein
  TgBMP2/4 gene homologous to vertebrate BMP2 and BMP4, cloning and expression (*Tripneustes gratilla*), **258,** 457
Bone morphogenetic protein-2
  enhancement of osteoclast formation in presence of IL-1α, role of upregulation of ODF and cyclooxygenase-2 (mouse), **259,** 97
  expression via adenoviral vector in C2C12 myoblasts, induction of differentiation into osteoblast lineage, **262,** 739
  inhibition of MAPK-dependent Elk-1 transactivation and DNA synthesis induced by EGF in mesangial cells, **258,** 490
  osteoblastic responsiveness to, effect of serial passage of MC3T3-E1 cells, **265,** 246
Bone morphogenetic protein-3b
  gene expression, correlation with differentiation in rat calvarial osteoblasts, **256,** 419
Bone morphogenetic protein-4
  gene expression in osteogenic cells, role of E-box motif, **263,** 560
  and noggin, coordinate regulation of progression of chondrogenic differentiation in mouse ATDC5 clonal EC cells, **260,** 240
Bone resorption
  effect of substance P (rabbit), **262,** 418
  osteoclastic, in pit assay, inhibition by cyclosporin A activation of calcineurin-A, **254,** 248
  role of matrix metalloproteinases and lysosomal cysteine proteinases in osteoclasts: modes of action, **258,** 173
Bone turnover
  acceleration by parathyroid hormone, role of stem cell factor, **255,** 778
Boophilus microplus
  pyrethroid-resistant, point mutation in *para*-type sodium channel gene, **261,** 558
Bothrojaracin
  interaction with thrombin anion-binding exosites I and II, allosteric changes of catalytic site induced by, **262,** 819
Bovine serum albumin
  interaction with Schiff base and site-specific photocleavage, **265,** 311
  oxidation by Fe^{3+}/ascorbate system, effect of lysine carboxymethylation, **264,** 207
Bowman–Birk inhibitor
  Dioclea glabra trypsin inhibitor DgTI, primary structure, **261,** 838
Brachyury gene
  differentiation-dependent expression in P19 cells, regulation by PEA3 site flanked by SP1, SP4, and GATA sites, **254,** 542
Bradykinin B_1 receptor
  gene expression in MH-S murine alveolar macrophages, effect of IL-1β, **259,** 476
Brain
  adenylate kinase isozyme distribution and developmental changes (rat), **254,** 618
  adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  Alzheimer's disease-affected
    cytoskeletal abnormalities in, relationship to presenilin-1 carboxyl-terminal fragments, **256,** 512
    expression of PPARγ and cyclooxygenases, **254,** 582
  α_1-antichymotrypsin gene induction (mouse), **263,** 270
  calpastatin isoform expression (mouse), **260,** 339
  carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  centaurin-α_1 expression (human), **262,** 237
  dentatorubral-pallidoluysian atrophy
    abnormal DRPLA protein complex in, pathological ubiquitination (human), **260,** 133
    pathological role of unique characteristics of ubiquitin-bonded complex (human), **264,** 37
  developing
    protocadherin 2C expression in redundant manner with OL-protocadherin (mouse), **260,** 641
    related cDNAs C184L, C184M, and C184S from, encoding of unrelated proteins (mouse), **263,** 737
    role of leptin (mouse), **256,** 600
  developmentally regulated expression of nonmuscle myosin heavy chain IIB inserted isoform (rat), **259,** 29
  endocannabinoids in, regional distribution, implications for biosynthesis and biological function (rat), **256,** 377
  expression of TRAIL and receptors (human), **257,** 454; *erratum,* **259,** 230
  fetal, antisense transcript to *SMAD5* expressed (human), **255,** 668
  frontal cortex, chronic antiderpressant treatment, HSC70 splice variant occurring after, identification (rat), **261,** 541
  glial cells and neurons, expression of homologous cytochrome b_5s (rat), **256,** 330
  glutaredoxin/thioltransferase localization and functional implications during focal ischemia (rat), **258,** 390
  homogenates, farnesyl pyrophosphate synthase as molecular target of nitrogen-containing bisphosphonates (bovine), **264,** 108
  IL1HY1 gene expression (human), **263,** 702
  membranes, nociceptin binding sites (*Rana esculenta*), **260,** 592
  olfactory bulb, expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
  OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  orexin distribution and regulation upon fasting (rat), **256,** 495
  p8 mRNA expression in response to LPS (rat), **260,** 686
  parenchyma, in adult mouse, migration of immature hematopoietic cells from GFP-expressing bone marrow chimera into, **262,** 610
  phospholipase C-δ1 expression (mouse), **261,** 393
  rDLG6 expression (rat), **265,** 462
  Rho-associated kinase distribution (bovine), **263,** 575
  sialidase, molecular cloning and expression (mouse), **258,** 727
  SorCS isolation, identification, and characterization (mouse), **266,** 347
  sulfate transporter identification (rat), **263,** 123
  TBP-interacting protein 120A gene expression (rat), **266,** 123
  TrkB catalytic form immunoreactivity, loss in Alzheimer's disease (human), **264,** 648
Brain cancer cells
  Apollon gene expression (human), **264,** 847
Brain-derived neurotrophic factor
  expressed in *E. coli,* viability and plasmid stability of vectors encoding, effect of selection marker (human), **258,** 29
  promoter, silencer-mediated repression in primary glial cells and non-mediated activation in neurons (rat), **261,** 233
Brain natriuretic peptide, *see also* Natriuretic peptide system
  pro-protein, amino-terminal region oligomerization via leucine zipper-like coiled-coil motifs, **255,** 495
Brain-specific membrane-anchored protein
  gene identification and localization on human chromosome 19p12, **264,** 55
Brain tumors
  expression of TRAIL and receptors (human), **257,** 454; *erratum,* **259,** 230
  hnRNP A2 and hnRNP L, binding to 3′UTR of glucose transporter 1 mRNA and formation of complex *in vivo* (human), **261,** 646
BRAK
  cloning: divergent CXC chemokine preferentially expressed in normal vs malignant cells (human), **255,** 703

Branched-chain amino acid transaminase
  pathophysiology, **266,** 647
Branched-chain fatty acids
  metabolism, role of very-long-chain acyl-CoA synthetase, **257,** 615
  peroxisomal β-oxidation, role of carnitine octanoyltransferase (human), **263,** 213
BRCA1
  casein kinase 2 binding to and phosphorylation of, **260,** 658
  gene encoding, prolactin-dependent upregulation in human breast cancer cell lines, **258,** 284
BRCA2
  gene encoding, transcriptional silencer upstream of, identification and characterization (human), **265,** 285
Breast cancer
  adipose-free breast tumors, leptin identification, **259,** 695
  and fibroadenoma, alteration of hMSH2 and DNA polymerase β genes (human), **259,** 429
Breast cancer cells
  Akt/protein kinase B, stimulatory effect of heregulin (HBL-100, MCF-7, MDA-231, T47D cells), **261,** 897
  apoptosis at low taxol concentration and necrosis at high taxol concentrations, **263,** 398
  cell surface binding and nuclear translocation of TIMP-1 fusion protein (MCF-7 cells), **257,** 494
  c-erbB-4/HER4 expression, effects of retinoids, vitamin D_3 and dexamethasone (T47D cells), **258,** 559
  c-met association with E-cadherin and catenins, **261,** 406
  effects of GAP31 and MAP30 proteolytic fragments (MDA-MB-231 cells), **262,** 615
  functional Fas ligand expression, induction by TNF-α and IFN-γ (MCF7 cells), **264,** 813
  growth inhibition by four inhibitors of cyclin-dependent kinases (MCF-7, ZR-75-1 cells), **260,** 768
  3-hydroxy-3-methylglutaryl-CoA reductase expression in response to EGF via ErbB-2 pathway (MCF-7, MDA-MB-468, SKBR-3 cells), **260,** 699
  immediate and long-term estradiol treatment, differential membrane antioxidant effects (MCF-7 cells), **260,** 410
  interleukin-6 gene repression, association with hypermethylation (MCF-7, MDA-MB-231 cells), **258,** 644
  leptin identification in, **259,** 695
  mitochondrial content, relationship to δ-aminolevulinic acid-induced protoporphyrin IX levels *in vitro* (MCF-7 cells), **265,** 315
  parathyroid hormone-related protein suppression by calcitonin, **265,** 260
  PC cell-derived growth factor expression, stimulation by estradiol, **256,** 204
  prolactin-dependent *BRCA1* gene upregulation (MCF-7, T47D cells), **258,** 284
  proliferation and HSP70 expression, effects of repetitive pulsed magnetic stimulation (MCF-7 cells), **261,** 689
  retinoic acid-resistant, growth and apoptosis, effects of 4-hydroxyphenylretinamide, **254,** 636
Breast cancer susceptibility tumor-suppressor protein
  BRCA2 gene for, transcriptional silencer upstream of, identification and characterization (human), **265,** 285
Breast milk
  genotoxicity of extracts and detection of DNA damage in exfoliated cells (human), **257,** 319; *erratum,* **259,** 494
Brevinase
  from *Agkistrodon blomhoffii brevicaudus* venom, purification and characterization: heterogeneous two-chain fibrinolytic enzyme, **260,** 665
BRL49653
  effect on uncoupling protein-2 mRNA expression in adipocytes, **256,** 138
Bromopalmitate
  effect on uncoupling protein-2 mRNA expression in adipocytes, **256,** 138
Bronchial epithelial cells
  expression of caveolin 1 gene (human), **255,** 580
  release of soluble ICAM-1 (human), **260,** 734
Bronchoalveolar secretions
  preterm infants, bleomycin-detectable free iron in, **257,** 218
Bryostatin 1
  and antitubulin agents, modulation of cIAP-1, effect on apoptosis of early pre-B acute lymphoblastic leukemia Reh cells, **266,** 76
Btk gene
  promoter, synergistic activation by transcription factors Sp1/3 and PU.1, **259,** 364
BUB1 kinase
  phosphorylation of human MAD1 *in vitro,* **257,** 589
BUB3 gene
  chromosomal mapping (human), **257,** 589
Buccal mucosa
  ulcer healing, interplay of ET-1, IL-4, and TNF-α during, effect of chronic alcohol ingestion (rat), **257,** 373
Burkholderia sp.
  strain RP007 degrading PAHs, conserved and hybrid *meta*-cleavage operons in, sequence and gene order, **262,** 308
Burkitt's lymphoma cells
  MDM2-overexpressing BL2 cells, p53 activation through phosphorylation, **264,** 860
  switch between latency and replication of Epstein–Barr virus in, potentiation by cocaine (Raji cells), **264,** 33
p-Butoxyphenol
  mouse ribonucleotide reductase R2 protein treated with, tyrosyl radical regeneration, **258,** 322
tert-Butylhydroquinone
  induction of Cu/Zn-superoxide dismutase gene, xenobiotic responsive element for, analysis (rat), **256,** 133
1,2-(4′-*n*-Butylphenyl)azo-4′(γ-phenylbutyroyl))-glycero-3-phosphocholine
  sensitized liposomes, fast laser-induced solute release, **262,** 406
Butyric acid
  induced apoptosis of colorectal carcinoma cells, redistribution of activated caspase-3 to nucleus during, **260,** 775
Butyrolactone I
  neuronal differentiation of Neuro 2a cells by, **256,** 372
Bystander effect
  in glioma gene therapy with HSV-TK/GCV system, tentative mechanism, **259,** 455

C

^{13}C
  hyperfine-shifted resonances in Fe_2S_2 ferredoxins, assignment strategy, **258,** 54
C5a receptor
  agonist-induced phosphorylation in COS-7 cells, effects of overexpression of wild-type and catalytically inactive GRK2 and GRK6, **259,** 224
Ca^{2+}-ATPase
  Ca^{2+}/CaM-dependent phosphorylation uncoupled from phospholamban, stimulation of Ca^{2+} pumping in cardiac SR (rabbit), **258,** 66
  extraocular muscle calcium homeostasis development (rat), **257,** 678
  plasma membrane
    gene point mutation, as cause of deafness in *Wriggle Mouse Sagami,* **261,** 773
    isoform 1, combined SSCP and heteroduplex analysis in patients with essential hypertension, **261,** 515
  sarcoplasmic reticulum, serine phosphorylation in intact beating rabbit heart, **264,** 241

Ca^{2+}/calmodulin-dependent protein kinase II
  gene expression in *Drosophila* CNS throughout development, **260,** 707
  linker domain localization, **263,** 657
  role in calcium channel activation by cAMP in STC-1 cells, **254,** 699
Cachexia
  cancer and AIDS-associated, 24-kDA proteoglycan in urine from, isolation, characterization and distribution (human), **254,** 642
Cadherin
  cell–cell adhesion mediated by, Cdc42, Rac1, and IQGAP1 as molecular switches for, **262,** 1
DE-Cadherin
  activation of cytoskeleton assembly pathways in *Drosophila* S2 cells by mechanisms independent of neuroglian, **265,** 372
E-Cadherin
  association with c-met in tumor cells (human), **261,** 406
VE-Cadherin
  complex with catenin, expression in human vascular endothelial cells, effect of γ-linolenic acid, **258,** 113
Cadmium
  c-*fos* induction by, mediation by heat shock element in c-*fos* promoter, **254,** 566
cafA gene
  E. coli, encoding of RNase G involved in processing of 5′ end of 16S rRNA, **259,** 483
Caffeine
  inhibition of phosphatidylserine synthesis by Jurkat T cells with bypass of CD3/TCR-induced protein-tyrosine kinases and calcium signals, **266,** 497
Caffeine (1,3,7-trimethylxanthine) oxidase
  purification and characterization, **263,** 460
cag pathogenicity island
  gastric MKN45 cells with, β-defensin-2 mRNA expression, induction by *Helicobacter pylori,* **263,** 770
Calcein
  cellular retention, and multidrug resistance pump inhibition, in human leukemic lymphoblasts, effects of MDR pump inhibitors, **257,** 410
Calcicludine
  and DTX-I, structure–activity relationships (rat brain), **262,** 319
Calcification
  bovine microvascular pericytes, acceleration by AGEs, **258,** 353
Calcineurin
  augmentation *in vitro* by HSP70 and HSP90 by calmodulin-dependent and -independent mechanisms, **260,** 619
Calcineurin-A
  α and β isoforms in osteoclast, molecular and functional evidence, **254,** 248
Calcitonin
  suppression of parathyroid hormone-related protein in breast cancer cells, **265,** 260
Calcitriol
  and analog MC1288, binding by human vitamin D_3 receptor, role of putative helices 4 and 5 of VDR, **264,** 478
Calcium
  association and dissociation of calcium-binding domains of calpain by, **257,** 63
  ATP-evoked mobilization in C6 glioma cells, effects of sphingosine and phorbol ester, **260,** 614
  binding sites for, generation by protein aging via carboxymethylation of lysines, **260,** 332
  Ca^{2+}/calmodulin, induction of RalA dissociation from synaptic membranes (rat), **263,** 765
  in calvarial organ culture, direct current-stimulated levels, effects of faradic products (mouse), **264,** 657
  capacity of low-calcium diet to induce renal vitamin D 1a-hydroxylase, decrease in adult rats, **255,** 731
  CD3/TCR-induced signals, bypass by caffeine in inhibition of phosphatidylserine synthesis by Jurkat T cells, **266,** 497
  cholecystokinin-evoked waves, in mouse pancreatic acinar cells, modulation by activation of $cPLA_2$, PLD, and PKC, **261,** 726
  contractile apparatus sensitivity to, in permeabilized renal artery, effects of smooth muscle myosin phosphatase small subunit (pig), **254,** 158
  cyclic ADP-ribose-dependent release, modulation by free $[Ca^{2+}]$ in scallop sarcoplasmic reticulum, **257,** 57
  cytoplasmic free, spontaneous and stimulated transients in human osteoblast-like cells and regulation, **263,** 206
  cytosolic
    control of loading dependence of inositol 1,4,5-trisphosphate-induced Ca^{2+} release (A7r5 cells), **264,** 967
    effects on membrane voltage and conductance of cultured mesangial cells from stroke-prone spontaneously hypertensive and WKY rats, **256,** 273
    increase in endothelial cells by calmodulin antagonists (porcine aorta), **265,** 697
    regulation of epithelial calcium channel ECaC, **261,** 488
    response to parathyroid hormone fragments in ROS 17/2 and SaOS-2 cells, **266,** 448
  dynamics in cultured cardiac myocytes, effects of antisense oligonucleotides to cardiac Na^+/Ca^+ exchanger (rat), **260,** 117
  effect on secondary structure of nodulation protein NodO (*Rhizobium leguminosarum* biovar *viciae*), **263,** 516
  EGF-dependent influx, inhibition by large annexin VI splice form (A431 cells), **260,** 540
  EGFR-operated signaling, impairment by chronic ethanol consumption via disruption of EGFR–PLCγ1 complexation (rat), **257,** 89
  and excitotoxin-stimulated ROS production in cerebellar granule cells, **256,** 320
  extracellular levels
    effect on osteoclast differentiation *in vitro* (mouse), **265,** 484
    high, inhibition of osteoclast-like cell formation by acting on calcium-sensing receptor in precursor cells (mouse), **261,** 144
  fluxes, activation, implications of sphingosylphosphorylcholine activation of G_q, G_{i-2}, and G_{i-3} in thyroid FRTL-5 cells, **258,** 812
  homeostasis, development in extraocular muscle, and visuomotor system maturation (rat), **257,** 678
  induced $p56^{Lck}$ phosphorylation in human T cells via calmodulin-dependent kinase, **259,** 283
  influx into *Dictyostelium,* role in regulation of MAP kinase ERK2, **260,** 504
  influx into T cells, association with annexin V inhibition of apoptosis (human), **265,** 709
  initiation sites, evoked by muscarinic receptor stimulation in exocrine acinar cells, millisecond analysis, **259,** 656
  inositol 1,4,5-trisphosphate-mediated release from endoplasmic reticulum, inhibition by antibodies to pleckstrin homology domain of PLC-δ1 (RBL cells), **260,** 42
  intracellular
    free, effect of substance P (rabbit), **262,** 418
    increase in proliferating smooth muscle cells, alteration (SVSC cells), **264,** 774
    mobilization in NK cells, effect of differential utilization of cyclic ADP-ribose pathway by chemokines, **262,** 467
    release, role in glibenclamide-induced apoptosis in HepG2 cells, **261,** 682
    response to $P2Y_2$ receptor agonist UTP in rat VSMC, **258,** 648
    role in nitric-oxide synthase mRNA induction by shear stress (bovine aorta), **254,** 231; *erratum,* **256,** 255

    - and ROS, elevation, role in induction of heparin-binding EGF-like growth factor in vascular endothelial cells and SMC, **259,** 50
  - intracellular transients
    - glucose-induced, in pancreatic β-cells, synchronization by diffusible factor, **254,** 436
    - stretch-activated, regulation by actin filaments (human), **261,** 419
    - in ventricular myocytes, ethanol-induced depression of, augmentation by hypertension (rat), **261,** 202
  - KCl-induced influx in GH3 pituitary cells, biphasic increase induced by cyclosporin A, **254,** 169
  - mitochondrial transients, species dependence during excitation–contraction coupling in cardiomyocytes (guinea pig, rat), **263,** 554
  - mobilization
    - in platelets caused by ADP or thrombin receptor agonist peptide, synergistic effect of thrombopoietin, **263,** 230
    - in rat colonic crypt cells, associated thromboxane A$_2$ receptor, **258,** 708
    - secretory phospholipase A$_2$-induced, in 1321N1 human astrocytoma cells, mechanism, **260,** 99
  - plasma membrane activity pumping, enhancement, senescence marker protein-30 rescue of cell death by, **254,** 1
  - receptor-operated influx and refilling in pancreatic acinar cells (rat), **256,** 579
  - regulation of transcription of calcium transporters and channels in developing neurons, **266,** 624
  - role in JNK activation and DNA fragmentation in H9c2 cells (rat), **262,** 350
  - role in pre- and post-mitochondrial events in tributyltin-induced T-cell apoptosis (Jurkat cells), **266,** 460
  - role in tyrosine phosphorylation stimulation by progesterone and 11-OH derivatives in human sperm, **255,** 23
  - signaling
    - in histamine and sulfidoleukotriene release in human cultured mast cells, **257,** 895; *erratum,* **259,** 503
    - inhibition in UV-irradiated fibroblasts, role of tyrosine phosphorylation and protein kinase C (V79 cells), **261,** 504
  - store, depletion, enhancement of NMDA response in cultured human astrocytes, **259,** 661

Calcium-binding domains
  - calpain, association and dissociation by Ca^{2+} (rabbit), **257,** 63

Calcium-binding protein
  - histidine-rich, existence as multimer in lumen of sarcoplasmic reticulum (rabbit), **263,** 667
  - S100A4, extracellular role in periodontal ligament (bovine), **255,** 416

Calcium-binding sites
  - EF-hand, of heterologously overexpressed human NEFA, **260,** 1

Calcium channels
  - activation by cAMP in STC-1 cells, dependence on Ca^{2+}/calmodulin-dependent protein kinase II, **254,** 699
  - as calcicludine target (rat brain), **262,** 319
  - ω-conotoxin MVIID blocking, solution structure, determination by 2D ^{1}H NMR, **254,** 32
  - epithelial, ECaC, activation by hyperpolarization and regulation by cytosolic calcium, **261,** 488
  - P/Q-type, α_{1A} subunit gene, isolation and functional characterization of 5′-upstream region (mouse), **260,** 54
  - transcription in developing neurons, control by calcium, **266,** 624

Calcium homeostasis
  - skeletal muscle, supramolecular triad complexes of, integral role of 90-kDa SR junctional protein (rabbit), **261,** 603

Calcium release channel
  - ryanodine receptor
    - activation from skeletal muscle by fatty acyl CoA–acyl CoA binding protein complex, inhibition by rapamycin, **264,** 409
    - in skeletal muscle sarcoplasmic reticulum, inhibition by ADP/ATP translocase inhibitor atractyloside (rabbit), **258,** 247

Calcium-sensing receptor
  - expression in pancreatic islet B-cells (rat), **264,** 615
  - in osteoclast precursor cells, role in inhibition of osteoclast-like cell formation by high extracellular Ca^{2+} (mouse), **261,** 144

Calcium transporters
  - transcription in developing neurons, control by calcium, **266,** 624

Calmidazolium
  - effect on cytosolic Ca^{2+} concentration in endothelial cells (porcine aorta), **265,** 697

Calmodulin
  - activation of Pur α binding to single-stranded purine-rich DNA elements, **255,** 406
  - antagonists of, effect on cytosolic Ca^{2+} concentration in endothelial cells (porcine aorta), **265,** 697
  - Ca^{2+}/CaM, induction of RalA dissociation from synaptic membranes (rat), **263,** 765
  - and calcineurin activity increase *in vitro* by HSP70 and HSP90: CaM-dependent and -independent mechanisms, **260,** 619
  - phosphorylation by protein kinase CK2, structural features, **256,** 442

Calmodulin-dependent kinase
  - calcium-induced p56^{Lck} phosphorylation in human T cells via, **259,** 283

Calmodulin-dependent protein kinase II
  - regulation of c-*fos* induction by hemin in human cells, **260,** 289

Calnexin
  - and α-glucosidase II, role in tyrosinase folding and copper loading *in vivo,* **261,** 720

Calpain
  - calcium-binding domains, association and dissociation by Ca^{2+} (rabbit), **257,** 63
  - comparison to procaspase expression in SCLC and NSCLC (human), **262,** 381
  - isoenzyme CAPN 8, isolation from mouse, **260,** 671
  - procaspase-3 and poly(ADP-ribose) polymerase as substrates (human neuroblastoma SH-SY5Y cells), **263,** 94

m-Calpain
  - mRNA expression in fibroblastic synoviocytes from patients with osteoarthritis and rheumatoid arthritis, downregulation by inflammatory cytokines, **266,** 341

Calpastatin
  - isoform structure, implications of species-common and species-specific alternative splicing (mouse), **260,** 339

Calpromotin
  - properties in solution: identity with thiol-specific antioxidant protein (human), **262,** 127

Calreticulin
  - canine cardiac, putative phosphate-containing peptide in, **259,** 233

Calvarial organ culture
  - direct current-stimulated calcium levels, effects of faradic products (mouse), **264,** 657

Calyculin A
  - effects on HSF1 activation upon heat shock and during post-heat-shock recovery (murine embryonic fibroblasts), **264,** 352

cAMP, *see* Cyclic AMP

cAMP-dependent protein kinase, *see* Protein kinase A

Canalicular multispecific organic anion transporter
  - CMOAT/MRP2, gene expression, Kupffer cell-mediated downregulation (rat liver), **255,** 143

Cancer
  - apoptosis role (human), **266,** 699
  - cachectic patients, 24-kDA proteoglycan in urine from, isolation, characterization, and distribution, **254,** 642

Cancer (*continued*)
- chemotherapy using tumor vascular targeting with tumor-tissue endothelium-specific monoclonal antibody (mouse, rat), **260,** 346
- p53-induced apoptosis as safeguard against, **265,** 1

Cancer cells
- expression of ICAM-1, effect of nitric oxide (human), **257,** 395

Candida albicans
- clinical strains, fluconazole resistance, induction by G464S amino acid substitution in sterol 14α-demethylase, **262,** 174

Candida maltosa
- growth inhibition, upregulation of promoter for ribosomal protein L41 gene in cycloheximide-resistant ribosomes, **258,** 611

Cannabinoid receptors
- CB1, binding by unsaturated long-chain *N*-acyl-vanillyl-amides, **262,** 275

Cannabinoids
- endogenous, brain regional distribution (rat), **256,** 377

Capacitation
- induction of tyrosine phosphorylation of proteins in sperm plasma membrane (boar), **262,** 787

CAPN 8
- isolation: mouse calpain isoenzyme, **260,** 671

Capping
- FcγRII in permeabilized U937 cells, engagement of spectrin and actin in, **259,** 287
- induction by crosslinking of plasmalemmal cholesterol in lymphocytes (mouse), **260,** 516

Capsid
- adeno-associated virus, role of capsid proteins, **266,** 371

Cap site element
- role in tissue-restricted expression of glycoprotein hormone α-subunit gene, **260,** 752

Capsular tissue
- coincubation with cartilage, generation of soluble aggrecanase (bovine), **255,** 686

Carbachol
- activation of IκB-kinase in isolated canine gastric parietal cells, **261,** 877

Carbocations
- transition state analogs for isoprenoid biosynthesis, nitrogen-containing bisphosphonates as, **263,** 754

Carbohydrate branching
- β-1,6 branching of N-linked carbohydrate, correlation with K-Ras in lectin-resistant colon carcinoma cells, **259,** 588

Carbohydrate response element-binding protein
- rat L-type pyruvate kinase gene promoter, characterization and purification, **257,** 44

Carbohydrates
- HNK-1 epitope, second glucuronosyltransferase involved in biosynthesis of, molecular cloning and expression (rat brain), **255,** 182
- proteins with affinity for, phage display cDNA cloning, **255,** 194

Carbonic anhydrase
- expression in pancreatic cancer cells, induction by lipoxygenase inhibition (human), **266,** 392

Carbon monoxide
- ligation kinetics with soluble guanylate cyclase, effect of YC-1, **254,** 188
- transcriptional activator CooA sensing, recognition of target DNA and transcription activation, **261,** 270

Carbon tetrachloride
- dehalogenation, extracellular agent from *Pseudomonas stutzeri* strain KC for, identification as pyridine-2,6-bis(thiocarboxylate), **261,** 562; *erratum,* **265,** 770
- hepatotoxicity
  - associated expression of osteopontin in Kupffer cells and hepatic macrophages and stellate cells (rat), **256,** 527
  - oxidative injury-induced cyclooxygenase activation in, analysis (rat), **254,** 764

Carbonyl modification
- proteins in aging in nematode: vitellogenin-6 as major carbonylated protein, **264,** 580

Carbonyl reductase-like 20β-hydroxysteroid dehydrogenase
- two cDNAs, cloning and expression in ovarian follicles (rainbow trout), **255,** 123

N^2-(1-Carboxyethyl)deoxyguanosine
- induction of single-strand breaks and augmentation of mutation frequencies, **264,** 544

Carboxyl methyltransferase
- modifying G proteins, identification as metalloenzyme (rat), **261,** 790

Carboxymethylation
- lysine
  - effect on BSA oxidation by Fe^{3+}/ascorbate system, **264,** 207
  - protein aging by, generation of sites for divalent metal and redox active copper binding, **260,** 332

N^ϵ-(Carboxymethyl)lysine
- levels in membrane proteins of human erythrocytes during aging in circulation, **258,** 123
- lysine conversion to, increased susceptibility of proteins to metal-catalyzed oxidation due to, **264,** 207

Carboxypeptidase A
- synergistic inhibition by Zn^{2+} and imidazole, **257,** 239

Carboxypeptidase M
- GPI-anchored, release by PI-PLC, upregulation of enzyme synthesis (MDCK cells), **258,** 204

Carboxy-terminal domain
- PPARγ2 mutant lacking COOH-terminal 16 amino acids, inhibition of adipogenesis in 3T3-L1 cells, **264,** 93
- recombinant, of BiP/GRP78, specificity of peptide-induced depolymerization, **263,** 181
- RNA polymerase II, role in activity of general transcription factor IIE in yeast, **261,** 734
- RNA polymerase II mediator CTD complex, subunit Med8, direct binding to regulatory elements of yeast *SUC2* and *HXK2* genes, **254,** 345
- SDF-1, attachment to N-terminus, enhancement of biological activity of N-terminal peptide, **264,** 42

Carcinoembryonic antigen
- production in lectin-resistant colon carcinoma cells, correlation with K-Ras, **259,** 588

Carcinogenesis
- breast, implication of presence of leptin in breast cell lines and breast tumors, **259,** 695
- candidate genes, identification by arbitrarily primed PCR fingerprinting, **258,** 271
- chemically induced, role of cytochrome P450, **266,** 690
- mechanistic studies by arsenic disruption of p53–mdm2 cellular levels, **263,** 446
- reconstituted three-dimensional human skin as *in vitro* model for, **254,** 49
- relevance of features of dendritic cells in IFN-γ transgenic mice, **259,** 294
- significance of aberrations in DNA demethylase MBD2 (human), **264,** 962
- TBP-interacting protein 120A gene expression during, analysis (F9, HL60, and P19 cells), **266,** 123
- toluene, analysis: oxidative DNA damage by minor toluene metabolites, **261,** 478

Cardiolipin
- and cytochrome *c,* molecular interaction between, loss due to lipid peroxidation, **264,** 343

Cardiomyocytes
- adrenomedullin and HIF-1 gene expression, regulation by hypoxia (HL-1 cells), **265,** 382

  - calcium dynamics *in vitro,* effects of antisense oligonucleotides to cardiac Na$^+$/Ca$^+$ exchanger (rat), **260,** 117
  - cardiotrophin-1 expression, induction by hypoxic stress (mouse), **264,** 436
  - excitation–contraction coupling, species dependence of mitochondrial calcium transients (guinea pig, rat), **263,** 554
  - focal adhesion kinase activation and subcellular translocation *in vitro,* induction by hypoxia (rat), **262,** 290
  - gene product identification after *in vivo* transfection in rat heart using Sendai virus-coated proteoliposomes, **259,** 408
  - MAPK and focal adhesion kinase activation by pulsatile stretch *in vitro* (rat), **259,** 8
  - necrosis at embryonic stage, induction by targeted disruption of TREB5 gene (mouse), **261,** 350
  - nitric-oxide synthase activation by mechanical activity, Ca^{2+}-independent alteration of contractile activity by, role of troponin I phosphorylation (rat), **256,** 398
  - vascular endothelial growth factor secretion, stimulation by pulsatile stretch (rat), **254,** 462
  - ventricular
    - cell shortening and intracellular Ca^{2+} transients, ethanol-induced depression, augmentation by hypertension (rat), **261,** 202
    - DIDS-sensitive anion-dependent Mg^{2+} efflux pathway (rat), **264,** 334
- Cardiomyopathy
  - alcoholic, deleted mitochondrial DNA in heart muscle from, detection by long-extension PCR, compromise by technical artifacts (human), **254,** 507
  - dilated, enhanced expression and autoimmunity of recombination signal binding protein-jκ in, analysis (human), **266,** 432
  - nonfamilial idiopathic dilated, in Japanese, association with polymorphisms of *HLA-DRB1* and *SOD2* genes, **261,** 332
  - related enhancement of GTP binding protein-coupled receptor kinase 5 expression (hamster), **262,** 206
  - titin gene structure (human), **262,** 411
- Cardiotrophin-1
  - expression in cardiac myocytes, induction by hypoxic stress (mouse), **264,** 436
  - immunoluminometric assay: detection in human plasma and increase in heart failure, **261,** 567
- Cardiotrophin-like cytokine
  - identification by computational EST database analysis, **262,** 132
- Carnitine
  - uptake, restoration in carnitine transporter-defective cell lines by OCTN2–green fluorescent protein construct (human), **264,** 909
- Carnitine octanoyltransferase
  - molecular cloning and expression (human), **263,** 213
- Carnitine palmitoyltransferase I
  - complete inhibition by malonyl CoA: confirmation of intactness of liver mitochondria (rat), **258,** 778
- Carnitine transporter
  - OCTN2, mutations in systemic primary carnitine deficiency (human), **261,** 484
- Carotid artery
  - balloon injury, neointimal formation in, inhibition by hemin administration (rat), **261,** 302
  - periadventitial cuff-induced injury, in apoE null mice, VCAM-1 expression and neointima formation after, reduction by reconstituted HDL containing human apoA-1, **264,** 465
- Cartilage
  - articular
    - expression of ADAMTS homologues (human), **260,** 318
    - superficial zone protein in, homology with megakaryocyte stimulating factor precursor and role in growth, cytoprotection, and lubrication (bovine, human), **254,** 535
  - branchial, elastin-like protein matrix of, crosslinking by lysyl pyridinoline (lamprey), **261,** 635
  - coincubation of bovine synovial or capsular tissue with, generation of soluble aggrecanase by, **255,** 686
- Cartilage-derived antitumor factor
  - review, **259,** 1
- Cartilage-derived growth factor
  - review, **259,** 1
- Casein kinase II, *see* Protein kinase CK2
- Caspase
  - activation
    - in apoptosis of NIH/3T3 cells overexpressing Bad, **264,** 724
    - by cytochrome *c* translocation associated with photodynamic therapy-induced apoptosis in lymphoma cells, **255,** 673
    - by Fas, role of cytochrome *c* (Jurkat, SKW6 cells), **261,** 71
    - after mitochondrial depolarization, prevention by 4b,5,9b,10-tetrahydroindeno[1,2-*b*]indole: inhibition of apoptosis (Jurkat cells), **264,** 622
    - by TNF in WEHI-164 cells, cell cycle-dependent patterns associated with apoptosis or necrosis, **261,** 385
  - Ced-4 killing of budding yeast independent of, **260,** 799
  - cleavage, role in synergistic binding of multiple domains of DFF45 to DFF40, **264,** 181
  - comparison in apoptosis and necrosis in HepG2 cells, **255,** 6
  - ICE caspase activation, role in TNF-α-induced apoptosis in IEC-6 cells: necrosis upon complete inhibition of caspase cascade, **260,** 159
  - initiator and effector, sequential activation by expression of extended polyglutamine, **257,** 724
  - proteolytic activity, resistance of liver poly(ADP-ribose) polymerase, **256,** 436
- Caspase-2
  - expression changes in Alzheimer's disease, comparison with development and aging (human, rat), **256,** 381
- Caspase-3
  - activated, redistribution to nucleus during butyric acid-induced apoptosis of colorectal cancer cells, **260,** 775
  - activation in HL-60 cells exposed to H_2O_2, **255,** 477
  - apoptotic pathways, activation in skeletal muscle fibers in laminin α2-deficient mice, **260,** 139
  - downregulation by sulglycotide in gastric mucosal inflammatory responses to *Helicobacter pylori* LPS (rat), **261,** 15
  - expression changes in Alzheimer's disease, comparison with development and aging (human, rat), **256,** 381
  - and related caspases, proteolytic activity, resistance of liver poly(ADP-ribose) polymerase, **256,** 436
- Caspase-8
  - cleavage of Bid induced by TRAIL with subsequent loss of mitochondrial membrane potential resulting in apoptosis in BJAB cells, **265,** 130
- Caspase-9
  - human, Akt phosphorylation site, absence in mouse caspase-9, **264,** 550
- Catalase
  - altered levels in progeria skin fibroblasts, **257,** 163
  - induction in ursodeoxycholic acid protection of hepatocyte against oxidative injury, **263,** 537
- Catalytic rate
  - Cu,Zn superoxide dismutase: engineering of superefficient enzyme, **256,** 425
- Catechin
  - inhibition of glucose uptake in U937 cells, **260,** 568
- Catecholamines
  - secretion and synthesis in cultured adrenal medullary chromaffin cells, stimulation by leptin (pig), **261,** 426

β-Catenin
  binding to axin, modulation by glycogen synthase kinase 3β site for phosphorylation of axin, **266,** 28
  high-affinity binding to T-cell factor 4, Tcf4 residues involved in, identification, **256,** 584
  homolog *armadillo* in *Drosophila* S2 cells, distribution, effects of neuroglian and DE-cadherin, **265,** 372
γ-Catenin
  expression, link to ras signaling (human), **260,** 371
Catenins
  association with c-met in tumor cells (human), **261,** 406
  VE-cadherin/catenin complex expression in HUVEC, inhibition by γ-linolenic acid and impact on angiogenesis, **258,** 113
Cathepsin B
  cleavage enzyme for sterol regulatory element binding protein homologous to, in hamster liver microsomes, **258,** 542
Cathepsin C
  competitive inhibition by guanidinium ions, and reexamination of substrate inhibition, **258,** 6
Cathepsin D
  levels in fetal L132 lung cells, effects of experimental induction of advanced glycation end products, **261,** 175
Cathepsin E
  salt-bridge interactions of propeptide and enzyme segment, molecular modeling study (human), **264,** 825
Cathepsin F
  cDNA sequence: predicted cystatin domain at N-terminus of zymogen (human), **257,** 313
  genomic organization: similarity to cathepsin W (human), **259,** 401
Cathepsin G
  neutrophil, inhibition by human and murine secretory leukocyte protease inhibitor (mouse), **254,** 614
Cathepsin L inhibitors
  mechanism, analysis based on crystal structure of papain–CLIK148 complex, **266,** 411
Cathepsin L-type protease
  lysosomal, cleavage of retinoid X receptor α, **254,** 388
Cationic liposome
  suitable for gene transfer into pregnant animals, evaluation, **258,** 358
Caveolae
  biogenesis during cell transdifferentiation in lung alveolar epithelial primary cultures (rat), **262,** 744
  CD39 localization (COS-7, HUVEC cells), **262,** 596
  estrogen receptor α localized in, mediation of nongenomic stimulation of NO release by estrogen in BAECs, **263,** 257
  increased number in Duchenne muscular dystrophy, **261,** 547
  spatial organization of EGF receptor transmodulation by PDGF (human fibroblasts), **261,** 695
Caveolin
  expression and localization in vascular smooth muscle cells, regulation by serum and heparin (human), **265,** 722
Caveolin-1
  expression during cell transdifferentiation in lung alveolar epithelial primary cultures (rat), **262,** 744
  gene expression, reduction in lung carcinoma cell lines, **255,** 580
  identification as fatty acid binding protein, **255,** 34
  nuclear translocation in vascular endothelial cells, induction by VEGF, **256,** 192
Caveolin-3
  overexpression in Duchenne muscular dystrophy, **261,** 547
cbbQ genes
  located downstream of form I and form II RubisCO genes, effects on RubisCO activities (*Hydrogenovibrio marinus*), **265,** 177
Cbfa1
  mice deficient in, with congenital lack of bone marrow, excessive extramedullary hematopoiesis in, **255,** 352
CCAAT enhancer binding protein
  C/EBPδ, transcriptional regulation in G_0 growth-arrested mammary epithelial cells (mouse), **262,** 696
  and glucocorticoid receptor, binding to acute phase response element of mouse α_1 acid glycoprotein gene, interference mapping, **255,** 608
  related site, direction of negative regulation of GST-Ya gene by antioxidant/electrophile response element, **265,** 18
  role in adipocyte differentiation (3T3-L1 cells), **266,** 677
  role in attenuation of haptoglobin gene expression by TGF-β (rat IEC-6 cells), **259,** 544
CCK_A receptor
  gene expression, correlation with DNA demethylation during postnatal development of rat pancreas, **264,** 29
  pancreatic expression and localization, ontogeny and species differences (human, mouse, pig, rat), **260,** 820
CCR-7
  stably expressed in HEK-293 cells, pharmacological and signaling analysis, **263,** 685
CD3
  calcium signals and protein-tyrosine kinases induced by CD3/TCR, bypass by caffeine in inhibition of phosphatidylserine synthesis by Jurkat T cells, **266,** 497
CD4
  anchored in cell membrane, conformation, changes induced by soluble recombinant HIV envelope glycoprotein gp120, **265,** 428
  role in HIV-1 entry: direct visualization of viral entry, **258,** 695
  transduced human glioma NP-2 cell line, based system for determination of HIV coreceptor usage, **258,** 313
CD9
  murine platelet, monoclonal antibodies to, preparation from hamster–mouse interspecies hybridomas, **262,** 167
CD11a
  mRNA and protein induction in tissue macrophages by IFN-γ, LPS and TNF-α, role of Na^+/H^+ exchange and PKC, **257,** 635
CD11c
  I-domain, binding of fibrinogen, **264,** 630
CD14
  expression, role in inhibition of mitochondrial function in HL-60 cells, **263,** 294
CD16
  shedding from human neutrophils, induction by actin polymerization, **255,** 568
CD28
  interaction with CD80/CD86, role in apoptosis induction in *Herpesvirus saimiri*-immortalized T lymphocytes, **263,** 352
  mRNA, identification of three alternatively spliced variants (human), **259,** 34
CD30 ligand
  expression on activated T cells (mouse), **256,** 519
CD31
  dimerization and N-glycosylation, **261,** 283
CD34+ progenitors
  erythroid differentiation, role of erythropoietin receptor tyrosine residues (human), **256,** 685
CD36 scavenger receptor
  role in induction of macrophage respiratory burst by oxidized LDL (human), **263,** 804
CD39
  localization to caveolae (COS-7, HUVEC cells), **262,** 596

CD40
  cytoplasmic domain, TRAF2 binding to, inhibition by TRAF2 phosphorylation, **256,** 620
CD44
  fusion proteins, alternatively spliced, heparan sulfate composition of, **257,** 839
CD46
  measles virus interaction with, **264,** 268
CD59
  protection of MLV vector particles from human complement-mediated lysis, **264,** 1
CD69
  recombinant soluble dimer produced in *Escherichia coli,* saccharide binding by, **266,** 19
CD80–CD86
  interaction with CD28, role in apoptosis induction in *Herpesvirus saimiri*-immortalized T lymphocytes, **263,** 352
CD88
  agonist-induced phosphorylation in COS-7 cells, effects of overexpression of wild-type and catalytically inactive GRK2 and GRK6, **259,** 224
CD95
  induced apoptosis, and menadione-induced necrosis, comparison in HepG2 cells, **255,** 6
CD98
  overexpression, role in malignant transformation of NIH3T3 cells, **262,** 720
CD105
  epitopes on, recognition by monoclonal antibody SH-2 raised against human mesenchymal stem cells, **265,** 134
CD153
  expression on activated T cells (mouse), **256,** 519
CD163
  gene, genomic organization and chromosomal localization (human), **260,** 466
  shedding by monocytes by PKC-regulated process after phorbol ester treatment, **256,** 110
cdaA1
  p85 gene regulating cytokinesis initiation in *Tetrahymena,* molecular cloning, **264,** 112
Cdc3
  septin ring component, conjugation with SUMO-1 homologue Smt3 at mother-bud neck in budding yeast, **259,** 582
cdc25B
  multiple splicing variants, regulation of G2/M progression, **260,** 510
Cdc42
  as molecular switch for cadherin-mediated cell–cell adhesion, **262,** 1
Cdk, *see* Cyclin-dependent kinase
CDP-choline
  formation, CTP:phosphocholine cytidylyltransferase catalyzing, regulatory mechanisms and functions, **257,** 643
CDR3
  TCR/Vβ, analysis in T cells inducing synovial hyperplasia in rheumatoid arthritis, **263,** 172
C/EBP, *see* CCAAT enhancer binding protein
Ced-4
  and Ced-3 and Ced-9, interactions in yeast, **260,** 799
  oligomerized, caspase-independent killing of budding yeast by, **260,** 799
Ced-9
  and Ced-3 and Ced-4, interactions in yeast, **260,** 799
Ce-FLI-1
  Ras-binding protein comprising leucine-rich repeats and gelsolin-like domains (*Caenorhabditis elegans*), **257,** 111
Cell adhesion
  anti-CD3-activated T cells to syngeneic colon adenocarcinoma cells, regulation by protein-tyrosine kinase, protein kinase C, and cAMP (mouse), **255,** 460
  cadherin-mediated, Cdc42, Rac1, and IQGAP1 as molecular switches for, **262,** 1
  colon cancer cells, role of cell surface *N*-acetylneuraminic acid α2,3-galactoside (human), **256,** 631
  factor J-induced, effect on tyrosine phosphorylation (Jurkat cells), **266,** 51
  hematopoietic and endothelial cells *in vitro,* effects of angiopoietins and VEGF (mouse), **264,** 133
  related function of acetylcholinesterase, localization at peripheral anionic site, **258,** 758
  vascular endothelial, enhancement by PPARγ agonists via increased ICAM-1 expression (human), **263,** 718
Cell adhesion molecule
  C-CAM, long isoform of, binding to actin (rat), **256,** 404
  C-CAM1, cytoplasmic domain, role in suppression of tumorigenicity of DU145 prostate cancer cells, **263,** 797
Cell culture
  CHO cells in high productivity cultures, metabolic sialylation of recombinant proteins expressed in, **258,** 132
  long-term, human hepatocytes with high growth potential and expressing different phenotypes, **256,** 184
  matrix-mediated changes in rat hepatocyte HNF-4α isoforms and ARP-1 DNA-binding activity, **259,** 651
  primary mouse thyrocytes, **257,** 511
Cell cycle
  caspase activation by TNF during, stage-dependent patterns, association with TNF induction of apoptosis or necrosis (WEHI-164 cells), **261,** 372
  control of reverse transcriptase activity for yeast retrotransposon Ty3, **254,** 679
  early S phase checkpoint, regulation by E2F1 transcription factor (NIH3T3 fibroblasts), **258,** 77
  entry into, from G_0 arrest, deficiency in mice lacking Pin1, **265,** 658
  G1/S transition
    FRTL-5 cells, direct interaction of 73-kDa heat shock cognate protein with P27Kip1 during, **257,** 340
    hepatocytes in primary culture, cyclin A2 expression during, regulation by cAMP (rat), **261,** 118
  half-lives of ornithine decarboxylase and *S*-adenosylmethionine decarboxylase activities during, analysis in CHO cells, **263,** 13
  regulation, modulation by silymarin (human), **263,** 528
  stage of, effect on expression of nuclear pore complex oxalate binding protein gp210, **266,** 72
  Vpr-induced abnormality, inhibition by quercetin (MIT-3 cells), **261,** 308
Cell cycle arrest
  direct interaction of p21 cyclin-dependent kinase inhibitor with retinoblastoma tumor suppressor protein, **263,** 35
  endothelial cells, induction by mouse recombinant kringle 5, **258,** 668
  G_0
    entry into cell cycle from, deficiency in mice lacking Pin1, **265,** 658
    transcriptional regulation of C/EBPδ in, analysis in mammary epithelial cells (mouse), **262,** 696
  G_1
    heat-induced, dependence on p53 function and role of retinoblastoma protein dephosphorylation (HeLa, NCI-H1299 cells), **266,** 377
    induction in endothelial cells by yeast-expressed human endostatin, **258,** 345
    induction by IL-6 via induction of CDK inhibitor p27$^{\mathrm{Kip1}}$ in LNCaP prostate tumor cells, **257,** 609
  in head and neck cancer cell line PCI-1, effect of arsenic trioxide, **265,** 400
  IFN-γ-induced, in primary cultured hepatocytes, role of IRF-1, **257,** 672
  role in arginine deiminase inhibition of cell proliferation, **261,** 10

Cell cycle progression
  G2/M, regulation by multiple splicing variants of cdc25B, **260,** 510
  in human malignant glioma, modulation by p27, **261,** 890
  induction by spermidine, association of 2-deoxy-D-ribose-induced apoptosis in HL-60 cells with, **257,** 460
Cell cycle progression inhibitors
  induction of neuronal differentiation of Neuro 2a cells: trichostatin A and butyrolactone I, **256,** 372
Cell death
  regulatory protein Bak, expression in endothelial cells in inflamed tissues and induction by IFN-γ *in vitro* (human), **264,** 139
  rescue by senescence marker protein-30 via enhancement of plasma membrane Ca^{2+}-pumping activity, **254,** 1
  serum starvation-induced, in scleroderma myofibroblasts, rescue by IL-1 (human), **255,** 129
Cell division
  negative regulatory role of *Escherichia coli hfq* gene, **266,** 579
Cell-free translation
  codon-reading specificities of wobble variants of unmodified form of tRNA$_1^{Ser}$, **257,** 662
Cell fusion
  HTLV-I-induced, role of heat shock cognate protein 70, **261,** 357
Cell growth
  AIDS-associated Kaposi's sarcoma cells, mediated by ERK1/2, negative regulation by p38 MAP kinase, **264,** 676
  carcinoma cell lines resistant to retinoic acid, inhibition by 4-hydroxyphenylretinamide, **254,** 636
  melanoma cells, role of macrophage migration inhibitory factor overexpression (human), **264,** 751
  myeloid leukemia cell lines, suppression by troglitazone by induction of p21WAF1/CIP1 Cdk inhibitor, **261,** 833
  pancreatic cancer COLO-357 cells, TGF-β-induced inhibition, suppression by Smad6, **255,** 268
  Rb independent inhibition by p15^{INK4B}, **262,** 534
  red light-induced stimulation in *E. coli,* role of ground and excited singlet state oxygen, **257,** 753
  role of deubiquitinating enzymes, **266,** 633
  Saccharomyces cerevisiae at alkaline pH, identification of high pH-inducible gene *SHC1* required for, **255,** 116
  suppression, p53 activity for, partial restoration in p53 mutants by inhibition of phosphorylation at Ser-15 or Ser-315, **261,** 256
  TBP-interacting protein 120A gene expression during, analysis (F9, HL60, and P19 cells), **266,** 123
Cell hydration
  induction of signaling cascades: role in regulation of cell function, **255,** 551
Cell immortality
  relationship to telomerase activity (human), **254,** 795
Cell lines
  Apaf-1 forms, identification (human), **261,** 746
  diverse, comparison of GAPDH, β-actin, cyclophilin and 28S rRNA as internal standards for quantification of RNA levels under hypoxia, **259,** 523
  glycoprotein hormone α-subunit gene expression, role of cap site element, **260,** 752
  green fluorescent protein toxicity, **260,** 712
  H9c2, JNK activation and DNA fragmentation, role of Ca^{2+} (rat), **262,** 350
  HIV-1 entry, direct visualization: mechanisms and role of cell surface receptors, **258,** 695
  L-M(TK$^-$)/CD9, expression of hamster diphtheria toxin receptor (mouse), **254,** 325
  mammalian
    dendrimer-mediated transfection, enhancement using synthetic lung surfactant, **264,** 253
    nonapoptotic, single-strand breaks in agarose-embedded chromatin of, **264,** 388
  measles virus interaction with CD46, **264,** 268
  MIT-23
    multiple centrosome formation induced by expression of HIV Vpr gene, **258,** 379
    Vpr-induced cell cycle abnormality, inhibition by quercetin, **261,** 308
  STC-1, calcium channel activation by cAMP, dependence on Ca^{2+}/calmodulin-dependent protein kinase II, **254,** 699
  tetracycline-controlled inducible, rapid selection with green fluorescent–transactivator fusion protein, **257,** 874
Cell lysate
  CHO cell, conversion of prion protein into protease-resistant isoform: cellular chaperone implication, **258,** 470
Cell markers
  toxicity of green fluorescent protein in living cells, **260,** 712
Cell migration
  endothelial cells, effect of restin: NC10 domain of human collagen XV, **255,** 735
  fibroblasts, promotion by p130^{Cas}, **262,** 25
  immature exogenous hematopoietic cells into adult brain parenchyma under GFP-expressing bone marrow chimera (mouse), **262,** 610
  macrophages into hepatic necrotic areas, role of osteopontin expression (rat), **256,** 527
  regions of β1 integrin cytoplasmic domain involved in, mapping in rat primary oligodendrocyte precursors, **259,** 121
  retinal pericytes, effect of angiotensin II (bovine), **266,** 382
  vascular smooth muscle cells
    effects of human cytomegalovirus immediate early gene products (rat), **256,** 608
    inhibition, in reduction of intimal hyperplasia by fasudil (human, rabbit), **262,** 211
    inhibition by manumycin A (rat), **264,** 915
Cell morphology
  changes induced by lipoxygenase inhibition in pancreatic cancer cells (human), **266,** 392
  effect of dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
  thrombin-stimulated changes in Swiss 3T3 cells, selective potentiation by NO donors, **266,** 352
Cell permeabilization
  rapid *in vivo* test for, in determination of optimal parameters for *in vivo* gene transfer by electroporation (mouse), **261,** 377
Cell physiology
  effects of dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
Cell proliferation
  or apoptosis, dose-dependent induction by bacterial protein A in mouse splenic lymphocytes, **260,** 105
  endothelial cells
    effect of restin: NC10 domain of human collagen XV, **255,** 735
    effects of angiopoietins and VEGF *in vitro* (mouse), **264,** 133
  expansion of genetically modified hematopoietic cells, G-CSF–gyrase B fusion gene as type of molecular switch for, **260,** 9
  hematopoietic cells
    effects of angiopoietins and VEGF *in vitro* (mouse), **264,** 133
    insulin- and IL-4-stimulated, support by insulin receptor substrate 4, **260,** 718
  hepatocytes, impairment by chronic ethanol consumption, role of disruption of EGF receptor–PLCγ1 complexation (rat), **257,** 89
  immunocytes, induction by minimized Fc-binding peptide from protein A (mouse), **258,** 141
  inhibition by arginine deiminase via arrest of cell cycle and induction of apoptosis, **261,** 10

  inhibitory activity of chimeric peptides consisting of GHRP-6 and somatostatin, **259,** 379
  keratinocytes, ceramide-mediated inhibition, role of 92-kDa gelatinase (human), **260,** 634
  measurement method, and retinoid anticancer effects in pancreatic adenocarcinoma model, **257,** 596
  melanoma B16 cells, inhibition by IFN-α via interference with bFGF autocrine growth circuit, **262,** 838
  normal and malignant human cells, effects of repetitive pulsed magnetic stimulation, **261,** 689
  osteoblastic MC3T3-E1 cells, stimulation by HMG-like protein in bovine milk, **261,** 113
  pancreatic cancer cells, effects of lipoxygenase inhibitors (human), **261,** 218
  restart from G$_0$ arrest, effect of removal of Pin1 gene (mouse), **265,** 658
  smooth muscle cells, alteration of increase of intracellular Ca^{2+} in, analysis (SVSC cells), **264,** 774
  vascular smooth muscle cells
    effects of human cytomegalovirus immediate early gene products (rat), **256,** 608
    effects of platelet surface membranes (bovine coronary artery), **259,** 341
    inhibition by eicosapentaenoic acid and docosahexaenoic acid by inhibition of phosphorylation of Cdk2–cyclinE complex, **254,** 502
    inhibition by manumycin A (rat), **264,** 915
Cell spreading
  fibroblasts
    PLA$_2$-mediated arachidonic acid release required for, role of β1-integrin cytosolic domain, **258,** 306
    promotion by p130^{Cas}, **262,** 25
  preadipocytes, α_2-adrenergic-induced, role of Ca^{2+}-independent phospholipase A2, **265,** 572
Cell surface receptors
  role in HIV-1 entry: direct visualization of viral entry, **258,** 695
Cell survival
  control by extracellular signal-regulated kinase (rat mesangial cells), **264,** 696
Cell swelling
  activation of p38 MAP kinase and JNK in epithelial A6 cells, **266,** 547
Cellulose-binding domain
  recombinant human T cell connective tissue-activating peptide III fused to, production and heparanase activity, **255,** 657
Cell volume
  induction of signaling cascades: role in regulation of cell function, **255,** 551
Cell wall
  antibiotics affecting, induction of expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
  psu1$^+$ role in synthesis, **262,** 368
Centaurin-α
  human homologue, molecular cloning and functional characterization, **262,** 237
Central nervous system
  Ca^{2+}/calmodulin-dependent protein kinase II gene expression in *Drosophila* throughout development, **260,** 707
  hesr-1 expression (mouse), **260,** 459
  lack of reciprocal genomic imprinting of sense and antisense RNA of mouse insulin-like growth factor II receptor, **257,** 604
  NO synthase immunolabeling (sea slugs), **262,** 545
  orexin-A adiminstration to, stimulation of gastric secretion in conscious rats, **254,** 623
Centromeres
  interaction with CCAAT enhancer binding proteins, **266,** 677
Centrosome
  multiple, formation induced by expression of HIV Vpr gene (MIT-23 cells), **258,** 379
Ceramide
  chronic formation in bovine glomerular endothelial cells, stimulation by nitric oxide, **258,** 60
  mediated inhibition of human keratinocyte growth, role of 92-kDa gelatinase, **260,** 634
  naturally occurring, glucosylation in CHP-100 neuroepithelioma cells, inhibition by *N*-oleoylethanolamine, implications for apoptosis, **255,** 456
  synergism with phorbol ester or okadaic acid to induce IκB degradation, **263,** 63
c-*ERBB-2* gene
  identification of novel promoter and exons, **258,** 499
c-erbB-4/HER4
  expression in T47D breast carcinoma cells, effects of retinoids, vitamin D$_3$ and dexamethasone, **258,** 559
Cerebellar cells
  p53 null mouse, apoptosis induction by adenovirus E1A, c-Myc, Bax, and Nip3, effects of wild-type and mutated p53 and Id proteins, **255,** 722
Cerebellar granule cells
  excitotoxin-stimulated, sources of reactive oxygen species production (rat), **256,** 320
  GABA$_A$ receptor populations in culture, desensitization kinetics, pharmacology, serine/threonine kinase sensitivity, and localization (rat), **266,** 603
Cerebellum
  phospholipase Cβ isozyme localization (mouse), **265,** 473
Cerebral arteries
  middle, myogenic tone, nonspecific inhibition by MEK1 inhibitor PD98059 (rat), **257,** 523
Cerebral cortex
  primate, [^{3}H]nemonapride-labeled dopamine D4-like binding sites, substantial 5-HT2A receptor portion in, **255,** 367
Cerebral vasospasm
  hemolysate role: hemolysate induction of tyrosine phosphorylation and collagen-lattice compaction in cultured fibroblasts (dog, human), **264,** 100
Cerebrospinal fluid
  insulin-like growth factor binding proteins in, expression and regulation during development and aging (human), **264,** 652
Cervical cancer cells
  HeLa, *see* HeLa cells
  and normal keratinocytes, expression of class I HOX genes: HOXC5 and HOXC8 selective turn on in cancer cells, **257,** 738
Cervical intraepithelial neoplasia
  HPV16-positive, regression, balance of IgG subclasses toward viral L1-capsids as predictor for, **258,** 128
c-Fgr
  association with CCR3 receptor stimulation: mechanism in eotaxin-induced human eosinophil chemotaxis, **264,** 163
c-Fos
  induction by heat, arsenite, and cadmium, mediation by heat shock element in c-*fos* promoter, **254,** 566
  interaction of microphthalmia-associated transcription factor with, and effect on subcellular localization, **254,** 384
  mRNA, MAP kinase-independent induction in human cells by hemin, **260,** 289
  overexpression, enhancement of transcription of arachidonate 12-lipoxygenase in A431 cells, **261,** 848
  promoter
    expression, stimulation by RGS 1 and RGS 16, **259,** 550
    silencer-mediated repression in primary glial cells and non-mediated activation in neurons (rat), **261,** 233
  SRE, gene expression, role of 3′ side sequences, **262,** 523

Cha o 2
  purification, identification, and cDNA cloning: major allergen of Japanese cypress pollen, **263,** 166
Chaperones
  association with MHC class I proteins, effect of N-glycan chain length, **262,** 473
  cellular, and cell-lysate conversion of prion protein into protease-resistant isoform, **258,** 470
  Cu chaperones, role in copper homeostasis, **261,** 225
  Escherichia coli export chaperone SecB, C-terminal tail mobility, **264,** 949
  eukaryotic and prokaryotic, association with human 1α,25-dihydroxyvitamin D_3 receptor, **260,** 446
  extracellular, role in rescue of misassembled thyroglobulin in follicular lumen (human), **255,** 438
  related activity of DFF45: two independent inhibitory domains of DFF40 nuclease activity, **264,** 176
Chaperonins
  chloroplast, α and β Cpn60 polypeptides, heterogeneous assembly into chaperonin oligomer (spinach), **266,** 584
CHAPS
  effect on anion exchange perfusion chromatography and gel filtration of intact chloroplast H^+-ATP synthase (spinach), **265,** 520
Chara australis
  internodal cells, reverse motion of organelles with myosin molecules along actin filament bundles, **257,** 223
Chelation
  iron in human astrocytoma cells, screening of transcriptionally regulated genes after, **264,** 709
Chemical cleavage of mismatches
  and FD, use in Fabry disease: α-galactosidase A mutations and carrier detection, **257,** 708
Chemiluminescence
  lucigenin, application to detection of intramitochondrial superoxide radical production (human), **262,** 80
  ultraweak, with ESR, study of peroxynitrite reaction with heterocyclic compounds: role of radical pathway, **259,** 460
Chemiluminescent probe
  lucigenin, validation for monitoring superoxide production and basal vascular NO production, **254,** 319
Chemokine receptors
  CCR3, stimulation, association with Src family kinases Hck and c-Fgr: mechanism in eotaxin-induced human eosinophil chemotaxis, **264,** 163
  CCR-7, stably expressed in HEK-293 cells, pharmacological and signaling analysis, **263,** 685
  role in HIV-1 entry: direct visualization of viral entry, **258,** 695
Chemokines
  BRAK, cloning: divergent CXC chemokine preferentially expressed in normal vs malignant cells (human), **255,** 703
  CC, isolation of divergent member ALP with unique C-terminal extension (mouse), **258,** 737
  utilization of cyclic ADP-ribose pathway, effect on mobilization of intracellular Ca^{2+} in NK cells, **262,** 467
Chemosensitivity
  human malignant glioma cells, modulation by p27, **261,** 890
Chemosensitization
  multidrug-resistant ovarian carcinoma 2780AD cells, inhibition by hexanoylglucosylceramide, **266,** 492
Chemotaxis
  eotaxin-induced, human eosinophils, role of association of Src family kinases Hck and c-Fgr with CCR3 receptor stimulation, **264,** 163
  mast cells, induction by serum amyloid A via activation of pertussis toxin-sensitive signal transduction pathway (human), **254,** 143
Chiral reaction field
  lens protein, role in D-amino acid formation during aging (human), **263,** 322
CHK, *see* Csk homologous kinase
Chloride–bicarbonate exchangers
  in fetal pancreas (human), **263,** 315
Chloride channels
  activation in renal epithelial A6 cells by flavonoids, **254,** 368
  CFTR, inhibition, role in glibenclamide-induced apoptosis in HepG2 cells, **261,** 682
  ClC-1, muscular, regulation, role of phosphorylation and physiological state (mouse), **261,** 528
  CLC, molecular cloning in *Oreochromis mossambicus* and functional complementation of yeast *CLC* gene mutant, **255,** 175
  CLCA2, gene induction during mammary gland involution (mouse), **264,** 933
  CLC-K2, gene promoter, isolation and characterization (rat), **261,** 432
  glutamate-gated, homologue of, cloning, sequencing, and developmental expression (*Haemonchus contortus*), **254,** 529
Chloride/iodide channel
  TSH/dibutyryl cAMP-activated, in FRTL-5 cells, **259,** 631
Chlorofluoroacetic acid
  deuterated, glutathione transferase ζ-catalyzed biotransformation, **261,** 779
3-Chloro-2-hydroxy-(3,4-dimethyl-5-isoxazolyl)-1,4-naphthoquinon-4-imine
  mechanism of antibacterial and degradation behavior, **263,** 301
Chloroperoxidase
  kinetic epoxidation assay, **266,** 301
Chloroplasts
  F_0F_1-ATP synthase, CF_0, and CF_1, isolation by blue native electrophoresis, **259,** 569
  heterogeneous assembly of α and β Cpn60 polypeptides into chaperonin oligomer (spinach), **266,** 584
  intact H^+-ATP synthase, anion-exchange perfusion chromatography and gel filtration, detergent effect (spinach), **265,** 520
  signal recognition particle 54-kDa subunit, functional comparison with cytosolic SRP54, **254,** 253
CHO cells
  aldose reductase gene expression: genomic regions directing cell-specific expression (mouse), **255,** 759
  CHO-IR, expression of human Akt3, **257,** 906
  CHO Lec1, *N*-acetylglucosaminyltransferase I deficiency, complementation by *Arabidopsis thaliana* cDNA, **261,** 829
  choline uptake and phosphatidylcholine synthesis, inhibition by diethanolamine, **262,** 600
  H_2O_2-induced apoptosis, opposing effects of protein kinase C δ and protein kinase B α, **264,** 840
  half-lives of ornithine decarboxylase and *S*-adenosylmethionine decarboxylase activities during cell cycle, **263,** 13
  in high productivity cultures, metabolic sialylation of recombinant proteins expressed in, **258,** 132
  mNSC1 expression, **265,** 13
  nickel(II) acetate-treated, differential expression of vimentin, hSNF2H homologue, and H ferritin, **258,** 592
  thermoresistance conferred by Hsp20 in clonal survival assay and assessment of Hsp20 protection of coexpressed luciferase, **254,** 164
Cholecystokinin
  CCK-8 and CCK-9, bioactive regions, primary sequence and conformations (dog), **266,** 400
  induction of paxillin redistribution in rat pancreatic acinar cells, **254,** 400
  octapeptide, Ca^{2+} waves in mouse pancreatic acinar cells evoked by, modulation by activation of $cPLA_2$, PLD, and PKC, **261,** 726
Cholecystokinin receptor CCK_A
  gene expression, correlation with DNA demethylation during postnatal development of rat pancreas, **264,** 29

pancreatic expression and localization, ontogeny and species differences (human, mouse, pig, rat), **260,** 820
Cholestanol
induction of apoptosis of cerebellar neuronal cells (rat), **256,** 198
5α-Cholest-8(14)-en-3β-ol-15-one
effect on HMG-CoA reductase, LDL receptor, and oxysterol binding protein mRNA levels in Hep G2 cells, **259,** 688
Cholesterol
effect on efficiency of MAL incorporation into artificial membranes, **266,** 330
effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
and sphingomyelin, changes in nuclear membrane in liver after hepatectomy (rat), **262,** 692
Cholesterol 7α-hydroxylase
gene expression in transgenic mouse, **266,** 454
promoter, binding and transactivation by hepatocyte nuclear factor 1 in human gene but not rat, **260,** 829
Cholesteryl ester transfer protein
gene, identification of retinoic acid receptor element (human), **258,** 411
Choline
uptake by CHO cells, inhibition by diethanolamine, **262,** 600
Choline acetyltransferase
and GLUT3, colocalization in retina (rat), **256,** 505
Chondrocytes
articular cartilage superficial zone protein, growth-promoting and cytoprotective roles (bovine), **254,** 535
thrombospondin expression (human), **263,** 389
Chondrogenesis
promotion by TAK-778 *in vitro* and *in vivo* (ATDC5 cells, rabbit), **261,** 131
Chondrogenic EC cells
chrondrogenic differentiation, coordinate regulation by noggin and BMP-4 (ATDC5 cells), **260,** 240
in late-phase differentiation, Indian hedgehog actions (ATDC5 cells), **257,** 814
CHOP/GADD153
and methionyl-tRNA synthetase, gene overlap in conserved region controlling mRNA stability (human), **262,** 31
Choriocarcinoma cells
apoptosis, induction by 15-deoxy-$\Delta^{12,14}$-prostaglandin J_2 (JEG3 cells), **262,** 579
differentiating, RasGAP-associated protein (mouse), **263,** 523
JEG-3, retinoid X receptor
regulation by ligand 9-*cis*-retinoic acid, **260,** 729
RXRα, cleavage by lysosomal cathepsin L-type protease, **254,** 388
Chromaffin cells
adrenal medullary, catecholamine secretion and synthesis *in vitro,* stimulation by leptin (pig), **261,** 426
Chromatin
agarose-embedded, of nonapoptotic cells, single-strand breaks in, **264,** 388
hepatic, phosphatidylcholine-dependent phospholipase C detection and activity (rat), **265,** 640
Chromogranin A
modulation of ductal morphogenesis and basement membrane deposition by mammary epithelial cells, **259,** 563
Chromosomal region maintenance 1
mediation of nuclear export of nonstructural protein 2 from parvovirus minute virus of mice, **264,** 144
Chromosome 1
apM-1 gene mapping to 1q21.3-q23 locus for familial combined hyperlipidemia, **260,** 416
macrophin mapping to 1p31–32 (human), **264,** 568
prostaglandin F receptor gene localization to 1p31.1 (human), **254,** 413
Chromosome 2
IL1HY1 gene mapping to long arm (human), **263,** 702
MPSK gene localization to 2q34–37: myristylated and palmitylated Ser/Thr protein kinase (human), **259,** 533
orphan G protein-coupled receptor localized to 2p16, cloning and characterization, **260,** 174
Chromosome 3
phosphoinositide 3-kinase p110α gene localization to 3 Band B (mouse), **262,** 438
Chromosome 4
human ATPase II gene mapping to 4p14–p12, **257,** 333
Chromosome 5
BRAK localization to 5q31: divergent CXC chemokine preferentially expressed in normal vs malignant cells (human), **255,** 703
HVDAC1 gene mapping to 5q31: human voltage-dependent anion channel isoform 1, **255,** 707
mapping of gene for human Fe65L2 interacting with Alzheimer's β-amyloid precursor protein, **258,** 385
placental leucine aminopeptidase gene assignment to 5q14.2-q15 (human), **262,** 269
Chromosome 6
TBP-like protein mapping to q22.1–22.3 region (human), **255,** 137
Chromosome 8
ZHX1 localization on 8q (human), **261,** 614
Chromosome 10
BUB3 gene mapping (human), **257,** 589
HVDAC2 gene mapping to 10q22: human voltage-dependent anion channel isoform 2, **255,** 707
SHFM3 critical region on 10q24, mapping of Dactylin gene encoding F-box/WD40-containing protein (human), **261,** 64
Chromosome 11
DOC-1R identification from 11q13: DOC-1 related protein (human), **255,** 59
ets family gene *EHF* mapping to 11p12 (human), **264,** 119
Frizzled-4 gene characterization on 11q14-q21 (human), **264,** 955
ganglioside sialidase mapping to 11q13.5 (human), **261,** 21
Chromosome 12
CD163 gene localization 12p13 (human), **260,** 466
Frizzled-10 gene localization to 12q24.33 (human), **262,** 39
TBP-interacting protein 120A gene mapping to 12q14 (human), **266,** 123
Chromosome 17
syntaxin 8 gene mapping to 17p12 (human), **257,** 577
Chromosome 18
headpin mapping to 18q: differentially expressed serpin (human), **264,** 299
Chromosome 18 C
protocadherin 2C gene localization (mouse), **260,** 641
Chromosome 19
BSMAP gene localization on 19p12: brain-specific membrane-anchored protein (human), **264,** 55
DYRK1B mapping to 19q12–13.11 (human), **254,** 474
Chromosome 31
cyclin-dependent kinase 5 activator-like molecule localization to 31D1-31D2 (*Drosophila melanogaster*), **261,** 459
Chromosomes
focal sites of DNA repair synthesis (human), **257,** 378
hybrid haplotype, analysis to determine localization of *cis* regulatory elements at β-globin locus, **254,** 181
lipophilin gene localization (human), **256,** 147
from malignant rhabdoid tumors, *Rab36* gene within homozygously deleted region at 22q11.2, cloning and characterization, **254,** 594
MEP1A-like sequences, genomic localization (human), **261,** 163
structure, role of deubiquitinating enzymes, **266,** 633

- Chronic lung disease
  - bleomycin-detectable free iron in alveolar system of preterm infants, **257,** 218
- Chronic lymphocytic leukemia
  - and systemic glucocorticoid resistance, lymphocytes from patient with, *in vitro* expression of glucocorticoid receptor isoforms, **254,** 559
- Chronic myeloid leukemia cells
  - coordinately regulated expression of human phenylalanyl-tRNA synthetase α- and β-subunits, **255,** 765
- Chymotrypsin
  - 16-mer peptide fragment of bacterial protein A formed by, functional mimicry, **260,** 111
- Ciliary epithelial cells
  - human ocular nonpigmented, functional expression of natriuretic peptide system, **258,** 21; *erratum,* **264,** 1007
- Circadian rhythm
  - arylalkylamine *N*-acetyltransferase expression
    - in rat retinal photoreceptor cells, **248,** 115; *erratum,* **261,** 546
    - in rat suprachiasmatic nucleus, **258,** 772; *erratum,* **261,** 546
  - *psbA* transcripts in homologous/heterologous cyanobacterial cells, **255,** 47
- Circadian rhythm sleep disorders
  - melatonin 1a receptor allelic variants in, function and prevalence (human), **262,** 832
- Circular dichroism
  - prion protein cellular isoform structural dependence on solvent: spectroscopic characterization of intermediate conformation, **264,** 972
- *cis*-Element
  - for transcriptional activation of *rae28/mph1* gene in F9 cells, characterization (mouse), **262,** 509
- Cisplatin
  - cancer cells treated with, STAT1-independent upregulation of FADD and procaspase-3 and -8 (human), **256,** 603
  - sensitivity of human colon cancer cells to, effect of GRP78 overexpression, **257,** 361
- Cizl
  - p21$^{\text{Cip1/Waf}}$-interacting zinc finger protein, cloning and characterization (human), **264,** 457
- c-Jun
  - DNA elements bound by, sequence variations *in vivo* (rat), **256,** 68
- c-Jun N-terminal kinase
  - activation
    - basal level, and JNK-mediated TNF resistance, regulation by IκBα in L929 cells, **263,** 107
    - by benzyl isothiocyanate in HT29 cells prior to transcription factors AP-1 and NF-κB, **257,** 149
    - by cell swelling in epithelial A6 cells, **266,** 547
    - in H9c2 cells, role of Ca^{2+} (rat), **262,** 350
    - by PDGF in A431 cells, role of phospholipase C-γ and phosphatidylinositol 3-kinase signaling pathways, **261,** 641
    - relationship to p53-dependent Fas expression induced by apoptotic stimuli, **256,** 595
  - JNK/p38 pathways, inhibition by radicicol-related macrocyclic nonaketide LL-Z1640-2 in signal-specific manner, **257,** 19
  - JNKp46 and JNKp54
    - activation by hepatocyte isolation: induction of gene 33 expression (rat), **254,** 728
    - regulation by human α_{1A}-adrenoceptors expressed in Rat-1 cells, **261,** 372
  - JNKp46 and JNKp55, effects of cAMP in helper T lymphocytes (human), **266,** 129
  - role in differential regulation of heat shock proteins by anticancer drugs, **262,** 516
- Cla-1
  - expression in monocytes and macrophages, inhibition by lipopolysaccharide (human), **262,** 251
- *CLC* gene
  - mutant, in yeast, functional complementation by cloned CLC chloride channels from *Oreochromis mossambicus,* **255,** 175
- CLIK148
  - complex with papain, crystal structure: analysis of inhibition mechanism of cathepsin L-specific inhibitors, **266,** 411
- Clodronate
  - inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
- Clonal survival assay
  - thermoresistance in, conferral by Hsp20, **254,** 164
- *Clostridium perfringens*
  - NADH peroxidase activity of rubrerythrin, **255,** 317
- Clusterin
  - prevention of aggregation of neuropeptide 106–126 *in vitro,* **259,** 336
- c-MET
  - association with E-cadherin and catenins in tumor cells (human), **261,** 406
  - association with STAT1α/1β, STAT3, and STAT5 in long-term hepatocyte cultures (human), **265,** 376
  - expression in gastric cancer cells, inhibition by PPARγ via suppression of *Ets* (human), **265,** 453
- CMOAT/MRP2
  - gene expression, Kupffer cell-mediated downregulation (rat liver), **255,** 143
- c-Myb
  - DNA-binding domain, artificial tandem protein of, construction and DNA binding specificity, **262,** 94
- c-Myc
  - induction of apoptosis in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
- Coagulant protein
  - factor V activating enzyme, cloning and sequence analysis (viper venom), **262,** 328
- Coated pits
  - endocytosis through, induction by crosslinking of plasmalemmal cholesterol in lymphocytes (mouse), **260,** 516
- Cobalt
  - unidirectional transport from apical to basolateral compartment in polarized MDCK cells, **257,** 289
- Cobrotoxin
  - expression and mutagenesis studies (Taiwan cobra), **263,** 652
  - refolding: secondary structure formation as earliest structural event, **260,** 284
- Cocaine
  - potentiation of switch between latency and replication of Epstein–Barr virus in Raji cells, **264,** 33
- Cochlea
  - aquaporin 5 identification: cDNA cloning and *in situ* localization (rat), **264,** 157
- Codon optimization effect
  - translational efficiency of DNA vaccine in mammalian cells, **261,** 445
- Codon-reading specificities
  - *in vitro,* wobble variants of unmodified form of tRNA$_1^{\text{Ser}}$, **257,** 662
- Coenzyme A
  - and bovine phenol sulfotransferase, inhibition and binding studies, **261,** 815
- Coenzyme Q-10
  - plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
- Colcemid
  - apoptosis induced by, protein phosphatase-1 activation and association with retinoblastoma protein in, analysis (HeLa cells), **266,** 279

Cold shock
  induction of Csp protein family in *Streptomyces aureofaciens,* **265,** 305
Coleoptile tips
  blue light-mediated signal transduction, role of superoxide (*Sorghum bicolor,* wheat), **256,** 293
Colicin
  Im7 protein specific immunity to, critical residues on Im7 immunity-determining region conferring, hierarchical order, **264,** 69
Collagen
  glycated, lattices, decreased contraction, correlation with impaired matrix metalloproteinase production (human fibroblasts), **264,** 488
  induction of phosphatidylinositol 3-kinase product formation in platelets (human), **263,** 780
  remodeling in anterior cruciate ligament, associated with developing spontaneous murine osteoarthritis, **258,** 763
Collagen I
  mRNA levels in hepatic stellate cell line, effect of MDMA, **259,** 678
Collagen IV
  α3 chain peptide, protection of basement membrane against damage by neutrophils (human), **261,** 247
  deposition by mammary epithelial cells, promotion by chromogranin A, **259,** 563
Collagen VI
  heterozygous splice site mutation in COL6A1 leading to in-frame deletion of α1(VI) collagen chain in Italian family with Bethlem myopathy, **258,** 802
Collagen X
  mRNA, upregulation by Indian hedgehog in chondrocytic EC cells, **257,** 814
  promoter induction by serum, role of RAF/MEK/ERK and p38 pathways (MCT cells), **262,** 50
Collagen XIV
  16-kDa fragment, purified from granulation tissue, identification as neutrophil chemotactic factor (rat), **256,** 642
Collagen XV
  NC10 domain restin, antiangiogenic activity, comparison with endostatin (human), **255,** 735
Collagenase-3
  expression in human abdominal aortic aneurysms and VSMC in culture, **261,** 904
Collagen-lattice compaction
  cultured fibroblasts, induction by hemolysate (dog, human), **264,** 100
Collagen-related peptide
  induction of platelet activation by interaction with glycoprotein VI (human), **256,** 114
Colon
  pig, *E. coli* acid phosphatase/phytase gene *appA2* isolated from, cloning, sequencing, and expression, **257,** 117
Colon cancer cells
  accelerated adhesion to ROS-treated endothelial cells in absence of *de novo* protein synthesis (colo201 cells), **257,** 214
  cGMP increase in, effects of chemically synthesized porcine guanylin and uroguanylin (human T84 cells), **259,** 141
  c-met association with E-cadherin and catenins (human), **261,** 406
  conditioned media from, effect on glucose uptake and lactate production in L6 myoblasts (Colo 320 cells), **260,** 626
  functional estrogen receptor β expression (human), **261,** 521
  intercellular adhesion, role of cell surface *N*-acetylneuraminic acid α2,3-galactoside (human), **256,** 631
  lectin-resistant, correlation of K-Ras with β-1,6 branching of N-linked carbohydrate and CEA production, **259,** 588
  retinoic acid-resistant, growth and apoptosis, effects of 4-hydroxyphenylretinamide (SW-480, SW-620 cells), **254,** 636
  sensitivity to DNA crosslinking agents, effect of GRP78 overexpression (human), **257,** 361
  STAT1-independent upregulation of FADD and procaspase-3 and -8 in cells treated with cytotoxic drugs (human), **256,** 603
  syngeneic, adhesion of anti-CD3-activated T cells to, regulation by protein-tyrosine kinase, protein kinase C, and cAMP (mouse), **255,** 460
Colonic crypt cells
  rat, Ca^{2+} pathway in, thromboxane A$_2$ receptor linked with, **258,** 708
Colorectal cancer
  DNA demethylase MBD2 mRNA expression (human), **264,** 962
  with microsatellite instability, DNA methylation in, analysis by bisulfite treatment and PCR–SSCP (human), **262,** 671
Colorectal cancer cells
  amino acid-restricted, increased spermidine transport in, antizyme-dependent and -independent mechanisms (Caco-2 cells), **256,** 646
  apoptosis induction by transfection with human IFN-β gene (SW480 cells), **257,** 771
  butyric acid-induced apoptosis, redistribution of activated caspase-3 to nucleus during (DiFi, HT29, SW-480 cells), **260,** 775
  differentiation, influence of multidrug-resistant phenotype (HT29-D4 cells), **259,** 43
  functional Fas ligand expression, induction by TNF-α and IFN-γ (HT29 cells), **264,** 813
  growth inhibition by retinoids, mediation by retinoic acid receptor α (HT29 cells), **261,** 572
  interferon-β secretion induced by poly I:poly C, stimulation side-dependent asymmetry (Caco-2 cells), **254,** 5
  proteasome accumulation induced by glucose starvation and hypoxia (HT29 cells), **258,** 448
  σ receptor ligand-induced upregulation of H$^+$/peptide transporter PEPT1 (Caco-2 cells), **261,** 242
  telomerase activity, upregulation by hypoxia via MAP kinase signaling (HT29 cells), **260,** 365
  temporal effects of benzyl isothiocyanate: activation of JNK prior to transcription factors AP-1 and NF-κB (HT29 cells), **257,** 149
Colorimetric assay
  terminal galactose on immunoglobulins, **261,** 196
Combinatorial chemistry
  detection of motif binding platelet fibrinogen receptor gpIIbIIIa, **256,** 537
  discovery of inhibitory ligands for diverse targets from library of chimeric molecules, **266,** 62
Competitive PCR
  quantitative analysis of expression of mouse sialyltransferase genes, **260,** 23
Complement
  mediated inactivation, protection of MLV vector particles from, **264,** 1
  regulation, human factor H and I function in, on xenosurface, **265,** 556
Complementary DNA
  antisense, *N*-acetylglucosaminyltransferase V, hepatocarcinoma cells transfected with, increased susceptibility to apoptosis (human), **264,** 509; *erratum,* **266,** 615
  Arabidopsis thaliana, complementing *N*-acetylglucosaminyltransferase I deficiency of CHO Lec1 cells, cloning, **261,** 829
  cDNA-AFLP, modified method for cloning of differentially expressed genes in metastatic osteosarcomas (rat), **261,** 35
  phage display cDNA cloning of protein with carbohydrate affinity, **255,** 194
Complementation
  N-acetylglucosaminyltransferase I deficiency of CHO Lec1 cells by *Arabidopsis thaliana* cDNA, **261,** 829
  fol2 deletion in *Saccharomyces cerevisiae* by human and *Escherichia coli* genes for GTP cyclohydrolase I, **255,** 521
Complement factor H
  expression in L cells, **262,** 315

- Complexin I
  - functional role in exocytosis of secretory vesicles, transfection analysis (PC12 cells), **265,** 691
- Complexin II
  - functional role in exocytosis of secretory vesicles, transfection analysis (PC12 cells), **265,** 691
- Compound 48/80
  - induced histamine release by rat mast cells, effect of HCO_3^-, **260,** 71
- Computer techniques
  - comparison of three classes of snake neurotoxins by computer simulation graphics, **257,** 500
  - derivation of steady-state rate equations, **265,** 448
- Cones
  - guanylate cyclase subtype expression (medaka), **255,** 216
- Conformation
  - β-amyloid, FT-IR study: standardization of aggregation grade, **265,** 297
  - CCK-8 and CCK-9 bioactive regions (dog), **266,** 400
  - CD4 anchored in cell membrane, changes induced by soluble recombinant HIV envelope glycoprotein gp120, **265,** 428
  - cyclodextrin glucanotransferase from hyperthermophilic archaea, *in vitro* heat effect, **265,** 57
  - estrogen receptor α and β, effects of ICI 164,384 and ICI 182,780, **261,** 1
  - F_1-ATPase α and β subunits, effect of nucleotide binding to isolated subunits (*Escherichia coli*), **266,** 58
  - ferricytochrome c-551 from *Pseudomonas stutzeri* substrain ZoBell, solution conformation, **254,** 675
  - intermediate, of prion protein cellular isoform, spectroscopic characterization, **264,** 972
  - leukocyte NADPH oxidase subunit $p47^{phox}$, phosphorylation-induced changes, **259,** 38
  - ordered, SPR2 N-terminal domain (human), **262,** 395
  - protein disulfide isomerase, probing with retinol, **261,** 41
  - ribosomes, alteration by RIP-JIP60 *in vivo* in transgenic tobacco, **258,** 572
  - sequence-directed variations in ssDNA backbone, recognition by nucleases, **256,** 532
  - vitamin D_3 receptor, role of putative helices 4 and 5 (human), **264,** 478
- Congenital adrenal hyperplasia
  - CYP21 mutations in, functional analysis in Spanish patients, **262,** 635
  - mutant steroid 21-hydroxylase from patient with, membrane anchoring and function, **257,** 384
- Conjugation
  - tumor necrosis factor α with polyvinyl pyrrolidone, **257,** 448
- Connective tissue-activating peptide III
  - recombinant human T cell, fused to cellulose-binding domain, production and heparanase activity, **255,** 657
- Connexin 32
  - human, murine hepatocytes transfected with, induction of tight junctions: interaction of connexin 32 with occludin, **266,** 222
- Connexin-mimetic peptide
  - inhibition of endothelium-dependent smooth muscle hyperpolarization (rabbit), **254,** 27
- ω-Conotoxin MVIID
  - solution structure, determination by 2D ^1H NMR, **254,** 32
- Contractile activity
  - cardiac myocytes, NO effects, role of troponin I phosphorylation, **256,** 398
  - ventricular myocytes, ethanol-induced depression of, augmentation by hypertension (rat), **261,** 202
- Contractile apparatus
  - Ca^{2+} sensitivity in permeabilized renal artery, effects of smooth muscle myosin phosphatase small subunit (pig), **254,** 158
- Contrast agents
  - MRI, hepatic uptake, molecular mechanisms (rat), **257,** 746
  - regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
- *Conus anemone* venom
  - crude, binding to [^3H]neuropeptide Y, high-affinity displacement by insect neuropeptides, **262,** 180
- CooA
  - recognition of target DNA and transcription activation, **261,** 270
- *cop* operon
  - *Enterococcus hirae, in vivo* regulation by Cu(I) and Cu(II), effects of promoter mutations, **259,** 443
- Copper
  - Cu(I) and Cu(II), *in vivo* regulation of *cop* operon of *Enterococcus hirae* by, effects of promoter mutations, **259,** 443
  - Cu(II), and NADH, oxidative DNA damage by nitrosobenzene in presence of, **257,** 555
  - divalent metal and redox active binding, sites for, generation by protein aging via carboxymethylation of lysines, **260,** 332
  - homeostasis, molecular mechanisms, **261,** 225
  - loading by tyrosinase *in vivo,* calnexin and α-glucosidase II roles, **261,** 720
  - mediated formation of ROS during glycation reactions *in vitro,* block by lens proteins, **259,** 706
  - recombinant prion protein refolded in presence of, selective oxidation of Met residues, **259,** 352
  - toxicity, decreased sensitivity in neuronal systems *in vitro:* enhanced microtubule assembly and glucose metabolism, **264,** 605
- Copper–adenine complex
  - catalysis of O_2 production from H_2O_2, **263,** 672
- Core-binding factor
  - synergy with *mi* transcription factor, region of MITF responsible for, identification, **261,** 53
- Coreceptor usage
  - HIV, determination, system based on human glioma NP-2 cell line, **258,** 313
- Core protein
  - HCV, intracellular antibody fragments, characterization and binding, **263,** 410
- Corneal epithelial cells
  - SV40-transformed, integrin $\alpha5$ expression, synergistic upregulation by C-terminal tetrapeptide of substance P and IGF-1 (human), **255,** 692
- Coronary artery disease
  - plasma growth factor levels after heparin administration: HGF as major mediator in heparin-induced angiogenesis (human), **255,** 80
- Coronary venular endothelial cells
  - *in vitro* angiogenesis, inhibitory effect of full-length endostatin (bovine), **263,** 340
- Corpus luteum
  - angiogenin localization and mRNA expression (bovine), **257,** 182
  - prolactin-induced apoptosis, role of Fas/Fas ligand system (rat), **260,** 167
- Corpus striatum
  - dopamine release, role of ryanodine receptor type 3, evidence from mutant mouse lacking the receptor, **266,** 588
- Corticotropin-releasing factor receptor 2α
  - short variant, from amygdala, cloning and characterization (rat), **256,** 692
- Coumarin
  - and derivatives, effects on activity of protein kinases: daphnetin as PK inhibitor, **260,** 682
- *Cowdria ruminantium*
  - *map1* gene: member of multigene family with conserved and variable genes, **257,** 300
- CpG islands
  - methylation patterns, abnormalities in, detection, **262,** 624
  - for promoter activity, in exon 1 of spinocerebellar ataxia 2 gene, **254,** 315

- CpG methylation
  - relationship to reactivity of nearest neighboring guanines toward aflatoxin B_1-8,9-epoxide, **254,** 114
- c-Raf
  - c-Raf/MEK/ERK pathway, requirement for serum induction of collagen X promoter (MCT cells), **262,** 50
- Creatine kinase
  - partially folded, modified by 5,5′-dithio-bis(2-nitrobenzoic acid), reactivation and refolding (rabbit), **259,** 450
- CREB
  - role in transcriptional activation of apurinic/apyrimidinic endonuclease by oxidative stress, **261,** 859
- CREB binding protein
  - histone acetyl transferase activity, stimulation by phosphorylation by p44 MAP kinase/ERK1 (NIH3T3 cells), **262,** 157
- CRE-like element
  - TREB5 protein binding to, disruption of gene encoding, induction of cardiomyocyte necrosis at embryonic stage (mouse), **261,** 350
- Crk-II
  - role in embryonic development, analysis with mutant mice with Crk-II removed by gene trap insertional mutagenesis, **266,** 569
- CRM1
  - mediation of nuclear export of nonstructural protein 2 from parvovirus minute virus of mice, **264,** 144
- Crosslinking
  - cytochrome c_3 and flavodoxin from *Desulfovibrio gigas,* **256,** 367
  - myosin S1 with actin *in vitro:* actin–S1–actin complexes (rabbit skeletal muscle), **258,** 628
  - plasmalemmal cholesterol in lymphocytes, induction of capping, membrane shedding, and endocytosis through coated pits (mouse), **260,** 516
  - protein/DNA, induced by UV-laser, analysis: detection of sequence variations of DNA elements bound by c-Jun *in vivo,* **256,** 68
  - telomere–protein complexes produced by, isolation from erythrocyte nuclei (chicken), **254,** 517
- CryIVA protoxin
  - regulation by inorganic phosphate, **262,** 359
- Crypt cells
  - rat colonic, Ca^{2+} pathway in, thromboxane A_2 receptor linked with, **258,** 708
- α-Crystallin
  - chaperoning of dithiothreitol-denatured α-lactalbumin (bovine), **261,** 292
- αA-Crystallin
  - aged, formation of four isomers at Asp-151 residue, induction by natural aging (human), **265,** 746
  - chiral field, role in D-amino acid formation during aging (human), **263,** 322
- αB-Crystallin
  - binding to Hsp27, site of, identification with yeast two-hybrid system, **255,** 256
  - enhancement of amyloid β neurotoxicity (rat), **262,** 152
- α-/γ-Crystallin
  - oxidatively induced high-molecular-weight aggregate formation (rat), **260,** 60
- βA3/A1-Crystallin
  - lens, age-related degradation (human), **258,** 632
- Crystal structure
  - glycerol kinase complexed with ATP analog, **259,** 640
  - mistletoe lectin I from *Viscum album,* **257,** 418
- Csk homologous kinase
  - binding of tyrosine phosphorylated paxillin in blastic T cells (human), **256,** 668
  - downregulation of SCF/KL-activated Lyn kinase activity in Mo7e megakaryocytic cells, **259,** 611
- Csp proteins
  - expression upon cold shock and tetracycline production in *Streptomyces aureofaciens,* **265,** 305
- c-Src
  - activation of DNA binding and transcriptional activity of Stat3 (COS-7, F9 cells), **266,** 481
  - oncogenic conversion, critical amino acid substitutions in Src SH3 domain causing, analysis, **263,** 759
- CTD kinase
  - role in activity of general transcription factor IIE in yeast, **261,** 734
- CTF/NF-1
  - role in basal expression of *Hmgi-c* proximal promoter (mouse), **265,** 439
- CTG repeat
  - expanded, *trans* RNA interference caused by, and myotonic dystrophy pathogenesis (human), **264,** 76
- CTP:phosphocholine cytidylyltransferase
  - regulatory mechanisms and functions, **257,** 643
- Cullin-1
  - and Skp1, βTrCP1, and βTrCP2, SCF-like complex containing, catalysis of IκBα ubiquitination, **256,** 127
- Cullin-2
  - NEDD8-conjugation site, identification (human), **257,** 100
- Cumene hydroperoxide
  - demethylation reactions supported by, catalysis by CYP2B4 lacking NH_2-terminal sequence, **258,** 32
- CUP/AP-2 regulatory element
  - in C/EBPα promoter, **266,** 677
- Cu,Zn superoxide dismutase
  - gene transcription, xenobiotic responsive element for activation of, analysis (rat), **256,** 133
  - levels in progeria skin fibroblasts, **257,** 163
  - livers of mice with homozygous deletion of gene for, transcriptional induction of metallothionein-I and -II genes in, **264,** 735
  - superefficient, engineering (*Photobacterium leiognathi*), **256,** 425
- CXCR4
  - recognition, role of positively charged residues, analysis with synthetic peptides, **263,** 691
- Cyanidin
  - inhibition of glucose uptake in U937 cells, **260,** 568
- *Cyanidium caldarium*
  - *psb*U gene cloning and expression, and functional studies of recombinant 12-kDa PSII protein, **260,** 245
- Cyanobacteria
  - photosystem II complex, functional reconstitution with synthetic phytanyl-chained glycolipid vesicle membrane, **265,** 734
- Cybrids
  - cell lines containing mtDNA from Huntington's disease patients, characterization, **261,** 701
- Cyclic ADP-ribose
  - dependent Ca^{2+} release, modulation by free [Ca^{2+}] in scallop sarcoplasmic reticulum, **257,** 57
- Cyclic ADP-ribose pathway
  - utilization by chemokines, effect on mobilization of intracellular Ca^{2+} in NK cells, **262,** 467
- Cyclic AMP
  - ACTH receptor gene regulation induced by, steroidogenic factor-1 binding elements involved in, analysis (human), **255,** 28
  - activation of calcium channels in STC-1 cells, dependence on Ca^{2+}/calmodulin-dependent protein kinase II, **254,** 699
  - cyclin A2 expression regulation by, during G1/S transition in primary hepatocytes (rat), **261,** 118
  - dibutyryl cAMP synergistic action with retinoic acid to enhance MMP-2 basal promoter activity, **258,** 663

Cyclic AMP (*continued*)
  downregulation in PBLs, mediation by HIV-1 infection, **256,** 429
  effects on c-Jun N-terminal kinase JNKp46, JNKp55, and ERK2 in helper T lymphocytes (human), **266,** 129
  mediation of EDHF-type relaxations of rabbit jugular vein, **263,** 52
  regulation of adhesion of anti-CD3-activated T cells to syngeneic colon adenocarcinoma cells (mouse), **255,** 460
  repression of GLUT4 promoter, mediation by transcription factor NF1, **260,** 600
Cyclic AMP-dependent protein kinase, *see* Protein kinase A
Cyclic AMP response element-like element
  TREB5 protein binding to, disruption of gene encoding, induction of cardiomyocyte necrosis at embryonic stage (mouse), **261,** 350
Cyclic GMP
  increase in human T84 colon carcinoma cells, effects of chemically synthesized porcine guanylin and uroguanylin, **259,** 141
Cyclic-nucleotide phosphodiesterase
  PDE10A2, characterization and phosphorylation: alternative splice variant of human cAMP- and cGMP-hydrolyzing PDE, **261,** 551
Cyclic strain
  endothelial cells exposed to, PI 3-kinase-dependent MAP kinase activation via p21ras, **257,** 668
Cyclin A2
  expression during G1/S transition in primary hepatocytes, regulation by cAMP (rat), **261,** 118
Cyclin A–Cdk2 complex
  DP1 phosphorylation in multiprotein complexes by, greater efficiency via weak-interacting domain, **258,** 596
Cyclin D1–cdk4
  small-molecule inhibitors of, characterization, **260,** 768
Cyclin-dependent kinase
  Cdk1/cyclin B, cyclosome activation by, role of Suc1, **257,** 12
  inhibition by ribosomal protein L34, **255,** 631
Cyclin-dependent kinase 2
  complex with cyclin E, inhibition, role in inhibition of VSMC proliferation by eicosapentaenoic acid and docosahexaenoic acid, **254,** 502
Cyclin-dependent kinase 4
  mediated apoptotic cascade in PC12 cells, **260,** 806
Cyclin-dependent kinase 5
  complex with activation domain of neuronal Cdk5 activator, model, **259,** 420
Cyclin-dependent kinase 5 activator
  related molecule, isolation, characterization, and role in response to O$_2$ deprivation (*Drosophila melanogaster*), **261,** 459
Cyclin-dependent kinase inhibitors
  p21, direct interaction with retinoblastoma tumor suppressor protein, **263,** 35
  p21WAF1/CIP1, induction, role in troglitazone suppression of cell growth of myeloid leukemia cell lines, **261,** 833
  p27^{Kip1}
    direct interaction with 73-kDa heat shock cognate protein during G1/S transition (rat FRTL-5 cells), **257,** 340
    induction by IL-6, role in IL-6 induction of G$_1$ arrest in LNCaP prostate tumor cells, **257,** 609
  small-molecule, characterization, **260,** 768
Cyclin E–Cdk2 complex
  inhibition, role in inhibition of VSMC proliferation by eicosapentaenoic acid and docosahexaenoic acid, **254,** 502
Cyclins
  interaction with human gene encoding HECT domain and RCC1-like repeats, **266,** 115
Cyclodextrin glucanotransferase
  from hyperthermophilic archaea, function and conformation, *in vitro* heat effect, **265,** 57
Cycloheximide
  ribosomes resistant to, ribosomal protein L41 gene promoter in, upregulation during growth inhibition in *Candida maltosa,* **258,** 611
Cyclooxygenase
  oxidative injury-induced activation in experimental hepatotoxicity (rat), **254,** 764
  role in bacterial lipopolysaccharide effect on prostaglandin production by astrocytes (rat), **263,** 570
Cyclooxygenase-1
  expression in gingival fibroblasts stimulated with IL-1β and EGF, role of tyrosine kinases (human), **257,** 528
  increased expression in Alzheimer's disease brains, **254,** 582
  role in immediate and delayed phases of prostaglandin synthesis in mast cells (mouse), **265,** 205
  role in selective potentiation of drug cytotoxicity by NSAIDs in human glioma cells, **259,** 600
Cyclooxygenase-2
  expression
    in bone-derived endothelial cells, induction by basic FGF (mouse), **254,** 259
    in gingival fibroblasts stimulated with IL-1β and EGF, role of tyrosine kinases (human), **257,** 528
    increase in Alzheimer's disease brains, **254,** 582
  gene promoter activity, glucocorticoid-mediated suppression, modulation by glucocorticoid receptor expression in vascular endothelial cells, **254,** 292
  gene transcription
    regulation by diverse ligands in osteoblasts (mouse), **264,** 865
    stimulation in pancreatic acinar cells after induction of acute pancreatitis (rat), **265,** 545
  induction in osteoblasts, increase of PGE$_2$ production by, effect of low-intensity pulsed ultrasound (mouse), **256,** 284
  role in immediate and delayed phases of prostaglandin synthesis in mast cells (mouse), **265,** 205
  upregulation, role in BMP-2 enhancement of osteoclast formation in presence of IL-1α (mouse), **259,** 97
Cyclopentapeptides
  endothelin A selective receptor antagonists, sodium binding properties, mass spectrometric studies, **254,** 713
Cyclophilin
  and GAPDH, β-actin, and 28S rRNA, comparison as internal standards for quantification of RNA levels under hypoxia, **259,** 523
Cyclosome
  activation by protein kinase Cdk1/cyclin B, role of Suc1, **257,** 12
  phosphorylation, role in stimulation by Fizzy/cdc20 (clam oocytes), **260,** 193
Cyclosporin A
  activation of calcineurin-A, inhibitory effects on osteoclastic bone resorption in pit assay, **254,** 248
  effect on calcein retention and inhibition of multidrug resistance pump in human leukemic lymphoblasts, **257,** 410
  effect on Fas ligand expression on vascular endothelial cells, **263,** 430
  induction of biphasic increase in KCl-induced calcium influx in GH3 pituitary cells, **254,** 169
Cyr61
  homologue with altered expression in Rat 6 cells transformed by mutant p53^{val135}, identification and characterization, **266,** 472
Cystathionine β-synthase
  gene, spatial and temporal expression during early development (human), **254,** 127
Cystatin domain
  at N-terminus of cyteine protease zymogen: human cathepsin F, **257,** 313

Cystatin S
  gene, 5′-flanking sequence and regulatory elements (rat), **261,** 705
Cysteine
  Cys-12 in potato tuber ADP-glucose pyrophosphorylase, role in heat stability, **257,** 782
  MerC residues Cys-22, Cys-25, Cys-127, and Cys-132, roles in Hg^{2+} uptake, **255,** 307
  recombinant human gastric lipase cysteine mutants, expression, **257,** 851
Cysteine proteinase
  cathepsin F, cDNA sequence: predicted cystatin domain at N-terminus of zymogen (human), **257,** 313
  ervatamin C, structural characterization, **264,** 635
  forms not observed during natural senescence, induction by drought (cowpea), **255,** 324
  lysosomal, and matrix metalloproteinases, in osteoclasts, role in bone resorption: modes of action (rabbit), **258,** 173
  papain-like, cathepsins F and W as independent subgroup of, **259,** 401
Cystic fibrosis transmembrane conductance regulator
  Cl^- channels, inhibition, role in glibenclamide-induced apoptosis in HepG2 cells, **261,** 682
  role of chloride–bicarbonate exchangers (human), **263,** 315
Cytidine deaminase
  supergene family member APOBEC-2, cloning and properties (human, mouse), **260,** 398; *erratum,* **263,** 264
Cytochrome b_5
  homologous, expression by neurons and glial cells of rat brain, **256,** 330
Cytochrome *c*
  extramitochondrial NADH oxidation mediated by, modulation by contact site density (rat), **259,** 325
  molecular interaction with cardiolipin, loss due to lipid peroxidation, **264,** 343
  nine-heme, gene sequence (*Desulfovibrio desulfuricans*), **262,** 629
  release by mitochondria
    ATP-dependent steps of apoptosis execution upstream and downstream of, NO inhibition (Jurkat cells), **258,** 215
    IgG-induced changes in, association with lymphoblastoid cell apoptosis induced by IgG (human), **264,** 896
  role in Fas-induced caspase activation and apoptosis (Jurkat, SKW6 cells), **261,** 71
  translocation associated with photodynamic therapy-induced apoptosis, inhibition of respiration and activation of caspase in lymphoma cells, **255,** 673
Cytochrome c_3
  and flavodoxin, from *Desulfovibrio gigas,* crosslinking, **256,** 367
Cytochrome *c*-553
  primary structure characteristics of lipoprotein (*Bacillus pasteurii*), **264,** 380
Cytochrome *c* oxidase deficiency
  SURFEIT-1 gene analysis and 2D blue native gel electrophoresis (human), **265,** 339
Cytochrome P450
  activity in olfactory and vomeronasal mucosa (mouse), **266,** 262
  dependent substrate oxidations, role of singlet oxygen, **263,** 392
  recombinant mammalian, indigo formation by, **265,** 469
  research on, beginning and development, review, **266,** 690
Cytochrome P450 1A1
  dependent monooxygenase, effect of vitamins A and K (rat), **262,** 565
  from rat, and yeast NADPH-P450 reductase, electrostatic interaction in mixed and fused systems, **257,** 273
  selective inhibition by resveratrol (human), **262,** 20
Cytochrome P450 1A2
  knockout mice, TCDD-mediated oxidative stress in, **264,** 376
Cytochrome P450 2A6
  gene deletion, associated reduction of susceptibility to lung cancer (human), **261,** 658
  genotyping with single PCR–RFLP and significance of homozygous *CYP2A6* deletion for nicotine metabolism (human), **262,** 146
Cytochrome P450 2B1
  phenobarbital-induced gene expression, role of phosphorylation/dephosphorylation steps (rat hepatocytes), **264,** 530
Cytochrome P450 2B2
  phenobarbital-induced gene expression, role of phosphorylation/dephosphorylation steps (rat hepatocytes), **264,** 530
Cytochrome P450 2B4
  hepatic microsomal, electron donor function of mitochondrial adrenodoxin toward, analysis (rabbit), **254,** 83
  lacking NH_2-terminal sequence, cumene hydroperoxide-supported demethylation reactions supported by (rabbit), **258,** 32
  N-terminal truncated, catalytic activities and reduction with alternative electron sources (rabbit), **263,** 678
Cytochrome P450 2B10
  related cDNA, and clone derived from cyp2b10-like pseudogene, isolation (mouse), **258,** 11
Cytochrome P450 2C9
  genotyping, methods for, validation (human), **254,** 628; *erratum,* **258,** 227
Cytochrome P450 2E1
  expression, insulin and glucagon regulation, role of phosphatidylinositol 3-kinase, Src kinase, and protein kinase A signaling pathways (rat), **266,** 304
  gene 5′-flanking region, characterization (human, rat), **263,** 286
  hepatic gene expression, alterations in obese, diabetic *ob/ob* mice and *fa/fa* Zucker rats, **255,** 300
  mRNA levels and metabolic activity, relationship (human liver), **262,** 499
Cytochrome P450 3A
  isozyme detection in intestinal microsomes (rat), **255,** 394
Cytochrome P450 3A4
  hepatic expression, individual differences, and genetic polymorphism in 5′-upstream region (human), **259,** 201
  mRNA levels and metabolic activity, relationship (human liver), **262,** 499
Cytochrome P450 3A5
  identification of unique 5′-untranslated sequence in cDNA and purification of recombinant protein, **260,** 676
Cytochrome P450 3A7
  gene promoter, functional pregnane X receptor response element in, detection (human), **260,** 377
Cytochrome P450 4A
  hepatic gene expression, alterations in obese, diabetic *ob/ob* mice and *fa/fa* Zucker rats, **255,** 300
Cytochrome P450 4C15
  differentially expressed in arthropod steroidogenic glands, cloning, **264,** 413
Cytochrome P450 4F7
  kidney-specific, cloning (*Dicentrarchus labrax*), **258,** 155
Cytochrome P450 4F8
  gene expression in seminal vesicles (human), **261,** 169
Cytochrome P450 6H1
  cDNA cloning: putative ecdysone 20-hydroxylase (*Locusta migratoria*), **259,** 305
Cytochrome P450 7A1
  gene expression in transgenic mouse, **266,** 454
  promoter, binding and transactivation by hepatocyte nuclear factor 1 in human gene but not rat, **260,** 829
Cytochrome P450 21
  mutations in Spanish patients with congenital adrenal hyperplasia, functional analysis, **262,** 635

Cytochrome P450 27A
  truncated form purified from hepatic mitochondria, biochemical characterization (rabbit), **263,** 663
Cytochrome P450 94A2
  cloning and functional characterization (*Vicia sativa*), **261,** 156
Cytochrome P450 105D1
  heterologous expression, activity, and activation effects of multiple xenobiotics (*Streptomyces griseus*), **263,** 838
Cytochrome P450 BM-3
  heme domain, oxyferrous complex with, spectral properties, **266,** 187
Cytokines
  effects on angiogenin production by human HepG2 hepatoma cells, **259,** 178
  functional pleiotropy, molecular basis, **260,** 303
  induction by proteolytically cleaved fragment of bacterial protein A, **260,** 111
  inflammatory, downregulation of m-calpain mRNA expression in fibroblastic synoviocytes from patients with osteoarthritis and rheumatoid arthritis, **266,** 341
  mRNA, RNA recognition motifs of human neuronal ELAV-like proteins involved in binding to, **256,** 263
  neuropoietic family, new member of, identification by computational EST database analysis, **262,** 132
  role in silencing by bystander macrophages of retroviral LTR-driven transgene expression, **257,** 74
  Th1, role in dose-dependent induction of cell proliferation or apoptosis by bacterial protein A, **260,** 105
Cytokinesis
  HL-60 cell, inhibition by bistratene A, mechanism, **260,** 80
  initiation in *Tetrahymena,* molecular cloning of p85 gene regulating, **264,** 112
Cytokinin oxidase
  glycosylated, gene encoding, isolation from maize, **255,** 328
Cytolysins
  soluble and membrane-bound forms, secondary structure, IR spectroscopic study (sea anemone), **254,** 174
Cytolysis
  selective, virus-infected human erythrocytes by cobra cytotoxins, **264,** 63
Cytometer
  Cellscan mark *S,* in distinguishing of fluorescence intensity and polarization kinetics in lymphocyte activation, **261,** 712
Cytoplasm
  GAP^m localization (RBL-2H3 cells), **255,** 421
  survival motor neuron protein localization in spinal cord (mouse), **254,** 10
Cytoplasmic retention defect
  in mutant LKB1 in Peutz–Jeghers syndrome patients, **261,** 750
Cytosine extension method
  detection of abnormal methylation patterns in global DNA and within CpG islands, **262,** 624
Cytoskeleton, *see also* Actin cytoskeleton
  abnormalities in Alzheimer's brain, relationship to presenilin-1 carboxyl-terminal fragments, **256,** 512
  actin polymerization, induction of FcγRIIIb shedding from human neutrophils, **255,** 568
  assembly pathways in *Drosophila* S2 cells, activation by neuroglian and DE-cadherin by independent mechanisms, **265,** 372
  coupling with β_2-integrin, disruption of, abolition of integrin β_2 signaling capacity on granulocytes, **265,** 164
  gastric epithelial cells, disorganizing effect of *Helicobacter pylori* vacuolating cytotoxin (rat), **262,** 245
  interaction with C-CAM: actin binding to long isoform of C-CAM (rat), **256,** 404
  interaction with vesicles, role in aquaporin 5 trafficking in AQP5 gene-transfected salivary gland cells (human), **266,** 443
  large tethered complex in 3T3-L1 adipocytes, phospholipase D isoform PLD1b localization, **254,** 734
  reorganization, induction of urokinase-type plasminogen activator gene by activation of FAK and Src and Ras/Erk signaling pathway ($LLC-PK_1$ cells), **262,** 666
Cytosol signal recognition particle
  54-kDa subunit, functional comparison with plastid SRP54, **254,** 253
Cytostatic compounds
  possible role in bystander effect in glioma gene therapy with HSV-TK/GCV system, **259,** 455
Cytotoxic compounds
  possible role in bystander effect in glioma gene therapy with HSV-TK/GCV system, **259,** 455
Cytotoxicity
  drug, selective potentiation by NSAIDs in human glioma cells, role of MRP and COX-1, **259,** 600
  green fluorescent protein, **260,** 712
  tumor necrosis factor, JNK-mediated resistance in L929 cells, regulation by IκBα, **263,** 107
Cytotoxic T cell epitope
  microorganism-derived, translational efficiency of plasmid encoding, codon optimization effect on, **261,** 445
Cytotoxins
  cobra, selective lysis of virus-infected human erythrocytes, **264,** 63

D

Dactylin gene
  encoding F-box/WD40-containing protein, mapping to SHFM3 critical region on 10q24 (human), **261,** 64
Daidzein
  activation of Cl^- channel and $Na^+/K^+/2Cl^-$ cotransporter in renal epithelial A6 cells, **254,** 368
  inhibition of glucose uptake in U937 cells, **260,** 568
DAMS
  antisense transcript to *SMAD5* expressed in fetal and tumor tissues, **255,** 668
Daphnetin
  identification as protein kinase inhibitor, **260,** 682
DARPP-32
  and inhibitor-1, dephosphorylation, dual control by inositol glycan putative insulin mediators from beef liver, model phosphatase 2C → phosphatase 1 activation cascade via, **255,** 150
Deafness
  in *Wriggle Mouse Sagami,* point mutation in plasma membrane Ca^{2+}-ATPase gene as cause of, **261,** 773
Deamidation
  Asn108 in prion peptide 106–126 and full-length PrP upon aging, **261,** 578
Deaminoneuraminic acid
  free, elevated expression in mammalian cells cultured in mannose-rich media, **261,** 326
Death receptors
  TRAIL receptors, expression in human brain and brain tumors, **257,** 454; *erratum,* **259,** 230
β-Defensin-2
  mRNA expression, induction by *Helicobacter pylori* in gastric MKN45 cells with *cag* pathogenicity island, **263,** 770
Defensins
  NP-2, synthetic peptides corresponding to β-hairpin loop of, mitochondrial activity (rabbit), **254,** 281
Deferoxamine
  effect on gene transcription in astrocytoma cells (human), **264,** 709
Degranulation
  basophils, secretory IgA-mediated, roles of GTP-binding regulatory proteins and PI 3-kinase (human), **264,** 575

Deguanylation
  HIV-1 RNA by recombinant pokeweed antiviral protein, **263,** 419
Dehalogenase
  two-component tetrachlorohydroquinone reductive dehalogenase system from *Phanerochaete chrysosporium,* **257,** 901; *erratum,* **259,** 232
Dehalogenation
  carbon tetrachloride, extracellular agent from *Pseudomonas stutzeri* strain KC for, identification as pyridine-2,6-bis(thiocarboxylate), **261,** 562; *erratum,* **265,** 770
Dehydroalanyl residue
  capture of 5′-deoxyadenosyl radical generated from *S*-adenosylmethionine by pyruvate formate-lyase-activating enzyme, **254,** 306
2-Dehydro-3-deoxyphosphooctonate aldolase
  characterization (*Aquifex aeolicus*), **263,** 346
Dehydroepiandrosterone sulfotransferase
  hepatic, human recombinant, sulfation of iodothyronines, **263,** 632
Deletion analysis
  Wilson disease gene 5′-flanking region (human), **259,** 206
Demeclocycline
  effects on Na^+/K^+ pump activity in Calu-3 human airway cells, **260,** 13
Demethylation
  cumene hydroperoxide-supported reactions catalyzed by CYP2B4 lacking NH_2-terminal sequence, **258,** 32
  DNA, during postnatal development of rat pancreas, correlation with cholecystokinin type A receptor gene expression, **264,** 29
Demethylchlortetracycline, *see* Demeclocycline
Dendrimers
  mediated transfection, enhancement using synthetic lung surfactant Exosurf Neonatal *in vitro,* **264,** 253
Dendritic cells
  features in IFN-γ transgenic mice, relevance to cancer development, **259,** 294
Dendritic morphology
  induction in fibroblasts by pharbin (mouse), **261,** 188
Dendrotoxin-I
  and calcicludine, structure–activity relationships (rat brain), **262,** 319
Denervation
  chicken skeletal muscle, increased acetylcholinesterase mRNA synthesis following, **260,** 251
Dengue virus
  NS5 protein, 37-amino-acid interdomain of, functional NLS and inhibitory CK2 site, **257,** 731
de novo design
  betabellin 16D: β-sandwich protein forming narrow fibrils associating into broad ribbons, **264,** 498
Dentatorubral–pallidoluysian atrophy
  pathological role of unique characteristics of ubiquitin-bonded complex (human), **264,** 37
Dentatorubral-pallidoluysian atrophy protein complex
  pathological ubiquitination in DRPLA brain (human), **260,** 133
  ubiquitin-bonded, characteristics, pathological role in DRPLA (human), **264,** 37
Dentin sialoprotein
  rat gene, regulatory sequences, conferral of tooth-specific expression in transgenic mouse, **260,** 433
5′-Deoxyadenosyl radical
  generated from *S*-adenosylmethionine by pyruvate formate-lyase-activating enzyme, capture by dehydroalanyl residue, **254,** 306
3-Deoxyglucosone
  increase in human uremic plasma, *in vivo* determination, **256,** 89
3-Deoxy-D-*manno*-octulosonic acid 8-phosphate synthase, *see* 2-Dehydro-3-deoxyphosphooctonate aldolase
15-Deoxy-$\Delta^{12,14}$-prostaglandin J_2
  induction of apoptosis in JEG3 choriocarcinoma cells, **262,** 579
Deoxyribonuclease I
  polymorphism, *DNASE1*6* allele, encoding of Arg to Cys substitution responsible for instability (human), **260,** 280
Deoxyribonuclease II
  active, development of, structural requirements (human), **256,** 591
  related acid DNase, cDNA cloning (rat), **265,** 395
2-Deoxy-D-ribose
  induced apoptosis in HL-60 cells, association with cell cycle progression by spermidine, **257,** 460
15-Deoxy-16-*m*-tolyl-17,18,19,20-tetranorisocarbacyclin
  protective effects on ischemic delayed neuronal damage (gerbil), **265,** 301
Dephosphorylation, *see also* Phosphorylation/dephosphorylation
  DARPP-32 and inhibitor-1, dual control by inositol glycan putative insulin mediators from beef liver, model phosphatase 2C → phosphatase 1 activation cascade via, **255,** 150
  protein tyrosine, stimulation by laminin in PC12 cells, **262,** 713
  retinoblastoma protein, role in heat-induced G1 arrest (HeLa, NCI-H1299 cells), **266,** 377
Depolarization
  mitochondrial, caspase activation after, prevention by 4b,5,9b,10-tetrahydroindeno[1,2-*b*]indole: inhibition of apoptosis (Jurkat cells), **264,** 622
Depolymerization
  peptide-induced, of recombinant C-terminal fragment of BiP/GRP78, specificity, **263,** 181
Depurination
  HIV-1 RNA by pokeweed antiviral protein isoforms PAP-I, PAP-II, and PAP-III, **260,** 453
Δ^6-Desaturase
  molecular cloning and functional characterization (rat), **255,** 575
Δ^{12}-Desaturase gene
  Mucor rouxii, heterologous expression in *Saccharomyces cerevisiae,* **263,** 47; *erratum,* **265,** 771
Desmosome
  and nucleus, pinin in, differentiation by antibodies, **263,** 192
Desulfovibrio desulfuricans
  nine-heme cytochrome *c* gene, sequence, **262,** 629
Desulfovibrio gigas
  cytochrome c_3 and flavodoxin from, crosslinking, **256,** 367
Desulfovibrio vulgaris
  hydrogenase, catalytic action under H_2 atmosphere, H_2S liberation during, **255,** 295
  NADH peroxidase activity of rubrerythrin, **255,** 317
Detoxification enzyme inducer
  benzyl isothiocyanate, temporal effects in HT29 cells: activation of JNK prior to AP-1 and NF-κB, **257,** 149
Deubiquitinating enzymes
  diversity and emerging roles, review, **266,** 633
Development
  adenylate kinase isozyme levels in brain during, analysis (rat), **254,** 618
  and aging, caspase levels in rat during, comparison with Alzheimer's disease, **256,** 381
  alveolar structures in whole-organ culture of mouse mammary gland, effect of estrogen, **232,** 340; *corrigendum,* **257,** 249
  anterior head, Otx proteins essential for, function and evolution, **258,** 229; *erratum,* **260,** 575
  brain
   related cDNAs C184L, C184M, and C184S expressed during, encoding of unrelated proteins (mouse), **263,** 737
   role of leptin (mouse), **256,** 600
  Ca^{2+}/calmodulin-dependent protein kinase II gene expression in *Drosophila* CNS during, **260,** 707

Development (*continued*)
  cyclin-dependent kinase 5 activator-like molecule expression during, analysis (*Drosophila melanogaster*), **261,** 459
  early
    associated transient increase of elongation factor-1 δ kinase (sea urchin), **266,** 425
    spatial and temporal cystathionine β-synthase gene expression during, analysis (human), **254,** 127
  embryonic
    expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
    ornithine decarboxylase activity during, effect of 60-Hz magnetic field (chicken), **265,** 211
    role of Crk-II: analysis with mutant mice with Crk-II removed by gene trap insertional mutagenesis, **266,** 569
  glutamate-gated chloride channel homologue expression in, analysis (*Haemonchus contortus*), **254,** 529
  hematopoietic, primordial germ-cell derived embryonic germ cells in culture (mouse), **260,** 475
  insulin-like growth factor binding proteins in cerebrospinal fluid during, analysis (human), **264,** 652
  mice lacking Pin1, **265,** 658
  neurons, transcription of calcium transporters and channels during, control by calcium, **266,** 624
  postnatal, of rat pancreas, DNA demethylation during, correlation with cholecystokinin type A receptor gene expression, **264,** 29
  role of deubiquitinating enzymes, **266,** 633
  sarcoglycan gene product expression during, analysis in cultured myocytes (mouse), **262,** 88
  testicular, associated expression of angiopoietin-2B and VEGF (chicken), **260,** 492
  vegf-d mRNA expression pattern in adult and fetal mouse, **257,** 891
Developmental defects
  specific, induction by double-stranded RNA in zebrafish embryo, **263,** 156
Developmental regulation
  Δ^1-pyrroline-5-carboxylate synthetase 1 gene expression in *Arabidopsis thaliana,* **261,** 766
Dexamethasone
  and cytokines, effects on angiogenin production by human HepG2 hepatoma cells, **259,** 178
  downregulation of tenascin expression in early lung organogenesis (rat), **263,** 597
  effect on c-erbB-4/HER4 expression in T47D breast cancer cells, **258,** 559
  and sex hormones, effects on leptin expression in rat adipose tissue, **259,** 624
  suppression of cyclooxygenase-2 gene promoter activity in vascular endothelial cells mediated by, modulation by glucocorticoid receptor expression, **254,** 292
  upregulation of 5-lipoxygenase in mast cells (human), **265,** 617
Dexniguldipine
  effect on calcein retention and inhibition of multidrug resistance pump in human leukemic lymphoblasts, **257,** 410
DgTI
  Dioclea glabra trypsin inhibitor, primary structure: Bowman–Birk inhibitor, **261,** 838
Diabetes
  aorta of rats with, increased adrenomedullin expression, **258,** 453
  energy metabolism in, regulation in human cells, **266,** 662
  hepatocyte nuclear factor-1α mutations associated with, analysis (human), **266,** 196
  insulin-dependent
    diabetes-associated diseases in patients with, relationship to Pro12Ala missense mutation of PPARγ, **254,** 450
    frequency and severity in congenic diabetes-prone BB.Sa and BB.Xs rats, comparison with progenitor strain BB/OK, **263,** 843
  non-insulin-dependent
    diabetes-associated diseases in patients with, relationship to Pro12Ala missense mutation of PPARγ, **254,** 450
    hepatic *CYP2E1* and *CYP4A* gene regulation in, analysis in *ob/ob* mice and *fa/fa* Zucker rats, **255,** 300
    KK-A^y mouse model, effects of n-3 polyunsaturated fatty acids, **259,** 85
    mitochondrial glycerol-3-phosphate dehydrogenase gene detection in Spanish patients, **263,** 439
    pancreatic B cells and islets from rat models of, Gαolf identification, **254,** 269
  tumor-associated: glucose metabolism alterations in isolated perfused rat hepatocytes induced by pancreatic cancer conditioned medium, **257,** 622
Dialkyl phthalates
  binding characteristics for estrogen receptor, **254,** 311
Diamide
  effects on properties of rat brain β_1-adrenergic and human platelet serotonin$_{2A}$ receptor recognition sites, **257,** 629
Diazepam
  myorelaxant and sedative effects and locomotor activity induced by, antagonism by 6-methyl-3′-bromoflavone (mouse), **262,** 643
Dibutyryl cAMP
  synergistic action with retinoic acid to enhance MMP-2 basal promoter activity, **258,** 663
  and thyrotropin, Cl^-/I^- channel activated by, in FRTL-5 cells, **259,** 631
Dichloroacetate
  inhibition of glutathione *S*-transferase ζ and tyrosine metabolism, implications for DCA biotransformation and toxicity (human, rat), **262,** 752
Dichloroacetic acid
  deuterated, glutathione transferase ζ-catalyzed biotransformation, **261,** 779
2,6-Dichloro-*p*-hydroquinone 1,2-dioxygenase
  characterization (*Sphingomonas chlorophenolica*), **266,** 322
Dictyostelium discoideum
  differentiation-inducing factor-1 from, activation of Akt/PKB in human leukemia K562 cells, **263,** 790
  MAP kinase ERK2 regulation by serpentine receptor-dependent pathway, **260,** 504
Dideoxycytidine
  cell line resistant to, collateral resistance to 5-fluoro-2′-deoxyuridine (H9 cells), **262,** 657
DIDS
  anion-dependent Mg^{2+} efflux pathway sensitive to, in rat ventricular myocytes, **264,** 334
Dielectrophoretic manipulation
  cell reactions (BHK21 C-13 cells), **257,** 687
Diet
  energy-deficient, suppression of systemic and gut immunity during infection (mouse), **264,** 796
  fish oil feeding, or fibrate administration, upregulation of liver uncoupling protein-2 mRNA in mice, **257,** 879
  low-calcium, capacity to induce renal vitamin D 1a-hydroxylase, decrease in adult rats, **255,** 731
Diethanolamine
  inhibition of choline uptake and phosphatidylcholine synthesis in CHO cells, **262,** 600
Differential display
  for expressed genes, **262,** 365; *erratum,* **265,** 272
  identification of human MD-1 homologue as BCG-regulated gene product in monocytes, **256,** 325

- Differential hybridization
  - identification of receptor genes in renal cell carcinoma associated with angiogenesis (human), **257,** 855
- Differentiation
  - adipocytes
    - brown, immortal, from *p53*-knockout mice, **255,** 221
    - identification of inducible genes at early stage (3T3-L1 cells), **254,** 299
    - induction of Id4 gene expression during, analysis (3T3-L1 cells), **256,** 614
    - role of CCAAT enhancer binding proteins (3T3-L1 cells), **266,** 677
  - astrocytes, potentiation of acidic FGF-induced $p21^{ras}$/Erk signaling pathway *in vitro* (rat), **260,** 441
  - *Brachyury* expression dependent on, regulation in P19 cells by PEA3 site flanked by SP1, SP4, and GATA sites, **254,** 542
  - calvarial osteoblasts, correlation with bone morphogenetic protein-3b gene expression (rat), **256,** 419
  - chondrogenic, coordinate regulation by noggin and BMP-4, **260,** 240
  - colon carcinoma cells, influence of multidrug-resistant phenotype (HT29-D4 cells), **259,** 43
  - effects on insulin secretion from nonendocrine cells with engineered human proinsulin cDNA, **265,** 361
  - erythroid
    - CD34+ progenitors, role of erythropoietin receptor tyrosine residues (human), **256,** 685
    - in K562 cells, heme regulatory effects during, **258,** 87
    - terminal, *in vitro,* hemoglobin synthesis during, role of transcription factor CP2, **263,** 580
  - hematopoietic progenitors, differential expression of protein kinase C transcripts in, analysis (human), **263,** 603
  - induced by FGF 1 overexpression in SH-SY5Y neuroblastoma cells: BCL-2 upregulation, **258,** 745
  - late-phase, in mouse chondrogenic EC cells ATDC5, Indian hedgehog actions in, **257,** 814
  - macrophage, arrest in HL-60 cells by Wilms' tumor gene product WT-1 through the zinc-finger domain, **254,** 164
  - megakaryocytes, Mpl ligand-induced, $TAF_{II}32$ isoform repression as part of program of genes regulated during, **262,** 55
  - melanocyte, marker TRP-1 expression, regulatory role of microphthalmia transcription factor (human), **256,** 657
  - monocytic, HL-60 cells, induction of nuclear translocation of phosphatidylinositol 3-kinase and PI-specific PLC isoforms, **259,** 314
  - muscle, in L6 myoblasts, time course of M-type 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase expression during, **259,** 250
  - myoblasts
    - cells repopulated with mitochondria harboring mtDNA mutations, long-term analysis (human), **266,** 179
    - into osteoblast lineage, induction by BMP-2 expression via adenoviral vector (C2C12 cells), **262,** 739
  - myocytes
    - *in vitro,* sarcoglycan gene product expression during, analysis (mouse), **262,** 88
    - role of acetyl-CoA carboxylase β (H9c2 cells), **254,** 657
  - neuroblastoma cells, associated downregulation of HASH-1, **256,** 557
  - osteoblastic, in bovine microvascular pericytes, induction by AGEs, **258,** 353
  - osteoblasts, efp expression and regulation during, analysis in primary culture (rat), **261,** 412
  - osteoclasts
    - effect of extracellular calcium concentrations *in vitro* (mouse), **265,** 484
    - in hematopoietic cell cultures stimulated with RANKL and M-CSF, enhancement by TGF-β, **265,** 233
    - regulation by ODF/OPGL/TRANCE/RANKL, **256,** 449
  - pancreatic cancer cells, effect of lipoxygenase inhibition (human), **266,** 392
  - preadipocytes, role of regulation of stearoyl-CoA desaturase genes, **266,** 1
  - preosteoclasts, regulation by macrophage-inflammatory protein-1α *in vitro* (pig), **254,** 773
  - role of deubiquitinating enzymes, **266,** 633
  - spermatogenic cells, tetratricopeptide repeat-containing protein gene *tpis* induced by, isolation (mouse), **264,** 81
  - TBP-interacting protein 120A gene expression during, analysis (F9, HL60, and P19 cells), **266,** 123
  - transdifferentiation of alveolar epithelial primary cultures, caveolin-1 expression and biogenesis of caveolae during, analysis (rat), **262,** 744
  - U937 cells, enabling of phospholipase D-dependent pathway of cytosolic PLA_2 activation, **260,** 232
  - ventrally emigrating neural tube cells into heart muscle (chicken), **254,** 601
- Differentiation-inducing factor-1
  - activation of Akt/PKB in human leukemia K562 cells (*Dictyostelium discoideum*), **263,** 790
- Diffusible factor
  - synchronization of glucose-induced Ca^{2+} transients in pancreatic β-cells, **254,** 436
- Digestive organs
  - ganglioside sialidase expression (human), **261,** 21
- Dihaloacetic acids
  - deuterated, glutathione transferase ζ-catalyzed biotransformation, **261,** 779
- 1,2-(Dihexadecanoyl)-*sn*-glycero-3-phosphocholine
  - sensitized liposomes, fast laser-induced solute release, **262,** 406
- *cis*-2,3-Dihydro-2,3-dihydroxybiphenyl
  - dehydrogenation by *cis*-2,3-dihydro-2,3-dihydroxybiphenyl dehydrogenase and *cis*-1,2 -dihydro-1,2-dihydroxynaphthalene dehydrogenase, **260,** 181
- *cis*-2,3-Dihydro-2,3-dihydroxybiphenyl dehydrogenase
  - and *cis*-1,2-dihydro-1,2-dihydroxynaphthalene dehydrogenase, utilization of same range of substrates (*Comamonas testosteroni* B-356), **260,** 181
- *cis*-1,2 -Dihydro-1,2-dihydroxynaphthalene
  - dehydrogenation by *cis*-2,3-dihydro-2,3-dihydroxybiphenyl dehydrogenase and *cis*-1,2 -dihydro-1,2-dihydroxynaphthalene dehydrogenase, **260,** 181
- *cis*-1,2-Dihydro-1,2-dihydroxynaphthalene dehydrogenase
  - *and cis*-2,3-dihydro-2,3-dihydroxybiphenyl dehydrogenase, utilization of same range of substrates (*Pseudomonas putida* G7), **260,** 181
- 3,4 -Dihydro-3,4-dihydroxy-2,2′,5,5′-tetrachlorobiphenyl
  - dehydrogenation by *cis*-2,3-dihydro-2,3-dihydroxybiphenyl dehydrogenase and *cis*-1,2 -dihydro-1,2-dihydroxynaphthalene dehydrogenase, **260,** 181
- 7,8-Dihydroneopterin
  - solutions, formation of oxygen radicals in, **264,** 262
- Dihydropteroate synthase
  - *Streptococcus pneumoniae,* substrate binding order and sulfonamide inhibition, **258,** 752
- Dihydrotestosterone
  - agonist action, dependence on androgen receptor phosphorylation/dephosphorylation, **259,** 21
- 2,3-Dihydroxy-1,4-dithiolbutane
  - modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
- 1,25-Dihydroxyvitamin D_3
  - direct action on circulating human osteoclast precursors, **264,** 590
  - suppression of VCAM-1 receptor VLA-4 expression in HL-60 cells, **255,** 371
- 1α,25-Dihydroxyvitamin D_3
  - osteoclast formation induced by, inhibition by bFGF via suppression of osteoclast differentiation factor production (mouse), **265,** 45
- 1α,25-Dihydroxyvitamin D_3 receptor
  - association with eukaryotic and prokaryotic chaperone proteins (human), **260,** 446

3,3′-Diiodothyronine
  hepatic uptake, role of Na^+/taurocholate cotransporting polypeptide and organic anion transporting polypeptide, **254,** 497
4,4′-Diisothiocyanato-stilbene-2,2′-disulfonic acid
  anion-dependent Mg^{2+} efflux pathway sensitive to, in rat ventricular myocytes, **264,** 334
Dilated cardiomyopathy
  enhanced expression and autoimmunity of recombination signal binding protein-jκ in, analysis (human), **266,** 432
  idiopathic, myosin autoantibodies in, subclass specificity, **259,** 255
Dimerization
  CD31, **261,** 283
  heparin affin regulatory peptide/pleiotrophin, promotion by glycosaminoglycans, **266,** 437
2,3-Dimethoxy-5-methyl-1,4-benzoquinone
  paralysis of filarial parasites *in vitro,* **256,** 81
2-(4-Dimethylaminostyryl)-1-ethylpyridinium
  accumulation in *Pseudomonas aeruginosa,* role of efflux pumps and outer membrane permeability barrier, **261,** 452
1,3-Dimethyl-2,4-(1*H*,3*H*)-quinazolinedione
  binding to odorant binding proteins cloned from *Phyllopertha diversa,* **263,** 832
Dimyristoyl-L-α-phosphatidylcholine
  and DMPG, reconstituted bilayers
    actin binding protein fragment insertion into, **259,** 108
    α-actinin fragment insertion into, **264,** 225
Dimyristoyl-L-α-phosphatidylglycerol
  and DMPC, reconstituted bilayers
    actin binding protein fragment insertion into, **259,** 108
    α-actinin fragment insertion into, **264,** 225
Di(nucleoside) polyphosphate hydrolase
  encoding by *IalA* invasion gene of *Bartonella bacilliformis,* **256,** 474
Dinucleotide repeats
  transcribed, and associated genes, analysis (channel catfish), **259,** 190
1,2-(Dioctadecanoyl)-*sn*-glycero-3-phosphocholine
  sensitized liposomes, fast laser-induced solute release, **262,** 406
Dioxin-responsive genes
  expression in human endometrial cells in culture, **257,** 259
1,2-(Dipentadecanoyl)-*sn*-glycero-3-phosphocholine
  sensitized liposomes, fast laser-induced solute release, **262,** 406
Dipeptidyl-peptidase IV
  hepatic, acidic N-glycans from, *in vivo* modulation by *N*-propanoyl-D-mannosamine (rat), **263,** 76
Diphtheria toxin receptor
  hamster, cloning, expression, and characterization, **254,** 325
Direct current
  calvarial organ culture calcium levels stimulated by, effects of faradic products (mouse), **264,** 657
Discs large tumor suppressor protein
  from *Drosophila,* rat homolog rDLG6, identification and expression in brain, **265,** 462
Dishevelled
  functional analysis: identification of EPS8 as Dvl1-associated molecule, **266,** 216
Disulfide bonds
  pairing of pheromone-binding protein and general odorant-binding protein 2 from *Bombyx mori,* **266,** 386
  recombinant human gastric lipase cysteine mutants, **257,** 851
  stanniocalcin (chum salmon), **257,** 295
1,2-(Ditetradecanoyl)-*sn*-glycero-3-phosphocholine
  sensitized liposomes, fast laser-induced solute release, **262,** 406
5,5′-Dithio-bis(2-nitrobenzoic acid)
  modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
  partially folded creatine kinase modified by, reactivation and refolding, **259,** 450
Dithiothreitol
  α-lactalbumin denatured by, chaperoning by α-crystallin (bovine), **261,** 292
  modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
Divergent evolution
  monocot and dicot mitochondria: compilation and analysis of plant mitochondrial promoter sequences, **256,** 409
DLG
  from *Drosophila,* rat homolog rDLG6, identification and expression in brain, **265,** 462
DNA
  abnormalities, detection by arbitrarily primed PCR fingerprinting (human), **258,** 271
  addition of labeled nucleotides to, by DNA polymerase I, optical mapping, **254,** 466
  alpha$_2$-macroglobulin, polymorphism, association with late-onset Alzheimer's disease, **264,** 48
  anti-dsDNA antibodies, cross-reaction with phosphoprotein P1, role of phenylalanines in C-terminal hydrophobic cluster (human), **263,** 334
  association with lysozyme, **266,** 366
  AT-rich five-base core sequence, recognition by Mrf-2 DNA-binding domain via major- and minor-groove contacts, **258,** 326
  calf thymus, interaction with ellagic acid, flow linear dichroism UV–VIS spectroscopic study, **265,** 416
  compaction profile, archaeal histones from *Pyrococcus kodakaraensis* KOD1, **258,** 416
  complementary strands, overlapping sequences with high homology to functional proteins: rumen bacterium *Prevotella albensis,* **263,** 58
  damage, detection in exfoliated cells from human breast milk, **257,** 319; *erratum,* **259,** 494
  demethylation, during postnatal development of rat pancreas, correlation with cholecystokinin type A receptor gene expression, **264,** 29
  double-strand breaks
    episomal vectors in lymphoblasts, repair, role of p53 (human), **264,** 702
    site-specific, generation in human cells by homing endonucleases I-*Ppo*I and I-*Cre*I, **255,** 88
  elements bound by c-Jun *in vivo,* sequence variations (rat), **256,** 68
  foreign, in HBV, replication *in vitro,* **262,** 530
  fragmentation
    in H9c2 cells, role of Ca^{2+} (rat), **262,** 350
    in lung fibroblasts, effects of exogenous NO and hyperoxia (human), **262,** 685
    role in intracellular acidification during apoptosis, **254,** 821
  genomic region upstream from ovine intestinal Na^+/glucose cotransporter cDNA, isolation and characterization, **257,** 533
  Holliday junctions, specific helicase RecG, resolution of R-loop in replication origin of human mitochondrial DNA, **255,** 1
  hypervariable minisatellite Pc-1, intramolecular quadruplex formation of G-rich strand (mouse), **264,** 327
  hypochlorous acid-induced base modification, potentiation by nitrite, **257,** 572
  individual molecules embedded in gel, dynamics by fluorescence microscopy, **258,** 102
  interferon stimulatory response element DNA–protein complexes, stimulation by hepatocyte isolation (rat), **263,** 627
  methylation
    analysis with bisulfite treatment and PCR–SSCP in colorectal cancer with microsatellite instability (human), **262,** 671
    density in global DNA and within CpG islands, assessment, **262,** 624
  mismatch repair, *hMLH1* gene for, core promoter and frequent single-nucleotide polymorphism, **256,** 488
  mitochondrial, *see* Mitochondrial DNA

  nonenzymatic glycation adduct N^2-(1-carboxyethyl)deoxyguanosine, induction of single-strand breaks and augmentation of mutation frequencies, **264,** 544
  oxidative damage
    analysis, implications of discrepancies in measurement of UVC-induced 8-oxo-2′-deoxyguanosine by HPLC-EC and GC-MS, **259,** 374
    Fenton reaction-mediated, protective effect of kinetin, **265,** 499
    by minor toluene metabolites, related carcinogenesis and reproductive dysfunction (human), **261,** 478
    modulation by tomato consumption (human), **262,** 828
    by nitrobenzene metabolite in presence of NADH and Cu(II) (bovine), **257,** 555
  paired domain recognition motif, mediation of Pax2 repression of gene transcription (zebrafish), **266,** 532
  pressure-induced synthesis in aortic smooth muscle cells in threshold-dependent manner (human), **256,** 212
  –protein noncovalent complexes, electrospray ionization mass spectrometry, **257,** 1
  pyrimidine dimers and single-strand breaks, repair in Scid cells (mouse), **264,** 878
  quinone-mediated arylation, prevention by antioxidants (HL-60 cells), **262,** 769
  replicating, double-strand break targeting to, in identification of defective DSB repair subpathway in ataxia-telangiectasia cells (human), **261,** 317
  ribosomal, strength of autonomously replicating sequences among repeats in, differences (*Saccharomyces cerevisiae*), **266,** 190
  sequences responsible for reduced promoter activity of phospholipid transfer protein by fibrate (human), **264,** 802
  single large molecule, specific sequence on, visualization with fluorescence microscopy based on DNA stretching, **265,** 140
  single-strand breaks, in agarose-embedded chromatin of nonapoptotic cells, **264,** 388
  single-strand breaks and mutation frequency, effects of nonenzymatic glycation adduct of DNA N^2-(1-carboxyethyl)deoxyguanosine, **264,** 544
  single-stranded backbone, sequence-directed structure of, recognition by nucleases, **256,** 532
  surfactant interactions with, analysis: duplex stabilization from coupled cooperativity in ligand binding, **263,** 41
  target, recognition by CO-sensing transcriptional activator CooA, **261,** 270
  transcribed dinucleotide microsatellites and associated genes, mapping (channel catfish), **259,** 190
  transposition, studies using Tn5, **266,** 729
DNA adducts
  formation by 1,2-epoxy-3-(*p*-nitrophenoxy)propane, **261,** 844
  nonenzymatic glycation, N^2-(1-carboxyethyl)deoxyguanosine, induction of single-strand breaks and augmentation of mutation frequencies, **264,** 544
DNA binding
  by apolipoprotein repressor protein-1 of rat hepatocytes, matrix-mediated changes, **259,** 651
  by artificial tandem protein of c-Myb DNA-binding domain, specificity, **262,** 94
  end binding by Ku80, functional domains of Ku80 required for, **261,** 802
  by FAC1, enhancement by phosphorylation, **260,** 785
  by hepatocyte nuclear factor-1α, effects of diabetes-associated mutations (human), **266,** 196
  by MIDA1, distinct activities of, conversion by Id1 association with MIDA1, **266,** 147
  Mrf-2 domain involved in, recognition of five-base core sequence through major- and minor-groove contacts, **258,** 326
  by Myc-associated zinc finger protein, regulation by casein kinase II, **262,** 198
  by p53 *in vitro,* specificity, modification by mutations at position 277 (human), **263,** 1
  by paired and homeobox protein Pax-4, **259,** 510
  Pur α to single-stranded purine-rich elements, activation by calmodulin, **255,** 406
  purine clusters to lipocortin I heterotetramer, **265,** 200
  by Ro52, properties and sequence specificity (human), **259,** 665
  by Stat3, activation by c-Src (COS-7, F9 cells), **266,** 481
  stimulation by Sp1 phosphorylation of Erk 2, **254,** 454
  telomere-binding activity of replication factor C large subunit p140 (human), **258,** 482
  ZF5 domain involved in, identification (mouse), **255,** 528
DNA binding protein
  cooperating with estrogen receptor, identification as retinoblastoma interacting zinc finger protein, **264,** 983
  ssDNA-binding, of herpes simplex virus type 1, photoaffinity labeling with oligodeoxyribonucleotides, **264,** 493
DNA demethylase
  MBD2, mRNA expression, reduction in colorectal and stomach cancers (human), **264,** 962
DNA-dependent protein kinase
  catalytic subunit, preferential cleavage in Bcl-2-sensitive manner in butyric acid-treated colorectal carcinoma cells, **260,** 775
DNA fragmentation factor 40
  nuclease activity, two independent inhibitory domains: DFF45 in role of chaperone and inhibitor, **264,** 176
  synergistic binding of multiple domains of DFF45, **264,** 181
DNA fragmentation factor 45
  chaperone and inhibition activities: two independent inhibitory domains of DFF40 nuclease activity, **264,** 176
  multiple domains, synergistic binding to DFF40, **264,** 181
DNA-fragmenting factor
  control of nuclear apoptosis, **254,** 552
dnaK
  DNA sequence encoding, DNA sequence with homology to GDH gene on complementary strand (*Prevotella albensis*), **263,** 58
DNA polymerase α–primase complex
  B subunit, phosphorylation and dephosphorylation in early embryogenesis of *Drosophila,* **254,** 372
DNA polymerase β
  gene, alteration in breast carcinomas and fibroadenomas, **259,** 429
DNA polymerase I
  addition of labeled substrate to fixed DNA molecules, optical mapping, **254,** 466
DNA repair
  defective, ribosomal protein S3-related, noninvolvement in chromosomal instability of Fanconia anemia cells, **264,** 518
  double-strand breaks
    defective subpathway for, identification in ataxia-telangiectasia cells (human), **261,** 317
    episomal vectors in lymphoblasts, role of p53 (human), **264,** 702
  8-hydroxyguanine lesions in human cells, mutM homologue type 1a as major repair enzyme for, **258,** 605
  Ku80 functional domains required for DNA end binding and survival after radiation, **261,** 802
  pyrimidine dimers and single-strand breaks in genes, by Scid cells (mouse), **264,** 878
DNA repair synthesis
  focal sites in human chromosomes, **257,** 378
*DNASE1*6*
  allele of deoxyribonuclease I polymorphism, encoding of Arg to Cys substitution responsible for instability (human), **260,** 280

- DNA synthesis
  - in bovine coronary artery SMC, effects of platelet surface membranes, **259,** 341
  - EGF-stimulated, in cultured rat hepatocytes, relationship to STAT activation, **258,** 565
  - hepatocytes in mouse liver, effects of HB-EGF, **259,** 683
  - MAP kinase-dependent, induced by EGF in mesangial cells, inhibition by BMP-2, **258,** 490
- DNA vaccine
  - translational efficiency in mammalian cells, codon optimization effect on, **261,** 445
- DOC-1 related protein
  - DOC-1R, gene identification and mutation analysis (human), **255,** 59
- Docosahexaenoic acid
  - dietary, effects on obesity and diabetes (KK-A^y mouse), **259,** 85
  - inhibition of VSMC proliferation by inhibition of phosphorylation of Cdk2–cyclinE complex, **254,** 502
- Dodecamer binding protein
  - purification and characterization from yeast mitochondria, **261,** 740
- *n*-Dodecyl-β-D-maltoside
  - effect on anion exchange perfusion chromatography and gel filtration of intact chloroplast H$^+$-ATP synthase (spinach), **265,** 520
- Dolastatin 10
  - and bryostatin 1, modulation of cIAP-1, effect on apoptosis of early pre-B acute lymphoblastic leukemia Reh cells, **266,** 76
- Dopamine
  - release from striatum, role of ryanodine receptor type 3, evidence from mutant mouse lacking the receptor, **266,** 588
  - transport in purified rat striatal synaptic vesicles, effects of styrene and styrene oxide, **255,** 70
- Dopamine D2 receptor
  - D2L and D2S, G protein-mediated activation of MAP kinase, **256,** 33
- Dopamine D4-like binding sites
  - [^{3}H]nemonapride-labeled, in primate cerebral cortex, substantial 5-HT2A receptor portion in, **255,** 367
- Dopamine D4 receptor
  - gene associated with expression and schizophrenia, genetic polymorphism in promoter region, **258,** 292
- Dopamine D5 receptor
  - mRNA, distribution in ventromedial hypothalamic nucleus (rat), **266,** 556
- Down syndrome
  - ets-2 gene expression in hearts of patients: evidence against gene dosage effects hypothesis, **254,** 395
- Doxorubicin
  - activation of p53 through phosphorylation in MDM2-overexpressing BL2 cells, **264,** 860
  - cancer cells treated with, STAT1-independent upregulation of FADD and procaspase-3 and -8 (human), **256,** 603
  - cardiotoxicity induced by, mitochondrial DNA alterations in, effects of nimesulid and metoprolol, **254,** 651
  - cytotoxic effects in T98G human glioma cells, enhancement by NSAIDs: role of MRP and COX-1, **259,** 600
  - inhibition of RH II/Gu RNA helicase activity by binding to substrate, **266,** 361
- Doxycycline
  - induction of Fas/Fas ligand-mediated apoptosis in Jurkat T cells, **260,** 562
  - susceptibility of human granulocytic ehrlichiosis agent in HL-60 cells, p44 expression changes as measure of, **257,** 351
- DP1
  - phosphorylation by cyclin A–Cdk2 in multiprotein complexes, greater efficiency via weak-interacting domain, **258,** 596
- Dr1
  - overexpression in *Xenopus* postblastular embryo, inhibition of class II gene transcription, **265,** 644
- *drp35* gene
  - *Staphylococcus aureus,* expression, induction by cell wall-affecting antibiotics, **264,** 348
- Drug cytotoxicity
  - selective potentiation by NSAIDs in human glioma cells, role of MRP and COX-1, **259,** 600
- DSLET-Mal
  - affinity labeling of δ opioid receptors, **265,** 513
- DTX-I, *see* Dendrotoxin-I
- DU-6622
  - specific chiral isomers, differential inhibition of pancreatic lipase and HMG-CoA synthase, **265,** 536
- Duchenne muscular dystrophy
  - early decrease of IIx myosin heavy chain transcripts in, analysis (human), **255,** 466
  - increased number of caveolae and caveolin-3 overexpression in, **261,** 547
- Dvl1
  - EPS8 as molecule associated with, identification, **266,** 216
- Dynein
  - Tctex2-related outer arm light chain, phosphorylation at activation of sperm motility, **256,** 177
- DYRK1B
  - cloning and characterization (human, mouse), **254,** 474
- DYRK/MNB
  - biochemical properties and physiological functions, **266,** 291
- β-Dystroglycan
  - N-terminal extracellular region, structural and functional analysis, **266,** 274

E

- E1A
  - induction of apoptosis in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
  - inhibition of transcriptional activation of myogenin gene by MEF2-mediated recruitment of Myf5, **265,** 222
- E2F1
  - weak cyclin A interaction compared to p107 domain, association with more efficient DP1 phosphorylation, **258,** 596
  - regulation of early S phase checkpoint in NIH3T3 fibroblasts, **258,** 77
- E6 protein
  - HPV-16, and HBV X protein, transactivation of HBV pregenomic promoter, mediation by AP1 site of E element in enhancer I in human liver cell, **265,** 62
- Early nodulin genes
  - occurrence in *Oryza* species and related grasses, **258,** 148
- E-box motif
  - role in BMP-4 gene expression in osteogenic cells, **263,** 560
- Ecdysone
  - L-glutamate transporter GLT-1 expression inducible by, in embryonic kidney cells (human), **265,** 101
- Ecstasy (MDMA), *see* 3,4-Methylenedioxymethamphetamine
- Ectonucleotidases
  - CD39, localization to caveolae (COS-7, HUVEC cells), **262,** 596
- EDG3
  - specificity for sphingosine 1-phosphate and sphingosylphosphorylcholine, with signaling distinct from EDG1 and AGR16, **260,** 203
- EDHF, *see* Endothelium-derived hyperpolarizing factor
- Editosome assembly
  - role of RNA 3′ of apolipoprotein B mRNA mooring sequence, tissue-specific differences (rat enterocytes, liver), **263,** 81

- eEF-2
  - 100-kDa, transformation to 65-kDa eEF-2 *in vitro,* **255,** 535
- Efflux pumps
  - interplay with outer membrane permeability barrier in *Pseudomonas aeruginosa,* role in fluorescent dye accumulation, **261,** 452
- EF-hand proteins
  - five-EF-hand protein family member peflin, similarity to apoptosis-linked gene 2 (human), **263,** 68
  - human NEFA, heterologously overexpression and analysis of Ca^{2+}-binding sites, **260,** 1
- efp gene
  - molecular cloning and expression and regulation in primary osteoblasts (rat), **261,** 412
- Egg extracts
  - microtubule self-organization in, induction by Ran GTPase (*Xenopus laevis*), **262,** 571
- Eggs
  - 58-kDa Shc protein detected in, tyrosine phosphorylation upon egg activation (*Xenopus laevis*), **258,** 265
- Egr-1
  - gene expression dependent on, regulation by C-terminal activation domain, **255,** 208
- *EHF* gene
  - in *ets* family, chromosomal localization, tissue/tumor expression, and regulatory function (human), **264,** 119
- Ehrlichiosis agent
  - progression of infection and antimicrobial susceptibility in HL-60 cells, monitoring by p44 expression, **257,** 351
  - quantitation based on analysis of rRNA from HL-60 cells, **262,** 7
- EHS-gel overlay
  - effects on hepatocyte HNF-4α isoform expression and ARP-1 expression and DNA-binding activity (rat), **259,** 651
- Eicosanoids
  - direct binding to peroxisome proliferator-activated receptor α, **260,** 609
  - sulfation, murine sulfotransferase catalyzing, bacterial expression, purification, and characterization, **254,** 65
- Eicosapentaenoic acid
  - dietary, effects on obesity and diabetes (KK-A^y mouse), **259,** 85
  - inhibition of VSMC proliferation by inhibition of phosphorylation of Cdk2–cyclinE complex, **254,** 502
- Elastase
  - neutrophil, inhibition by human and murine secretory leukocyte protease inhibitor (mouse), **254,** 614
- Elasticity
  - myosin mutant subfragment-1 on functionalized silver surface (*Dictyostelium*), **261,** 276
  - transverse, skeletal muscle myofibrils, atomic force microscopic study (rabbit), **256,** 13
- Elastin
  - elastin-like protein matrix of lamprey branchial cartilage, crosslinking by lysyl pyridinoline, **261,** 635
- *elav*-like gene
  - *Caenorhabditis elegans,* neuronal expression and effect of ectopic expression, **260,** 646
- ELAV-like proteins
  - human neuronal, RNA recognition motifs involved in binding to cytokine mRNA, **256,** 263
- Electrical current
  - direct current-stimulated calvarial organ culture calcium levels, effects of faradic products (mouse), **264,** 657
- Electrical properties
  - single ion channels, measurement using artificial lipid bilayer formed on agarose-coated glass, **265,** 595
- Electrocardiogram
  - pathophysiological U wave cosegregating with mitochondrial DNA mutation, **257,** 228
- Electromagnetic field
  - 60-Hz, effect on ornithine decarboxylase activity in developing embryo (chicken), **265,** 211
  - combined with elevated temperature, effect on embryogenesis of *Drosophila,* **265,** 73
  - effects of repetitive pulsed magnetic stimulation on cell proliferation and HSP70 expression in normal and malignant human cells, **261,** 689
- Electron microscopy
  - Ca^{2+}/calmodulin-dependent protein kinase II linker domain localization, **263,** 657
- Electron paramagnetic resonance
  - protein-derived radicals in H_2O_2 reaction with Fe bound in mitochondrial F_1ATPase, **263,** 281
  - ultraweak luminescence with, study of peroxynitrite reaction with heterocyclic compounds: role of radical pathway, **259,** 460
- Electron transfer
  - in nitric-oxide synthase isoforms, rapid kinetic studies (bovine, mouse, rat), **265,** 184
- Electron transfer complexes
  - crosslinking between cytochrome c_3 and flavodoxin from *Desulfovibrio gigas,* **256,** 367
- Electron tunneling spectroscopy
  - single-molecule, higher plant light-harvesting complex II, **256,** 288
- Electrophile response element
  - Nrf2 binding to, role in upregulation of human γ-glutamylcysteine synthetase regulatory subunit gene, **261,** 661
- Electrophoresis
  - blue native PAGE, isolation of chloroplast F_0F_1-ATP synthase, CF_0, and CF_1, **259,** 569
  - two-dimensional, SURFEIT-1 gene on blue native gel, analysis in cytochrome *c* oxidase deficiency (human), **265,** 339
- Electroporation
  - gene transfer *in vivo,* optimal parameters for, determination (mouse), **261,** 377
  - optimization for biochemical studies in live cells, **256,** 235
- Electroreduction
  - by N-terminal truncated cytochrome P450 2B4, **263,** 678
- Electrospray ionization mass spectrometry
  - protein/DNA noncovalent complexes, **257,** 1
  - sodium binding properties of cyclopentapeptide endothelin A selective receptor antagonists, **254,** 713
- Electrostatic interactions
  - localized structural effects in thermostable enzyme, **258,** 179
  - rat P450 1A1 and yeast NADPH-P450 reductase in mixed and fused systems, **257,** 273
- Elk-1
  - MAP kinase-dependent transactivation induced by EGF in mesangial cells, inhibition by BMP-2, **258,** 490
- Ellagic acid
  - interaction with calf thymus DNA, flow linear dichroism UV–VIS spectroscopic study, **265,** 416
- Elongation factor-1 δ kinase
  - transient increase during sea urchin development and identity with casein kinase 2, **266,** 425
- *elr-1* gene
  - neuronal expression and effect of ectopic expression (*Caenorhabditis elegans*), **260,** 646
- Embryo
  - cardiomyocyte necrosis, induction by targeted disruption of TREB5 gene (mouse), **261,** 350

Embryo (*continued*)
- developing, ornithine decarboxylase activity after exposure to 60-Hz magnetic fields (chicken), **265,** 211
- early, and oocyte, cyclosome stimulation by Fizzy/cdc20, role of cyclosome phosphorylation (clam), **260,** 193
- *Paracentrotus lividus,* mitosis during early cleavage of, role of constitutive hsp70, **260,** 143
- *Xenopus*
  - biological activities of human Smad1: role of N-terminal domain, **258,** 366
  - postblastular, overexpression of Dr1, inhibition of class II gene transcription, **265,** 644
- zebrafish, specific developmental defects, induction by double-stranded RNA, **263,** 156

Embryogenesis
- associated transient increase of elongation factor-1 δ kinase (sea urchin), **266,** 425
- Ca^{2+}/calmodulin-dependent protein kinase II gene expression in *Drosophila* CNS during, **260,** 707
- early, in *Drosophila,* phosphorylation and dephosphorylation of B subunit of DNA polymerase α–primase complex in, **254,** 372
- effects of electromagnetic fields in combination with elevated temperature (*Drosophila*), **265,** 73
- hesr-1 cDNAs expressed during, analysis (mouse), **260,** 459
- late, TgBMP2/4 gene maximally expressed during, cloning (*Tripneustes gratilla*), **258,** 457
- role of Crk-II: analysis with mutant mice with Crk-II removed by gene trap insertional mutagenesis, **266,** 569
- spatial and temporal cystathionine β-synthase gene expression during, analysis (human), **254,** 127

Embryonal carcinoma cells
- differentiation-dependent expression of *Brachyury,* regulation by PEA3 site flanked by SP1, SP4, and GATA sites (P19 cells), **254,** 542

Embryonic stem cells
- lacking VEGF, tumorigenic phenotype restoration *in vivo,* potential of oncogenic *ras* for, **254,** 480

Endocannabinoids
- brain regional distribution, implications for biosynthesis and biological function (rat), **256,** 377

Endocrine cells
- regulated secretory pathway, sorting and activation of PC2 into, role of protein 7B2, **257,** 473

Endocrine disruptors
- dialkyl phthalates: binding characteristics for estrogen receptor, **254,** 311

Endocytosis
- via coated pits, induction by crosslinking of plasmalemmal cholesterol in lymphocytes (mouse), **260,** 516
- receptor-mediated, anti-ErbB2 phage antibodies, **255,** 386
- and ubiquitination, of Gap1 permease, role of N-terminal C$_2$ domain of yeast Npi1/Rsp5 ubiquitin ligase, **257,** 561

Endoglin
- epitopes on, recognition by monoclonal antibody SH-2 raised against human mesenchymal stem cells, **265,** 134

Endoglycoceramidase
- conserved Asn-Glu-Pro sequence, Glu residue in, essential role in enzymatic activity (*Rhodococcus* sp. M-777), **260,** 89

Endometrial cells
- cultured, expression of dioxin-responsive genes (human), **257,** 259

Endonuclease I
- *Escherichia coli,* recognition of sequence-directed structure of ssDNA backbone, **256,** 532

Endopeptidase
- with strict specificity for threonine residues at P1′ position (*Archachatina ventricosa*), **256,** 307

Endoplasmic reticulum
- inositol 1,4,5-trisphosphate-mediated Ca^{2+} release, inhibition by antibodies to pleckstrin homology domain of PLC-δ1 (RBL cells), **260,** 42
- lens epithelial cells, unfolded protein formation in, induction by xanthurenic acid (bovine, pig), **265,** 600
- MAL retention in, after substitution of last two C-terminal serines, **260,** 188
- oligosaccharyltransferase, functions of multiple subunits, **266,** 684
- rough, free and N-linked oligomannosides as markers of quality control of newly synthesized glycoproteins, **258,** 1

Endosomes
- SNAP-23 intracellular localization to, **255,** 340

Endosperm
- and suspension cells, differential splicing of maize transposable element *Ds* from primary transcripts, **261,** 798

Endostatin
- antiangiogenic activity compared with restin: NC10 domain of human collagen XV, **255,** 735
- cloning, expression, and *in vitro* activity (human), **258,** 345
- full-length, inhibitory effect on *in vitro* angiogenesis (human), **263,** 340

Endothelial cell protein C receptor
- function as receptor for protein C activation on ECs in arteries, veins, and capillaries (human), **259,** 671

Endothelial cells
- adherens junctions, regulation by ras-dependent signal transduction pathway (human), **260,** 371
- aortic, *see* Aortic endothelial cells
- blood–brain barrier-forming, barrier function, induction by glial cell-derived neurotrophic factor (pig), **261,** 108
- bone-derived, cyclooxygenase-2 expression, induction by basic FGF (mouse), **254,** 259
- cell cycle arrest and apoptosis, induction by mouse recombinant kringle 5 (bovine, human), **258,** 668
- cerebral, NF-κB activation, inhibition by zinc ionophore pyrithione (bovine), **259,** 505
- effects of angiopoietins and VEGF *in vitro* (mouse), **264,** 133
- glomerular, chronic ceramide formation in, stimulation by nitric oxide (bovine), **258,** 60
- human umbilical cord
  - heparin-binding EGF-like growth factor induction, role of intracellular ROS and Ca^{2+} elevation, **259,** 50
  - $\alpha_3\beta_1$ integrin expression, negative regulation by H-Ras (ECV304 cells), **257,** 95
- human umibilical vein, *see* Human umbilical vein endothelial cells
- hypoxic superfusate from porcine cells, inhibition of crossbridge function in human heart, **262,** 64
- *in vitro* effects of human endostatin expressed in yeast, **258,** 345
- migration and proliferation, effect of restin: NC10 domain of human collagen XV, **255,** 735
- tumor-tissue, monoclonal antibody specific to, for tumor vascular targeting (mouse, rat), **260,** 346
- vascular, *see* Vascular endothelial cells

Endothelial differentiation gene receptor, *see* AGR16; EDG3

Endothelin
- role in hypoxia-induced pulmonary hypertension (rat), **254,** 100
- smooth muscle-constricting, containing 31 amino acids, sandwich-type enzyme immunoassays for, **256,** 1

Endothelin-1
- downregulation by interleukin-4 during gastric ulcer healing (rat), **263,** 591
- effect on intracellular Ca^{2+} in smooth muscle cells (SVSC cells), **264,** 774

- and IL-4 and TNF-α
  - interplay in gastric mucosal inflammatory responses to *Helicobacter pylori* LPS, **258,** 17
  - role in buccal mucosal ulcer healing: effect of chronic alcohol ingestion (rat), **257,** 373
- secretion from vascular endothelial cells, suppression by thiazolidinediones (bovine), **254,** 757
- stellate cell contraction and portal pressure increase induced by, attenuation by ROCK inhibitor Y-27632 (rat), **266,** 296
- variants in atopic asthma (human), **262,** 259

Endothelin-1 receptor
- variants in atopic asthma (human), **262,** 259

Endothelin-3
- high-affinity interaction with recombinant bovine ETA receptor, **256,** 357

Endothelin A receptor
- bovine recombinant, high-affinity interaction of endothelin-3 with, **256,** 357

Endothelin A selective receptor
- cyclopentapeptide antagonists of, sodium binding properties, mass spectrometric studies, **254,** 713

Endothelin B receptor
- modulation of endothelin converting enzyme-1 expression in primary astrocytes (rat), **261,** 149

Endothelin converting enzyme-1
- expression in astrocytes in primary culture, modulation by endothelin B receptors (rat), **261,** 149

Endothelium
- smooth muscle hyperpolarization dependent on, role of heterocellular gap junctional communication (rabbit), **254,** 27
- vascular, function, implications of tetrahydrobiopterin oxidation by peroxynitrite, **263,** 681

Endothelium-derived hyperpolarizing factor
- relaxations of rabbit jugular vein attributable to, mediation by cAMP, **263,** 52

Endotoxemia
- acute, dynamic regulation of PPARγ1 expression in white blood cells (pig), **263,** 749

Endotoxin, *see* Lipopolysaccharide

Energy deficits
- relationship to leptin effects on hypothalamic hypocretin/orexin and neuropeptide Y (rat), **258,** 119
- suppression of systemic and gut immunity during infection (mouse), **264,** 796

Energy metabolism
- regulation in human cells in aging and diabetes, **266,** 662

ENOD genes
- homologues, occurrence in *Oryza* species and related grasses, **258,** 148

Enterobacter aerogenes
- antibiotic resistance, conferral *in vivo* by modification of porin activity, **266,** 248

Enterococcus hirae
- *cop* operon of, *in vivo* regulation by Cu(I) and Cu(II), effects of promoter mutations, **259,** 443

Enterocytes
- apolipoprotein B mRNA editing enhancement activity from, sequence elements required for, identification (chicken), **254,** 744
- and liver, differences in editosome assembly, role of RNA 3′ of apolipoprotein B mRNA mooring sequence (rat), **263,** 81

Enzyme immunoassay
- prolactin-releasing peptide in rat tissue and plasma, **257,** 264
- sandwich-type, smooth muscle-constricting 31-amino acid endothelins, **256,** 1

Enzyme inhibition constants
- for catalytically impaired mutants, wild-type enzyme as reporter for, **263,** 617

Enzyme-linked immunosorbent assay
- adiponectin: decreased plasma levels in obesity (human), **257,** 79

Eosinophilic leukemia cells
- cell growth suppression by troglitazone by induction of p21WAF1/CIP1 cyclin-dependent kinase inhibitor (EoL-1 cells), **261,** 833

Eosinophils
- eotaxin-induced chemotaxis, role of association of Src family kinases Hck and c-Fgr with CCR3 receptor stimulation (human), **264,** 163

Eotaxin
- genomic organization, sequence analysis, and transcriptional regulation in dermal fibroblasts (human), **255,** 470
- induced human eosinophil chemotaxis, role of association of Src family kinases Hck and c-Fgr with CCR3 receptor stimulation, **264,** 163

Epalrestat
- prevention of glucose-induced PDGF-β receptor increase in rat aortic SMC, **261,** 853

EPCR, *see* Endothelial cell protein C receptor

Epidermal growth factor
- activation of STAT proteins in cultured rat hepatocytes, relationship to stimulation of DNA synthesis, **258,** 565
- calcium influx dependent on, inhibition by large annexin VI splice form (A431 cells), **260,** 540
- induced MAPK-dependent Elk-1 transactivation and DNA synthesis in mesangial cells, inhibition by BMP-2, **258,** 490
- induction of gastrin promoter, DNA binding in, stimulation by Sp1 phosphorylation by Erk 2, **254,** 454
- receptor autophosphorylation induced by, in primary hepatocytes isolated from phenobarbitone-treated mice, **260,** 483
- related domain in NELL proteins, role in NELL interaction with protein kinase C, **265,** 752
- related molecule with two follistatin modules, stimulation of tyrosine phosphorylation of erbB-4 in MKN28 gastric cancer cells, **266,** 593
- stimulated human gingival fibroblasts, cyclooxygenase expression and PGE$_2$ production, role of tyrosine kinases, **257,** 528
- stimulation of 3-hydroxy-3-methylglutaryl-CoA reductase expression via ErbB-2 pathway in human breast cancer cells, **260,** 699

Epidermal growth factor-like growth factor
- genes encoding, differential regulation in keratinocytes (human), **265,** 214

Epidermal growth factor receptor, *see also* Human epidermal growth factor receptor 2
- association with STAT1α/1β, STAT3, and STAT5 in long-term hepatocyte cultures (human), **265,** 376
- complexation with PLCγ1, disruption by chronic ethanol consumption, relevance to impaired hepatocyte proliferation (rat), **257,** 89
- and muscarinic M$_3$ receptors, activation of mutually inhibitory signaling cascades in human neuroblastoma SH-SY5Y cells, **255,** 774
- phosphorylation in pancreatic cancer cells, reduction by phorbol ester via tyrosine phosphatase activation (human), **265,** 728
- transmodulation by PDGF, spatial organization (human fibroblasts), **261,** 695

Epidermal growth factor receptor protein kinase
- inhibitory effects of coumarin and derivatives, **260,** 682

Epidermoid carcinoma cells
- apoptosis, rescue by β4 integrin subunit via PI3 kinase/Akt kinase signaling pathway (A431 cells), **264,** 127
- arachidonate 12-lipoxygenase transcription in, enhancement by c-Fos overexpression (A431 cells), **261,** 848
- EGF-dependent Ca^{2+} influx, inhibition by large annexin VI splice form (A431 cells), **260,** 540
- JNK/SAPK activation by PDGF, role of phospholipase C-γ and phosphatidylinositol 3-kinase signaling pathways (A431 cells), **261,** 641

Epilepsy
- human gene *EPM2A,* isolation and characterization of mouse homologue, **257,** 24

Epinephrine
- secretion and synthesis in cultured adrenal medullary chromaffin cells, stimulation by leptin (pig), **261,** 426

Episomal vectors
- DNA double strand break repair in lymphoblasts, role of p53 (human), **264,** 702

Epithelial cells
- alveolar
  - glyceraldehyde-3-phosphate dehydrogenase transcription, increase by hypoxia (rat), **266,** 156
  - transdifferentiation in primary cultures, caveolin-1 expression and biogenesis of caveolae during, analysis (rat), **262,** 744
- breast
  - death, inhibition by cooked meat-derived 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (human), **266,** 203
  - exfoliated, detection of DNA damage (human), **257,** 319; *erratum,* **259,** 494
- bronchial, release of soluble ICAM-1 (human), **260,** 734
- ciliary, human ocular nonpigmented, functional expression of natriuretic peptide system, **258,** 21; *erratum,* **264,** 1007
- gastric, cytoskeletal disorganization by *Helicobacter pylori* vacuolating cytotoxin (rat), **262,** 245
- intestinal, heparin binding epidermal growth factor-like growth factor gene regulation by TGF-β (rat), **264,** 808
- lens
  - intense myristoylation of single protein (bovine), **256,** 652
  - unfolded protein formation in endoplasmic reticulum, induction by xanthurenic acid (bovine, pig), **265,** 600
- mammary
  - ductal morphogenesis and basement membrane deposition, modulation by chromogranin A (TAC2 cells), **259,** 563
  - G_0 growth-arrested, transcriptional regulation of C/EBPδ in, analysis (mouse), **262,** 696
- MDR3-negative, phosphatidylcholine transport via drug-induced MDR1 P-glycoprotein (human), **262,** 121
- normal and malignant, cell proliferation and HSP70 expression, effects of repetitive pulsed magnetic stimulation (human), **261,** 689
- polarized, interferon-β secretion induced by poly I:poly C, stimulation side-dependent asymmetry, **254,** 5
- proximal tubule, aquaporin-1 expression, regulation by hyperosmolarity and contrast agents (human), **256,** 240
- renal
  - Cl^- channel and $Na^+/K^+/2Cl^-$ cotransporter activation by flavonoids (A6 cells), **254,** 368
  - swelling of, activation of p38 MAP kinase and JNK (A6 cells), **266,** 547
- retinal pigment, nitric oxide regulation of reduced-folate transporter *in vitro* (human), **257,** 279
- specific transcriptional regulation of human Galβ1,3GalNAc/Galβ1,4GlcNAc α2,3-sialyltransferase gene, **257,** 516
- thymic medulla, expression of autoimmune regulator (human), **257,** 821

Epithelin/granulin
- as extracellular cofactors for HIV-1 and HIV-2 Tat proteins, **256,** 299

Epithelium
- nasal, hesr-1 expression (mouse), **260,** 459
- oral, normal tissue and squamous cell cancer, serpin differentially expressed in, identification and cloning: *headpin,* **264,** 299

9,11-Epithio-11,12-methano-thromboxane A_2
- induction of intracellular Ca^{2+} increase in rat colonic crypt cells, **258,** 708

Epitopes
- endoglin, recognition by monoclonal antibody SH-2 raised against human mesenchymal stem cells, **265,** 134
- galactose-α1,3-galactose, masking and reduction by glycosyltransferase gene transfection (swine), **264,** 611
- HLA class I-restricted T cell, on hepatitis B surface antigen, mutation hot spot in chronic carriers and hepatocellular carcinoma (human), **262,** 757
- MHC class I, stability in macrophage cytosol, effect of thimet oligopeptidase, **255,** 596
- osteopontin, murine, detection by monoclonal antibodies, **257,** 6
- saliva-binding, of *Porphyromonas gingivalis* FimA protein, expression on surface of *Streptococcus gordonii,* **258,** 222

EPM2A gene
- human epilepsy gene, isolation and characterization of mouse homologue, **257,** 24

Epoxidation
- by chloroperoxidase, kinetic assay, **266,** 301

1,2-Epoxy-3-(*p*-nitrophenoxy)propane
- mutagenic activity and DNA adduct formation by, **261,** 844

EPR spectroscopy
- detection of reactive oxygen species in hemolymph of moth larvae, **264,** 212
- overexpressed fuscoredoxin (*Escherichia coli*), **260,** 209

EPS8
- identification as Dvl1-associated molecule, **266,** 216

Epstein–Barr virus
- expression vector based on, containing mini-OriP, construction, **264,** 938
- switch between latency and replication in Raji cells, potentiation by cocaine, **264,** 33

Era
- binding to 30S ribosomal subunit: essential *E. coli* small G protein, **264,** 51

ErbB-2
- anti-ErbB2 phage antibodies, receptor-mediated endocytosis, **255,** 386
- pathway, role in EGF stimulation of 3-hydroxy-3-methylglutaryl-CoA reductase expression in human breast cancer cells, **260,** 699

ErbB-4
- tyrosine phosphorylation in MKN28 gastric cancer cells, stimulation by EGF-like molecule with two follistatin modules, **266,** 593

Ervatamin C
- structural characterization, **264,** 635

Erythrocytes
- β1,4-galactosyltransferase knockout mice, impaired galactosylation of core 2 O-glycans in, **260,** 94
- membrane proteins, modification by AGEs during aging in circulation (human), **258,** 123
- nuclei, isolation of crosslinked telomere–protein complexes (chicken), **254,** 517
- surface exposure of phosphatidylserine, detection using annexin V-ferrofluid (human), **258,** 199
- virus-infected, selective lysis by cobra cytotoxins (human), **264,** 63

Erythroid cells
- glycophorin B gene expression specific to, role of GPB promoter E-box (human), **265,** 170

Erythroid differentiation
- CD34+ progenitors, role of erythropoietin receptor tyrosine residues (human), **256,** 685
- K562 cells, heme regulatory effects during, **258,** 87
- terminal, *in vitro,* hemoglobin synthesis during, role of transcription factor CP2, **263,** 580

Erythroleukemia cells
- apoptosis and mitotic arrest as independent effects of okadaic acid (K562 cells), **260,** 256

erythroid differentiation, heme regulatory effects during (K562 cells), **258,** 87
Erythromycin
oxidation by heterologously expressed *Streptomyces griseus* cytochrome P450 105D1, **263,** 838
Erythropoietin receptor
tyrosine residues, role in erythroid differentiation of CD34+ progenitors (human), **256,** 685
Escherichia coli
agmatinase catalytic activity, essential role of manganese, **258,** 808
agmatinase catalytic activity and substrate binding, role of His-163, **264,** 196
appA2 acid phosphatase/phytase gene, isolated from pig colon, cloning, sequencing, and expression, **257,** 117
biotin carboxylase inhibition by reaction intermediate analog, implications for kinetic mechanism, **266,** 466
cafA gene, encoding of RNase G involved in processing of 5′ end of 16S rRNA, **259,** 483
cell growth, red light-induced stimulation of, role of ground and excited singlet state oxygen, **257,** 753
essential small G protein Era, binding to 30S ribosomal subunit, **264,** 51
expression of SOS genes *recA* and *uvrA,* induction by polyamines, **264,** 584
expression studies
Agkistrodon acutus acutin, **255,** 412
Bacillus subtilis IFO 3336 poly-γ-glutamate synthetic system, **263,** 6
Bacillus subtilis σ^B: activity of σ^B stress-activated phosphatase/kinase cascade, **257,** 106
human kidney 11β-hydroxysteroid dehydrogenase, **255,** 652
mouse recombinant kringle 5, **258,** 668
murine sulfotransferase catalyzing sulfation of eicosanoids, **254,** 65
Streptomyces griseus cytochrome P450 105D1, **263,** 838
Taiwan cobra cobrotoxin, **263,** 652
F_1-ATPase α and β subunits, conformation, effect of nucleotide binding to isolated subunits, **266,** 58
F_1-ATPase, rotation, **260,** 597
F plasmid partition proteins SopA and SopB, interaction, **263,** 113
fuscoredoxin from, overexpressed, biochemical and spectroscopic characterization, **260,** 209
β-glucuronidase-deficient and lycopene-producing strains, effect on ACF formation, **262,** 322
GTP cyclohydrolase I-encoding gene, complementation of *fol2* deletion in *Saccharomyces cerevisiae,* **255,** 521
hfq::cat mutant, overproduction of outer-membrane proteins FepA and FhuE responsible for iron transport, **264,** 525
hfq gene, negative regulatory role in cell division, **266,** 579
high efficient expression of functional ligand binding site of inositol 1,4,5-trisphosphate receptor, **257,** 792
histidine-tagged proteins expressed in, N-terminal modification, MS determination, **259,** 271
Im7 protein, critical residues on immunity-determining region conferring immunity to colicin, hierarchical order, **264,** 69
mutant lacking $NADP^+$-dependent isocitrate dehydrogenase, radiation sensitivity, **254,** 647
plasmid vectors encoding human neurotrophins expressed in, viability and stability of, effect of selection marker, **258,** 29
polA1 strain, spontaneous *tonB* deletion mutations, DNA sequence analysis, **261,** 584
recombinant, extractive cultivation with aqueous two-phase systems for production and separation of extracellular xylanase, **255,** 274
recombinant soluble CD69 dimer produced in, saccharide binding by, **266,** 19
SecB C-terminal tail mobility, **264,** 949
sequences mediating protein oligomerization, genetic screen for, **266,** 243
viability, spermidine-induced decrease, role of ppGpp, ribosome modulation factor, and σ^s, **264,** 643
wild and mutant strains, photosensitization by *meso*-tetra(*N*-methyl-4-pyridyl)porphine, **256,** 84
wobble variants of unmodified form of $tRNA_1^{Ser}$, *in vitro* codon-reading specificities, **257,** 662
Esculin
effect on activity of protein kinases, **260,** 682
Esophagus
NO synthase immunolabeling (sea slugs), **262,** 545
esp-1 gene
structural analysis (human), **266,** 564
EST database
computational analysis: identification of new member of neuropoietic cytokine family, **262,** 132
Estradiol
in analysis of role of sex steroid milieu in plasma leptin levels in adult male and female rats, **259,** 56
immediate and long-term treatment of MCF-7 breast cancer cells, differential membrane antioxidant effects, **260,** 410
induced LH and prolactin surges in ovariectomized rats, leptin stimulation of, mediation by melanocortin-4 receptor, **257,** 860
17β-Estradiol
agonist action, dependence on androgen receptor phosphorylation/dephosphorylation, **259,** 21
effects on development of alveolar structures in whole-organ culture of mouse mammary gland, **232,** 340; *corrigendum,* **257,** 249
induction of apoptosis in preosteoclastic FLG 29.1 cell line, **255,** 680
nongenomic stimulation of NO release in BAECs, mediation by estrogen receptor α localized in caveolae, **263,** 257
and progesterone, luteinizing hormone and prolactin surges induced by, role of leptin in female rat, **254,** 578
stimulation of PC cell-derived growth factor expression in breast cancer cells, **256,** 204
stimulation of renewal of spermatogonial stem cells in male Japanese eel, **264,** 230
Estramustine
antagonist action, dependence on androgen receptor phosphorylation/dephosphorylation, **259,** 21
Estrogen receptor
binding characteristics of dialkyl phthalates for, **254,** 311
binding to estrogen-responsive elements, interference by p53, role of downregulation of ER-responsive genes by p53 (HeLa cells), **264,** 359
DNA binding protein cooperating with, identification as retinoblastoma interacting zinc finger protein, **264,** 983
nuclear, activation by U73122 and U73343 (SKBR-3 cells), **261,** 340
Estrogen receptor α
67/45 kDa dimorphism, role of alternative translation initiation (human), **257,** 84
conformation and stability, effects of ICI 164,384 and ICI 182,780, **261,** 1
gene polymorphisms associated with sporadic Alzheimer's disease, **265,** 335
inactivated, female mouse with, disproportional body growth in, **265,** 569
localized in caveolae, mediation of nongenomic stimulation of NO release by estrogen in BAECs, **263,** 257
Estrogen receptor β
conformation and stability, effects of ICI 164,384 and ICI 182,780, **261,** 1
functional, expression in colon cancer cells (human), **261,** 521
Estrogen-responsive elements
estrogen receptor binding to, interference by p53, role of downregulation of ER-responsive genes by p53 (HeLa cells), **264,** 359
Estrogen-responsive finger protein
molecular cloning and expression and regulation in primary osteoblasts (rat), **261,** 412

Estrogen-responsive genes
  downregulation by p53 by interference with binding of ER to estrogen-responsive elements (HeLa cells), **264,** 359
Estrogen sulfotransferase
  hepatic, human recombinant, sulfation of iodothyronines, **263,** 632
Estrone
  production, predominant mechanism by human estrogenic 17β-hydroxysteroid dehydrogenase, **259,** 489
Estrone sulfatase
  steroidal and nonsteroidal inhibitors, structure–activity relationship study, **254,** 811
Ethanol
  chronic consumption, disruption of complexation between EGF receptor and PLCγ1, relevance to impaired hepatocyte proliferation (rat), **257,** 89
  induction of depression of cell shortening and intracellular Ca^{2+} transients in ventricular myocytes, augmentation by hypertension (rat), **261,** 202
  potentiation of mitochondrial permeability transition (rat), **265,** 405
Ethidium bromide
  accumulation in *Pseudomonas aeruginosa,* role of efflux pumps and outer membrane permeability barrier, **261,** 452
7-Ethyl-10-hydroxycamptothecin
  glucuronidation by *UGT1*-encoded human UDP-glucuronosyltranserases, **260,** 199
N-Ethyl maleimide
  modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
Etomoxir
  upregulation of uncoupling protein 3 mRNA levels in primary cultures of rat preadipocytes, **263,** 87
Etoposide
  activation of p53 through phosphorylation in MDM2-overexpressing BL2 cells, **264,** 860
ets factors
  EHF gene, chromosomal localization, tissue/tumor expression, and regulatory function (human), **264,** 119
ets-2 gene
  expression in hearts of Down syndrome patients: evidence against gene dosage effects hypothesis, **254,** 395
Ets transcription factor
  suppression by PPARγ, in inhibition of c-*MET* expression in gastric cancer cells (human), **265,** 453
Eukaryotic initiation factor 2α kinases
  role in inhibition of protein synthesis in leukemia cells by flavonoids, **265,** 589
Eukaryotic initiation factor 4B
  from *Arabidopsis thaliana* and wheat, identification as member of multigene family, **266,** 314
Evan's Blue
  stimulation of large-conductance Ca^{2+}-activated K^+ channels in cultured human umibilical vein endothelial cells, **254,** 666
Evolution
  acetaldehyde dehydrogenase (acylating) and 4-hydroxy-2-oxovalerate aldolase, studies with *Pseudomonas* sp. DJ77 *phnIJ* genes, **256,** 469
  heat shock protein 90α (Chinook salmon), **258,** 784
  hydroxymethyldihydropterin pyrophosphokinases, **254,** 70
  Otx proteins, review, **258,** 229; *erratum,* **260,** 575
  xylanase II from alkaliphilic thermophilic *Bacillus,* relationship to alkaliphilic xylanases, **263,** 640
EXAFS, *see* Extended X-ray absorption fine structure
Excitation–contraction coupling
  in cardiomyocytes, species dependence of mitochondrial calcium transients (guinea pig, rat), **263,** 554
Excitotoxicity
  kainic acid-mediated, induction of heme oxygenase 1 in rat brain: dissociation of mRNA and protein expression in hippocampus, **259,** 91
Exercise
  acute effects on circulating leptin in lean and genetically obese *fa/fa* rats, **255,** 698
  long-term, effect on gene expression of insulin signaling pathway intermediates in skeletal muscle (rat), **254,** 720
Exocytosis
  regulated, role of actin, **266,** 652
  secretory vesicles, functional roles of complexin I and II, transfection analysis (PC12 cells), **265,** 691
Exon
  additional, in stress-inducible heat shock protein 70 gene HSP70-1 (human), **257,** 193
Exon–intron structure
  aldose reductase gene: genomic regions directing cell-specific expression (mouse), **255,** 759
Exon skipping
  in transcription of human thrombospondin 2 gene, **259,** 527
3′–5′ Exonuclease
  associated with VDJP, characterization, **259,** 262
Exonuclease VII
  Escherichia coli, recognition of sequence-directed structure of ssDNA backbone, **256,** 532
Exosurf Neonatal
  synthetic lung surfactant, enhancement of dendrimer-mediated transfection *in vitro,* **264,** 253
Expressed sequence tags
  temperature-related, in rat testis during spermatogenesis, cloning, **258,** 401
Extended X-ray absorption fine structure
  single metal binding domain in nucleotide excision repair protein XPA (*Xenopus laevis*), **254,** 109
Extracellular acidification
  human somatostatin sst_4 receptor-mediated stimulation, role of PI 3-kinase, **263,** 239
Extracellular matrix, *see also* Basement membrane
  elastin-like, of lamprey branchial cartilage, crosslinking by lysyl pyridinoline, **261,** 635
Extracellular signal-regulated kinase
  c-Raf/MEK/ERK pathway, requirement for serum induction of collagen X promoter (MCT cells), **262,** 50
  dual potential for control of cell survival (rat mesangial cells), **264,** 696
  ERK1/2
    AIDS-associated Kaposi's sarcoma cell growth mediated by, negative regulation by p38 MAP kinase, **264,** 676
    PI 3-kinase-dependent activation via p21ras in endothelial cells exposed to cyclic strain, **257,** 668
  ERK2
    effects of cAMP in helper T lymphocytes (human), **266,** 129
    regulation by serpentine receptor-dependent pathway in *Dictyostelium,* **260,** 504
    Sp1 phosphorylation by, stimulation of DNA binding, **254,** 454
  inactivation
    in apoptosis of NIH/3T3 cells overexpressing Bad, **264,** 724
    by mammalian tyrosine-specific phosphatase PTPBR7, **256,** 52
  mediation of renal regeneration after myoglobinuric acute renal injury (rat), **254,** 88
  $p21^{ras}$/Erk signaling pathway induced by acidic FGF, potentiation by cytodifferentiation of cultured astrocytes (rat), **260,** 441
  p44 MAP kinase/ERK1, phosphorylation of CBP histone acetyl transferase *in vitro,* stimulation of activity (NIH3T3 cells), **262,** 157

relationship to phospholipase D activity and respiratory burst in fMet-Leu-Phe-stimulated human neutrophils, **264,** 371
Extractive cultivation
  recombinant *Escherichia coli* with aqueous two-phase systems for production and separation of extracellular xylanase, **255,** 274
Extraocular muscle
  calcium homeostasis development, and visuomotor system maturation (rat), **257,** 678
Extrinsic protein
  recombinant 12-kDa, of PSII of red alga *Cyanidium caldarium,* functional studies, and *psb*U gene cloning and expression, **260,** 245
Ezrin
  high levels expressed by human pancreatic adenocarcinoma cell lines with high metastatic potential, **258,** 395

F

F1 element
  in proacrosin promoter, YY1 as binding factor (mouse), **257,** 871
F9 cells
  rae28/mph1 gene transcriptional activation, *cis*-elements for, characterization (mouse), **262,** 509
Fabry disease
  identification of α-galactosidase A mutations and molecular carrier detection using fluorescent chemical cleavage of mismatches, **257,** 708
FAC1
  DNA-binding activity, enhancement by phosphorylation, **260,** 785
Factor V activating enzyme
  cDNA cloning from snake venom (viper), **262,** 328
Factor H
  human, function on xenosurface, **265,** 556
Factor I
  human, function on xenosurface, **265,** 556
Factor J
  internalization and cellular signaling after interaction with cell (Jurkat, K562 cells), **266,** 51
FADD
  STAT1-independent upregulation in cancer cells treated with cytotoxic drugs (human), **256,** 603
Familial amyloidotic polyneuropathy
  compound heterozygote with high serum transthyretin and retinol binding protein levels, **264,** 365
  transthyretin mutant Y114C self-association properties related to, effects on transthyretin detection and quantitation, **261,** 264
Familial combined hyperlipidemia
  chromosome 1q21.3-q23 locus for, apM-1 gene mapping to, **260,** 416
FANCA protein, *see* Fanconi anemia complementation group A protein
Fanconia anemia
  cell lines, chromosomal instability, noninvolvement of defective repair activity of ribosomal protein S3, **264,** 518
Fanconi anemia complementation group A protein
  binding of SNX5, **265,** 630
  intracellular localization, **259,** 594
Faradic products
  effects on direct current-stimulated calvarial organ culture calcium levels (mouse), **264,** 657
Farnesyl pyrophosphate synthase
  inhibition by nitrogen-containing bisphosphonates (bovine brain), **255,** 491
  as molecular target of nitrogen-containing bisphosphonates (bovine brain homogenates), **264,** 108
Farnesyltransferase
  gene transcription and mRNA stability, effects of insulin, **254,** 243
Fas
  caspase activation and apoptosis induced by, role of cytochrome *c* (Jurkat, SKW6 cells), **261,** 71
  p53-dependent expression, induced by apoptotic stimuli, relationship to JNK activation, **256,** 595
Fas associated factor 1
  identification and characterization (human), **262,** 388
Fas/Fas ligand
  in prolactin-induced apoptosis in rat corpus luteum, **260,** 167
  T cell apoptosis mediated by, induction by doxycycline (Jurkat cells), **260,** 562
Fas ligand
  expression on vascular endothelial cells, effect of cyclosporine downregulation (human), **263,** 430
  functional, expression on HT29 and MCF7 adenocarcinoma cells, induction by TNF-α and IFN-γ, **264,** 813
Fast atom bombardment mass spectrometry
  sodium binding properties of cyclopentapeptide endothelin A selective receptor antagonists, **254,** 713
Fasting
  regulatory effects on orexin in brain (rat), **256,** 495
Fasudil
  reduction of intimal hyperplasia by inhibition of vascular smooth muscle cell migration and enhancement of cell loss (human, rabbit), **262,** 211
Fat
  depletion from denervated fat tissue by hyperleptinemia (rat), **260,** 653
  dietary, regulation of uncoupling protein 2 and 3 genes (mouse), **256,** 27
  visceral, effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
Fat distribution
  and obesity, in Japanese men, effect of Gln27Glu β_2-adrenergic receptor variant, **258,** 138
F_1-ATPase
  α and β subunits, conformation, effect of nucleotide binding to isolated subunits (*Escherichia coli*), **266,** 58
  mitochondrial, H_2O_2 reaction with bound Fe, protein-derived radicals in, EPR detection (bovine), **263,** 281
  rotation (*Escherichia coli*), **260,** 597
Fatty acid amide hydrolase
  catalysis by, identification of two serine residues involved in, **264,** 316
Fatty acid binding protein
  adipocyte, gene induction in monocytes by PPARγ (human), **261,** 456
  caveolin-1 identification as, **255,** 34
Δ-6 Fatty acid desaturase
  molecular cloning and functional characterization (rat), **255,** 575
Fatty acid hydroxylase
  medium chain, CYP94A2, cloning and functional characterization (*Vicia sativa*), **261,** 156
Fatty acid metabolism
  peroxisomal protein Yor180Cp of yeast involved in, preliminary characterization, **260,** 28
Fatty acids
  direct binding to peroxisome proliferator-activated receptor α, **260,** 609
  mitochondrial oxidation, role of acetyl-CoA carboxylase β (H9c2 cells), **254,** 657
  polyunsaturated, *see* Polyunsaturated fatty acids
  upregulation of uncoupling protein 3 in C2C12 myotubes, **258,** 464
Fatty acid synthase
  gene, enhancer sequence in distal promoter of, identification (rat), **261,** 400
Fatty acyl CoA–acyl CoA binding protein complex
  activation of ryanodine receptors from skeletal muscle, inhibition by rapamycin, **264,** 409

- F-box/WD40 proteins
  - Dactylin gene encoding member of, mapping to SHFM3 critical region on 10q24 (human), **261,** 64
- Fc binding
  - by proteolytically cleaved fragment of bacterial protein A, **260,** 111
- Fc fragment
  - minimized Fc binding peptide of protein A, induction of immunocyte proliferation and Th1-type response in mice, **258,** 141
  - staphylococcal protein A peptide fragments binding to, design, **256,** 6
- Fc receptor
  - FcγRII, engagement of spectrin and actin in capping of, in permeabilized U937 cells, **259,** 287
  - FcγRIIA, interaction with glycoprotein Ibα in platelets (human), **266,** 24
  - FcγRIIIb, shedding from human neutrophils, induction by actin polymerization, **255,** 568
- Fe65L2
  - interacting with Alzheimer's β-amyloid precursor protein, gene encoding, genome structure and chromosomal mapping (human), **258,** 385
- Fendiline
  - effect on cytosolic Ca^{2+} concentration in endothelial cells (porcine aorta), **265,** 697
- Fenofibrate
  - administration, or fish oil feeding, upregulation of liver uncoupling protein-2 mRNA in mice, **257,** 879
- Fenton reaction
  - oxidative damage to DNA mediated by, protective effect of kinetin, **265,** 499
- FepA
  - outer-membrane protein involved in iron transport, overproduction in *E. coli hfq::cat* mutant, **264,** 525
- Ferredoxins
  - Fe_2S_2, hyperfine-shifted ^{13}C and ^{15}N resonances in, assignment strategy, **258,** 54
- Ferricytochrome c-551
  - from *Pseudomonas stutzeri* substrain ZoBell, solution conformation, **254,** 675
- Ferritin
  - H chain, and hSNF2H homologue and vimentin, differential expression in nickel(II) acetate-treated CHO cells, **258,** 592
  - iron released from, *in vitro* complexation of 1,2,4-benzenetriol with, **259,** 169
  - light chain, gene expression, regulation by oxidized LDL in monocytic THP-1 cells, **265,** 577
  - as target for pentaerythrityl tetranitrate in endothelial cells (pig aorta), **261,** 28
- Ferrofluids
  - annexin V-ferrofluid, detection of phosphatidylserine surface exposure on human erythrocytes using, **258,** 199
- [2Fe–2S] protein
  - from hyperthermophilic bacterium *Aquifex aeolicus,* **261,** 885
- Fetal Alz-50 clone 1 protein, *see* FAC1
- Fetal calf serum
  - induced upregulation of P2Y$_2$ receptors in rat VSMC, MAPKK-dependent, **258,** 648
- Fetus
  - antisense transcript to *SMAD5* expressed in, **255,** 668
  - gene transfer into, evaluation of cationic liposome suitable for, **258,** 358
  - *vegf-d* mRNA expression pattern (mouse), **257,** 891
- Fex
  - seven-transmembrane receptor with homology to glycoprotein receptors, identification and expression in adult and developing mouse, **254,** 273
- F_0F_1-ATPase
  - mitochondrial, inhibition by piceatannol via targeting of F_1 complex (rat brain), **261,** 499
- F_0F_1-ATP synthase, *see* ATP synthase
- FHL1
  - expression in skeletal muscle (mouse), **255,** 245
- FHL3
  - expression in skeletal muscle (mouse), **255,** 245
- FHL4
  - expression in testis (mouse), **255,** 251
- FhuE
  - outer-membrane protein involved in iron transport, overproduction in *E. coli hfq::cat* mutant, **264,** 525
- Fiber cells
  - lens, degeneration produced by thiamine deficiency *in vivo* (mouse), **258,** 703
- Fibrate
  - reduction of phospholipid transfer protein promoter activity, DNA sequences responsible for, identification (human), **264,** 802
- Fibril formation
  - betabellin 16D characterization: β-sandwich protein forming narrow fibrils associating into broad ribbons, **264,** 498
- Fibrin
  - thrombin-induced polymerization, incipient stage, detection by fluorescence correlation spectroscopy, **260,** 35
- Fibrinogen
  - activation by thrombin, and incipient stage in fibrin polymerization, fluorescence correlation spectroscopy detection, **260,** 35
  - binding to CD11c I-domain, **264,** 630
  - degradation of nascent chains, mediation by ubiquitin proteasome pathway, **261,** 590
  - murine platelet, monoclonal antibodies to, preparation from hamster–mouse interspecies hybridomas, **262,** 167
- β-Fibrinogenase
  - heterogeneous two-chain, brevinase, purification from *Agkistrodon blomhoffii brevicaudus* venom, **260,** 665
- Fibrinogen receptor
  - platelet, gpIIbIIIa, motif binding, detection with combinatorial chemistry, **256,** 537
- Fibrinolysis
  - by Hannahpep purified from venom of Indian king cobra, **266,** 488
- Fibroadenoma
  - and breast carcinoma, alteration of hMSH2 and DNA polymerase β genes in, **259,** 429
- Fibroblast growth factor
  - preferentially expressed in heart, cloning and characterization (human), **255,** 717
  - XFGF-20 in *Xenopus laevis,* characterization, **261,** 756
- Fibroblast growth factor 1
  - overexpression, SH-SY5Y neuroblastoma cells differentiated by, upregulation of BCL-2 in, **258,** 745
  - p21^{ras}/Erk signaling pathway induced by, potentiation by cytodifferentiation of cultured astrocytes (rat), **260,** 441
- Fibroblast growth factor 2
  - downregulation by IFN-α and associated inhibition of B16 melanoma cell proliferation, **262,** 838
  - induced angiogenesis *in vitro,* inhibitory effect of full-length human endostatin, **263,** 340
  - induction of cyclooxygenase-2 expression in bone-derived endothelial cells (mouse), **254,** 259
  - induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
  - induction of osteoclast formation by reciprocal regulation of osteoclast differentiation factor and osteoclastogenesis inhibitory factor production (mouse), **265,** 158

inhibition of osteoclast formation induced by 1α,25-dihydroxyvitamin D_3 via suppression of osteoclast differentiation factor production (mouse), **265,** 45
plasma levels after heparin administration (human), **255,** 80
production in aortic endothelial cells, regulation by nicotine (bovine), **257,** 306
upregulation of $P2Y_2$ receptor mRNA in rat VSMC, **258,** 648

Fibroblast growth factor 4
interactions with FGF receptors 1 and 2, differential regulation by heparin, **263,** 621

Fibroblast growth factor 10
as growth factor for preadipocytes in white adipose tissue (rat), **258,** 109

Fibroblast growth factor receptors
for FGF-1 and FGF-2, interactions with FGF-4, differential regulation by heparin, **263,** 621

Fibroblasts
AF-6 *in vivo* interaction with activated Ras and ZO-1 (Rat1 cells), **259,** 103
aldose reductase gene expression: genomic regions directing cell-specific expression (NIH3T3 cells), **255,** 759
Bad overexpression, induction of sensitization to apoptosis with caspase activation and ERK inactivation (NIH/3T3 cells), **264,** 724
basal c-Jun N-terminal kinase activation and JNK-mediated TNF resistance, regulation by IκBα (L929 cells), **263,** 107
carnitine transporter-defective, carnitine uptake, restoration by OCTN2–green fluorescent protein construct (human), **264,** 909
chromosomes in, focal sites of DNA repair synthesis (human), **257,** 378
dendritic appearances in, induction by pharbin (mouse), **261,** 188
dermal
hyaluronidase expression (human), **266,** 268
MAP kinase-independent induction of c-*fos* mRNA by hemin (human), **260,** 289
MCP-4 genomic organization, sequence analysis, and transcriptional regulation (human), **255,** 470
in progeria, altered antioxidant enzyme levels, **257,** 163
dermal, matrix metalloproteinase-1 and -3 upregulation, role of NF-κB (rabbit), **264,** 561
diploid lung MRC-5 cells persistently infected with Sindbis virus, Mn superoxide dismutase induction in, **261,** 139
DNA end binding of Ku80 and survival after radiation, associated Ku80 functional domains (mouse), **261,** 802
early S phase checkpoint in, regulation by E2F1 transcription factor (NIH3T3 cells), **258,** 77
embryonic, HSF1 activation upon heat shock and during post-heat-shock recovery, effects of proteasome inhibitors and calyculin (mouse), **264,** 352
embryonic lung, HGF expression, adrenergic stimulation (human), **262,** 76
embryo transfor cell line resistant to retinoic acid, growth and apoptosis, effects of 4-hydroxyphenylretinamide, **254,** 636
embryonic kidney, monoallelic *H19* gene expression in transfected cells, effects of proinsulin-like growth factor-II overexpression (human), **255,** 226
enrichment with polyunsaturated fatty acids, induction of oxidative stress and activation of AP1 and NFκB (human), **265,** 116
epidermal growth factor receptor transmodulation by PDGF, spatial organization (human), **261,** 695
extracts, RNase treatment, effects on substrate methylation by type I protein-arginine *N*-methyltransferases (Rat1 cells), **259,** 391
Fanconia anemia cell lines, chromosomal instability, noninvolvement of defective repair activity of ribosomal protein S3, **264,** 518
gingival
Porphyromonas gingivalis LPS-stimulated, IL-6 production, inhibition by IL-10 (human), **263,** 372
stimulated with IL-1β and EGF, cyclooxygenase expression and PGE_2 production, role of tyrosine kinases (human), **257,** 528
stretch-activated intracellular calcium transients, regulation by actin filaments (human), **261,** 419
human α_{1A}-adrenoceptors expressed in, differential regulation of 46- and 54-kDA Jun N-terminal kinases and p38 MAP kinase (Rat-1 cells), **261,** 372
intracellular localization of Fanconi anemia complementation group A protein (GM6914 cells), **259,** 594
malignant transformation, associated changes in glycosylation, role of β-1,4-galactosyltransferase V, **265,** 434
malignant transformation by CD98 overexpression (NIH3T3 cells), **262,** 720
movement, migration, and spreading, promotion by $p130^{Cas}$, **262,** 25
overexpressing insulin receptors, insulin signaling in, role of rat SH2-containing inositol phosphatase 2 (Rat1 cells), **260,** 265
PLA_2-mediated arachidonic acid release required for cell spreading, role of β1-integrin cytosolic domain (NIH-3T3 cells), **258,** 306
poly(ADP-ribose) polymerase-deficient, p73 expression compensating for reduced level of regularly spliced wild-type p53 (mouse), **255,** 399
pulmonary
IL-6-induced Stat3 signaling and gp130 gene expression in primary cultures, inhibition by α-thrombin (human), **256,** 626
release of soluble ICAM-1 (human), **260,** 734
viability and DNA fragmentation, effects of exogenous NO and hyperoxia (human), **262,** 685
renal, CD39 localization to caveolae in, analysis (COS-7 cells), **262,** 596
silica-induced generation of reactive oxygen species, role in MAP kinase activation (Rat2 cells), **262,** 708
SV40 immortalization, effect on p53-dependent radiation responses (human), **257,** 168
thrombin-stimulated $p70^{S6k}$ activity and morphological changes, selective potentiation by NO donors (Swiss 3T3 cells), **266,** 352
transformed by mutant $p53^{val135}$, genes with altered expression in, identification and characterization (Rat 6 cells), **266,** 472
transforming ability of *RET* cDNAs with mutations at Asp 631 (NIH 3T3 cells), **255,** 587
tyrosine phosphorylation and collagen-lattice compaction *in vitro,* induction by hemolysate (dog, human), **264,** 100
UV-irradiated, inhibition of calcium signaling in, role of tyrosine phosphorylation and protein kinase C (V79 cells), **261,** 504

Fibronectin
splicing in MDCK cells, regulation by HGF/scatter factor: comparison with effects of TGF-β1, **260,** 225

Fibrosarcoma cells
invasiveness, effect of suppression of membrane type-1 matrix metalloproteinase production and progelatinase A activation by heat shock (HT-1080 cells), **265,** 189
ProMMP-1 and ProMMP-3 activation, effect of tissue factor pathway inhibitor-2/matrix-associated serine protease inhibitor (HT-1080 cells), **255,** 94; *erratum,* **258,** 497
site-specific DNA double-strand breaks, generation by homing endonucleases I-*Ppo*I and I-*Cre*I, **255,** 88
TNF induction of apoptosis or necrosis, association with cell cycle stage-dependent patterns of caspase activation (WEHI-164 cells), **261,** 385
transfected, TNF-α-induced p38 MAP kinase activation and IL-6 production, negative regulation by thioredoxin, **258,** 443

Fibrosis
pulmonary, bleomycin-induced, amelioration by *in vivo* gene transfer of PDGF β extracellular domain via HVJ-liposome method (mouse), **265,** 503

FimA protein
Porphyromonas gingivalis, saliva-binding epitopes of, expression on surface of *Streptococcus gordonii,* **258,** 222

Firefly luciferase
  light-emitting species dissociated from *Photinus pyralis* system, light emission from, **265,** 273
Fisetin
  inhibition of glucose uptake in U937 cells, **260,** 568
Fish oil
  feeding, or fibrate administration, upregulation of liver uncoupling protein-2 mRNA in mice, **257,** 879
Fizzy/cdc20
  stimulation of cyclosome, role of cyclosome phosphorylation (clam oocytes), **260,** 193
FK506-binding protein
  His-tagged, expressed in bacteria, N-terminal modification, MS determination, **259,** 271
Flavin semiquinone
  nitric-oxide synthase, reactivity in arginine oxygenation to N^G-hydroxyarginine, **250,** 36; *erratum,* **256,** 447
Flavodoxin
  and cytochrome c_3, from *Desulfovibrio gigas,* crosslinking, **256,** 367
Flavonoids
  activation of Cl^- channel and $Na^+/K^+/2Cl^-$ cotransporter in renal epithelial A6 cells, **254,** 368
  inhibition of glucose uptake in U937 cells, **260,** 568
  inhibition of protein synthesis in leukemia cells, role of eukaryotic initiation factor 2α kinases, **265,** 589
FLK-1
  lipocortin V function as signaling protein for, **258,** 713
Flk-1/KDR
  nuclear translocation in vascular endothelial cells, induction by VEGF, **256,** 192
FLT-1
  fourth immunoglobulin-like loop of extracellular domain, heparin binding site in, detection (HUVEC cells), **264,** 730
flt-1 gene
  upregulation associated with VEGF inhibition of hepatic stellate cell contraction during activation *in vitro,* **258,** 674
Flt-1 receptor
  VEGF binding site, characterization, **262,** 731
Flt3 ligand
  stimulated hematopoietic cells, PI3 kinase subunit p85 in, lack of binding to human Flt3 receptor and complex formation with SHP2, SHIP, and tyrosine-phosphorylated proteins, **254,** 440
Flt3 receptor
  human, in hematopoietic cells, lack of binding by p85 subunit of PI3 kinase, **254,** 440
FLT tyrosine kinase receptor family
  flt-1, upregulation associated with VEGF inhibition of hepatic stellate cell contraction during activation *in vitro,* **258,** 674
Fluconazole
  resistance of clinical strains of *Candida albicans* to, induction by G464S substitution in sterol 14α-demethylase, **262,** 174
Fluorescein 5′-isothiocyanate
  in studies of soybean lipoxygenase structure and molecular mechanisms, **265,** 489
Fluorescence
  apo-glucose oxidase, as glucose concentration probe, **263,** 550
  green fluorescent protein mutant with enhanced sensitivity for microanalysis at 488 nm excitation, **264,** 556
  NAD(P)H, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
Fluorescence correlation spectroscopy
  detection of incipient stage in thrombin-induced fibrin polymerization at single molecule level, **260,** 35
Fluorescence detection
  and chemical cleavage of mismatches, in Fabry disease: α-galactosidase A mutations and carrier detection, **257,** 708
Fluorescence intensity
  dynamic measurements, tracing and subgrouping of lymphocyte activation by, **261,** 712
Fluorescence microscopy
  DNA-stretching-based method, visualization of specific sequence on single large DNA molecule, **265,** 140
  dynamics of DNA molecules embedded in gel, **258,** 102
  imaging of DNA polymerase I action and products, **254,** 466
Fluorescence polarization
  dynamic measurements, tracing and subgrouping of lymphocyte activation by, **261,** 712
Fluorescence spectroscopy
  bacterial luciferase α subunit Trp182, Trp194, and Trp250 residues, **263,** 820
  prion protein cellular isoform structural dependence on solvent: spectroscopic characterization of intermediate conformation, **264,** 972
Fluorescent dyes
  accumulation in *Pseudomonas aeruginosa,* role of efflux pumps and outer membrane permeability barrier, **261,** 452
5-Fluoro-2′-deoxyuridine
  resistance of dideoxycytidine-resistant H9 cell line to, **262,** 657
trans-Flupenthixol
  acceleration of course of multidrug resistant leukemia, **266,** 167
Fluvastatin
  effect on regression of atherosclerosis in rabbit aorta and serum lipid levels and role of NO, **259,** 414
Flux
  multisite modulation during monolignol formation in loblolly pine, **261,** 652
fms-like tyrosine kinase-1
  fourth immunoglobulin-like loop of extracellular domain, heparin binding site in, detection (HUVEC cells), **264,** 730
Focal adhesion
  inhibitory effect on angiotensin II-induced p44/42 MAP kinase activity in human mesangial cells, mediation by integrins, **261,** 820
  role in angiotensin II signal transduction pathways in human mesangial cells, **257,** 234
Focal adhesion kinase
  activation
    by cytoskeletal reorganization, role in induction of urokinase-type plasminogen activator gene (LLC-PK_1 cells), **262,** 666
    by pulsatile stretch in cultured rat cardiac myocytes, **259,** 8
  activation and subcellular translocation in cultured cardiac myocytes, induction by hypoxia (rat), **262,** 290
  tyrosine phosphorylation
    reduction by *Helicobacter pylori* vacuolating cytotoxin, **262,** 245
    stimulation by growth hormone in human osteoblast-like Saos2 cells, **263,** 100
Focal ischemia
  glutaredoxin mRNA and protein in rat brain following, **258,** 390
Folate transport
  nitric oxide regulation of reduced-folate transporter in cultured human retinal pigment epithelial cells, **257,** 279
Folic acid
  biosynthesis, dihydropteroate synthase in, substrate binding order and sulfonamide inhibition (*Streptococcus pneumoniae*), **258,** 752
Follistatin modules
  EGF-like molecule with, stimulation of tyrosine phosphorylation of erbB-4 in MKN28 gastric cancer cells, **266,** 593

Follistatin-related protein
  cDNA cloning and distribution (*Xenopus laevis*), **254,** 42
Food intake
  and leptin effects on hypothalamic hypocretin/orexin and neuropeptide Y (rat), **258,** 119
Food restriction
  and dietary obesity, effects on hypothalamic levels of agouti-related protein, α-MSH, and pro-opiomelanocortin (rat), **258,** 574
Forkhead transcription factor
  sep1+, effect of deletion on hyphal growth (*Schizosaccharomyces pombe*), **263,** 465
Formate
  uptake into vesicles isolated from basolateral region of plasma membrane of ovine parotid acinar cells, **259,** 606
Formyl-methionyl-leucyl-phenylalanine
  activation of neutrophil NADPH oxidase, inhibition by specific SAPK2/p38 inhibitor SB 203580, **259,** 465
  stimulation of phospholipase D in human neutrophils, role of MAP kinase, **264,** 371
Fortieth Anniversary Issue
  BBRC articles cited 500 times or more during the period 1960–1995, **266,** 621
  current, past, and deceased editors, **266,** 619
  Editorial Board (photograph), **266,** 620
  Forty Years Ago, by Bernard L. Horecker, **266,** 618
  Introduction, by William J. Lennarz, **266,** 617
Fos
  expression, effect of dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
  region-specific expression in rat accessory olfactory bulb, induction by protease-sensitive urinary pheromones, **260,** 222
Fosfomycin
  effect on expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
F plasmid
  partition proteins SopA and SopB, interaction, **263,** 113
Fracture healing
  initial stage, in bone marrow cells, role of hedgehog signaling molecules (mouse), **262,** 443
Free fatty acids
  plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
Free radicals
  enzymes scavenging, altered levels in progeria skin fibroblasts, **257,** 163
  generated in cell cultures, photodynamic effects on, quantitative aspects, **255,** 360
Frizzled-4 gene
  molecular cloning and characterization on chromosome 11q14-q21 (human), **264,** 955
Frizzled-10 gene
  molecular cloning (human), **262,** 39
Frizzled-related protein
  homologue with altered expression in Rat 6 cells transformed by mutant $p53^{val135}$, identification and characterization, **266,** 472
Fructose-2,6-bisphosphatase 6-phosphohydrolase
  –6-phosphofructo-2-kinase, *see* 6-Phosphofructo-2-kinase/fructose 2,6-bisphosphatase
Fruiting bodies
  fresh, ribonuclease in, isolation (straw mushroom), **264,** 714
ftsZ gene
  Acholeplasma laidlawii, and gene product, characterization, **262,** 44
2′-Fucosyllactose
  6-*O*-sulfation, lymph node sulfotransferase causing, purification and characterization (pig), **256,** 170
Fungi
  phytopathogenic, alkaline protease inhibitor with antifungal properties against, characterization, **262,** 702
N^6-Furfuryladenine
  protection against Fenton reaction-mediated oxidative damage to DNA, **265,** 499
Fuscoredoxin
  Escherichia coli, overexpressed, biochemical and spectroscopic characterization, **260,** 209
Fusion gene
  G-CSF–gyrase B, as molecular switch for expansion of genetically modified hematopoietic cells, **260,** 9
Fusion proteins
  nuclear import in yeast, and location and number of nuclear localizing signals, **256,** 278
Fusogenic liposomes
  immunopotentiating, vaccine-delivery system using, **261,** 824
Fv fragment
  single-chain, recombinant, processing in insect cells, enhancement by bacterial signal peptidase, **255,** 444
Fyn
  selective association with integrin-rich actin cytoskeleton of activated non-aggregated platelets, **260,** 790

G

G1TE
  nonphosphorylated inhibitor to Grb2-SH2 domain, structural requirement for Tyr in consensus sequence Y-E-N of, **264,** 902
$GABA_A$ receptor
  benzodiazepine binding site, binding by 6-methyl-3′-bromoflavone (mouse), **262,** 643
  populations in cerebellar granule cells in culture, desensitization kinetics, pharmacology, serine/threonine kinase sensitivity, and localization (rat), **266,** 603
GADD34-like gene
  interacting with zinc-finger transcription factor binding $p21^{WAF}$ promoter, cloning, **256,** 249
Gadolinium complexes
  MRI contrast agents, hepatic uptake, molecular mechanisms (rat), **257,** 746
GAL80 gene
  transcription initiation mediated by initiator binding protein in *Saccharomyces cerevisiae,* **255,** 157
Galactose
  binding site location in *trans*-sialidase (*Trypanosoma cruzi*), **262,** 549
  lectin RCA_{120} specific for, binding by plasmid–lactose conjugate, **260,** 323
  6-*O*-sulfation in 2′-fucosyllactose and other sialyl $Lewis^X$-related sugars, lymph node sulfotransferase causing, purification and characterization (pig), **256,** 170
  terminal, on immunoglobulins, microscale colorimetric assay, **261,** 196
Galactose-α1,3-galactose epitope
  masking and reduction by glycosyltransferase gene transfection (swine), **264,** 611
β-D-Galactose pentaacetate
  NAD(P)H fluorescence, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
β-Galactosidase
  gene transfection *in vivo* in rat heart using Sendai virus-coated proteoliposomes, gene product identification following, **259,** 408
  and morphological change, senescence-associated, triggering by TGF-β in cancer cells, **255,** 110
α-Galactosidase A
  mutation identification and carrier detection in Fabry disease with fluorescent chemical cleavage of mismatches, **257,** 708

Galactosylation
  impaired, of core 2 O-glycans in erythrocytes of β1,4-galactosyltransferase knockout mice, **260,** 94
α-(1,3)-Galactosyltransferase
  histoblood group B, α-(1,3)-*N*-acetylgalactosaminyltransferase activity, role of amino acid (human), **262,** 487
β1,4-Galactosyltransferase
  knockout mice, erythrocytes of, impaired galactosylation of core 2 O-glycans, **260,** 94
β-1,4-Galactosyltransferase V
  role in malignant transformation-associated changes in glycosylation, **265,** 434
Galectin-3
  minimal lactose-binding domain, determination by λ phage display, **265,** 291
α-Gal epitope
  masking and reduction by glycosyltransferase gene transfection (swine), **264,** 611
Galβ1,3GalNAc/Galβ1,4GlcNAc α2,3-sialyltransferase
  gene, epithelial cell-specific transcriptional regulation (human), **257,** 516
Gamma irradiation
  hamster cells overexpressing dominant negative mutant of poly(ADP-ribose) polymerase, effect on NAD$^+$ consumption, **265,** 525
Gangciclovir
  glioma gene therapy with HSV-TK/GCV system, bystander effect in, tentative mechanism, **259,** 455
Gangliosides
  GD1a and GM3, induction of IL-10 production by T cells (human), **256,** 41
Ganglioside sialidase
  cloning, expression, and chromosomal mapping (human), **261,** 21
GAP
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
Gap1 permease
  ubiquitination and endocytosis, role of N-terminal C$_2$ domain of yeast Npi1/Rsp5 ubiquitin ligase, **257,** 561
GAP31
  proteolytic fragments, anti-HIV and anti-tumor activity, **262,** 615
GAP^{IP4BP}
  tissue-specific expression and subcellular distribution (RBL-2H3 cells, human), **255,** 421
GAP^{m}
  tissue-specific expression and subcellular distribution (RBL-2H3 cells, human), **255,** 421
Gap junctions
  cAMP role in EDHF/gap junction-dependent relaxations of rabbit jugular vein, **263,** 52
  heterocellular, role in endothelium-dependent smooth muscle hyperpolarization (rabbit), **254,** 27
Gas chromatography–mass spectrometry
  and HPLC-EC, discrepancies in measurement of UVC-induced 8-oxo-2′-deoxyguanosine, **259,** 374
Gastric acid
  secretion, stimulation by centrally administered orexin-A in conscious rats, **254,** 623
Gastric cancer cells
  c-*MET* expression, inhibition by PPARγ via suppression of *Ets* (human), **265,** 453
  direct interaction of multidrug resistance protein with quinoline derivative MS-209 (human), **255,** 618; *erratum,* **258,** 816
  erbB-4 tyrosine phosphorylation in, stimulation by EGF-like molecule with two follistatin modules (MKN28 cells), **266,** 593
  growth, effect of antisense human telomerase RNA transfection, **255,** 753
Gastric cells
  β-defensin-2 mRNA expression, induction by *Helicobacter pylori* in MKN45 cells with *cag* pathogenicity island, **263,** 770
  Sp1 phosphorylation by Erk 2, stimulation of DNA binding (human AGS cells), **254,** 454
Gastric lipase
  recombinant human, cysteine residues of, **257,** 851
Gastric mucosa
  inflammatory responses to *Helicobacter pylori* LPS in rat
    downregulation of caspase-3 and NO synthase-2 by sulglycotide, **261,** 15
    interplay of ET-1, IL-4, and TNF-α in, **258,** 17
  ulcer healing, interleukin-4 downregulation of endothelin-1 (rat), **263,** 591
Gastric parietal cells
  isolated, IκB-kinase regulation by carbachol (dog), **261,** 877
Gastrin
  promoter, stimulation by ras-Erk signal transduction pathway, and Sp1 phosphorylation by Erk 2, **254,** 454
Gastritis
  acute, *Helicobacter pylori*-induced, gastric mucosal inflammatory responses in rat
    downregulation of caspase-3 and NO synthase-2 by sulglycotide, **261,** 15
    role of ET-1, IL-4, and TNF-α (rat), **258,** 17
Gastrointestinal tract
  naringenin interactions in, analysis (rat), **265,** 410
GATA
  PEA3 site flanked by site for, regulation of differentiation-dependent *Brachyury* expression in P19 cells, **254,** 542
GATA-3
  and NFIL-6 and USF, of nuclear extracts, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
GB virus C
  complete coding sequence in European isolate, **255,** 432
GB virus C/hepatitis G virus
  quasispecies and replication sites in humans, **258,** 296
GDP
  labeled, direct transport of, as source of guanine nucleotides in isolated heart mitochondria (rat), **257,** 466
Gel
  DNA molecules embedded in, dynamics by fluorescence microscopy, **258,** 102
92-kDa Gelatinase
  genetic analysis in Finnish patients with abdominal aortic or intracranial aneurysms, **265,** 563
  role in ceramide-mediated inhibition of human keratinocyte growth, **260,** 634
Gel electrophoresis
  blue native PAGE, isolation of chloroplast F$_0$F$_1$-ATP synthase, CF$_0$, and CF$_1$, **259,** 569
  two-dimensional, SURFEIT-1 gene on blue native gel, analysis in cytochrome *c* oxidase deficiency (human), **265,** 339
Gel filtration
  intact chloroplast H$^+$-ATP synthase, detergent effect (spinach), **265,** 520
Gelsolin
  binding to amyloid β-protein (human), **258,** 241
Gelsolin-like domains
  and leucine-rich repeats, Ras-binding protein Ce-FLI-1 comprising (*Caenorhabditis elegans*), **257,** 111
Gene 33
  induction by activation of stress-activated protein kinases by hepatocyte isolation (rat), **254,** 728
Gene amplification
  MDM2 gene in mediastinum fibrosarcoma, detection by arbitrarily primed PCR fingerprinting, **258,** 271

Gene deletion
  CYP2A6, associated reduction of susceptibility to lung cancer (human), **261,** 658
  FOL2 gene in *Saccharomyces cerevisiae,* complementation by *Escherichia coli* and human genes for GTP cyclohydrolase I, **255,** 521
Gene expression
  during erythroid differentiation, heme regulatory effects (K562 cells), **258,** 87
  Mycobacterium tuberculosis H37Rv and avirulent mutant, comparison with mRNA differential display, **258,** 94
Gene expression profiling
  in response to p53 in human lung cancer cell line, **264,** 891
Gene mapping
  ACTN2 gene encoding α-actinin-2 sarcomeric isoform expressed in skeletal and cardiac muscle, **265,** 256
  PREF-1 gene (bovine), **264,** 662
  transcribed dinucleotide microsatellites and associated genes (channel catfish), **259,** 190
Gene organization
  UCP2 gene (human, mouse), **255,** 40
General odorant-binding protein 2
  structural analysis and disulfide-bridge pairing (*Bombyx mori*), **266,** 386
Genes
  class II, transcription, inhibition in *Xenopus* postblastular embryos with overexpressed Dr1, **265,** 644
  differential display analysis method, **262,** 365; *erratum,* **265,** 272
  differentially expressed, identification in activin-induced apoptotic LNCaP cells, **257,** 187
  dioxin-responsive, expression in human endometrial cells in culture, **257,** 259
  Egr-1-dependent expression, regulation by C-terminal activation domain, **255,** 208
  with expression altered in Rat 6 fibroblasts transformed by mutant $p53^{val135}$, identification and characterization, **266,** 472
  function, in zebrafish embryo, effect of dsRNA treatment, **263,** 156
  immediate early, expression in preadipocytes, differential regulation through multiple signaling pathways (3T3-L1 cells), **265,** 664
  inducible at early stage of adipocyte differentiation of 3T3-L1 cells, identification, **254,** 299
  metastasis-associated, differentially expressed in osteosarcomas, cloning by modified cDNA-AFLP method (rat), **261,** 35
  oncogene isolation from mammary tumors by retrovirus expression cloning system (rat), **265,** 7
  program regulated during Mpl ligand-induced megakaryocyte differentiation, $TAF_{II}32$ isoform repression as part of, **262,** 55
  RNA helicase-related, identification in *Plasmodium falciparum* and *P. cynomolgi,* **255,** 312
Gene structure
  titin gene (human), **262,** 411
  transcription factor gene TZFP related to PLZF (human), **264,** 789
  UCP2 gene (human, mouse), **255,** 40
Gene therapy
  glioma, with HSV-TK/GCV system, tentative mechanism for bystander effect (rat), **259,** 455
  hepatoma-specific, by retrovirus-mediated targeted gene transfer using adenovirus carrying ecotropic receptor gene, **265,** 550
Genetic heterogeneity
  yeast strains: characterization of *AQY1* from *Saccharomyces cerevisiae,* **257,** 139
Genetic polymorphisms
  CYP2A6, and lung cancer risk in Japanese subjects, **261,** 658
  5′-upstream region of CYP3A4, and individual differences in hepatic expression (human), **259,** 201
Gene transfer
  adenoviral-mediated, IL-6 in rat lung, enhancement of compartmentalized antiviral IgA and IgG responses, **258,** 332
  by electroporation *in vivo,* optimal parameters for, determination (mouse), **261,** 377
  PDGF β receptor extracellular domain *in vivo* by HVJ-liposome method: amelioration of bleomycin-induced pulmonary fibrosis (mouse), **265,** 503
  into pregnant animals, evaluation of cationic liposome suitable for, **258,** 358
  receptor-mediated, to mammalian cells, phage engineered for, genetic selection, **264,** 921
  targeted, mediated by retrovirus using adenovirus carrying ecotropic receptor gene, for hepatoma-specific gene therapy, **265,** 550
  transgene expression driven by retroviral LTR, negative regulation by activated macrophages, **257,** 74
Gene trap insertional mutagenesis
  removal of Crk-II in mutant mice for analysis of Crk-II role in embryonic development, **266,** 569
Gene trapping
  identification of differentially expressed RNA helicase, **262,** 677
Genistein
  activation of Cl^- channel and $Na^+/K^+/2Cl^-$ cotransporter in renal epithelial A6 cells, **254,** 368
  inhibition of glucose uptake in U937 cells, **260,** 568
  inhibition of protein synthesis in leukemia cells, role of eukaryotic initiation factor 2α kinases, **265,** 589
  neuroprotective effects in murine models of familial amyotrophic lateral sclerosis and stroke, **258,** 685
Genomic imprinting
  mouse insulin-like growth factor II receptor gene: lack of reciprocal imprinting of sense and antisense RNA in CNS, **257,** 604
Genomic organization
  γ adducin gene (human), **266,** 110
  adrenoleukodystrophy related gene (human), **258,** 436
  BMAL1 gene (mouse), **260,** 760
  cathepsin F (human), **259,** 401
  CD163 gene (human), **260,** 466
  Drosophila germ cell-less homologue in mouse, **262,** 223
  esp-1 gene (human), **266,** 564
  heat shock protein 105 gene (mouse), **256,** 75
  integrin α7 gene transcripts of cardiac and skeletal muscle (human), **260,** 357
  KPSFVRFamide gene (*Caenorhabditis elegans*), **254,** 222
  MCP-4 gene in dermal fibroblasts (human), **255,** 470
  MUC3 gene 3′ region (human), **263,** 728
  myristoyl-CoA:protein *N*-myristoyltransferase-1 (human), **257,** 284
  Niemann-Pick C1 gene (human), **261,** 493
  partial D category D^{Va} (human), **254,** 786
  PREF-1 gene (bovine), **264,** 662
  ribosomal protein gene cluster, comparison in *Halobacterium halobium, E. coli,* and *B. subtilis,* **264,** 24
  SMP30 gene (mouse), **254,** 1
  uncoupling protein 2 and 3 genes (mouse), **256,** 27
Genomic structure
  ACTN2 gene encoding α-actinin-2 sarcomeric isoform expressed in skeletal and cardiac muscle, **265,** 256
  aldose reductase gene: genomic regions directing cell-specific expression (mouse), **255,** 759
  apM-1 gene mapped to chromosome 1q21.3-q23 locus for familial combined hyperlipidemia (human), **260,** 416
  gene for human Fe65L2 interacting with Alzheimer's β-amyloid precursor protein, **258,** 385
  prostaglandin F receptor gene (human), **254,** 413

Genotoxicity
  evaluation with reconstituted three-dimensional human skin, **254,** 49
  human milk extracts, and detection of DNA damage in exfoliated cells from breast milk, **257,** 319; *erratum,* **259,** 494
Genotyping
  CYP2A6, with single PCR–RFLP (human), **262,** 146
  CYP2C9, methods for, validation (human), **254,** 628; *erratum,* **258,** 227
Geraniol
  induction of apoptosis-like cell death in shoot primordia of *Matricaria chamomilla,* **259,** 519
germ cell-less gene
  murine homologue of *Drosophila* gene, expression in germ lineage cells, **262,** 223
Germ cells
  embryonic, derived from primordial germ cells, hematopoietic development in culture (mouse), **260,** 475
  male, and somatic cells, in poikilotherm trout, HSF1 activation at different temperatures in, **259,** 15
Germ lineage cells
  Drosophila germ cell-less murine homologue expression, **262,** 223
Gill
  carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
Gingipains
  IL-6 inactivation: Lys- and Arg-specific proteinases from *Porphyromonas gingivalis,* **261,** 598
Glass
  agarose-coated, artificial lipid bilayer formed on, for simultaneous electrical and optical measurement of single ion channels, **265,** 595
Glaucoma
  candidate gene oculomedin induced by mechanical stretching in human trabecular cells of eye, **259,** 349
Glial cells
  BDNF and c-*fos* gene promoters, silencer-mediated repression in primary culture (rat), **261,** 233
  cell lines from brain, secretion of lecithin–cholesterol acyltransferase (human, rat), **258,** 73
  and neurons, of rat brain, expression of homologous cytochrome b_5s, **256,** 330
  neurotrophic factor derived from, induction of barrier function of endothelial cells forming blood–brain barrier (pig), **261,** 108
Glial fibrillary acidic protein
  assembly, effects of interaction with S100A1, role of S100A1 C-terminal extension, **254,** 36
Glibenclamide
  induction of apoptosis in HepG2 cells via CFTR Cl$^-$ channel inhibition and intracellular Ca^{2+} release, **261,** 682
  low-affinity binding sites on Kir6.2 subunit of β-cell K_{ATP} channel, **257,** 766
Glioblastoma cells
  MCP-1 expression, polymorphisms in MCP-1 gene regulatory region influencing (human A172 cells), **259,** 344
  S100A11 subcellular localization (human), **263,** 135
Glioma
  intracranial malignant xenografts in athymic mice, eradication by locoregional Apo2L/TRAIL in absence of neurotoxicity, **265,** 479
Glioma cells
  ATP-evoked Ca^{2+} mobilization, effects of sphingosine and phorbol ester (C6 cells), **260,** 614
  based system for HIV coreceptor usage determination (NP-2 cells), **258,** 313
  drug cytotoxicity, selective potentiation by NSAIDs, role of MRP and COX-1 (human T98G cells), **259,** 600
  ERG current inactivation (NG108-15 cells), **263,** 510
  expression of TRAIL and receptors (human), **257,** 454; *erratum,* **259,** 230
  gene therapy with HSV-TK/GCV system, tentative mechanism for bystander effect (rat), **259,** 455
  hypertonic stress, selective induction of glial glutamate transporter GLT-1 (C6 cells), **265,** 240
  inner mitochondrial membrane, Ca^{2+}-activated K channel of BK-type (human LN229 cells), **257,** 549
  malignant, cell cycle progression and chemosensitivity, modulation by p27 (human), **261,** 890
glnL
  nitrogen regulator II encoding, *in vitro* transcription, stimulation by heat shock protein (*Escherichia coli*), **258,** 341
β-Globin locus
  cis regulatory elements at, localization by analysis of hybrid haplotype chromosomes (human), **254,** 181
Globotriaosyl ceramide
  verotoxin binding to, monovalent soluble mimic inhibiting: adamantyl globotriaosyl ceramide, **257,** 391
Glomerular endothelial cells
  chronic ceramide formation in, stimulation by nitric oxide (bovine), **258,** 60
GLT-1
  glial, selective induction by hypertonic stress in C6 glioma cells, **265,** 240
  steroid hormone-inducible expression in embryonic kidney cells (human), **265,** 101
Glucagon
  regulation of CYP2E1 expression, role of phosphatidylinositol 3-kinase, Src kinase, and protein kinase A signaling pathways (rat), **266,** 304
Glucocorticoid receptor
  and C/EBP, binding to acute phase response element of mouse α_1 acid glycoprotein gene, interference mapping, **255,** 608
  expression in vascular endothelial cells, modulation of glucocorticoid-mediated suppression of cyclooxygenase-2 gene promoter activity, **254,** 292
  isoform expression in cultured lymphocytes from patient with systemic glucocorticoid resistance and chronic lymphocytic leukemia, **254,** 559
Glucocorticoid response elements
  in thyrotropin-releasing hormone receptor gene transcription, **257,** 829
Glucocorticoids
  and cytokines, effects on angiogenin production by human HepG2 hepatoma cells, **259,** 178
  dependent induction of haptoglobin gene expression, attenuation by TGF-β, role of MAP kinase pathway (rat IEC-6 cells), **259,** 544
  suppression of cyclooxygenase-2 gene promoter activity in vascular endothelial cells mediated by, modulation by glucocorticoid receptor expression, **254,** 292
Gluconic acid
  derivative of, attached to N-terminus of histidine-tagged proteins expressed in bacteria, identification, **262,** 793
Glucose
  apo-glucose oxidase fluorescence emission as concentration probe, **263,** 550
  Ca^{2+} transients in pancreatic β-cells induced by, synchronization by diffusible factor, **254,** 436
  high levels, enhancement of osteopontin expression in cultured rat aortic smooth muscle cells, **258,** 722
  induced oxygen levels in single mouse islets: detection of multiple oscillatory oxygen consumption patterns, **259,** 331
  induced PDGF-β receptor increase in rat aortic SMC, prevention by aldose reductase inhibitor, **261,** 853
  insulin secretion stimulated by, PACAP as islet neuropeptide contributing to, identification (mouse), **256,** 664
  metabolic alterations in isolated perfused hepatocytes induced by pancreatic cancer conditioned medium (rat), **257,** 622

  metabolism, and microtubule assembly, enhancement in neuronal systems *in vitro,* and decreased sensitivity to copper toxicity, **264,** 605
  plasma, effects of n-3 polyunsaturated fatty acids ($KK\text{-}A^y$ mouse), **259,** 85
  protection against MPP$^+$-induced apoptosis, role of mitochondrial membrane potential and ATP synthase (PC12 cells), **257,** 440
  uptake
    in L6 myoblasts, stimulation by factor from pancreatic and colonic cancer cells, **260,** 626
    in U937 cells, inhibition by flavonoids, **260,** 568
D-Glucose
  metabolic response of B and non-B pancreatic islets (rat), **262,** 346
  metabolism in muscles and pancreatic islets of GLUT4 null mice, **264,** 855
Glucose dehydrogenase
  with pyrroloquinoline quinone prosthetic group, water-soluble mutant with altered K_m values, site-directed mutagenesis studies on putative active site, **264,** 820
α-D-Glucose pentaacetate
  metabolism in muscles and pancreatic islets of GLUT4 null mice, **264,** 855
  NAD(P)H fluorescence, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
β-L-Glucose pentaacetate
  NAD(P)H fluorescence, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
Glucose-6-phosphate dehydrogenase
  mRNA, upregulation by nicotinic acid and nicotinamide in Jurkat cells, **255,** 133
Glucose-regulated protein
  78-kDa, modulation of activity of protein phosphatase 1 γ2, **259,** 300
Glucose-regulated stress protein
  GRP78, overexpression, effect on sensitivity of human colon cancer cells to DNA crosslinking agents, **257,** 361
Glucose starvation
  induction of nuclear accumulation of proteasomes in human cancer cells, **258,** 448
Glucose transporter, *see* GLUT1; GLUT3; GLUT4
α-Glucosidase II
  and calnexin, role in tyrosinase folding and copper loading *in vivo,* **261,** 720
Glucosylation
  natural ceramides in CHP-100 neuroepithelioma cells, inhibition by *N*-oleoylethanolamine, implications for apoptosis, **255,** 456
β-Glucuronidase
  deficient *Escherichia coli,* effect on ACF formation (rat colon), **262,** 322
Glucuronidation
  7-ethyl-10-hydroxycamptothecin by *UGT1*-encoded human UDP-glucuronosyltranserases, **260,** 199
Glucuronosyltransferase
  second, involved in biosynthesis of HNK-1 carbohydrate epitope, molecular cloning and expression (rat brain), **255,** 182
GLUT1
  gene expression, effect of mRNA stability, **263,** 265
  3′UTR, hnRNP A2 and hnRNP L binding (human brain tumors), **261,** 646
GLUT3
  and choline acetyltransferase, colocalization in retina (rat), **256,** 505
GLUT4
  expression, inhibition in isolated adipocytes from cachectic tumor-bearing rats, **256,** 676
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
  overexpression in mice, induction of upregulation of UCP3 mRNA in skeletal muscle, **258,** 187
  promoter, repression by cAMP, mediation by transcription factor NF1, **260,** 600
  translocation in adipose cells, inhibition by protein-tyrosine phosphatase-α overexpression (rat), **255,** 200
Glutamate
  uptake by cortical astrocytes *in vitro,* inhibition by unconjugated bilirubin, role of concentration and pH (rat), **265,** 67
Glutamate dehydrogenase gene
  DNA sequence with homology to, on complementary strand of DNA sequence encoding *dnaK* (*Prevotella albensis*), **263,** 58
Glutamate-gated chloride channel
  homologue of, cloning, sequencing, and developmental expression (*Haemonchus contortus*), **254,** 529
Glutamate racemase gene
  coexpression, effect on production of *Bacillus subtilis* IFO 3336 poly-γ-glutamate in *E. coli,* **263,** 6
Glutamate transporter GLT-1
  glial, selective induction by hypertonic stress in C6 glioma cells, **265,** 240
  steroid hormone-inducible expression in embryonic kidney cells (human), **265,** 101
γ-Glutamylcysteine synthetase
  regulatory subunit gene, upregulation in HepG2 cells, role of Nrf2 binding to electrophile response element, **261,** 661
Glutaredoxin
  activity of bovine erythrocyte glutathione peroxidase, **257,** 567
  localization in rat brain and functional implications during focal ischemia, **258,** 390
Glutathione
  dependent oxidative modification, of protoporphyrin and other dicarboxylic porphyrins by mammalian and plant peroxidases, **259,** 195
  hydrogen peroxide-induced depletion, effect of constitutive hsp70 (H9c2 cells), **265,** 279
  reduced, modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
Glutathione-dependent dehydroascorbic acid reductase
  activity of bovine erythrocyte glutathione peroxidase, **257,** 567
Glutathione peroxidase
  altered levels in progeria skin fibroblasts, **257,** 163
  bovine erythrocyte, dehydroascorbic acid reductase and thioltransferase activities, **257,** 567
  induction in ursodeoxycholic acid protection of hepatocyte against oxidative injury, **263,** 537
Glutathione *S*-transferase
  GST-Ya gene, negative regulation via antioxidant/electrophile response element, direction by C/EBP-like site, **265,** 18
  isoforms defending against oxidative stress, compounds inducing, analysis in neuronal IMR-32 cells, **262,** 591
Glutathione *S*-transferase A4-4
  detoxifying 4-hydroxy-2(*E*)-nonenal, marked expression in skin of rats irradiated by UVB light, **260,** 740
Glutathione *S*-transferase ζ
  catalyzed biotransformation of deuterated dihaloacetic acids, **261,** 779
  inhibition by dichloroacetate, implications for DCA biotransformation and toxicity (human, rat), **262,** 752
N-Glycans
  acidic, from rat liver dipeptidyl-peptidase IV, *in vivo* modulation by *N*-propanoyl-D-mannosamine, **263,** 76
  chain length, effect on chaperone association and intracellular transport of MHC class I proteins, **262,** 473
O-Glycans
  core 2, impaired galactosylation in erythrocytes of β1,4-galactosyltransferase knockout mice, **260,** 94
Glycated proteins
  glycated human serum albumin, induction of NO production in VSMC by NF-κB-dependent transcriptional activation of iNOS, **259,** 128

Glycation
  collagen, effect on matrix metalloproteinase production by human dermal fibroblasts, **264,** 488
  in vitro reactions, copper-mediated ROS formation during, block by lens proteins, **259,** 706
  modification of membrane proteins of human erythrocytes by AGEs during aging in circulation, **258,** 123
  nonenzymatic glycation adduct of DNA N^2-(1-carboxyethyl)deoxyguanosine, induction of single-strand breaks and augmentation of mutation frequencies, **264,** 544
Glyceraldehyde-3-phosphate dehydrogenase
  and β-actin, cyclophilin, and 28S rRNA, comparison as internal standards for quantification of RNA levels under hypoxia, **259,** 523
  induction of fusion of phospholipid vesicles of heterogeneous sizes, **262,** 586
  mRNA, upregulation by nicotinic acid and nicotinamide in Jurkat cells, **255,** 133
  transcription in alveolar epithelial cells, increase by hypoxia (rat), **266,** 156
Glycerol
  ATP-dependent phosphorylation by glycerol kinase, implication of X-ray structure of GK complexed with ATP analog, **259,** 640
Glycerol kinase
  complexed with ATP analog, X-ray structure, and mechanism of ATP-dependent glycerol phosphorylation, **259,** 640
Glycerol-3-phosphate dehydrogenase
  mitochondrial, gene detection in Spanish type 2 diabetes mellitus patient, **263,** 439
Glycerophospholipids
  hydrolysis by ricin RCA_{60} *in vitro,* **258,** 252; *erratum,* **260,** 835
Glycine
  synthetic leucine zipper peptides rich in, in probing of roles of side chains and backbone in protein structure, **265,** 350
Glycobiology
  insect: lectin multigene family in *Drosophila melanogaster,* **261,** 923
Glycogen phosphorylase
  Drosophila, structural and functional characterization, **257,** 34; *erratum,* **263,** 263
Glycogen synthase kinase 3β
  phosphorylation of axin, site for, modulation of interaction with β-catenin and Tcf-mediated gene expression, **266,** 28
Glycolipid-enriched membranes
  MAL incorporation, role of last two C-terminal serines, **260,** 188
  MAL targeting to, requirement of pre-Golgi sorting event for, **254,** 689
Glycolipids
  effect on efficiency of MAL incorporation into artificial membranes, **266,** 330
  phytanyl-chained, synthetic vesicle membranes composed of, as matrix for functional reconstitution of cyanobacterial photosystem II complex, **265,** 734
Glycooxidative stress
  diseases of, relevance of protein aging by carboxymethylation of lysines, **260,** 332
Glycophorin B
  promoter E-box, role in erythroid-specific expression of GPB gene (human), **265,** 170
Glycophosphatidylinositol-phospholipase C
  as reporter in analysis of protein S-myristoylation in *Leishmania,* **256,** 569
Glycoprotein Ia/IIa
  and glycoprotein VI, platelet signal transduction pathways mediated by, comparison (human), **256,** 114
Glycoprotein Ibα
  interaction with FcγIIA receptor in platelets (human), **266,** 24
  platelet, von Willebrand factor-binding domain of, characterization of liposomes carrying: potential platelet substitute, **261,** 784
Glycoprotein IIb/IIIa
  murine platelet, monoclonal antibodies to, preparation from hamster–mouse interspecies hybridomas, **262,** 167
Glycoprotein VI
  and glycoprotein Ia/IIa, platelet signal transduction pathways mediated by, comparison (human), **256,** 114
Glycoprotein hormone α-subunit gene
  tissue-restricted expression, influence of cap site element, **260,** 752
Glycoprotein receptors
  seven-transmembrane receptor fex with homology to, identification and expression in adult and developing mouse, **254,** 273
Glycoproteins
  newly synthesized, free and N-linked oligomannosides as markers of quality control of, **258,** 1
Glycosaminoglycans
  heparan sulfate composition of alternatively spliced CD44 fusion proteins, **257,** 839
  hybrid, containing 6-sulfated, 4-sulfated, and unsulfated *N*-acetylgalactosamine, enzymatic reconstruction, **258,** 741
  promotion of heparin affin regulatory peptide/pleiotrophin dimerization, **266,** 437
  substitution sites, localization on domain V of perlecan (mouse), **265,** 680
Glycosphingolipid mimics
  adamantyl globotriaosyl ceramide: monovalent soluble mimic inhibiting verotoxin binding to glycolipid receptor, **257,** 391
Glycosylation
  effect on naringenin in gastrointestinal tract (rat), **265,** 410
  genetic defects in, sugar supplement therapy (human), **255,** 189
  malignant transformation-associated changes in, role of β-1,4-galactosyltransferase V, **265,** 434
  role in development of active deoxyribonuclease II (human), **256,** 591
N-Glycosylation
  CD31, **261,** 283
  oligosaccharyltransferase subunit recognizing, identification, **266,** 684
Glycosyltransferase
  gene transfection, in masking and reduction of α-Gal epitope (swine), **264,** 611
Glyoxal
  increase in human uremic plasma, *in vivo* determination, **256,** 89
  induction of advanced glycation end products in fetal L132 lung cells, effects on intracellular cathepsin D levels, **261,** 175
GM_2 activator protein
  inhibition of platelet-activating factor, **258,** 256
GMP
  labeled, direct transport of, as source of guanine nucleotides in isolated heart mitochondria (rat), **257,** 466
Gob-5 gene
  expressed in intestinal goblet cells, cloning and identification (mouse), **255,** 347
Goblet cells
  intestinal, Gob-5 gene expressed in, cloning and identification (mouse), **255,** 347
Gonadectomy
  in analysis of role of sex steroid milieu in plasma leptin levels in adult male and female rats, **259,** 56
Gonadotropin receptors
  cDNA cloning, characterization, and expression (amago salmon), **263,** 584
  GTH-RI, cDNA expressed in ovary and testis, cloning and functional characterization (amago salmon), **265,** 366

- gp20
  - human sperm antigen homologue of leukocyte CD52, biochemical and MALDI analysis, **258,** 639
- gp41
  - interactions with gp41-derived peptides, correlation with peptide antimembrane fusion activity, **265,** 625
- gp91-*phox*
  - NADPH binding site, synthetic peptides corresponding to, uncompetitive inhibition of superoxide generation, **257,** 124
- gp120
  - HIV, soluble recombinant, induction of conformational changes in cell membrane-anchored CD4, **265,** 428
- gp130
  - IL-6-induced gene expression in primary lung fibroblasts, inhibition by α-thrombin (human), **256,** 626
  - signal transduction by STAT-3 in cardiac myocytes via, **264,** 436
- gp210
  - nuclear pore complex oxalate-binding, oxalate-induced and cell cycle-dependent expression, **266,** 72
- G protein-coupled receptor kinase
  - GRK2 and GRK6, wild-type and catalytically inactive, effect on agonist-induced phosphorylation of C5a receptor after overexpression in COS-7 cells, **259,** 224
- G protein-coupled receptors
  - HIV coreceptor usage determination based on human glioma NP-2 cell line, **258,** 313
  - orphan
    - GPR14, urotensin II identification as endogenous ligand (HEK293 cells), **266,** 174
    - localized to human chromosome 2p16, cloning and characterization, **260,** 174
    - SLC-1 receptor, melanin-concentrating hormone as endogenous ligand, isolation from rat, **261,** 622
  - prominently expressed in human placenta, sequence and tissue distribution, **256,** 352
  - SENR, urotensin II as endogenous ligand of, identification (pig), **265,** 123
- G_i protein-coupled receptors
  - mediation of angiogenic action of sphingosine 1-phosphate in human umbilical vein endothelial cells, **264,** 743
- G proteins
  - association of prostaglandin EP3 receptor with, and subsequent Gi activation, key amino acid residue of EP3 receptor governing, **255,** 164
  - β chain, role in regulation of MAP kinase ERK2 in *Dictyostelium,* **260,** 504
  - carboxyl methyltransferase modifying, identification as metalloenzyme (rat), **261,** 790
  - coupled signaling, pertussis toxin-sensitive, role in HIV-1 infection in PBLs, **256,** 429
  - Era, binding to 30S ribosomal subunit (*Escherichia coli*), **264,** 51
  - Gαolf isotype, identification by RT-PCR in pancreatic B cells and islets from rat models of non-insulin-dependent diabetes, **254,** 269
  - Gβγ, mediation of MAP kinase activation by dopamine D2 receptors, **256,** 33
  - gene expression in pineal gland (rat), **262,** 775
  - G_{i1}, activation by lysophosphatidic acid receptor without ligand in baculovirus expression system, **259,** 78
  - Giα, role in threshold-dependent DNA synthesis by pure pressure in aortic smooth muscle cells (human), **256,** 212
  - G_q, $G_{i\text{-}2}$, and $G_{i\text{-}3}$, activation by sphingosylphosphorylcholine in thyroid FRTL-5 cells, implications for activation of Ca^{2+} fluxes and Na^+–H^+ exchange, **258,** 812
  - heterotrimeric, association with bovine aortic phospholipase C γ, **258,** 425
  - and PI-3 kinase, role in secretory IgA-mediated basophil activation (human), **264,** 575
  - signals, role in nitric-oxide synthase mRNA induction by shear stress (bovine aorta), **254,** 231; *erratum,* **256,** 255
  - thromboxane receptor coupling to, critical role of Phe-138 in second intracellular loop in human TXA_2R, **264,** 171
  - transducin, interaction with uracil nucleotides, **262,** 341
- Graft rejection
  - in human, role of apoptosis, **266,** 699
- Granulation tissue
  - collagen XIV 16-kDa fragment purified from, identification as neutrophil chemotactic factor (rat), **256,** 642
- Granulin
  - epithelin/granulin growth factors as extracellular cofactors for HIV-1 and HIV-2 Tat proteins, **256,** 299
- Granulocyte colony-stimulating factor receptor
  - –gyrase B fusion gene, as molecular switch for expansion of genetically modified hematopoietic cells, **260,** 9
- Granulocytes
  - β_2-integrin signaling capacity on, abolition by disruption of β_2-integrin–cytoskeletal coupling, **265,** 164
- Granulosa cells
  - luteinized, apoptosis induction by MAP kinase kinase inhibitor PD98059 (human), **263,** 143
- Granzyme B
  - recombinant human, expression in and purification from *Pichia pastoris,* **261,** 251
- Granzyme D
  - selective expression and function in lymphohematopoietic stromal cells (mouse), **264,** 768
- Grb2
  - gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
- Grb2-SH2 domain
  - G1TE nonphosphorylated inhibitor to, structural requirement for Tyr in consensus sequence Y-E-N of, **264,** 902
- Green fluorescent protein
  - bone marrow chimera expressing, immature hematopoietic cells from, migration into adult brain parenchyma (mouse), **262,** 610
  - expression, targeting to cell surface, **262,** 638
  - β-Gal gene transfection in rat heart *in vivo* using Sendai virus-coated proteoliposomes with, gene product identification following, **259,** 408
  - luteinizing hormone receptor bound to, hormone-driven aggregation, **255,** 382
  - mutant with enhanced sensitivity for microanalysis at 488-nm excitation, **264,** 556
  - OCTN2 fusion with, subcellular localization and functional restoration of carnitine uptake in carnitine transporter-defective cell lines (human), **264,** 909
  - real-time visualization of PH domain-dependent translocation of phospholipase C-δ1 in MDCK cells: response to hypo-osmotic stress, **254,** 284
  - TIMP-1 fused to, binding to cell surface and translocation to nucleus of MCF-7 breast carcinoma cells, **257,** 494
  - toxicity to living mammalian cells, **260,** 712
  - –transactivator fusion protein, rapid selection of tetracycline-controlled inducible cell lines with, **257,** 874
  - yeast enhanced, in analysis of nuclear import of nonnuclear proteins in relation to location and number of nuclear localizing signals, **256,** 278
- GRK, *see* G protein-coupled receptor kinase
- groEL
  - thioredoxin reductase refolding assisted by, **255,** 17
- Growth, *see also* Cell growth
  - hyphal, effect of *sep1+* forkhead transcription factor deletion (*Schizosaccharomyces pombe*), **263,** 465

- Growth, *see also* Cell growth (*continued*)
  - inhibition
    - *Candida maltosa,* upregulation of promoter for ribosomal protein L41 gene in cycloheximide-resistant ribosomes, **258,** 611
    - by retinoids, in human colon carcinoma HT29 cells, mediation by retinoic acid receptor α, **261,** 572
- Growth arrest
  - activities of HIV-1 Vpr in transformed yeast, residues in HFRIGC sequence involved in, **264,** 287
- Growth/differentiation factor-5 gene
  - minimal promoter components (human), **263,** 707
- Growth factors
  - effects on glucose metabolism in isolated perfused rat hepatocytes, comparison with effects of pancreatic cancer conditioned medium, **257,** 622
  - functional pleiotropy, molecular basis, **260,** 303
  - induced upregulation of $P2Y_2$ receptors in rat VSMC, MAPKK-dependent, **258,** 648
  - withdrawal, tumor cell apoptosis induced by, enhancement by human *TFAR19* gene, **254,** 203
- Growth hormone
  - effect on focal adhesion kinase and actin stress fiber in human osteoblast-like Saos2 cells, **263,** 100
  - effect on lipolysis and leptin release in adipose tissue from Stat5a and b knockout mice, **263,** 201
  - human, transgenic RNA, species-specific alternative splicing in mammary glands of pigs, rabbits, and mice, **257,** 843
  - inhibitory activity of chimeric peptides consisting of GHRP-6 and somatostatin, **259,** 379
  - prolactin/growth hormone gene family members PLP-I, -J, -K, and -L, identification (rat), **262,** 575
  - stimulated secretion from anterior pituitary cells, role of SST receptor subtypes (rat), **263,** 276
- Growth hormone receptor
  - transgene expression in mouse, 762-bp proximal leptin promoter to drive and control regulation of, analysis, **262,** 187
- Growth hormone releasing peptide 6
  - and somatostatin, chimeric peptides consisting of, antiproliferative and GH-inhibitory activity, **259,** 379
- Growth inhibitory factor
  - low-molecular-weight, isolation from hybridoma cell cultures, **254,** 138
- Growth medium
  - Burk's nitrogen-free, molybdenum and vanadium supplements in, regulated expression of *nifM* of *Azotobacter vinelandii* in response to, **264,** 186
- GTP
  - labeled, direct transport of, as source of guanine nucleotides in isolated heart mitochondria (rat), **257,** 466
- GTPase
  - association with transglutaminase in secretion of anterior prostate (rat), **260,** 351
- GTPase activating proteins
  - role in angiotensin II signal transduction pathways in human mesangial cells, **257,** 234
- GTP binding protein-coupled receptor kinase 5
  - enhanced expression in hearts of cardiomyopathic hamsters, **262,** 206
- GTP cyclohydrolase I
  - *Escherichia coli* and human genes for, complementation of *fol2* deletion in *Saccharomyces cerevisiae,* **255,** 521
  - gene expression in hereditary progressive dystonia with marked diurnal fluctuation, **260,** 747
- GTPγS
  - NADPH oxidase induced by, reconstitution in streptolysin O-permeabilized neutrophils by cytosolic fractions (human), **265,** 29
- Guanidine hydrochloride
  - enhancement of lipocalin-type prostaglandin D synthase activity (mouse), **266,** 641
- Guanidinium ions
  - competitive inhibition of cathepsin C by, and reexamination of substrate inhibition, **258,** 6
- Guanine nucleotides
  - in isolated heart mitochondria, origin (rat), **257,** 466
- Guanylate cyclase
  - particulate, desensitization in airway smooth muscle, role of protein kinase C (human), **266,** 152
  - soluble
    - impaired activation in neurons and lymphocytes by chronic hyperammonemia (rat), **257,** 405
    - ligation kinetics with carbon monoxide, effect of YC-1, **254,** 188
    - tissue distribution (human), **263,** 696
  - subtype expression in photoreceptor cells in retina and pineal organ (medaka), **255,** 216
- Guanylin
  - porcine, cDNA and deduced amino acid sequence, and biochemical activity of chemically synthesized peptide, **259,** 141
- Guanylyl cyclase, *see* Guanylate cyclase
- Gyrase B
  - –G-CSF fusion gene, as molecular switch for expansion of genetically modified hematopoietic cells, **260,** 9

H

- *H19* gene
  - monoallelic expression in transfected embryonic kidney fibroblasts, effects of proinsulin-like growth factor-II overexpression (human), **255,** 226
- *Haemophilus influenzae*
  - identification of penicillin-binding protein multienzyme complexes, **264,** 191
- Hair
  - red color, association with loss-of-function mutations in melanocortin-1 receptor (human), **260,** 488
- Hair follicles
  - nude mouse, serine protease overexpressed in, **258,** 374
- Hairpin ribozyme
  - specificity *in vivo,* **257,** 356
- *Halobacterium halobium*
  - region homologous to *E. coli* α-operon, cloning, sequencing, and characterization of ribosomal protein and RNA polymerase genes, **264,** 24
- Hammerhead ribozymes
  - directed against murine TNFα, characterization *in vitro* and *in vivo,* **260,** 390
  - inosine$^{15.1}$ hammerhead ribozymes for targeting transthyretin-30 mutation, **260,** 313
  - Mg^{2+} binding by, and cleavage activity, effect of $2'$-hydroxyl group substitution at position 2.1, **262,** 461
  - repression of hepatitis B virus X gene expression, **257,** 759; *erratum,* **259,** 231
- Hannahpep
  - isolation, purification, and characterization from venom of Indian king cobra, **266,** 488
- Haptoglobin
  - gene expression, attenuation by TGF-β, role of MAP kinase pathway (rat IEC-6 cells), **259,** 544
- HASH-1
  - downregulation in differentiating neuroblastoma cells, **256,** 557
- H^+-ATP synthase
  - intact chloroplast, anion-exchange perfusion chromatography and gel filtration, detergent effect (spinach), **265,** 520
- HB-EGF, *see* Heparin-binding epidermal growth factor-like growth factor

- HBsu
  - histone-like protein of *Bacillus subtilis,* depletion, associated defective protein translocation and upregulation of small cytoplasmic RNA, **258,** 211
- HBV, *see* Hepatitis B virus
- Hck
  - association with CCR3 receptor stimulation: mechanism in eotaxin-induced human eosinophil chemotaxis, **264,** 163
  - proto-oncogene p120^{Cbl} as downstream substrate of, **257,** 129
- HCV, *see* Hepatitis C virus
- Head development
  - Otx proteins essential for, function and evolution: review, **258,** 229; *erratum,* **260,** 575
- Head kidney
  - androgen receptor mRNA levels (Japanese eel), **254,** 378
  - carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
- *headpin*
  - identification and cDNA cloning: differentially expressed serpin mapping to chromosome 18q (human), **264,** 299
- Heart
  - adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  - Adriamycin-induced toxicity, mitochondrial DNA alterations in, effects of nimesulid and metoprolol, **254,** 651
  - androgen receptor mRNA levels (Japanese eel), **254,** 378
  - Apaf-1 forms, identification (human), **261,** 746
  - carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  - cardiomyopathic, enhanced GTP binding protein-coupled receptor kinase 5 expression in, analysis (hamster), **262,** 206
  - crossbridge function in, inhibition by hypoxic endothelial superfusate (human), **262,** 64
  - deleted mitochondrial DNA, detection by long-extension PCR, compromise by technical artifacts (human), **254,** 507
  - Down syndrome patients, ets-2 gene expression: evidence against gene dosage effects hypothesis, **254,** 395
  - failing, associated alterations of two β_1-adrenergic receptor transcripts (human), **258,** 552
  - fibroblast growth factor preferentially expressed in, cloning and characterization (human), **255,** 717
  - infarcted, production of prostanoids and NO *in situ,* effect of aspirin (rabbit), **257,** 488
  - intact beating, serine phosphorylation of sarcoplasmic reticulum Ca^{2+}-ATPase (rabbit), **264,** 241
  - *in vivo* gene transfection using Sendai virus-coated proteoliposomes, and gene product identification (rat), **259,** 408
  - mitochondrial DNA deletions in atrial tissue, gross mosaic distribution (human), **254,** 152
  - muscle, differentiation of ventrally emigrating neural tube cells into, analysis (chicken), **254,** 601
  - NMR studies, linking to physiological genomics, **266,** 723
  - NO release, stimulation by blood flow, role of stretch-activated ion channels (guinea pig), **261,** 6
  - phospholipase C-δ1 expression (mouse), **261,** 393
  - protection from oxidative stress by manganese dipyridoxyl diphosphate in *ex vivo* rat model, **254,** 768
  - RGS 1 and RGS 16 induced in response to bacterial LPS, stimulation of c-fos promoter expression (pig), **259,** 550
  - right heart hypertrophy in hypoxia-induced pulmonary hypertension, reduction by L-arginine (rat), **254,** 100
  - TBP-interacting protein 120A gene expression (rat), **266,** 123
- Heart disease
  - in human, role of apoptosis, **266,** 699
- Heart failure
  - elevated plasma cardiotrophin-1 detected by immunoluminometric assay (human), **261,** 567
- Heartwater
  - *Cowdria ruminantium* causing, *map1* gene: member of multigene family with conserved and variable genes, **257,** 300
- Heat
  - c-*fos* induction by, mediation by heat shock element in c-*fos* promoter, **254,** 566
  - effect on function and conformation of cyclodextrin glucanotransferase from hyperthermophilic archaea *in vitro,* **265,** 57
  - expression of heat shock genes induced by, in murine fibroblasts, effects of proteasome inhibitors and calyculin, **264,** 352
  - G1 arrest induced by, dependence on p53 function and role of retinoblastoma protein dephosphorylation (HeLa, NCI-H1299 cells), **266,** 377
- Heat shock
  - and post-heat-shock recovery, HSF1 activation in fibroblasts during, effects of proteasome inhibitors and calyculin A, **264,** 352
  - suppression of membrane type-1 matrix metalloproteinase production and progelatinase A activation in fibrosarcoma HT-1080 cells: effect on cell invasiveness, **265,** 189
- Heat shock cognate protein 70
  - expression in *Lycopersicon esculentum,* dose- and time-dependent induction or potentiation by salicylic acid, **265,** 422
  - role in HTLV-I-induced syncytium formation and viral entry into cells, **261,** 357
  - splice variant occurring after chronic antidepressant treatment of frontal cortex, identification (rat), **261,** 541
- Heat shock cognate protein 73
  - association with Alzheimer's amyloid precursor protein, induction by proteasome inhibitors, **254,** 804
  - direct interaction with cyclin-dependent kinase inhibitor P27Kip1 during G1/S transition (rat FRTL-5 cells), **257,** 340
- Heat shock elements
  - in c-*fos* promoter, mediation of c-*fos* induction by heat, arsenite, and cadmium, **254,** 566
- Heat shock factor 1
  - activation at different temperatures in somatic and male germ cells in poikilotherm trout, **259,** 15
  - activation upon heat shock and during post-heat-shock recovery in fibroblasts, effects of proteasome inhibitors and calyculin A, **264,** 352
  - differential regulation by anticancer drugs, role of c-Jun N-terminal kinase, **262,** 516
  - stress response mediated by, to chemical stressors in mammalian cells, temperature dependence, **265,** 763
- Heat shock protein
  - eukaryotic and prokaryotic, association with human 1α,25-dihydroxyvitamin D_3 receptor, **260,** 446
  - gp96, peptide association with, occurrence *in vivo* (mouse), **262,** 813
  - stimulation of *in vitro* transcription of nitrogen regulator gene *glnL* of *E. coli,* **258,** 341
- Heat shock protein 20
  - thermoprotective effects in clonal survival assay and failure to protect coexpressed luciferase in CHO cells, **254,** 164
- Heat shock protein 27
  - binding to Hsp27 and αB-crystallin, site of, identification with yeast two-hybrid system, **255,** 256
  - expression, induction by proteasome inhibitors MG132 and lactacystin, **254,** 264
  - heat-induced expression in murine fibroblasts, effects of proteasome inhibitors and calyculin, **264,** 352
- Heat shock protein 56
  - effect on calcineurin in cell-free *in vitro* system, **260,** 619

Heat shock protein 60
  differential regulation by anticancer drugs, role of c-Jun N-terminal kinase, **262,** 516
Heat shock protein 70
  augmentation of calcineurin *in vitro* by calmodulin-dependent and -independent mechanisms, **260,** 619
  constitutive
    attenuation of H_2O_2-induced membrane lipid peroxidation (H9c2 cells), **265,** 279
    role in mitosis during early cleavage of *Paracentrotus lividus* embryos, **260,** 143
  dnaK, DNA sequence encoding, DNA sequence with homology to GDH gene on complementary strand (*Prevotella albensis*), **263,** 58
  eukaryotic, association with human 1α,25-dihydroxyvitamin D_3 receptor, **260,** 446
  expression in *Lycopersicon esculentum,* dose- and time-dependent induction or potentiation by salicylic acid, **265,** 422
  expression in normal and malignant human cells, effects of repetitive pulsed magnetic stimulation, **261,** 689
  heat-induced expression in murine fibroblasts, effects of proteasome inhibitors and calyculin, **264,** 352
  induction by proteasome inhibitors MG132 and lactacystin, **254,** 264
  induction in *Rhizopus nigricans,* **265,** 494
  from reef coral, molecular characterization, **262,** 103
Heat shock protein 70-1
  stress-inducible, additional exon (human), **257,** 193
Heat shock protein 75
  differential regulation by anticancer drugs, role of c-Jun N-terminal kinase, **262,** 516
Heat shock protein 90
  augmentation of calcineurin *in vitro* by calmodulin-dependent and -independent mechanisms, **260,** 619
  eukaryotic, association with human 1α,25-dihydroxyvitamin D_3 receptor, **260,** 446
Heat shock protein 90α
  sequence features and phylogenetic analysis (Chinook salmon), **258,** 784
Heat shock protein 105
  genomic cloning and promoter analysis (mouse), **256,** 75
Heat shock transcription factor
  HSF1, hyperphosphorylation by proteasome inhibitors MG132 and lactacystin, **254,** 264
Heat stability
  potato tuber ADP-glucose pyrophosphorylase, role of Cys-12 in small subunit, **257,** 782
HECT domain
  and RCC1-like repeats, human gene encoding, interaction with cyclins and potential regulation by tumor suppressor proteins, **266,** 115
Hedgehog signaling molecule
  bone marrow cells, role in initial stage of fracture repair (mouse), **262,** 443
HeLa cells
  apoptosis induced by growth factor withdrawal, enhancement by human *TFAR19* gene, **254,** 203
  cell proliferation and HSP70 expression, effects of repetitive pulsed magnetic stimulation, **261,** 689
  MAP kinase-independent induction of c-*fos* mRNA by hemin, **260,** 289
  mitochondrial DNA-depleted, upregulation of mitochondrial biogenesis genes in, role of oxidative stress, **258,** 44
  mitotic extract, identification and characterization of nuclear pore subcomplexes, **254,** 417
  nuclear localization of C-terminal domains of kinesin-like protein MKLP-1, **260,** 605
  nucleolus, dissociation of N-terminal half of NPM after anticancer drug treatments, **264,** 305
  nucleophosmin/B23 mRNA changes during entry into mitosis, **257,** 865
  p53 downregulation of estrogen-responsive genes, role of interference with binding of ER to estrogen-responsive elements, **264,** 359
  ProMMP-1 and ProMMP-3 activation, effect of tissue factor pathway inhibitor-2/matrix-associated serine protease inhibitor, **255,** 94; *erratum,* **258,** 497
  transfected, androgen receptor phosphorylation/dephosphorylation status, effect on androgen agonistic or antagonistic activity, **259,** 21
Helicase
  Holliday junction-specific, RecG, resolution of R-loop in replication origin of human mitochondrial DNA, **255,** 1
Helices
  vitamin D_3 receptor, role in conformation and ligand binding: point mutations in putative helices 4 and 5 (human), **264,** 478
Helicobacter pylori
  induction of β-defensin-2 mRNA expression in gastric MKN45 cells with *cag* pathogenicity island, **263,** 770
  vacuolating cytotoxin, disorganizing effect on cytoskeleton of gastric epithelial cells, **262,** 245
Helix bundles
  transmembrane and water-soluble, patterns of surface roughness, comparison, **263,** 714
Helper T cells
  c-Jun N-terminal kinase JNKp46, JNKp55, and ERK2 activities, effects of cAMP (human), **266,** 129
Hemagglutinating virus of Japan
  HVJ-liposome method of gene transfer of PDGF β receptor extracellular domain *in vivo:* amelioration of bleomycin-induced pulmonary fibrosis (mouse), **265,** 503
Hemagglutinin–neuraminidase
  from Sendai virus, 3D model, **262,** 401
Hematopoiesis
  extramedullary, excess in Cbfa1-deficient mice with congenital lack of bone marrow, **255,** 352
  induction in primordial germ-cell derived embryonic germ cells in culture (mouse), **260,** 475
Hematopoietic cells
  bone marrow-derived, osteoblast-like cells cocultured with, BMP-2 effect on osteoclast-like cell formation (mouse), **259,** 97
  genetically modified murine, expansion of, G-CSF–gyrase B fusion gene as molecular switch for, **260,** 9
  human Flt3 receptor in, lack of binding by p85 subunit of PI3 kinase: complex formation of p85 with SHP2, SHIP, and tyrosine-phosphorylated proteins (Baf3/Flt3, THP-1 cells), **254,** 440
  identification as source of platelet-activating factor acetylhydrolase in plasma (human), **261,** 511
  immature exogenous, migration into adult brain parenchyma under GFP-expressing bone marrow chimera (mouse), **262,** 610
  insulin- and IL-4-stimulated proliferation, support by insulin receptor substrate 4 (32D-R cells), **260,** 718
  M-CSF- and RANKL-stimulated cultures, osteoclast differentiation in, enhancement by TGF-β, **265,** 233
  normal and malignant, *DAMS* expression: antisense transcript to *SMAD5* (human), **255,** 668
Hematopoietic progenitors
  differentiation, differential expression of protein kinase C transcripts in, analysis (human), **263,** 603
  effects of angiopoietins and VEGF *in vitro* (mouse), **264,** 133
  tetracycline-controlled inducible cell lines, rapid selection with green fluorescent–transactivator fusion protein (Ba/F_3 cells), **257,** 874
Heme
  cytochrome P450 BM-3 heme domain, oxyferrous complex with, spectral properties, **266,** 187

  regulatory effects during erythroid differentiation (K562 cells), **258,** 87
Heme oxygenase-1
  induction by kainic acid-mediated excitotoxicity in rat brain: dissociation of mRNA and protein expression in hippocampus, **259,** 91
  upregulation by hemin injection, inhibition of neointimal formation in balloon-injured carotid artery (rat), **261,** 302
Heme-regulated inhibitor
  role in inhibition of protein synthesis in leukemia cells by flavonoids, **265,** 589
Hemin
  inhibition of neointimal formation in balloon-injured carotid artery (rat), **261,** 302
  MAP kinase-independent induction of c-*fos* mRNA in human cells, **260,** 289
Hemocyanin
  mass spectrometry (*Limulus polyphemus*), **264,** 883
Hemoglobin
  fetal, levels in sickle cell anemia patients, role of elements at locus control region and β-globin gene cluster, **254,** 181
  synthesis during erythroid terminal differentiation *in vitro,* role of transcription factor CP2, **263,** 580
Hemolymph
  moth larvae, EPR detection of reactive oxygen species, **264,** 212
Hemolysate
  induction of tyrosine phosphorylation and collagen-lattice compaction in cultured fibroblasts (dog, human), **264,** 100
Hemolytic uremic syndrome
  related verotoxin binding to glycolipid receptor, soluble mimic inhibiting: adamantyl globotriaosyl ceramide, **257,** 391
Hemophilia
  Japanese patients, multiple infection with TT virus of different genotypes, **256,** 208
Heparanase
  activity of recombinant human T cell connective tissue-activating peptide III fused to cellulose-binding domain, **255,** 657
  HSE1, gene cloning and functional expression (human), **261,** 183
Heparan sulfate
  composition, of alternatively spliced CD44 fusion proteins, **257,** 839
Heparan sulfate proteoglycans
  recombinant, with 20-kDa glycosaminoglycan chains, human perlecan domain I expression as, **256,** 542
Heparin
  angiogenesis induced by, role of hepatocyte growth factor (human), **255,** 80
  differential regulation of FGF-4 interactions with FGF receptors 1 and 2, **263,** 621
  regulation of caveolin expression and localization in vascular smooth muscle cells (human), **265,** 722
  site binding, in fourth immunoglobulin-like loop in extracellular domain of FLT-1, detection (HUVEC cells), **264,** 730
Heparin affin regulatory peptide
  dimerization, promotion by glycosaminoglycans, **266,** 437
Heparin-binding epidermal growth factor-like growth factor
  effects on DNA synthesis of hepatocytes in mouse liver, **259,** 683
  gene regulation by TGF-β in intestinal epithelial cells (rat), **264,** 808
  induction in vascular endothelial cells and SMC, role of intracellular ROS and Ca^{2+} elevation, **259,** 50
  precursor, cloning, expression, and characterization (hamster), **254,** 325
Hepatic encephalopathy
  peripheral marker: impaired activation of soluble guanylate cyclase in neurons and lymphocytes by chronic hyperammonemia (rat), **257,** 405
Hepatic stellate cells
  type I collagen mRNA levels, effect of MDMA, **259,** 678
Hepatitis B surface antigen
  HLA class I-restricted T cell epitope on, mutation hot spot in chronic carriers and hepatocellular carcinoma (human), **262,** 757
  secretion, interference by intracellular expression of cloned antibody fragment, **255,** 785
Hepatitis B virus
  with foreign DNA, replication *in vitro,* **262,** 530
  pregenomic promoter, synergistic transactivation by HPV-16 E6 with HBV X protein, mediation by AP1 site of E element in enhancer I in human liver cell, **265,** 62
  X gene expression, repression by hammerhead ribozymes, **257,** 759; *erratum,* **259,** 231
Hepatitis C virus
  core protein, intracellular antibody fragments, characterization and binding, **263,** 410
  NS2 protein generated by NS2-3 autocleavage, requirement for NS5A phosphorylation, **254,** 572
  NS5A protein, phosphorylation by casein kinase II, **257,** 777
  RNA, conserved 3′ terminus, selective binding by heterogeneous nuclear ribonucleoprotein I, **254,** 351
  translation, enhancement using yellow fever virus 5′ noncoding region, **253,** 257; *erratum,* **257,** 250
Hepatitis G virus
  complete coding sequence in European isolate, **255,** 432
Hepatitis G virus/GB virus C
  quasispecies and replication sites in humans, **258,** 296
Hepatoblastoma HepG2 cells, *see* HepG2 cells
Hepatocellular carcinoma
  detection of mutation hot spot in HLA class I-restricted T cell epitope on hepatitis B surface antigen (human), **262,** 757
Hepatocellular carcinoma cells
  Hep3B, apoptosis induced by prostaglandin A_2/Δ^{12}-PGJ_2, cDNAs for Sox-4 and human homolog of yeast Ssf-1 differentially regulated during, **260,** 216
  hepatitis B surface antigen secretion, interference by intracellular expression of cloned antibody fragment (HuH-7 cells), **255,** 785
  HepG2, *see* HepG2 cells
  replication of HBV with foreign DNA (HuH-7 cells), **262,** 530
  transfected with antisense *N*-acetylglucosaminyltransferase V cDNA, increased susceptibility to apoptosis (human 7721 cells), **264,** 509; *erratum,* **266,** 615
Hepatocyte growth factor
  deleted variant, mutant with Ala substitution in N-terminal basic region, activity *in vivo* (mouse, rat), **254,** 363
  expression in embryonic lung fibroblasts, adrenergic stimulation (human), **262,** 76
  human, cDNA expression in rat hepatocyte cultures, **257,** 199
  regulation of fibronectin splicing in MDCK cells: comparison with effects of TGF-β1, **260,** 225
  relationship to branched chain amino acids and proteasomes, **266,** 647
  role in heparin-induced angiogenesis (human), **255,** 80
Hepatocyte growth factor activator inhibitor type 2
  lacking first Kunitz domain, as predominant product in mouse but not human, **255,** 740
Hepatocyte growth factor/scatter factor receptor
  c-met, association with E-cadherin and catenins in tumor cells (human), **261,** 406
Hepatocyte nuclear factor 1
  binding to and transactivation of human but not rat CYP7A1 promoter, **260,** 829

Hepatocyte nuclear factor 1α
  insulin gene as target (human), **263,** 566
  structure/function studies (human), **266,** 196
Hepatocyte nuclear factor 1β
  insulin gene as target (human), **263,** 566
Hepatocyte nuclear factor 4α
  isoform expression by rat hepatocytes, matrix-mediated changes, **259,** 651
Hepatocytes
  apoptosis markers, implication of resistance of liver poly(ADP-ribose) polymerase to cleavage by caspases, **256,** 436
  CYP2E1 expression, insulin and glucagon regulation, role of PI3-kinase, Src kinase, and protein kinase A signaling pathways (rat), **266,** 304
  DNA synthesis, effects of HB-EGF (mouse), **259,** 683
  EGF-induced activation of STAT proteins *in vitro,* relationship to stimulation of DNA synthesis (rat), **258,** 565
  G1/S transition in primary culture, cyclin A2 expression during, regulation by cAMP (rat), **261,** 118
  hepatocyte growth factor discovery in primary cultures (rat), **266,** 647
  human connexin 32-transfected, induction of tight junctions: interaction of connexin 32 with occludin (mouse), **266,** 222
  IFN-γ-induced cell cycle arrest and apoptosis in primary culture, role of IRF-1 (mouse), **257,** 672
  isolated perfused, glucose metabolic alterations induced by pancreatic cancer conditioned medium (rat), **257,** 622
  isolation
    activation of stress-activated protein kinases: induction of gene 33 expression (rat), **254,** 728
    stimulation of formation of interferon stimulatory response element DNA–protein complexes (rat), **263,** 627
  isolation and culture, rapid induction of NF-κB binding during, inhibition by *L-NAME* (rat), **257,** 145
  long-term culture with high growth potential and expressing different phenotypes (human), **256,** 184
  matrix-mediated changes in HNF-4α isoforms and ARP-1 expression and DNA-binding activity (rat), **259,** 651
  in mouse liver, DNA synthesis, effects of HB-EGF, **259,** 683
  oxidative injury, protection by ursodeoxycholic acid via antioxidant induction, **263,** 537
  phenobarbital-induced gene expression of CYP2B1 and CYP2B2, role of phosphorylation/dephosphorylation steps (rat), **264,** 530
  primary cultures
    from phenobarbitone-treated mice, EGF-induced receptor autophosphorylation in, **260,** 483
    from rat, expression of human hepatocyte growth factor cDNA, **257,** 199
  proliferation, impairment by chronic ethanol consumption, role of disruption of EGF receptor–PLCγ1 complexation (rat), **257,** 89
  senescence marker protein-30 expression (rat), **254,** 1
  as source of platelet-activating factor acetylhydrolase in plasma, evaluation (human), **261,** 511
  specific expression of rat serum amyloid A1 gene, upstream regulatory element contributing to, **264,** 395
  STAT1α/1β, STAT3, and STAT5 expression and association with c-MET and EGF receptor in long-term cultures (human), **265,** 376
  uptake of MRI contrast agents, molecular mechanisms (rat), **257,** 746
Hepatoma
  gene therapy specific to, by retrovirus-mediated targeted gene transfer using adenovirus carrying ecotropic receptor gene, **265,** 550
  HepG2 cells, *see* HepG2 cells
Hepatoma-derived growth factor
  HRP-3, identification, cloning, and translocation to nucleus (human, mouse), **266,** 81
Hepatoma-derived growth factor-related protein
  (HRP)-1 gene, role in spermatogenesis (mouse), **262,** 433
HepG2 cells
  angiogenin expression, regulation by mediators of acute-phase response, **259,** 178
  apoptosis induction by glibenclamide, role of CFTR Cl^- channel inhibition and intracellular Ca^{2+} release, **261,** 682
  apoptosis and necrosis, comparative study, **255,** 6
  destabilizing ability of 3′UTR of MDR1 mRNA, **261,** 627
  EGF-induced tyrosine phosphorylation of EGF receptor, inhibitory effect of genistein and daphnetin, **260,** 682
  γ-glutamylcysteine synthetase regulatory subunit gene upregulation, role of Nrf2 binding to electrophile response element, **261,** 661
  hepatitis B virus X gene expression, repression by hammerhead ribozymes, **257,** 759; *erratum,* **259,** 231
  HMG-CoA reductase, LDL receptor, and oxysterol binding protein mRNA levels, effects of 15-ketosterols, **259,** 688
  ITIH4 upregulation by IL-6, **263,** 224
  replication of HBV with foreign DNA, **262,** 530
  retinoid X receptor α cleavage by lysosomal cathepsin L-type protease, **254,** 388
  retinoid X receptor regulation by ligand 9-*cis*-retinoic acid, **260,** 729
Herbicides
  quinoline-linked triazolopyrimidine analogues, synthesis and interactions with recombinant tobacco acetolactate synthase, **258,** 797
Hereditary pancreatitis
  unifying pathomechanism: rat trypsin stabilization by mutation Arg117→His, **264,** 505
Hereditary progressive dystonia
  with marked diurnal fluctuation, GTP cyclohydrolase I gene expression in, **260,** 747
Heregulin
  regulation of Akt/protein kinase B in breast cancer cells, **261,** 897
Heregulin-α
  solution structure and N-terminal mutant with suppressed activity, **256,** 156
Herpes simplex virus
  glioma gene therapy with HSV-TK/GCV system, bystander effect in, tentative mechanism, **259,** 455
Herpes simplex virus type 1
  infection, bovine lactoferrin peptidic fragments involved in inhibition of, **264,** 19
  single-strand DNA-binding protein, photoaffinity labeling with oligodeoxyribonucleotides, **264,** 493
  thymidine kinase, multiple nuclear localization signals, characterization, **264,** 338
Herpesvirus saimiri
  immortalized T lymphocytes, apoptosis induction, **263,** 352
Hesperetin
  inhibition of glucose uptake in U937 cells, **260,** 568
Hesr-1
  cDNAs, identification and expression (*Drosophila,* human, mouse), **260,** 459
Heterocyclic carboxamidophenoxyisobutyric acids
  inhibition of advanced glycation end products, **262,** 651; *erratum,* **264,** 1008
Heterocyclic compounds
  peroxynitrite reaction with, by radical pathway, **259,** 460
Heterocyclic ureidophenoxyisobutyric acids
  inhibition of advanced glycation end products, **262,** 651; *erratum,* **264,** 1008
Heteroduplex analysis
  and SSCP, plasma membrane Ca^{2+}-ATPase isoform 1 in patients with essential hypertension, **261,** 515

Heterogeneous nuclear ribonucleoprotein
  hnRNP-I/PTB, selective binding to conserved 3′ terminus of hepatitis C viral RNA, **254,** 351
  hnRNP A2, interaction with protein kinase CK2, **260,** 17
  hnRNP A2 and hnRNP L, binding to 3′UTR of glucose transporter 1 mRNA and formation of complex *in vivo* (human brain tumors), **261,** 646
Heterogeneous nuclear ribonucleoprotein complex K protein
  expression in atherosclerotic arterial smooth muscle cells (rabbit), **260,** 382
Hexanoylglucosylceramide
  inhibition of P-glycoprotein activity and chemosensitization of multidrug-resistant ovarian carcinoma 2780AD cells, **266,** 492
Hexose esters
  metabolic response of B and non-B pancreatic islets (rat), **262,** 346
hfq gene
  Escherichia coli, negative regulatory role in cell division, **266,** 579
Hfq protein
  hfq::cat mutant *E. coli,* overproduction of outer-membrane proteins FepA and FhuE responsible for iron transport, **264,** 525
HGF, *see* Hepatocyte growth factor
Hibernation
  Na^+/K^+-ATPase activity during, regulation by reversible phosphorylation (ground squirrel), **254,** 424
HIF-1
  gene expression in HL-1 cardiomyocytes, regulation by hypoxia, **265,** 382
High-density lipoprotein
  binding affinity and reactivity of lecithin–cholesterol acyltransferase (human), **258,** 548
  reconstituted, containing human apolipoprotein A-1, reduction of VCAM-1 expression and neointima formation after carotid cuff injury in apoE null mice, **264,** 465
High mobility group-like protein
  in bovine milk, stimulation of proliferation of osteoblastic MC3T3-E1 cells, **261,** 113
High-performance liquid chromatography
  HPLC-EC, and GC-MS, discrepancies in measurement of UVC-induced 8-oxo-2′-deoxyguanosine, **259,** 374
Hippocampus
  heme oxygenase 1 induction by kainic acid-mediated excitotoxicity, dissociation of mRNA and protein expression (rat), **259,** 91
  long-term potentiation, role of arachidonic acid, *in vitro* studies (guinea pig, rat), **254,** 446
Histamine release
  human cultured mast cells, Ca^{2+} and PKC signaling for, **257,** 895; *erratum,* **259,** 503
  rat mast cells, modulation by HCO_3^-, mechanisms, **260,** 71
Histidine
  bacterially expressed proteins tagged with, gluconic acid derivative attached to N-terminus of, identification, **262,** 793
  His-163 of *E. coli* agmatinase, role in catalytic activity and substrate binding, **264,** 196
  His-273 in sixth transmembrane domain of Ang II receptor subtype AT2, role in ligand–receptor interaction (rat), **257,** 704
Histidine decarboxylase
  and ornithine decarboxylase, PEST regions containing C-termini of, roles in protein degradation (rat), **257,** 269
Histidine-rich Ca^{2+} binding protein
  existence as multimer in lumen of sarcoplasmic reticulum (rabbit), **263,** 667
Histidine-tagged proteins
  expressed in bacteria, N-terminal modification, MS determination, **259,** 271
Histoblood group B
  α-(1,3)-galactosyltransferase, α-(1,3)-*N*-acetylgalactosaminyltransferase activity, role of amino acid (human), **262,** 487
Histone acetyltransferase
  CREB binding protein activity as, stimulation by phosphorylation by p44 MAP kinase/ERK1 (NIH3T3 cells), **262,** 157
  Sas3 activity as, zinc finger motif requirement for, **266,** 405
Histone deacetylase
  cloning and characterization (mouse), **263,** 482
  physical association with MBP-1 for transcriptional repression, **260,** 405
Histones
  archaeal, from *Pyrococcus kodakaraensis* KOD1, DNA compaction profile and intracellular contents, **258,** 416
Histoplasma capsulatum
  expression of human 100-kDa homologue during infection of murine macrophages, **254,** 605
HIV protease inhibitor
  1,2-epoxy-3-(*p*-nitrophenoxy)propane, mutagenic activity and DNA adduct formation, **261,** 844
HL-60 cells
  caspase 3 activation in H_2O_2-exposed cells, **255,** 477
  cytokinesis, inhibition by bistratene A, mechanism, **260,** 80
  2-deoxy-D-ribose-induced apoptosis, association with cell cycle progression by spermidine, **257,** 460
  macrophage differentiation, arrest by Wilm's tumor gene product WT1 through the zinc-finger domain, **254,** 192
  mitochondria inhibition, role of apoptosis and CD14 expression, **263,** 294
  monocytic differentiation, induction of nuclear translocation of phosphatidylinositol 3-kinase and PI-specific PLC isoforms, **259,** 314
  nonapoptotic, single-strand breaks in agarose-embedded chromatin of, **264,** 388
  progression of infection and antimicrobial susceptibility of human granulocytic ehrlichiosis agent in, monitoring by p44 expression, **257,** 351
  protein kinase C isoenzymes in, effects of 13-hydroxyoctadecadienoic acid, **256,** 269
  rRNA, analysis, in quantitation of human granulocytic ehrlichiosis infectious agent, **262,** 7
  transfected with bax or bax C-terminus, sensitivity to apoptotic signal, **260,** 582
  VCAM-1 receptor VLA-4 expression, suppression by 1,25-dihydroxyvitamin D_3, **255,** 371
HLA class I antigen
  restricted T cell epitope on hepatitis B surface antigen, mutation hot spot in chronic carriers and hepatocellular carcinoma (human), **262,** 757
HLA-DRB1 gene
  polymorphisms, association with nonfamilial idiopathic dilated cardiomyopathy in Japanese, **261,** 332
HMG-CoA reductase
  expression via ErbB-2 pathway in human breast cancer cells, stimulation by EGF, **260,** 699
  and LDL receptor, genes encoding, differential regulation by 15-ketosterols in Hep G2 cells, **259,** 688
HMG-CoA reductase inhibitor
  effect on regression of atherosclerosis in rabbit aorta and serum lipid levels and role of NO, **259,** 414
HMG-CoA synthase
  inhibition by specific chiral isomers of β-lactone DU-6622, **265,** 536
Hmgi-c gene
  proximal promoter, basal expression, role of Sp1 and CTF/NF-1 (mouse), **265,** 439
hMLH1 gene
  for mismatch repair, core promoter and frequent single-nucleotide polymorphism, **256,** 488
hMSH2 gene
  alteration in breast carcinomas and fibroadenomas, **259,** 429

HNK-1 carbohydrate epitope
  second glucuronosyltransferase involved in biosynthesis of, molecular cloning and expression (rat brain), **255,** 182
Holliday junctions
  specific helicase RecG, resolution of R-loop in replication origin of human mitochondrial DNA, **255,** 1
Homeobox proteins
  Pax-4, paired-type, DNA binding and transactivation properties, **259,** 510
Homeopeptides
  cell-permeable, in mapping β1 integrin cytoplasmic domain regions in migration and survival in oligodendrocyte precursors, **259,** 121
Homing endonucleases
  I-*Ppo*I and I-*Cre*I, generation of site-specific DNA double-strand breaks in human cells, **255,** 88
Homocysteine
  effect on matrix metalloproteinase 2, **263,** 498
Homology modeling
  comparison of three classes of snake neurotoxins, **257,** 500
Horseradish peroxidase
  recombinant, lacking tryptophan, stability and catalytic properties, **262,** 297
House dust mite
  induction of telomerase activation in allergen-specific memory T cells in bronchial asthma, **259,** 617
HOXC5
  selective turn on in cervical cancer cells compared to normal keratinocytes (human), **257,** 738
HOXC8
  selective turn on in cervical cancer cells compared to normal keratinocytes (human), **257,** 738
Hox gene
  complexity in medaka fish, comparison with pufferfish and zebrafish, **260,** 66
HOX genes
  class I, expression in cervical cancer cells and normal keratinocytes: HOXC5 and HOXC8 selective turn on in cancer cells, **257,** 738
H$^+$/peptide transporter
  PEPT1, upregulation by σ receptor ligand in Caco-2 cells, **261,** 242
H-Ras
  negative regulation of $\alpha_3\beta_1$ integrin expression in ECV304 endothelial cells, **257,** 95
hSNF2H homologue
  and vimentin and H ferritin, differential expression in nickel(II) acetate-treated CHO cells, **258,** 592
Human chorionic gonadotropin
  intrinsically fluorescent luteinizing hormone receptor aggregation driven by, demonstration, **255,** 382
Human cytomegalovirus
  immediate early gene products, effects on vascular smooth muscle cell migration, proliferation, and PDGF β receptor expression, **256,** 608
  protease, activity in monomers, **259,** 370
Human epidermal growth factor receptor 2
  overexpression in breast cancer cells, role in activation of Akt, **261,** 897
Human granulocytic ehrlichiosis agent
  progression of infection and antimicrobial susceptibility in HL-60 cells, monitoring by p44 expression, **257,** 351
  quantitation based on analysis of rRNA from HL-60 cells, **262,** 7
Human immunodeficiency virus
  coreceptor usages, determination based on human glioma NP-2 cell line, **258,** 313
  gp41, interactions with gp41-derived peptides, correlation with peptide antimembrane fusion activity, **265,** 625
  soluble recombinant gp120, induction of conformational changes in cell membrane-anchored CD4, **265,** 428
  Vpr gene, multiple centrosome formation induced by expression in MIT-23 cells, **258,** 379
Human immunodeficiency virus type 1
  complex regulatory region LTR NRE, interactions with several transcription factors of nuclear extracts, real-time study, **264,** 6
  effects of GAP31 and MAP30 proteolytic fragments, **262,** 615
  entry, direct visualization: mechanisms and role of cell surface receptors, **258,** 695
  infection, role of pertussis toxin-sensitive G protein-coupled signaling and mediation of cAMP downregulation, **256,** 429
  phorbol ester-induced activation in U1 cells, role of poly(ADP-ribose) polymerase modulation of LTR function, **262,** 285
  replication in human astrocytoma cells, inhibition by NO, **254,** 200
  reverse transcriptase activity, inhibition by nitric oxide, **258,** 624
  RNA
    deguanylation by recombinant pokeweed antiviral protein, **263,** 419
    depurination by pokeweed antiviral protein isoforms PAP-I, PAP-II, and PAP-III, **260,** 453
  Tat protein
    extracellular cofactors for, epithelin/granulin growth factors as, **256,** 299
    poly(ADP-ribosyl)ation *in vitro,* **261,** 90
  Vpr, residues in HFRIGC sequence involved in growth arrest activities, **264,** 287
Human immunodeficiency virus type 2
  Tat protein, extracellular cofactors for, epithelin/granulin growth factors as, **256,** 299
Human MutS homolog 2
  gene, alteration in breast carcinomas and fibroadenomas, **259,** 429
Human papillomavirus type 16
  E6 protein, and HBV X protein, transactivation of HBV pregenomic promoter, mediation by AP1 site of E element in enhancer I in human liver cell, **265,** 62
  L1-capsids, balance of IgG subclasses toward, as predictor for regression of HPV16-positive cervical intraepithelial neoplasia, **258,** 128
Human T-cell lymphotropic virus type I
  cell fusion and entry, role of heat shock cognate protein 70, **261,** 357
Human umbilical vein endothelial cells
  adhesion of cancer cells and neutrophils in absence of *de novo* protein synthesis, acceleration by ROS treatment, **257,** 214
  adhesiveness, enhancement by PPARγ agonists via increased ICAM-1 expression, **263,** 718
  advanced glycation end product receptor complex in, characterization, **256,** 549
  angiogenesis, induction by sphingosine 1-phosphate, **264,** 743
  Bcl-2 protein expression during oxidative stress, regulation, **260,** 522
  caveolae, CD39 localization to, **262,** 596
  in vitro effects of human endostatin expressed in yeast, **258,** 345
  large-conductance Ca^{2+}-activated K$^+$ channels in, stimulation by Evans Blue *in vitro,* **254,** 666
  metabolism, effects of AMP-activated protein kinase and activator AICAR, **265,** 112; *erratum,* **266,** 615
  mitogen-activated protein kinase stimulation by vascular endothelial growth factor, mechanism, **255,** 545
  plasminogen activator inhibitor type 1 expression, downregulation by thiazolidinediones, **258,** 431
  stimulation by vascular endothelial growth factor-A, associated induction of NO release by VEGF receptor-2, **265,** 636
  survivin and XIAP induction by VEGF, **264,** 781
  VE-cadherin/catenin expression, effect of γ-linolenic acid, **258,** 113
Huntingtin
  N-terminal fragment with expanded polyglutamine tract, rapid aggregate formation of, **256,** 361

Huntington's disease
  huntingtin N-terminal fragment with expanded polyglutamine tract, rapid aggregate formation of, **256,** 361
  mitochondrial DNA from patients, characterization of cybrid cell lines containing, **261,** 701
HXK2 gene
  and *SUC2* gene, regulatory elements of, direct binding by Med8 (*Saccharomyces cerevisiae*), **254,** 345
Hyaluronidase
  expression in dermal fibroblasts (human), **266,** 268
Hybrid cells
  NG108-15, ERG current inactivation (mouse), **263,** 510
Hybridoma cells
  low-molecular-weight growth inhibitory factor isolation, **254,** 138
Hydration state
  induction of signaling cascades: role in regulation of cell function, **255,** 551
Hydrazide
  synthesis by amidase from *Rhodococcus rhodochrous* J1, **256,** 415
Hydrazine
  as substrate in hydrazide synthesis by amidase from *Rhodococcus rhodochrous* J1, **256,** 415
Hydrogen
  reduction of *Desulfovibrio* hydrogenase, liberation of H_2S by, **255,** 295
Hydrogenase
  Desulfovibrio, catalytic action under H_2 atmosphere, H_2S liberation during, **255,** 295
Hydrogenovibrio marinus
  cbbQ genes located downstream of form I and form II RubisCO genes, effects on RubisCO activities, **265,** 177
Hydrogen peroxide
  activation of caspase 3 in HL-60 cells, **255,** 477
  apoptosis induced by, opposing effects of protein kinase C δ and protein kinase B α (CHO cells), **264,** 840
  membrane lipid peroxidation induced by, attenuation by constitutive hsp70 (H9c2 cells), **265,** 279
  modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
  oxidative stress produced by, compounds inducing glutathione *S*-transferase isoforms defending against, analysis in neuronal IMR-32 cells, **262,** 591
  production of O_2 by copper–adenine catalyst, **263,** 672
  reaction with Fe bound in mitochondrial F_1ATPase, protein-derived radicals in, EPR detection, **263,** 281
  upregulation of extracellular signal-regulated kinase, role in cell survival (rat mesangial cells), **264,** 696
  in urine, implications for antioxidant defense and redox regulation (human), **262,** 605
Hydrogen sulfide
  liberation during catalytic action of *Desulfovibrio* hydrogenase under H_2 atmosphere, **255,** 295
Hydrolysis
  phosphoinositides, enhanced by phospholipase Cβ1 or γ1 overexpression, effects on stimulus-induced insulin release in MIN6 cells, **254,** 77
Hydrophobic behavior
  brain membrane tubulin, role of Na^+,K^+-ATPase, **253,** 824; *erratum,* **257,** 642
Hydrophobic cluster
  C-terminal, phosphoprotein P1, phenylalanine role in cross-reaction with anti-dsDNA antibodies (human), **263,** 334
N^G-Hydroxy-L-arginine
  formation by arginine oxygenation, reactivity of flavin semiquinone of nitric-oxide synthase in, **250,** 36; *erratum,* **256,** 447
2-Hydroxycoumarin
  effect on activity of protein kinases, **260,** 682
4-Hydroxycoumarin
  effect on activity of protein kinases, **260,** 682
7-Hydroxycoumarin
  effect on activity of protein kinases, **260,** 682
3β-(2-Hydroxyethoxy)-5α-cholest-8(14)-)en-15-one
  effect on HMG-CoA reductase, LDL receptor, and oxysterol binding protein mRNA levels in Hep G2 cells, **259,** 688
Hydroxyflutamide
  agonist action, dependence on androgen receptor phosphorylation/dephosphorylation, **259,** 21
8-Hydroxyguanine
  lesions in human cells from, mutM homologue type 1a as major repair enzyme for, **258,** 605
Hydroxyl groups
  substitution at hammerhead ribozyme position 2.1, effect on Mg^{2+} binding by ribozyme and cleavage activity, **262,** 461
Hydroxyl radical
  formation, and presence of bleomycin-detectable free iron in alveolar system of preterm infants, **257,** 218
  formation in solutions of 7,8-dihydroneopterin, **264,** 262
  role in adhesion of cancer cells and neutrophils to endothelial cells in absence of *de novo* protein synthesis, **257,** 214
  scavenging by ascorbyl palmitate, measurement in *in vitro* models, **262,** 661
  verotoxin-1-induced generation by human endothelial cells, **260,** 813
Hydroxymethyldihydropterin pyrophosphokinases
  evolutionary, mechanistic, and predictive analyses, **254,** 70
3-Hydroxy-3-methylglutaryl-CoA reductase, *see* HMG-CoA reductase
4-Hydroxy-2(*E*)-nonenal
  glutathione *S*-transferase A4-4 detoxifying, marked expression in skin of rats irradiated by UVB light, **260,** 740
13-Hydroxyoctadecadienoic acid
  selective inhibition of classical PKC isoenzymes, **256,** 269
4-Hydroxy-2-oxovalerate aldolase
  phnIJ gene encoding, in *Pseudomonas* sp. DJ77, cloning and evolution, **256,** 469
4-Hydroxyphenylretinamide
  effects on growth and apoptosis of retinoic acid-resistant carcinoma cell lines, **254,** 636
11β-Hydroxysteroid dehydrogenase
  human kidney, expression in bacteria, **255,** 652
17β-Hydroxysteroid dehydrogenase
  estrogenic, predominance of estrone production and induction by NADPH (human), **259,** 489
20β-Hydroxysteroid dehydrogenase
  carbonyl reductase-like, two cDNAs, cloning and expression in ovarian follicles (rainbow trout), **255,** 123
Hypaque-76
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
Hyperammonemia
  chronic, impairment of activation of soluble guanylate cyclase in neurons and lymphocytes (rat), **257,** 405
Hypercholesterolemia
  murine model deficient in LDL receptor, Lewis lung carcinoma in, LDL-mediated suppression, **255,** 377
Hyperfine-shifted resonances
  ^{13}C and ^{15}N, in Fe_2S_2 ferredoxins, assignment strategy, **258,** 54
Hyperglycemia
  associated increase in vascular adrenomedullin expression (rat), **258,** 453
  impairment of insulin signaling between PI 3-kinase and Akt/PKB activations in ZDF liver (rat), **266,** 252
Hyperleptinemia
  depletion of fat from rat denervated fat tissue by, **260,** 653

Hypermethylation
  association with IL-6 gene repression (human breast cancer cells), **258,** 644
Hyperosmolarity
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
Hyperoxia
  effects on lung fibroblast viability and DNA fragmentation (human), **262,** 685
Hyperplasia
  congenital adrenal, CYP21 mutations in, functional analysis in Spanish patients, **262,** 635
  intimal, reduction by fasudil via inhibition of vascular smooth muscle cell migration and enhancement of cell loss (human, rabbit), **262,** 211
  synovial, in rheumatoid arthritis, dominant and shared T cell receptor β chain variable regions inducing, **263,** 172
Hyperpolarization
  activation of epithelial calcium channel ECaC, **261,** 488
  smooth muscle, endothelium-dependent, role of heterocellular gap junctional communication (rabbit), **254,** 27
Hypersensitivity
  type I, mast cell-mediated, JAK-3 role (mouse), **257,** 807
Hypertension
  arterial, manifestation of oxidative stress in pathogenesis (ISIAH rat), **263,** 450
  augmentation of ethanol-induced depression of cell shortening and intracellular Ca^{2+} transients in ventricular myocytes (rat), **261,** 202
  essential, plasma membrane Ca^{2+}-ATPase isoform 1 in patients with, combined SSCP and heteroduplex analysis, **261,** 515
  portal, increase induced by endothelin-1, attenuation by ROCK inhibitor Y-27632 (rat), **266,** 296
  pulmonary, hypoxia-induced, right heart hypertrophy in, reduction by L-arginine (rat), **254,** 100
  stroke-prone spontaneously hypertensive rat with, and WKY rat, membrane voltage and conductance of mesangial cells from, effects of cytosolic Ca^{2+}, **256,** 273
Hypertonic stress
  selective induction of glial glutamate transporter GLT-1 in C6 glioma cells, **265,** 240
Hyphal growth
  effect of *sep1+* forkhead transcription factor deletion (*Schizosaccharomyces pombe*), **263,** 465
Hypochlorous acid
  induced DNA base modification, potentiation by nitrite, **257,** 572
  3-nitrotyrosine loss on exposure to, potential for *in vivo* biomarker, **258,** 168
  rate of deactivation by melatonin, factors affecting, **257,** 431
Hypochord
  follistatin-related protein localization (*Xenopus laevis*), **254,** 42
Hypocretin/orexin
  and neuropeptide Y, content in hypothalamus, effects of chronic leptin injections (rat), **258,** 119
Hypoglycemic phenotype
  very long chain acyl-CoA dehydrogenase deficiency with, identification of novel mutations (human), **264,** 483
Hypoosmotic stress
  effect on phospholipase C-δ1 translocation in MDCK cells, real-time visualization: role of PH domain, **254,** 284
Hypotaurine
  oxidation to taurine with photochemically generated singlet oxygen, effect of azide, **254,** 661
Hypothalamus
  agouti-related protein, α-MSH, and pro-opiomelanocortin levels in dietary-obese and food-restricted rats, **258,** 574
  D_5 dopamine receptor mRNA distribution in ventromedial nucleus (rat), **266,** 556
  hypocretin/orexin and neuropeptide Y content, effects of chronic leptin injections (rat), **258,** 119
Hypoxanthine/xanthine oxidase
  neutrophils exposed to, accelerated adhesion to cancer cells and neutrophils in absence of *de novo* protein synthesis (human), **257,** 214
Hypoxia
  induction of focal adhesion kinase activation and subcellular translocation in cultured cardiac myocytes (rat), **262,** 290
  induction of nuclear accumulation of proteasomes in human cancer cells, **258,** 448
  pulmonary hypertension induced by, right heart hypertrophy in, reduction by L-arginine (rat), **254,** 100
  quantification of RNA levels under, comparison of GAPDH, β-actin, cyclophilin and 28S rRNA as internal standards for, **259,** 523
  regulation of adrenomedullin and HIF-1 gene expression in HL-1 cardiomyocytes, **265,** 382
  retinal, VEGF gene family expression during, analysis (mouse), **262,** 333
  tumor adaptation to, by angiogenesis, **266,** 718
  upregulation of glyceraldehyde-3-phosphate dehydrogenase transcription in alveolar epithelial cells (rat), **266,** 156
  upregulation of telomerase activity via MAP kinase signaling in solid tumor cells (human), **260,** 365
  VEGF gene expression (mouse), **262,** 333
Hypoxia-inducible factor-1
  gene expression in HL-1 cardiomyocytes, regulation by hypoxia, **265,** 382
  HIF1A gene transcription, promoter and 5′ UTR analyses (human), **261,** 534
  role in tumor adaptation to hypoxia, **266,** 718
Hypoxia-inducible factor α
  oxygen/redox-dependent degradation domain, characterization, **260,** 557
Hypoxic stress
  induction of cardiotrophin-1 expression by cardiac myocytes (mouse), **264,** 436

I

IalA invasion gene
  Bartonella bacilliformis, homologs in other invasive bacteria and encoding of di(nucleoside) polyphosphate hydrolase, **256,** 474
IAP proteins
  Apollon gene-encoded, expression in brain cancer cells (human), **264,** 847
  cIAP-1, modulation by antitubulin agents combined with bryostatin 1, effect on apoptosis of early pre-B acute lymphoblastic leukemia Reh cells, **266,** 76
  X-chromosome-linked, induction by VEGF in human umbilical vein endothelial cells, **264,** 781
Ibandronate
  inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
Ibuprofen
  selective potentiation of drug cytotoxicity in human glioma cells, role of MRP and COX-1, **259,** 600
ICE caspases
  activation, role in TNF-α-induced apoptosis in IEC-6 cells: necrosis upon complete inhibition of caspase cascade, **260,** 159
ICI 164,384
  effects on estrogen receptor α and β conformation and stability, **261,** 1
ICI 182,780
  effects on estrogen receptor α and β conformation and stability, **261,** 1
I-*Cre*I
  from green alga, generation of site-specific DNA double-strand breaks in human cells, **255,** 88

ICSAT
overexpression, role in development of adult T-cell leukemia or multiple myeloma (mouse), **260,** 329
Id proteins
effects on induction of apoptosis by adenovirus E1A, c-Myc, Bax, and Nip3 in p53 null mouse cerebellum cells, **255,** 722
Id1, association with MIDA1, effect on MIDA1 DNA binding activities, **266,** 147
Id4 gene, induction during adipocyte differentiation (3T3-L1 cells), **256,** 614
IEX-1L
characterization as mutant nonspliced $p22^{PRG1/IEX-1}$ variant not expressed *in vivo* (Jurkat cells), **262,** 139
IκB
degradation, induction by synergism of ceramide with phorbol ester or okadaic acid, **263,** 63
IκBα
avian, inactivation, regulation by differential serine phosphorylation, **257,** 798
phosphorylated by IKK, IκBα-ubiquitin ligase recruitment *in vivo* and *in vitro* to, **256,** 121
role in maintenance of basal c-Jun N-terminal kinase activation and regulation of JNK-mediated TNF resistance in L929 cells, **263,** 107
ubiquitination, catalysis by SCF-like complex with Skp1, cullin-1, βTrCP1, and βTrCP2, **256,** 127
IκBα-ubiquitin ligase
recruitment *in vivo* and *in vitro* to IκBα phosphorylated by IKK, **256,** 121
IκB-kinase
activation by carbachol in isolated canine gastric parietal cells, **261,** 877
IκBα phosphorylated by, IκBα-ubiquitin ligase recruitment *in vivo* and *in vitro* to, **256,** 121
IκB/NF-κB complex
purified recombinant, functional characterization, **260,** 691
I/LWEQ module
functional genomic analysis: module utility for prediction of protein–actin interaction, **266,** 135
Im7 protein
immunity-determining region, critical residues conferring immunity to colicin, hierarchical order (*Escherichia coli*), **264,** 69
Imidazole
reaction with peroxynitrite by radical pathway, **259,** 460
and Zn^{2+}, synergistic inhibition of carboxypeptidase A, **257,** 239
Imipramine
chronic treatment of frontal cortex with, HSC70 splice variant occurring after, identification (rat), **261,** 541
Immortalization
fibroblasts by SV40, effect on p53-dependent radiation responses (human), **257,** 168
Immune cells
luteal, FasL expression, possible role in prolactin-induced apoptosis in rat corpus luteum, **260,** 167
Immune tolerance
cells in thymic medulla regulating, expression of autoimmune regulator (human), **257,** 821
Immunity
gut and systemic, suppression by energy deficits during infection (mouse), **264,** 796
humoral, with vaccine delivery system using immunopotentiating fusogenic liposomes, **261,** 824
insect: lectin multigene family in *Drosophila melanogaster,* **261,** 923
Immunity proteins
Im7, critical residues on immunity-determining region conferring immunity to colicin, hierarchical order (*Escherichia coli*), **264,** 69
Immunoglobulin A
anti-adenoviral response in distinct tissue compartments, enhancement by Ad-mediated IL-6 gene transfer in rat lung, **258,** 332
binding of α1-proteinase inhibitor, promotion by α_1PI oxidation by myeloperoxidase–hydrogen peroxide system, **255,** 562
secretory, mediated basophil activation, roles of GTP-binding regulatory proteins and PI 3-kinase (human), **264,** 575
Immunoglobulin A1
asialo-, agalacto-IgA1/Sepharose, preferential binding of human serum IgG3 subclass to, **264,** 424
O-glycan glycoform, relationship to IgA1 sticky characteristics (human), **261,** 472
Immunoglobulin E
binding site in ovomucoid third domain, residues in, characterization by chemical modification (human), **261,** 610
serum levels, association with nonpathogenic common variants of *IFNGR1* and *IFNGR2* (human), **263,** 425
Immunoglobulin E-binding protein
allergen from *Aspergillus flavus,* characterization as alkaline serine protease, **261,** 669
Immunoglobulin G
anti-adenoviral response in distinct tissue compartments, enhancement by Ad-mediated IL-6 gene transfer in rat lung, **258,** 332
binding site in ovomucoid third domain, residues in, characterization by chemical modification (human), **261,** 610
to human papillomavirus type 16 L1-capsids, subclass balance, as predictor for regression of HPV16-positive cervical intraepithelial neoplasia, **258,** 128
IgG3 subclass, in human serum, preferential binding to asialo-, agalacto-IgA1/Sepharose, **264,** 424
induction of lymphoblastoid cell apoptosis, associated phosphorylation of Bcl-2 and mitochondrial changes (human), **264,** 896
Immunoglobulins
–CD44 fusion proteins, alternatively spliced, heparan sulfate composition of, **257,** 839
terminal galactose on, microscale colorimetric assay, **261,** 196
Immunolabeling
NO synthase in CNS and peripheral tissues (sea slugs), **262,** 545
Immunoluminometric assay
cardiotrophin-1: detection in human plasma and increase in heart failure, **261,** 567
Immunomodulation
by minimized Fc-binding peptide from protein A, **258,** 141
Immunorestoration
Staphylococcus aureus protein A activity for, analysis, **256,** 142
Immunosuppression
by leukotriene B_4 receptor antagonist *in vitro* (murine T cells), **264,** 321
Immunosuppressive therapy
implications of cyclosporine downregulation of Fas ligand expression on vascular endothelial cells (human), **263,** 430
Immunotherapy
tumor, utility of IFN-γ transgenic mice for study of, **259,** 294
Impact gene
Xenopus laevis homolog *Ximpact* cDNA, spatiotemporal, allelic, and enforced expression (mouse), **256,** 162
Indian hedgehog
actions in late-phase differentiation in mouse chondrogenic EC cells ATDC5, **257,** 814
Indigo
formation by recombinant mammalian cytochrome P450, **265,** 469
Indomethacin
selective potentiation of drug cytotoxicity in human glioma cells, role of MRP and COX-1-1, **259,** 600

- Infants
  - newborn, with/without asphyxia, oxidative stress as measured by plasma antioxidants and free fatty acids, **257,** 244
  - preterm, bleomycin-detectable free iron in alveolar system of, **257,** 218
- Infarction
  - associated production of prostanoids and NO by heart *in situ,* effect of aspirin (rabbit), **257,** 488
- Infection
  - gut and systemic immunity during, suppression by energy deficits (mouse), **264,** 796
- Inflammation
  - acute
    - macrophage inflammatory protein-1α expression and function in, regulation by IL-10 in murine model, **255,** 279
    - rat *in vivo* model, iNOS role in neutrophil extravasation, **257,** 684
  - acute-phase processes in human, increased serum ITIH4 levels during, **263,** 224
  - angiotensin II activation of NF-κB in human monocytes, **257,** 826
  - gastric mucosal inflammatory responses to *Helicobacter pylori* LPS in rat
    - downregulation of caspase-3 and NO synthase-2 by sulglycotide, **261,** 15
    - interplay of ET-1, IL-4, and TNF-α in, **258,** 17
  - responses in cutaneous wound healing, regulatory role of IL-10 (mouse), **265,** 194
  - tissues, and expression of Bcl-2 and Bak (human), **264,** 139
- Infrared spectroscopy
  - β-amyloid conformation: standardization of aggregation grade, **265,** 297
  - difference spectroscopic analysis of ATP-binding site of annexin VI, **263,** 775
  - prion protein cellular isoform structural dependence on solvent: spectroscopic characterization of intermediate conformation, **264,** 972
  - secondary structure of sea anemone cytolysins in soluble and membrane-bound forms, **254,** 174
- Inhibin
  - male sterility in transgenic mice expressing human activin/inhibin βA subunit gene in testis, **259,** 699
- Inhibition constants
  - for catalytically impaired mutant enzymes, wild-type enzyme as reporter for, **263,** 617
- Inhibitor-1
  - and DARPP-32, dephosphorylation, dual control by inositol glycan putative insulin mediators from beef liver, model phosphatase 2C → phosphatase 1 activation cascade via, **255,** 150
- Inhibitors of apoptosis
  - *Apollon* gene-encoded, expression in brain cancer cells (human), **264,** 847
  - cIAP-1, modulation by antitubulin agents combined with bryostatin 1, effect on apoptosis of early pre-B acute lymphoblastic leukemia Reh cells, **266,** 76
  - X-chromosome-linked, induction by VEGF in human umbilical vein endothelial cells, **264,** 781
- Initiator binding protein
  - transcription initiation mediated by, in *Saccharomyces cerevisiae,* **255,** 157
- Inorganic phosphate
  - regulation of CryIVA protoxin, **262,** 359
- Inositol phosphates
  - superoxide anion-induced formation in rat mesenteric artery SMCs, role of tyrosine kinase, **259,** 239
- Inositol phosphoglycans
  - putative insulin mediators from beef liver, dual control of inhibitor-1 and DARPP-32 dephosphorylation by, model phosphatase 2C → phosphatase 1 activation cascade via, **255,** 150
- Inositol 1,3,4,5-tetrakisphosphate
  - GAP$^{\mathrm{IP4BP}}$ and GAP$^{\mathrm{m}}$ proteins binding, tissue-specific expression and subcellular distribution (RBL-2H3 cells, human), **255,** 421
- Inositol 1,4,5-trisphosphate
  - induced Ca^{2+} release, loading dependence, control by cytosolic Ca^{2+} (A7r5 cells), **264,** 967
  - interaction with IP$_3$ receptor type I, real time analysis, **260,** 527
  - mediated Ca^{2+} release from endoplasmic reticulum, inhibition by antibodies to pleckstrin homology domain of PLC-δ1 (RBL cells), **260,** 42
- 1-D-*myo*-Inositol 1,4,5-trisphosphate
  - comparison with adenophostin A: inframolecular studies of protonation, **266,** 334
- Inositol 1,4,5-trisphosphate receptor
  - functional ligand binding site, high efficient expression in *E. coli,* **257,** 792
  - modulator 2-aminoethoxydiphenyl borate, effects on myometrial contractions (rat), **264,** 979
  - type I, interaction with ligand, real time analysis, **260,** 527
- 1-D-*myo*-Inosityl-2-amino-2-deoxy-α-D-glucopyranoside
  - biosynthesis, *Mycobacterium smegmatis* mutants defective in, characterization, **255,** 239
- Insect cells, *see also* Baculovirus expression system
  - *Drosophila* S2, cytoskeleton assembly pathways in, activation by neuroglian and DE-cadherin by independent mechanisms, **265,** 372
  - *Drosophila* SL2, human Btk promoter in, synergistic activation by Sp1/3 and PU.1, **259,** 364
  - Sf9
    - casein kinase 2 binding to and phosphorylation of BRCA1, **260,** 658
    - constitutive secretion of endogenous insulin-like peptide binding protein with high affinity for insulin, **265,** 674
    - nuclear localization of C-terminal domains of kinesin-like protein MKLP-1, **260,** 605
- Insulin
  - effect on farnesyltransferase gene transcription and mRNA stability, **254,** 243
  - endogenous insulin-like peptide binding protein with high affinity for, constitutive secretion in Sf9 cell cultures, **265,** 674
  - exocytosis from immature or mature secretory granules in rat pancreatic β cells, α-SNAP function in, **260,** 127
  - gene, as target of nuclear factor-1α and HNF-1β (human), **263,** 566
  - glucose secretion stimulated by, PACAP as islet neuropeptide contributing to, identification (mouse), **256,** 664
  - impaired secretion, mitochondrial gene mutation associated with, evaluation of pancreas from patients with, **259,** 149
  - regulation of CYP2E1 expression, role of phosphatidylinositol 3-kinase, Src kinase, and protein kinase A signaling pathways (rat), **266,** 304
  - secretion from nonendocrine cells with engineered human proinsulin cDNA, effects of differentiation, **265,** 361
  - signaling, regulation, role of SH2-containing inositol phosphatase 2, **260,** 265
  - signaling between PI 3-kinase and Akt/PKB activations in ZDF liver, impairment by hyperglycemia (rat), **266,** 252
  - signaling pathway intermediates, gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
  - stimulated proliferation of hematopoietic cells, support by insulin receptor substrate 4, **260,** 718
  - stimulus-induced release in MIN6 insulinoma cells, inhibition by excessive phosphoinositide hydrolysis, **254,** 77
- Insulin-like growth factor I
  - and C-terminal tetrapeptide of substance P, synergistic upregulation of integrin α5 in SV40-transformed human corneal epithelial cells, **255,** 692
  - regulation of insulin receptor substrate-1 expression in 3T3-L1 adipocytes, **255,** 614
- Insulin-like growth factor I receptor
  - cytoplasmic domain, baculovirus-mediated expression, purification, and characterization (human), **260,** 724

Insulin-like growth factor II
  pro-protein overexpression, effect on monoallelic *H19* gene expression in transfected embryonic kidney fibroblasts (human), **255,** 226
Insulin-like growth factor II receptor
  sense and antisense RNA, lack of reciprocal genomic imprinting in CNS (mouse), **257,** 604
Insulin-like growth factor binding protein-6
  mitogenic and antiapoptotic effects in osteoblastic osteosarcoma Saos-2/B-10 cells, **263,** 786
Insulin-like growth factor binding proteins
  in cerebrospinal fluid, expression and regulation during development and aging (human), **264,** 652
Insulin-like peptide binding protein
  endogenous, with high affinity for insulin, constitutive secretion in Sf9 cell cultures, **265,** 674
Insulin mediators
  inositol glycans from beef liver, dual control of inhibitor-1 and DARPP-32 dephosphorylation by, model phosphatase 2C → phosphatase 1 activation cascade via, **255,** 150
Insulinoma cells
  stimulus-induced insulin release, inhibition by excessive phosphoinositide hydrolysis (MIN6 cells), **254,** 77
Insulin receptor substrate 1
  expression in 3T3-L1 adipocytes, regulation by insulin-like growth factor 1, **255,** 614
  phosphorylation, inhibition in isolated adipocytes from cachectic tumor-bearing rats, **256,** 676
Insulin receptor substrate 4
  support of insulin- and IL-4-stimulated proliferation of hematopoietic cells, **260,** 718
Insulin-regulated membrane aminopeptidase
  placental, gene encoding, structural organization of 5′ end and chromosomal assignment (human), **262,** 269
Insulin-related peptides
  prothoracicotropic activity (*Samia cynthia ricini*), **266,** 575
Insulin resistance
  in nondiabetic Pima Indians, PP1R5 role: polymorphism screening in PP1R5 genomic region and association analysis with insulin action, **258,** 184
Integrin αIIbβ3
  actin cytoskeleton rich in, of activated nonaggregated platelets, selective association of tyrosine kinases Src, Fyn, and Lyn with, **260,** 790
Integrin $\alpha3\beta1$
  expression in ECV304 endothelial cells, negative regulation by H-Ras, **257,** 95
Integrin $\alpha5$
  synergistic upregulation by C-terminal tetrapeptide of substance P and and IGF-1 in SV40-transformed human corneal epithelial cells, **255,** 692
Integrin $\alpha6\beta4$
  $\beta4$ integrin subunit, rescue of A431 cells from apoptosis via PI3 kinase/Akt kinase signaling pathway, **264,** 127
Integrin $\alpha7$
  gene transcripts of cardiac and skeletal muscle, structure, genetic localization, and identification (human), **260,** 357
Integrin $\beta1$
  cytoplasmic domain regions in migration and survival, mapping in primary oligodendrocyte precursors, **259,** 121
  cytosolic domain, role in PLA_2-mediated arachidonic acid release and cell spreading in NIH-3T3 cells, **258,** 306
Integrin $\beta2$
  coupling with cytoskeleton, disruption of, abolition of β_2-integrin signaling capacity on granulocytes, **265,** 164
Integrins
  mediation of inhibitory effect of focal adhesion on angiotensin II-induced p44/42 MAP kinase activity in human mesangial cells, **261,** 820
  murine platelet, monoclonal antibodies to, preparation from hamster–mouse interspecies hybridomas, **262,** 167
  single-molecule adhesion forces in intact rat osteoclasts, AFM measurement, **259,** 645
Intercellular adhesion molecule 1
  expression, increase by PPARγ agonists, effect on vascular endothelial adhesiveness (human), **263,** 718
  expression on cancer cells, effect of NO, **257,** 395
  soluble, release by fibroblasts, smooth muscle cells, endothelial cells, epithelial cells, and keratinocytes (human), **260,** 734
  TNF-α-induced expression in human epidermal keratinocytes, potentiation by retinoic acid, **255,** 64
Interference mapping
  nuclear protein binding to acute phase response element of mouse α_1 acid glycoprotein gene, **255,** 608
Interferon-α
  inhibition of B16 melanoma cell proliferation by interference with bFGF autocrine growth circuit, **262,** 838
Interferon-β
  gene encoding, transfection of colon cancer cells with, induction of apoptosis (human), **257,** 771
  poly I:poly C-induced secretion from polarized epithelial cell lines, stimulation side-dependent asymmetry, **254,** 5
  role in formation of stable type I interferon receptor, **255,** 539
Interferon-γ
  effect on soluble ICAM-1 release by human fibroblasts, smooth muscle cells, endothelial cells, epithelial cells, and keratinocytes, **260,** 734
  induced cell cycle arrest and apoptosis in primary cultured hepatocytes, role of IRF-1, **257,** 672
  induction of CD11a mRNA and protein in tissue macrophages, role of Na^+/H^+ exchange and PKC and comparison with induction by LPS and TNF-α, **257,** 635
  induction of functional Fas ligand expression on HT29 and MCF7 adenocarcinoma cells, **264,** 813
  and interleukin-4, comparative effects on blood pressure (mouse), **254,** 816
  microglial cells activated with, NO and TNF-α production, inhibition by α-MSH peptides, **263,** 251
  regulation of Bcl-2 and Bak in endothelial cells *in vitro* (human), **264,** 139
  role in dose-dependent induction of proliferation or apoptosis by bacterial protein A, **260,** 105
  transcriptional suppression of rat angiotensin AT1a receptor gene expression in vascular smooth muscle cells, **262,** 494
  transgenic mouse, features of dendritic cells: relevance to cancer development, **259,** 294
Interferon-γ receptor
  variants *IFNGR1* and *IFNGR2,* association with atopy and asthma (human), **263,** 425
Interferon-inducible double-stranded RNA-dependent kinase
  role in inhibition of protein synthesis in leukemia cells by flavonoids, **265,** 589
Interferon receptor
  type I, stable complex formation, IFN-β action in, **255,** 539
Interferon regulatory factor
  ICSAT, overexpression, role in development of adult T-cell leukemia or multiple myeloma (mouse), **260,** 329
Interferon regulatory factor 1
  role in IFN-γ-induced cell cycle arrest and apoptosis in primary cultured hepatocytes, **257,** 672
  role in interferon stimulatory response element activation by hepatocyte isolation (rat), **263,** 627

Interferon stimulatory response element
  activation, stimulation by hepatocyte isolation (rat), **263,** 627
Intergenic transcription
  in human IL-4/IL-13 gene cluster, **255,** 556
Interleukin-1
  effect on angiogenin production by human HepG2 hepatoma cells, **259,** 178
  rescue of scleroderma myofibroblasts from serum starvation-induced cell death (human), **255,** 129
Interleukin-1α
  BMP-2 enhancement of osteoclast formation in presence of, role of upregulation of ODF and cyclooxygenase-2 (mouse), **259,** 97
  effect on soluble ICAM-1 release by human fibroblasts, smooth muscle cells, endothelial cells, epithelial cells, and keratinocytes, **260,** 734
Interleukin-1β
  downregulation of m-calpain mRNA expression in fibroblastic synoviocytes from patients with osteoarthritis and rheumatoid arthritis, **266,** 341
  effect on bradykinin B_1 receptor gene expression in MH-S murine alveolar macrophages, **259,** 476
  gene encoding, TCDD-induced expression in human endometrial cells in culture, **257,** 259
  stimulated human gingival fibroblasts, cyclooxygenase expression and PGE_2 production, role of tyrosine kinases, **257,** 528
  and TNF-α, induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
Interleukin-1 receptor antagonist
  IL1HY1 gene identification and characterization (human), **263,** 702
Interleukin-2
  role in dose-dependent induction of proliferation or apoptosis by bacterial protein A, **260,** 105
Interleukin-3
  mRNA, RNA recognition motifs of human neuronal ELAV-like proteins involved in binding to, **256,** 263
Interleukin-4
  downregulation of endothelin-1 during gastric ulcer healing (rat), **263,** 591
  and ET-1 and TNF-α
   interplay in gastric mucosal inflammatory responses to *Helicobacter pylori* LPS, **258,** 17
   role in buccal mucosal ulcer healing: effect of chronic alcohol ingestion (rat), **257,** 373
  IL-4/IL-13 gene cluster, intergenic transcription in human, **255,** 556
  and interferon-γ, comparative effects on blood pressure (mouse), **254,** 816
  stimulated proliferation of hematopoietic cells, support by insulin receptor substrate 4, **260,** 718
Interleukin-6
  adenoviral-mediated gene transfer in rat lung, enhancement of compartmentalized antiviral IgA and IgG responses, **258,** 332
  effect on angiogenin production by human HepG2 hepatoma cells, **259,** 178
  expression regulation by PMA, cell-specific differences (human lymphocytes, monocytes), **260,** 577
  gene encoding, repression, association with hypermethylation (human breast cancer cells), **258,** 644
  inactivation by gingipains: Lys- and Arg-specific proteinases from *Porphyromonas gingivalis,* **261,** 598
  induction of G_1 arrest through induction of CDK inhibitor $p27^{Kip1}$ and neuron-like morphology in LNCaP prostate tumor cells, **257,** 609
  production
   by *Porphyromonas gingivalis* LPS-stimulated human gingival fibroblasts, inhibition by IL-10, **263,** 372
   TNF-α-induced, negative regulation by thioredoxin, **258,** 443
   in vitamin D_3-differentiated THP-1 cells, induction by S-form LPS, **257,** 327
  Stat3 signaling induced by, in primary cultures of lung fibroblasts, inhibition by α-thrombin (human), **256,** 626
  upregulation of ITIH4 in hepatocarcinoma HepG2 cells, **263,** 224
Interleukin-9 receptor
  α-chain, interaction with Tip60 (human), **263,** 149
Interleukin-10
  inhibition of IL-6 production by *Porphyromonas gingivalis* LPS-stimulated human gingival fibroblasts, **263,** 372
  production by T cells, induction by gangliosides GD1a and GM3 (human), **256,** 41
  regulation of macrophage inflammatory protein-1α expression and function in murine model of acute inflammation, **255,** 279
  regulatory role in cutaneous inflammatory response of wound healing (mouse), **265,** 194
Interleukin-12 receptor $\beta 2$
  gene mutations in atopic subjects, **266,** 551
  physical interaction of Jak2 with, via Jak2 amino-terminus, **257,** 400
Interleukin-13
  IL-4/IL-13 gene cluster, intergenic transcription in human, **255,** 556
Interleukin-13 receptor $\alpha 1$
  gene promoter, structural characterization (human), **265,** 387
Interleukin-17
  induction of rapid tyrosine phosphorylation and Raf-1 kinase activation in U937 monocytic progenitor cells, **259,** 172
  signaling mechanism, role of JAK/STAT pathway (U937 cells), **262,** 14
Internodal cells
  characean, reverse motion of organelles with myosin molecules along actin filament bundles, **257,** 223
Inter-α trypsin inhibitor heavy chain 4 protein
  increased serum level in acute-phase patients and upregulation by IL-6 in hepatocarcinoma HepG2 cells, **263,** 224
Intestinal epithelial cells
  anoikis-like cell death, functional dissociation from stress-activated protein kinase (rat IEC-18, IEC-*ras*3 cells), **260,** 48
  haptoglobin gene expression, attenuation by TGF-β, role of MAP kinase pathway (rat IEC-6 cells), **259,** 544
  TNF-α-induced apoptosis, and signaling mechanisms involved, **260,** 159
Intestinal goblet cells
  Gob-5 gene expressed in, cloning and identification (mouse), **255,** 347
Intestinal mucosa
  interaction between actin and long isoform of cell adhesion molecule C-CAM (rat), **256,** 404
  ion transport in Ussing chamber, effects of chemically synthesized porcine guanylin and uroguanylin, **259,** 141
Intestine
  and liver, differences in editosome assembly, role of RNA 3′ of apolipoprotein B mRNA mooring sequence (rat), **263,** 81
  OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  p8 mRNA expression in response to LPS (rat), **260,** 686
  sodium-dependent phosphate transporter expressed in, cloning and characterization (human), **258,** 578
Intracellular aggregates
  in cultured cells overexpressing transglutaminase, effects of glutamine repeat length, **260,** 150
Intracellular signaling
  cascades, osmotic induction: role in regulation of cell function, **255,** 551
Introns
  retained, detection in transcription of human thrombospondin 2 gene, **259,** 527
Iodide/chloride channel
  TSH/dibutyryl cAMP-activated, in FRTL-5 cells, **259,** 631
Iodoacetamide
  induction of Cu/Zn-superoxide dismutase gene, xenobiotic responsive element for, analysis (rat), **256,** 133

Iodothyronines
  sulfation by recombinant human liver steroid sulfotransferases, **263,** 632
Ion channels
  mNSC1, expression in mammalian cells, **265,** 13
  single, simultaneous electrical and optical measurement using artificial lipid bilayer formed on agarose-coated glass, **265,** 595
  stretch-activated
    relationship to antigens: rippling muscle/MG-associated autoantibodies recognizing skeletal muscle proteins, **264,** 430
    role in flow-stimulated NO release in heart (guinea pig), **261,** 6
  voltage-dependent large conductance channels, expression in visceral smooth muscle (opossum), **264,** 929
Ion-exchange chromatography
  thaumatin-like antifungal protein (French bean legumes), **263,** 130
Ionizing radiation
  DNA end binding of Ku80 and survival of fibroblasts following, Ku80 functional domains required for, **261,** 802
  p53-dependent responses in SV40-immortalized human fibroblasts, **257,** 168
  responses of cells from Nijmegen breakage syndrome patients, restoration by expression of full-length NBS1 protein, **265,** 716
  sensitivity of *Escherichia coli* mutant lacking NADP$^+$-dependent isocitrate dehydrogenase, **254,** 647
I-*Ppo*I
  from myxomycete, generation of site-specific DNA double-strand breaks in human cells, **255,** 88
IQGAP1
  as molecular switch for cadherin-mediated cell–cell adhesion, **262,** 1
Iron
  bound in mitochondrial F_1ATPase, reaction with H_2O_2, protein-derived radicals in, EPR detection, **263,** 281
  chelation in human astrocytoma cells, screening of transcriptionally regulated genes after, **264,** 709
  Fe^{3+}/ascorbate system oxidation of BSA, effect of lysine carboxymethylation, **264,** 207
  free, bleomycin-detectable, in alveolar system of preterm infants, **257,** 218
  inorganic and ferritin-released, *in vitro* complexation of 1,2,4-benzenetriol with, **259,** 169
Iron–sulfur proteins
  [2Fe–2S] protein from hyperthermophilic bacterium *Aquifex aeolicus,* **261,** 885
Iron transport
  outer-membrane proteins FepA and FhuE responsible for, overproduction in *E. coli hfq::cat* mutant, **264,** 525
IRS-1, *see* Insulin receptor substrate 1
Ischemia
  delayed neuronal damage by, protective effects of prostaglandin I_2 analogs (gerbil), **265,** 301
Ischemia/reperfusion
  hepatic, induction of iNOS gene transcription by activation of NF-κB (rat), **261,** 917
Islets of Langerhans, *see* Pancreatic islets
Isocitrate dehydrogenase (NADP$^+$)
  Escherichia coli mutant lacking, radiation sensitivity, **254,** 647
Isohelenin
  effect on NO synthase gene expression in rat aortic smooth muscle cells, **262,** 375
Isomerization
  Asn108 in prion peptide 106–126 and full-length PrP upon aging, **261,** 578
Isoniazid
  accumulation in *Mycobacterium smegmatis,* modulation by proton motive force-driven and ATP-dependent extrusion mechanisms, **256,** 682
Isopentenyl pyrophosphate isomerase
  inhibition by nitrogen-containing bisphosphonates (bovine brain), **255,** 491
Isoprenoids
  biosynthesis, carbocation transition state analogs for, nitrogen-containing bisphosphonates as, **263,** 754
  metabolism, pathway of, inhibition by alendronate (rat liver), **266,** 560
3-Isopropylmalate dehydrogenase
  localized structural effects of electrostatic interactions (*Thermus thermophilus*), **258,** 179
8-Iso-prostaglandin $F_{2\alpha}$
  in plasma and urine, measurement in experimental hepatotoxicity (rat), **254,** 764
(−)Isoproterenol
  cooperative binding to rat brain β_1-adrenergic receptors, **257,** 629
Isoxazoylnaphthoquinone
  chlorinated, mechanism of antibacterial and degradation behavior, **263,** 301
ITIH4
  increased serum level in acute-phase patients and upregulation by IL-6 in hepatocarcinoma HepG2 cells, **263,** 224
Itk
  and other Tec protein kinases, pleckstrin homology domain in, structural modeling, **265,** 151

J

J-104870
  anorexigenic effect on neuropeptide Y receptor-mediated feeding (human, rat), **266,** 88
JAK1
  tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
JAK2
  physical interaction with IL-12 receptor β 2 subunit via amino-terminus, **257,** 400
  role in growth hormone stimulation of tyrosine phosphorylation of focal adhesion kinase and actin stress fiber formation in Saos2 osteoblast-like cells, **263,** 100
  tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
JAK3
  role in mast cell-mediated type I hypersensitivity reactions (mouse), **257,** 807
  tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
(*R*)-Japonilure
  binding to odorant binding proteins cloned from *Phyllopertha diversa,* **263,** 832
Jasplakinolide
  induced actin polymerization, induction of FcγRIIIb shedding from human neutrophils, **255,** 568
JIP60
  alteration of ribosome conformation *in vivo* in transgenic tobacco, **258,** 572
JNK, *see* c-Jun N-terminal kinase
Jugular vein
  EDHF-type relaxations, mediation by cAMP (rabbit), **263,** 52
Junctional protein
  90-kDa sarcoplasmic reticular, formation of integral part of supramolecular triad complex in skeletal muscle, **261,** 603

K

Kainic acid
  cerebellar granule cells stimulated with, reactive oxygen species production, **256,** 320
  excitotoxicity mediated by, induction of heme oxygenase 1 in rat brain: dissociation of mRNA and protein expression in hippocampus, **259,** 91
Kallikrein 2
  alternate transcripts, identification: long transcript and alternative splicing (human), **264,** 833

- Kanamicin
  - as selection marker, effect on viability and plasmid stability of vectors encoding human neurotrophins expressed in *E. coli,* **258,** 29
- Kaposi's sarcoma cells
  - AIDS-associated, ERK1/2-mediated growth, negative regulation by p38 MAP kinase, **264,** 676
- KatG
  - peroxynitritase activity in *Mycobacterium tuberculosis,* **256,** 485
- Keratinocyte growth factor receptor
  - activated forms, K-*sam* gene generating, detection of exons located more than 200 kb downstream of previously described 3′ exon, **265,** 739
- Keratinocytes
  - autocrine induction of substance P mRNA and peptide (human), **263,** 327
  - cervical, normal and malignant, expression of class I HOX genes: HOXC5 and HOXC8 selective turn on in cancer cells, **257,** 738
  - epidermal, TNF-α-induced ICAM-1 expression, potentiation by retinoic acid (human), **255,** 64
  - epidermal growth factor-like growth factor gene regulation (human), **265,** 214
  - proliferation, ceramide-mediated inhibition of, role of 92-kDa gelatinase (human), **260,** 634
  - release of soluble ICAM-1 (human), **260,** 734
- 15-Keto-13,14-dihydro-prostaglandin $F_{2\alpha}$
  - in plasma and urine, measurement in experimental hepatotoxicity (rat), **254,** 764
- 15-Ketosterols
  - differential regulation of HMG-CoA reductase and LDL receptor genes in Hep G2 cells, **259,** 688
- 11-Ketotestosterone
  - activation of transcription of eel androgen receptor in transfected mammalian cells, **254,** 378
- Kidney
  - adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  - Apaf-1 forms, identification (human), **261,** 746
  - betaine-aldehyde dehydrogenase immunolocalization (pig), **258,** 732
  - calpastatin isoform expression (mouse), **260,** 339
  - cytochrome P450 4F7 cloning (*Dicentrarchus labrax*), **258,** 155
  - ganglioside sialidase expression (human), **261,** 21
  - hesr-1 expression (mouse), **260,** 459
  - *in vivo* biological activity of dHGF mutant with Ala substitution in N-terminal basic region, **254,** 363
  - OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  - organic anion transporters hOAT1 and hOAT3, molecular cloning and characterization (human), **255,** 508
  - p8 mRNA expression in response to LPS (rat), **260,** 686
  - regeneration after myoglobinuric acute injury, mediation by extracellular signal-regulated kinase (rat), **254,** 88
  - senescence marker protein-30 expression (rat), **254,** 1
  - vitamin D 1a-hydroxylase induction by low-calcium diet, decrease in adult rats, **255,** 731
- Kidney cells
  - agonist-induced phosphorylation of C5a receptor, effects of overexpression of wild-type and catalytically inactive GRK2 and GRK6 (COS-7 cells), **259,** 224
  - aminoacylation activity of human phenylalanyl-tRNA synthetase α- and β-subunits expressed in COS cells, **255,** 765
  - aquaporin-1 expression in proximal tubule epithelial cells, regulation by hyperosmolarity and contrast agents (human), **256,** 240
  - chemokine receptor CCR-7 stably expressed in HEK-293 cells, pharmacological and signaling analysis, **263,** 685
  - Cl^- channel and $Na^+/K^+/2Cl^-$ cotransporter activation by flavonoids in epithelial A6 cells, **254,** 368
  - cultured in mannose-rich media, elevated expression of free deaminoneuraminic acid (COS-7 cells), **261,** 326
  - DFF45 in role of chaperone and inhibitor (293T cells), **264,** 176
  - embryonic, steroid hormone-inducible expression of L-glutamate transporter GLT-1 (human), **265,** 101
  - embryonic, transfected
    - monoallelic *H19* gene expression, effects of proinsulin-like growth factor-II overexpression (293 cells), **255,** 226
    - Tip60 interaction with human interleukin-9 receptor α-chain (293 cells), **263,** 149
  - fatty acid amide hydrolase catalytic activity, serine residues involved in, identification (COS-7 cells), **264,** 316
  - fibroblast-like, reactions to dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
  - fibronectin splicing, regulation by HGF/scatter factor: comparison with effects of TGF-β1 (MDCK cells), **260,** 225
  - herpes simplex virus type 1 infection, inhibition by bovine lactoferrin peptidic fragments (Vero cells), **264,** 19
  - human steroid 21-hydroxylase function in COS-1 cells, **257,** 384
  - interferon-β secretion induced by poly I:poly C, stimulation side-dependent asymmetry (MDBK cells), **254,** 5
  - mouse brain sialidase expression in COS-7 cells, **258,** 727
  - nuclear pore complex oxalate binding protein gp210 expression, oxalate-induced and cell cycle-dependent (Vero cells), **266,** 72
  - phospholipase C-δ1 translocation, real-time visualization: role of PH domain and response to hypo-osmotic stress (MDCK cells), **254,** 284
  - polarized, unidirectional transport of Co^{2+} from apical to basolateral compartment (MDCK cells), **257,** 289
  - recombinant human pyruvate carboxylase functional expression (293T cells), **266,** 512
  - release of GPI-anchored carboxypeptidase M by PI-PLC, upregulation of enzyme synthesis (MDCK cells), **258,** 204
  - ROMK1 channel processing and transport, temperature sensitivity (MDCK cells), **261,** 364
  - transfected eel androgen receptor cDNA in, steroid activation of transcription (293 cells), **254,** 378
  - transglutaminase-overexpressing, effects of glutamine repeat length (COS-7 cells), **260,** 150
- Kinetic epoxidation assay
  - chloroperoxidase, **266,** 301
- Kinetin
  - protection against Fenton reaction-mediated oxidative damage to DNA, **265,** 499
- Kir6.2
  - low-affinity binding sites for glibenclamide, characterization, **257,** 766
  - N-terminus, control of spontaneous bursting and ATP inhibition of K_{ATP} channels, **255,** 231
- Kit ligand
  - Lyn kinase activity in Mo7e megakaryocytic cells activated by, downregulation by CHK, **259,** 611
- KPSFVRFamide
  - isolation, pharmacology, and gene organization (*Caenorhabditis elegans*), **254,** 222
- K-Ras
  - correlation with β-1,6 branching of N-linked carbohydrate and CEA production in lectin-resistant human colon carcinoma cells, **259,** 588
- Kringle 5
  - mouse recombinant, induction of cell cycle arrest and apoptosis in endothelial cells, **258,** 668
- Kringles
  - role of kringles 1 to 3 in tumor-suppressing activity of human angiostatin protein, **264,** 469

K-*sam* gene
  generating activated forms of KGF receptor, detection of exons located more than 200 kb downstream of previously described 3′ exon, **265,** 739
Ku80
  functional domains for DNA end binding and survival after radiation, **261,** 802
Kunitz domain
  first, hepatocyte growth factor activator inhibitor type 2 lacking, as predominant product in mouse but not human, **255,** 740
Kupffer cells
  mediation of downregulation of rat hepatic CMOAT/MRP2 gene expression, **255,** 143
  osteopontin expression after CCl_4 intoxication (rat), **256,** 527

L

L1 capsid proteins
  human papillomavirus type 16, balance of IgG subclasses toward, as predictor for regression of HPV16-positive cervical intraepithelial neoplasia, **258,** 128
L-779,976
  in identification of SST receptor subtypes controlling stimulated growth hormone secretion, **263,** 276
L-817,818
  in identification of SST receptor subtypes controlling stimulated growth hormone secretion, **263,** 276
Lactacystin
  effects on HSF1 activation upon heat shock and during post-heat-shock recovery (murine embryonic fibroblasts), **264,** 352
  hyperphosphorylation of HSF1 and induction of hsp70 and hsp27 expression, **254,** 264
α-Lactalbumin
  dithiothreitol-denatured, chaperoning by α-crystallin (bovine), **261,** 292
Lactate
  production in L6 myoblasts, stimulation by factor from pancreatic and colonic cancer cells, **260,** 626
Lactation
  effect on expression of mRNA splice variant with exon for multiply O-glycosylated domain of MFG-E8 (mouse), **254,** 522
Lactoferrin
  bovine, peptidic fragments involved in inhibition of herpes simplex virus type 1 infection, **264,** 19
  interaction with human tear lipocalin, **265,** 322
Lactogenin
  isolation and characterization from bovine milk, **263,** 187
Lactoperoxidase
  bovine, GSH-dependent oxidative modification of protoporphyrin and other dicarboxylic porphyrins, **259,** 195
Lactose
  conjugation with plasmid via diazocoupling, enhancement of resistance to restriction enzymes and acquisition of binding affinity to galactose-specific lectin, **260,** 323
  minimal galectin-3 domain binding to, determination by λ phage display, **265,** 291
LaMDR1 gene
  structural and functional analysis in *Leishmania amazonensis,* **255,** 289
Laminin
  deposition by mammary epithelial cells, promotion by chromogranin A, **259,** 563
  neurite outgrowth mediated by, role of protein kinase C, **256,** 98
  stimulation of protein tyrosine dephosphorylation in PC12 cells, **262,** 713
  synthetic peptide YIGSR, bioconjugation
    with poly(styrene co-maleic acid), and effect on lung metastasis of B16-BL6 melanoma cells, **255,** 75
    with polyvinyl pyrrolidone, increase of YIGSR antimetastatic effect due to longer plasma half-life (mouse), **264,** 763
Laminin $\alpha2$
  deficient mice, skeletal muscle fibers in, activation of caspase-3 apoptotic pathways, **260,** 139
Laminin binding protein precursor p40
  binding to S21 protein of 40S ribosome (human), **256,** 385
Large conductance channels
  voltage-dependent, expression in visceral smooth muscle (opossum), **264,** 929
Laser pulse
  fast UV, induction of solute release from sensitized liposomes, **262,** 406
LAT1
  molecular cloning and transport function (human), **255,** 283
L-A virus
  nanoparticles, *in vitro* selective RNA synthesis with, **263,** 23
LBR kinase
  and SRPK1, substrate specificity, **255,** 602
L cells
  complement factor H expression, **262,** 315
LDL, *see* Low-density lipoprotein
Lecithin–cholesterol acyltransferase
  binding affinity and reactivity with native lipoproteins (human), **258,** 548
  lysophospholipase related to, cloning and expression (human), **257,** 50
  secretion by brain neuroglial cell lines (human, rat), **258,** 73
Lectin resistance
  human colon carcinoma cell lines with, correlation of K-Ras with β-1,6 branching of N-linked carbohydrate and CEA production, **259,** 588
Lectins
  galactose-specific, RCA_{120}, binding by plasmid–lactose conjugate, **260,** 323
  mannan-binding, MVL, isolation and characterization (*Microcystis viridis*), **265,** 703
  mistletoe, site-specific mutagenesis: role of ribosome-inactivating protein activity in apoptosis, **264,** 944
  multigene family in *Drosophila melanogaster,* **261,** 923
Legume
  first chromatographic isolation of thaumatin-like antifungal protein (French bean), **263,** 130
Leishmania amazonensis
  LaMDR1 multidrug resistance gene, structural and functional analysis, **255,** 289
Leishmania major
  protein S-myristoylation, detection with heterologous reporter, **256,** 569
Lens
  age-related degradation of βA3/A1-crystallin (human), **258,** 632
  fiber cell degeneration produced by thiamine deficiency *in vivo* (mouse), **258,** 703
  ocular, intense myristoylation of single protein in bovine epithelial cells and intact rat lens, **256,** 652
  thioredoxin-1 gene regulation specific to, in *in vivo* photochemical stress of Emory mouse, **265,** 345
  unfolded protein formation in epithelial cell endoplasmic reticulum, induction by xanthurenic acid (bovine, pig), **265,** 600
Lens proteins
  block of copper-mediated formation of ROS during glycation reactions *in vitro* (bovine), **259,** 706
Leptin
  chronic injections, effects on hypothalamic hypocretin/orexin and neuropeptide Y (rat), **258,** 119
  circulating
    levels in lean and genetically obese *fa/fa* rats, acute effects of exercise, **255,** 698

Leptin (*continued*)
  stimulatory effect on luteinizing hormone and prolactin surges in rat, **263,** 162
 effects on islet function after acute or prolonged exposure (human), **256,** 637
 expression in adipocytes, regulation by PPARγ activation with rosiglitazone (human), **265,** 265
 hyperleptinemia, depletion of fat from rat denervated fat tissue by, **260,** 653
 identification in breast cancer cell lines and breast tumors, **259,** 695
 plasma levels
  in adult rats, role of sex steroid milieu, **259,** 56
  effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
 proximal 762-bp promoter, to drive and control regulation of transgene expression of growth hormone receptor in mouse, analysis, **262,** 187
 regulation by steroid hormones in adipose tissue (rat), **259,** 624
 release by adipose tissue from Stat5a and b knockout mice, effect of growth hormone, **263,** 201
 role in brain development (mouse), **256,** 600
 role in steroid-induced luteinizing hormone and prolactin surges in female rat, **254,** 578
 stimulation of catecholamine secretion and synthesis in cultured adrenal medullary chromaffin cells (pig), **261,** 426
 stimulation of LH and prolactin surges in steroid-primed ovariectomized rats, mediation by melanocortin 4 receptor, **257,** 860
 tyrosine phosphorylation of STAT3 via leptin receptor in metaphase 2 stage oocyte (mouse), **256,** 480
Leptin receptor
 interaction with leptin: tyrosine phosphorylation of STAT3 in metaphase 2 stage oocyte (mouse), **256,** 480
 mRNA, colocalization with placental lactogen-II in rat trophoblast cells, **257,** 425
L-Leucine
 NAD(P)H fluorescence, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
Leucine aminopeptidase, *see* Leucyl aminopeptidase
Leucine-rich repeats
 and gelsolin-like domains, Ras-binding protein Ce-FLI-1 comprising (*Caenorhabditis elegans*), **257,** 111
Leucine zipper-like coiled-coil motifs
 oligomerization of atrial and brain natriuretic peptide pro-protein amino-terminal regions through, **255,** 495
Leucine zipper peptides
 synthetic, rich in glycine and sarcosine, in probing of roles of side chains and backbone in protein structure, **265,** 350
Leucyl aminopeptidase
 placental, gene encoding, structural organization of $5'$ end and chromosomal assignment (human), **262,** 269
 purification (algae), **262,** 557
Leukemia
 associated *TEL* gene, encoding of transcription repressor associated with SMRT and mSin3A, **264,** 871
 multidrug resistant, course of disease, acceleration by treatment with P-glycoprotein substrates, **266,** 167
Leukemia cells
 Akt/PKB activation by differentiation-inducing factor-1 from *Dictyostelium discoideum* (K562 cells), **263,** 790
 basophilic, subcellular distribution of GAP^{IP4BP} and GAP^{m} (RBL-2H3 cells), **255,** 421
 intact nuclei from, associated telomerase, enzymatic activity (human CEM cells), **265,** 51
 presence and expression of novel variant form of ST2 (human UT-7/GM cells), **264,** 14
 protein synthesis, inhibition by flavonoids, role of eukaryotic initiation factor 2α kinases (human, mouse), **265,** 589
 rapamycin-targeted signaling pathway, inhibition by L-asparaginase (human), **260,** 534
 TFAR19 gene cloned from TF-1 cells, enhancement of tumor cell apoptosis induced by growth factor withdrawal, **254,** 203
Leukemic lymphoblasts
 effects of multidrug resistance pump inhibitors on calcein retention and MDR pump inhibition (human), **257,** 410
Leukocytes
 CD52, human sperm antigen homologue gp20, biochemical and MALDI analysis, **258,** 639
 extravasation *in vivo,* role of inducible NOS (rat), **257,** 684
 IL1HY1 gene expression (human), **263,** 702
 polymorphonuclear, *see* Neutrophils
 PPARγ1 expression, dynamic regulation by acute endotoxemia (pig), **263,** 749
Leukotriene B_4
 neutrophils stimulated by, filamentous actin content, oscillation regulation (human), **262,** 479
Leukotriene B_4 receptor
 cloning and characterization (rat), **262,** 806
Leukotriene B_4 receptor antagonist
 ONO-4057, immunosuppressive effect *in vitro* (murine T cells), **264,** 321
Lewis lung carcinoma
 low-density lipoprotein-mediated suppression in hypercholesterolemic LDL receptor-deficient mice, **255,** 377
Lewis lung carcinoma cells
 reduced angiogenesis in apo(a)-transgenic mice, **257,** 714
LGP85
 cytoplasmic tail, *in vitro* binding by adaptor protein complex, **255,** 54
Light
 psbA transcripts dependent on, in homologous/heterologous cyanobacterial cells, **255,** 47
 ultraweak emission dependent on lipoxygenase, in early phase of neuroblastoma CHP100 cell apoptosis, **265,** 758
Light-harvesting complex II
 higher plant, single-molecule electron tunneling spectroscopy, **256,** 288
Lignin model compounds
 nonphenolic, manganese peroxidase-catalyzed destruction, coupling with MnP-mediated lipid peroxidation, **259,** 212
Lignins
 ^{14}C-labeled, manganese peroxidase-catalyzed destruction, coupling with MnP-mediated lipid peroxidation, **259,** 212
LIM proteins
 FHL1 and FHL3, differential expression in skeletal muscle (mouse), **255,** 245
 FHL4, expression in testis (mouse), **255,** 251
Linolenic acid
 dietary, effects on obesity and diabetes (KK-A^y mouse), **259,** 85
γ-Linolenic acid
 effects on VE-cadherin/catenin expression in human vascular endothelial cells, **258,** 113
Lipase
 pancreatic, inhibition by specific chiral isomers of β-lactone DU-6622, **265,** 536
 recombinant human gastric, cysteine residues of, **257,** 851
Lipid composition
 nuclear membrane, changes in, effects on RNA nucleocytoplasmic transport (rat), **258,** 476
Lipid hydroperoxides
 plasma, reduction by apolipoprotein B-100 (human), **259,** 185
Lipid peroxidation
 associated loss of molecular interaction between cytochrome *c* and cardiolipin, **264,** 343

  - in brain synaptosomes: peroxynitrite-induced formation of phospholipid hydroperoxides and inhibition by α-tocopherol (rat), **257,** 651
  - induction of cyclooxygenase activation in experimental hepatotoxicity (rat), **254,** 764
  - manganese peroxidase-mediated, coupling with destruction of nonphenolic lignin model compounds and ^{14}C-labeled lignins, **259,** 212
  - membrane, induced by H_2O_2, attenuation by constitutive hsp70 (H9c2 cells), **265,** 279
  - role in necrosis of wheat hybrid, **262,** 109
  - verotoxin-1-stimulated, potentiation by LPS (rat), **260,** 813
- Lipid–protein interaction
  - CTP:phosphocholine cytidylyltransferase, **257,** 643
- Lipids
  - artificial bilayer formed on agarose-coated glass, for simultaneous electrical and optical measurement of single ion channels, **265,** 595
  - photochromic, liposomes sensitized to, fast laser-induced solute release, **262,** 406
  - plasma, effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
  - reconstituted bilayers, insertion of α-actinin fragments into, **264,** 225
  - reconstituted monolayers and bilayers, insertion of actin binding protein fragments into, **259,** 108
  - serum levels, and atherosclerosis regression in rabbit aorta, effect of fluvastatin and role of NO, **259,** 414
- Lipoamide dehydrogenase
  - deficiency due to mutation in interface domain (human), **262,** 163
- Lipocalin
  - human tear, interaction with lysozyme and lactoferrin, **265,** 322
- Lipocortin I
  - heterotetramer, binding to purine RNA and pyrimidine DNA, **265,** 200
- Lipocortin V
  - function as signaling protein for VEGF receptor-2/FLK-1, **258,** 713
- Lipolysis
  - in adipose tissue, related leptin changes during acute exercise (rat), **255,** 698
  - in adipose tissue from Stat5a and b knockout mice, effect of growth hormone, **263,** 201
- Lipophilins
  - cDNA cloning, chromosomal gene localization, and tissue expression (human), **256,** 147
- Lipopolysaccharide
  - effect on prostaglandin production by rat astrocytes, **263,** 570
  - *Helicobacter pylori,* gastric mucosal inflammatory responses in rat
    - downregulation of caspase-3 and NO synthase-2 by sulglycotide, **261,** 15
    - interplay of ET-1, IL-4, and TNF-α in, **258,** 17
  - induced lethality in poly(ADP-ribose) polymerase-deficient mouse, prevention, **263,** 433
  - induction of CD11a mRNA and protein in tissue macrophages, role of Na$^+$/H$^+$ exchange and PKC and comparison with induction by IFN-γ and TNF-α, **257,** 635
  - induction of *IL1HY1* gene in THP-1 cells, **263,** 702
  - induction of p8 mRNA expression *in vivo* and *in vitro,* **260,** 686
  - induction of RGS 1 and RGS 16 in porcine tissues in response to, **259,** 550
  - inhibition of Cla-1 expression in human monocytes and macrophages, **262,** 251
  - *Porphyromonas gingivalis,* human gingival fibroblasts stimulated with, IL-6 production, inhibition by IL-10, **263,** 372
  - potentiation of verotoxin-1-stimulated lipid peroxidation in rat, **260,** 813
  - S-form, role in IL-6 induction in vitamin D$_3$-differentiated THP-1 cells, **257,** 327
  - systemic administration, associated α_1-antichymotrypsin gene induction in murine brain, **263,** 270
- Lipoprotein(a)
  - assembly in transgenic rabbits expressing human apolipoprotein (a), **255,** 639
- Lipoproteins
  - native, binding affinity and reactivity of lecithin–cholesterol acyltransferase (human), **258,** 548
- Liposomes
  - carrying von Willebrand factor-binding domain of platelet glycoprotein Ibα: potential platelet substitute, **261,** 784
  - cationic, suitable for gene transfer into pregnant animals, evaluation, **258,** 358
  - HVJ-liposome method of gene transfer of PDGF β receptor extracellular domain *in vivo:* amelioration of bleomycin-induced pulmonary fibrosis (mouse), **265,** 503
  - immunopotentiating fusogenic, vaccine-delivery system using, **261,** 824
  - phosphatidylserine-containing, uptake by liver cells *in vivo* and by sinusoidal liver cells in primary culture (rat), **256,** 57
  - protein expression, **261,** 238
  - sensitized, fast laser-induced solute release, **262,** 406
- Lipoxygenase
  - inhibition: induction of apoptosis, morphological changes, and carbonic anhydrase expression in pancreatic cancer cells (human), **266,** 392
  - structure and molecular mechanisms, analysis with fluorescein $5'$-isothiocyanate (soybean), **265,** 489
  - ultraweak light emission dependent on, in early phase of neuroblastoma CHP100 cell apoptosis, **265,** 758
- 5-Lipoxygenase
  - upregulation by dexamethasone in mast cells (human), **265,** 617
- Lipoxygenase inhibitors
  - effects on proliferation of pancreatic cancer cells (human), **261,** 218
- *Listeria monocytogenes*
  - CTL epitope derived from, translational efficiency of plasmid encoding, codon optimization effect on, **261,** 445
- Liver
  - α1-acid glycoprotein gene, induction by phenobarbital, role of NF-κB (rat), **254,** 93
  - adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  - androgen receptor mRNA levels (Japanese eel), **254,** 378
  - Apaf-1 forms, identification (human), **261,** 746
  - calpastatin isoform expression (mouse), **260,** 339
  - carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  - CCl$_4$-induced toxicity, oxidative injury-induced cyclooxygenase activation in, analysis (rat), **254,** 764
  - cholesterol 7α-hydroxylase gene expression in transgenic mouse, **266,** 454
  - chromatin, phosphatidylcholine-dependent phospholipase C detection and activity (rat), **265,** 640
  - CMOAT/MRP2 gene expression, Kupffer cell-mediated downregulation (rat), **255,** 143
  - *CYP2E1* and *CYP4A* gene expression, alterations in obese, diabetic *ob/ob* mice and *fa/fa* Zucker rats, **255,** 300
  - cytochrome P450 3A4 expression, individual differences, and genetic polymorphism in $5'$-upstream region (human), **259,** 201
  - and enterocytes, differences in editosome assembly, role of RNA $3'$ of apolipoprotein B mRNA mooring sequence (rat), **263,** 81
  - insulin signaling between PI 3-kinase and Akt/PKB activations in ZDF liver, impairment by hyperglycemia (rat), **266,** 252
  - *in vivo* biological activity of dHGF mutant with Ala substitution in N-terminal basic region, **254,** 363
  - ischemia/reperfusion, induction of iNOS gene transcription by activation of NF-κB (rat), **261,** 917
  - isolation of cyp2b10-like cDNA and clone derived from cyp2b10-like pseudogene (mouse), **258,** 11
  - metallothionein MT-I and -II genes, transcriptional induction in Cu,Zn-superoxide dismutase knockout mice, **264,** 735

Liver (*continued*)
  microsomes, cleavage enzymes for sterol regulatory element binding protein (hamster), **258,** 542
  mitochondria, truncated form of CYP27A purified from, biochemical characterization (rabbit), **263,** 663
  necrosis, subsequent vascular endothelial growth factor expression in nonparenchymal and parenchymal cells (rat), **254,** 587
  nuclear membrane sphingomyelin–cholesterol changes after hepatectomy (rat), **262,** 692
  OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  osteopontin expression in Kupffer cells, macrophages, and stellate cells after CCl_4 intoxication (rat), **256,** 527
  p8 mRNA expression in response to LPS (rat), **260,** 686
  6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase cDNA, isolation (chicken), **190,** 397; *erratum,* **259,** 711
  senescence marker protein-30 in, androgen-independent decrease with aging (rat), **254,** 1
  SREBP activation, alterations in trisomy 21 fetuses (human), **260,** 499
  TBP-interacting protein 120A gene expression (rat), **266,** 123
Liver cells
  nonparenchymal and parenchymal, vascular endothelial growth factor expression after necrosis (rat), **254,** 587
  synergistic transactivation of HBV pregenomic promoter by HPV-16 E6 with HBV X protein, mediation by AP1 site of E element in enhancer I (human), **265,** 62
  uptake of phosphatidylserine-containing liposomes *in vivo* and *in vitro,* comparison (rat), **256,** 57
LKB1
  serine/threonine kinase, mutant found in Peutz–Jeghers syndrome patients, loss of cytoplasmic retention ability, **261,** 750
LL-Z1640-2
  radicicol-related, inhibition of JNK/p38 pathways in signal-specific manner, **257,** 19
Long-extension PCR
  detection of deleted mitochondrial DNA, compromise by technical artifacts, **254,** 507
Long QT syndrome
  family with, mitochondrial DNA mutation cosegregating with pathophysiological U wave, **257,** 228
Long terminal repeat
  HIV-1
    functional modulation by poly(ADP-ribose) polymerase, role in phorbol ester-induced HIV-1 activation in U1 cells, **262,** 285
    NRE, interactions with several transcription factors of nuclear extracts, real-time study, **264,** 6
  Moloney murine leukemia virus, transgene expression driven by, negative regulation by activated macrophages, **257,** 74
Long-term potentiation
  role of arachidonic acid, *in vitro* studies (guinea pig, rat), **254,** 446
Low-density detergent-insoluble membrane
  fraction, from sea urchin sperm, isolation and characterization, **258,** 616
Low-density lipoprotein
  binding affinity and reactivity of lecithin–cholesterol acyltransferase (human), **258,** 548
  mediation of Lewis lung carcinoma suppression in hypercholesterolemic LDL receptor-deficient mice, **255,** 377
  oxidized
    induction of macrophage respiratory burst via its protein moiety (human), **263,** 804
    mediated activation of NF-κB and apoptosis in coronary artery endothelial cells, reduction by γ-tocopherol (human), **259,** 157
    regulation of ferritin light chain gene expression in monocytic THP-1 cells, **265,** 577
Low-density lipoprotein receptor
  and HMG-CoA reductase, genes encoding, differential regulation by 15-ketosterols in Hep G2 cells, **259,** 688
  hypercholesterolemic mice with deficiency of, Lewis lung carcinoma in, LDL-mediated suppression, **255,** 377
LPS, *see* Lipopolysaccharide
Luciferase
  effect of coexpressed Hsp20 in CHO cells, **254,** 164
  Photinus pyralis system, light-emitting species dissociated from, light emission from, **265,** 273
Lucigenin
  chemiluminescent probe for detection of intramitochondrial superoxide radical production (human), **262,** 80
  validation as chemiluminescent probe for monitoring superoxide production and basal vascular NO production, **254,** 319
Lung
  adenoviral-mediated IL-6 gene transfer, enhancement of compartmentalized antiviral IgA and IgG responses (rat), **258,** 332
  adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  alveolar epithelial cells, transdifferentiation in primary cultures, caveolin-1 expression and biogenesis of caveolae during, analysis (rat), **262,** 744
  bleomycin-induced fibrosis, amelioration by *in vivo* gene transfer of PDGF β extracellular domain via HVJ-liposome method (mouse), **265,** 503
  embryonic
    high expression of *vegf-d* (mouse), **257,** 891
    tenascin expression in mesenchyme and downregulation by dexamethasone in early organogenesis (rat), **263,** 597
  fetal, antisense transcript to *SMAD5* expressed in, analysis (human), **255,** 668
  ganglioside sialidase expression (human), **261,** 21
  metastasis of B16-BL6 melanoma cells, effect of laminin peptide YIGSR
    after bioconjugation with poly(styrene co-maleic acid) (mouse), **255,** 75
    after bioconjugation with polyvinyl pyrrolidone (mouse), **264,** 763
  p8 mRNA expression in response to LPS (rat), **260,** 686
  phospholipase C-δ1 expression (mouse), **261,** 393
  sodium-dependent phosphate transporter expressed in, cloning and characterization (human), **258,** 578
  TBP-interacting protein 120A gene expression (rat), **266,** 123
Lung adenocarcinoma cells
  two independent senescence programs in, triggering by TGF-β (A549 cells), **255,** 110
Lung cancer
  susceptibility, reduction associated with *CYP2A6* gene deletion (human), **261,** 658
Lung cancer cells
  comparative gene expression profiling in response to p53 (human), **264,** 891
  MRP-mediated multidrug resistance, reversal by RU486 (GLC4/Sb30 cells), **258,** 513
  reduced caveolin 1 gene expression (human), **255,** 580
Lung cells
  fetal, cathepsin D levels, effects of experimental induction of advanced glycation end products (L132 cells), **261,** 175
Lung surfactant
  synthetic, Exosurf Neonatal, enhancement of dendrimer-mediated transfection *in vitro,* **264,** 253
Luteinized granulosa cells
  apoptosis induction by MAP kinase kinase inhibitor PD98059 (human), **263,** 143
Luteinizing hormone
  intrinsically fluorescent LH receptor aggregation driven by, demonstration, **255,** 382

  leptin-stimulated surges in steroid-primed ovariectomized rats, mediation by melanocortin 4 receptor, **257,** 860
  pulsatile secretion in ovariectomized rat, suppression by orexins, **264,** 759
  steroid-induced surges in female rat, role of leptin, **254,** 578
  surges, stimulatory effect of circulating leptin (rat), **263,** 162
Luteinizing hormone receptor
  gene promoter, activation by Sp1 and Sp3 (human), **263,** 366
  intrinsically fluorescent, hormone-driven aggregation, **255,** 382
Lycopene
  Escherichia coli producing, effect on ACF formation (rat colon), **262,** 322
Lymph node
  sulfotransferase causing 6-*O*-sulfation of galactose residues in $2'$-fucosyllactose and other sialyl Lewis^X-related sugars, purification and characterization (pig), **256,** 170
Lymphoblastic leukemia cells
  early pre-B acute, apoptosis, effect of cIAP-1 modulation by antitubulin agents and bryostatin 1 (Reh cells), **266,** 76
Lymphoblastoid cells
  apoptosis induced by IgG, associated phosphorylation of Bcl-2 and mitochondrial changes (human), **264,** 896
  chromosomal instability of Fanconia anemia cell lines, noninvolvement of defective repair activity of ribosomal protein S3, **264,** 518
  micronuclei and DNA strand breaks, induction by human milk extracts (MCL-5 cells), **257,** 319; *erratum,* **259,** 494
  α2,6-sialyltransferase ST6Gal I overexpression in low metastatic variant of W16 cells, association with unique ST6Gal I mRNA, **264,** 619
Lymphoblasts
  carnitine transporter-defective, carnitine uptake, restoration by OCTN2–green fluorescent protein construct (human), **264,** 909
  DNA double strand break repair of episomal vectors, role of p53 (human), **264,** 702
  Niemann–Pick, resistance to phthalocyanine 4 photodynamic therapy-induced apoptosis, **258,** 506
Lymphocytes
  activation, tracing and subgrouping by dynamic fluorescence intensity and polarization measurements (human), **261,** 712
  Apaf-1 forms, identification (human), **261,** 746
  glucocorticoid receptor isoform expression in cells from patient with systemic glucocorticoid resistance and chronic lymphocytic leukemia, **254,** 559
  HIV-1 infection of peripheral blood cells, role of pertussis toxin-sensitive G protein-coupled signaling and mediation of cAMP downregulation (human), **256,** 429
  and monocytes, from peripheral blood, cell-specific differences in PMA regulation of IL-6 expression (human), **260,** 577
  and neurons, soluble guanylate cyclase activation in, impairment by chronic hyperammonemia (rat), **257,** 405
  plasmalemmal cholesterol, crosslinking, induction of capping, membrane shedding, and endocytosis through coated pits (mouse), **260,** 516
  splenic
    binding and processing of ^{125}I-labeled ACTH by isolated cells (rat), **266,** 542
    CD4$^+$ and CD8$^+$, increase by *Staphylococcus aureus* protein A, **256,** 142
    proliferation or apoptosis, dose-dependent induction by bacterial protein A (mouse), **260,** 105
    proliferation in response to minimized Fc-binding peptide from protein A (mouse), **258,** 141
Lymphohematopoietic stromal cells
  selective granzyme D expression and function in, analysis (mouse), **264,** 768
Lymphoid cells
  B- and T-lineage, tyrosine phosphorylation in, role of reactive oxygen species produced by NADPH oxidase (human), **255,** 262
Lymphokine-activated killer cells
  toxicity against human bile duct carcinoma cells, enhancement by SEA-scFv bifunctional antibody, **256,** 223; *erratum,* **259,** 230
Lymphoma cells
  Apaf-1 forms, identification (human), **261,** 746
  photodynamic therapy-induced apoptosis, role of cytochrome *c* leakage (mouse L5178Y-R cells), **255,** 673
Lymphomagenesis
  cooperativity of mutations in *p53* and *scid* genes in doubly heterozygous mice, **255,** 99
Lyn
  selective association with integrin-rich actin cytoskeleton of activated nonaggregated platelets, **260,** 790
Lysine
  carboxymethylation, protein aging by, generation of sites for divalent metal and redox active copper binding, **260,** 332
  conversion to N^{ϵ}-(carboxymethyl)lysine, increased susceptibility of proteins to metal-catalyzed oxidation due to, **264,** 207
Lysophosphatidic acid receptor
  activation of G$_{i1}$ without ligand in baculovirus expression system, **259,** 78
Lysophospholipase
  lecithin–cholesterol acyltransferase-related, cloning and expression (human), **257,** 50
Lysosomal targeting motif
  LI-motif, *in vitro* binding by adaptor protein complex, **255,** 54
Lysozyme
  association with nucleic acids, **266,** 366
  induction of fusion of phospholipid vesicles of heterogeneous sizes, **262,** 586
  interaction with human tear lipocalin, **265,** 322
Lysyl pyridinoline
  crosslinking of elastin-like protein matrix of lamprey branchial cartilage, **261,** 635

M

Macrocyclic nonaketide
  LL-Z1640-2, radicicol-related, inhibition of JNK/p38 pathways in signal-specific manner, **257,** 19
α_2-Macroglobulin
  DNA polymorphism, association with late-onset Alzheimer's disease, **264,** 48
Macrophage colony-stimulating factor
  hematopoietic cell cultures stimulated by, osteoclast differentiation in, enhancement by TGF-β, **265,** 233
Macrophage inflammatory protein-1α
  expression and function, regulation by IL-10 in murine model of acute inflammation, **255,** 279
  regulation of preosteoclast differentiation *in vitro* (pig), **254,** 773
  secretion, role of T-cell lymphotrophic virus type-I *tax* gene (human), **262,** 429
Macrophage inflammatory protein-3β
  recombinant, high-affinity binding by CCR-7 stably expressed in HEK-293 cells, stimulation of multiple signaling cascades, **263,** 685
Macrophage migration inhibitory factor
  high expression in melanoma cells and role in tumor cell growth and angiogenesis (human), **264,** 751
Macrophages
  activated, negative regulation of transgene expression driven by retroviral LTR (rat), **257,** 74
  alveolar, murine MH-S cell line, bradykinin B$_1$ receptor gene expression, effect of IL-1β, **259,** 476
  annexin IV truncated form, cloning and functional activity (mouse), **258,** 162

Macrophages (*continued*)
  CD11a mRNA and protein induction by IFN-γ, LPS and TNF-α, role of Na^+/H^+ exchange and PKC (mouse), **257,** 635
  Cla-1 expression, inhibition by lipopolysaccharide (human), **262,** 251
  free radicals generated in cultures of, photodynamic effects on, quantitative aspects (mouse), **255,** 360
  hepatic, osteopontin expression after CCl_4 intoxication (rat), **256,** 527
  Histoplasma capsulatum infection, associated fungal expression of human 100-kDa protein homologue (mouse), **254,** 605
  HL-60 cell differentiation to, arrest by Wilms' tumor gene product WT1 through the zinc-finger domain, **254,** 192
  human ATP-binding cassette transporter 1 expression, sterol-dependent regulation, **257,** 29
  identification as source of platelet-activating factor acetylhydrolase in plasma (human), **261,** 511
  IL1HY1 gene expression (human), **263,** 702
  MHC class I epitope stability in cytosol, effect of thimet oligopeptidase, **255,** 596
  peritoneal
    activation, induction of leukotriene B_4 receptor (rat), **262,** 806
    proteoglycan synthesis *in vitro,* modulation by serum amyloid A (mouse), **261,** 298
  PU.1 binding, enhancement by protein kinase C activation (mouse), **254,** 211
  respiratory burst, induction by oxidized LDL via its protein moiety (human), **263,** 804
  stimulation by mucins through macrophage scavenger receptor (THP-1 cells), **264,** 276
Macrophage scavenger receptor
  macrophage stimulation by mucins via, **264,** 276
Macrophin
  molecular cloning: human homologue of *Drosophila* kakapo with close structural similarity to plectin and dystrophin, **264,** 568
MAD1
  phosphorylation by BUB1 kinase *in vitro* (human), **257,** 589
MafF
  human homologue specifically binding to oxytocin receptor gene in term myometrium, molecular cloning, **264,** 86
Maghematite
  nanoparticles, with coupled annexin V, in detection of phosphatidylserine surface exposure on human erythrocytes, **258,** 199
Magnesium
  binding by hammerhead ribozyme, effect of functional group substitution at position 2.1, **262,** 461
  DIDS-sensitive anion-dependent efflux pathway in rat ventricular myocytes, **264,** 334
Magnetic field, *see* Electromagnetic field
Magnetic resonance imaging
  contrast agents, hepatic uptake, molecular mechanisms (rat), **257,** 746
Magnetic stimulation
  repetitive pulsed, effects on cell proliferation and HSP70 expression in normal and malignant human cells, **261,** 689
Maillard reaction
  advanced, intermediates in, *in vivo* determination (human), **256,** 89
Major histocompatibility complex
  MHC class I antigen
    chaperone association and intracellular transport, effect of N-glycan chain length, **262,** 473
    epitope stability in macrophage cytosol, effect of thimet oligopeptidase, **255,** 596
    molecular analyses of alleles: implications for evolutional mechanisms of HLA-A, -B, -C loci (chimpanzee), **261,** 46
  presentation, role of thimet oligopeptidase, **255,** 591
  MHC class II antigen, reaction with SEA-scFv bifunctional antibody, **256,** 223; *erratum,* **259,** 230
MAK
  biochemical properties and physiological functions, **266,** 291
MAK-related kinase
  biochemical properties and physiological functions, **266,** 291
MAL
  incorporation into artificial membranes, lipid requirements for, **266,** 330
  intracellular distribution and incorporation into GEMs, role of last two C-terminal serines, **260,** 188
  targeting to glycolipid-enriched membranes, requirement of pre-Golgi sorting event for, **254,** 689
Male germ cell-associated kinase
  biochemical properties and physiological functions, **266,** 291
Malic dehydrogenase
  in reversed micelles, regulation by pressure application, **254,** 685
Malignant glioma cells
  cell cycle progression and chemosensitivity, modulation by p27 (human), **261,** 890
Malignant transformation
  associated changes in glycosylation, role of β-1,4-galactosyltransferase V, **265,** 434
Malonyl CoA
  complete inhibition of carnitine palmitoyltransferase I by, in confirmation of intactness of liver mitochondria (rat), **258,** 778
Mammary carcinoma cells
  HSF-1-mediated stress response to chemical stressors, temperature dependence (FM3A cells), **265,** 763
Mammary epithelial cells
  death, inhibition by cooked meat-derived 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (human), **266,** 203
  ductal morphogenesis and basement membrane deposition, modulation by chromogranin A (TAC2 cells), **259,** 563
  G_0 growth-arrested, transcriptional regulation of C/EBPδ in, analysis (mouse), **262,** 696
Mammary gland
  alveolar structures, development in whole-organ culture, effect of estrogen (mouse), **232,** 340; *corrigendum,* **257,** 249
  involution, associated induction of Ca^{2+}-sensitive chloride channel 2 gene (mouse), **264,** 933
  lactation-dependent expression of MFG-E8 mRNA splice variant with exon for multiply O-glycosylated domain (mouse), **254,** 522
  species-specific alternative splicing of transgenic RNA (mouse, pig, rabbit), **257,** 843
Mammary tumor cells
  mitochondrial content, relationship to δ-aminolevulinic acid-induced protoporphyrin IX levels *in vitro* (EMT-6, R3230AC cells), **265,** 315
Mammary tumors
  oncogene isolation from, by retrovirus expression cloning system (rat), **265,** 7
Manganese
  effect on production of *Bacillus subtilis* IFO 3336 poly-γ-glutamate in *E. coli,* **263,** 6
  essential role in catalytic activity of *E. coli* agmatinase, **258,** 808
Manganese dipyridoxyl diphosphate
  antioxidative and cardioprotective properties, assessment *in vitro* and in *ex vivo* rat model, **254,** 768
Manganese peroxidase
  lipid peroxidation mediated by, coupling with destruction of nonphenolic lignin model compounds and ^{14}C-labeled lignins (white-rot fungus), **259,** 212
  veratryl alcohol oxidase activity addition by site-directed mutagenesis, **256,** 500

Mannan-binding lectin
  MVL, isolation and characterization (*Microcystis viridis*), **265,** 703
Mannan-binding proteins
  metabolic properties in mouse plasma, **256,** 231
Mannose-rich media
  mammalian cells cultured in, elevated expression of free deaminoneuraminic acid (COS-7 cells), **261,** 326
Manumycin A
  inhibition of vascular smooth muscle cell proliferation and migration (rat), **264,** 915
map1 gene
  Cowdria ruminantium: member of multigene family with conserved and variable genes, **257,** 300
MAP30
  proteolytic fragments, anti-HIV and anti-tumor activity, **262,** 615
MAP kinase, *see also specific MAP kinases*
  activation, role of silica-induced generation of reactive oxygen species in Rat2 fibroblasts, **262,** 708
  c-*fos* mRNA induction in human cells by hemin independent of, **260,** 289
  dependent Elk-1 transactivation and DNA synthesis, induced by EGF in mesangial cells, inhibition by BMP-2, **258,** 490
  effect on peroxynitrite-induced apoptosis in dopaminergic neuroblastoma SH-SY5Y cells (human), **263,** 504
  family members, activation by pulsatile stretch in cultured rat cardiac myocytes, **259,** 8
  G protein-mediated activation by dopamine D2 receptors, **256,** 33
  inactivation by mammalian tyrosine-specific phosphatase PTPBR7, **256,** 52
  modulation by silymarin (human), **263,** 528
  pathway, role in attenuation of haptoglobin gene expression by TGF-β (rat IEC-6 cells), **259,** 544
  phosphatidylinositol 3-kinase-dependent activation via p21ras in endothelial cells exposed to cyclic strain, **257,** 668
  related kinases, biochemical properties and physiological functions, **266,** 291
  role in stimulation of phospholipase D by fMet-Leu-Phe in human neutrophils, **264,** 371
  signaling in solid tumor cells, role in upregulation of telomerase activity by hypoxia (human), **260,** 365
  stimulation by vascular endothelial growth factor, mechanism (human), **255,** 545
MAP kinase inhibitor
  MEK1 inhibitor PD98059, nonspecific inhibition of myogenic tone in rat middle cerebral arteries, **257,** 523
MAP kinase kinase
  c-Raf/MEK/ERK pathway, requirement for serum induction of collagen X promoter (MCT cells), **262,** 50
  growth factor-induced upregulation of P2Y$_2$ receptors dependent on, in rat VSMC, **258,** 648
  inhibition, role in osmotically induced aldose reductase expression in rat VSMC, **255,** 12
  inhibitor PD98059, induction of apoptosis in human luteinized granulosa cells, **263,** 143
  signaling via, in regulation of immediate early gene expression in preadipocytes (3T3-L1 cells), **265,** 664
MARCKS
  identified by mAb generated against chick embryo neural retina, characterization, **257,** 480
Mass spectrometry
  determination of N-terminal modification of His-tagged proteins expressed in bacteria, **259,** 271
  ESI-Qq-oa-TOF MS, identification of tachykinin from midgut of *Schistocerca gregaria,* **266,** 237
  hemocyanin from *Limulus polyphemus,* **264,** 883
  sodium binding properties of cyclopentapeptide endothelin A selective receptor antagonists, **254,** 713
Mast cells
  chemotaxis, induction by serum amyloid A via activation of pertussis toxin-sensitive signal transduction pathway (human), **254,** 143
  histamine release, modulation by HCO$_3^-$, mechanisms (rat), **260,** 71
  histamine and sulfidoleukotriene release *in vitro,* and Ca^{2+} and PKC signaling (human), **257,** 895; *erratum,* **259,** 503
  5-lipoxygenase upregulation by dexamethasone (human), **265,** 617
  prostaglandin synthesis, immediate and delayed phases, roles of COX-1 and COX-2 (mouse), **265,** 205
  type I hypersensitivity reactions mediated by, JAK-3 role (mouse), **257,** 807
Matrix
  EHS-gel overlay effects on hepatocyte HNF-4α isoforms and ARP-1 expression and DNA-binding activity (rat), **259,** 651
Matrix-assisted laser desorption/ionization mass spectrometry
  analysis of human sperm antigen gp20: homologue of leukocyte CD52, **258,** 639
Matrix-associated serine protease inhibitor
  role in activation of ProMMP-1 and ProMMP-3, **255,** 94; *erratum,* **258,** 497
Matrix metalloproteinase-1
  upregulation in rabbit dermal fibroblasts, role of NF-κB activity, **264,** 561
Matrix metalloproteinase-2
  basal promoter activity, enhancement by synergistic action of retinoic acid and cAMP, **258,** 663
  effect of homocysteine, **263,** 498
Matrix metalloproteinase-3
  genetic analysis in Finnish patients with abdominal aortic or intracranial aneurysms, **265,** 563
  upregulation in rabbit dermal fibroblasts, role of NF-κB activity, **264,** 561
Matrix metalloproteinase-9
  genetic analysis in Finnish patients with abdominal aortic or intracranial aneurysms, **265,** 563
  role in ceramide-mediated inhibition of human keratinocyte growth, **260,** 634
Matrix metalloproteinase-13
  expression in human abdominal aortic aneurysms and VSMC in culture, **261,** 904
Matrix metalloproteinases
  impaired production coincident with decreased contraction of glycated collagen lattices (human fibroblasts), **264,** 488
  and lysosomal cysteine proteinases, in osteoclasts, role in bone resorption: modes of action (rabbit), **258,** 173
  membrane type-1
    production in fibrosarcoma HT-1080 cells, suppression by heat shock: effect on cell invasiveness, **265,** 189
    substrate sequences for, identification with bacteriophage peptide display library, **266,** 308
Maturation
  effect on capacity of low-calcium diet to induce renal vitamin D 1a-hydroxylase (rat), **255,** 731
  oocytes, 1-methyladenine inducing, regulation of 26S proteasome assembly in starfish oocytes, **254,** 338
MBD2
  mRNA expression, reduction in colorectal and stomach cancers (human), **264,** 962
MBP-1
  physical association with histone deacetylase for transcriptional repression, **260,** 405
MC1288
  binding by human vitamin D$_3$ receptor, role of putative helices 4 and 5 of VDR, **264,** 478

MCP-3
  genomic organization, sequence analysis, and transcriptional regulation in dermal fibroblasts (human), **255,** 470
MCP-4
  genomic organization, sequence analysis, and transcriptional regulation in dermal fibroblasts (human), **255,** 470
MD-1
  human homologue, as BCG-regulated gene product in monocytes, **256,** 325
MDM2
  cells overexpressing, activation of p53 through phosphorylation (BL2 cells), **264,** 860
  gene amplification in mediastinum fibrosarcoma, detection by arbitrarily primed PCR fingerprinting, **258,** 271
mdm2
  and p53, cellular levels, effect of arsenic, **263,** 446
MDMA, *see* 3,4-Methylenedioxymethamphetamine
Measles virus
  interaction with CD46, **264,** 268
Mechanical strain
  effect on PDGF-B and PDGF β receptor expression in vascular smooth muscle cells (rat aorta), **265,** 606
Mechanical stretch
  intracellular calcium transients activated by, regulation by actin filaments (human), **261,** 419
  and parathyroid hormone, synergistic effect on alveolar osteocytes (human), **264,** 719
  pulsatile, stimulation of vascular endothelial growth factor secretion by cultured rat cardiac myocytes, **254,** 462
  regulation of transients in cytoplasmic free Ca^{2+} in human osteoblast-like cells, **263,** 206
  trabecular cells of the eye, induced expression of oculomedin gene (human), **259,** 349
Med8
  direct binding to regulatory elements of *SUC2* and *HXK2* genes (*Saccharomyces cerevisiae*), **254,** 345
Mediastinum fibrosarcoma
  MDM2 gene amplification in, detection by arbitrarily primed PCR fingerprinting (human), **258,** 271
Medullo-thyroid carcinoma cells
  rMTC 6-23, targeting and activation of PC2 into regulated secretory pathway of, role of protein 7B2, **257,** 473
MEF2
  Myf5 recruitment mediated by, transcriptional activation of myogenin gene, inhibition by adenovirus E1A protein, **265,** 222
Megakaryocytes
  Mpl ligand-induced differentiation, $TAF_{II}32$ isoform repression as part of program of genes regulated during, **262,** 55
  SCF/KL-activated Lyn kinase activity, downregulation by CHK (Mo7e cells), **259,** 611
Megakaryocyte stimulating factor
  precursor, homology with articular cartilage superficial zone protein, **254,** 535
MEK1 inhibitor
  PD98059, nonspecific inhibition of myogenic tone in rat middle cerebral arteries, **257,** 523
Melanin-concentrating hormone
  isolation and identification as endogenous ligand of SLC-1 receptor (rat), **261,** 622
Melanocortin-1 receptor
  gene promoter region, characterization (human), **262,** 452
  loss-of-function mutations, frequency and association with red hair (human), **260,** 488
Melanocortin-3 receptor
  selectivity of N-terminally modified analogs of MTII (human), **261,** 209
Melanocortin-4 receptor
  ligands, hypothalamic levels in dietary-obese and food-restricted rats: α-MSH, AGRP, POMC, **258,** 574
  mediation of leptin stimulation of LH and prolactin surges in steroid-primed ovariectomized rats, **257,** 860
  selectivity of N-terminally modified analogs of MTII (human), **261,** 209
Melanocortin-5 receptor
  selectivity of N-terminally modified analogs of MTII (human), **261,** 209
Melanocytes
  differentiation marker TRP-1 expression, regulatory role of microphthalmia transcription factor (human), **256,** 657
  epidermal, melanogenesis, role of L-phenylalanine transport and autocrine turnover to L-tyrosine (human), **262,** 423
α-Melanocyte-stimulating hormone
  and agouti-related protein and pro-opiomelanocortin, hypothalamic levels in dietary-obese and food-restricted rats, **258,** 574
α-Melanocyte-stimulating hormone peptides
  inhibition of NO and TNF-α production by microglial cells activated with β-amyloid and IFN-γ, **263,** 251
Melanogenesis
  role of L-phenylalanine transport and autocrine turnover to L-tyrosine (human), **262,** 423
Melanoma cells
  B16-BL6, lung metastasis, effect of laminin peptide YIGSR
    after bioconjugation with poly(styrene co-maleic acid), **255,** 75
    after bioconjugation with polyvinyl pyrrolidone (mouse), **264,** 763
  cultured in mannose-rich media, elevated expression of free deaminoneuraminic acid (B16 cells), **261,** 326
  macrophage migration inhibitory factor overexpression, role in cell growth and angiogenesis (human), **264,** 751
  proliferation, inhibition by IFN-α via interference with bFGF autocrine growth circuit (B16 cells), **262,** 838
  retinoic acid-resistant, growth and apoptosis, effects of 4-hydroxyphenylretinamide (HT-144 cells), **254,** 636
MELAS
  diabetic subjects with, evaluation of pancreas from, **259,** 149
Melatonin
  deactivation of hypochlorous acid, rate of, factors affecting, **257,** 431
  synthesis, rate-limiting enzyme arylalkylamine *N*-acetyltransferase for, expression
    in retinal photoreceptor cells (rat), **248,** 115; *erratum,* **261,** 546
    in suprachiasmatic nucleus (rat brain), **258,** 772; *erratum,* **261,** 546
Melatonin 1a receptor
  allelic variants, function and prevalence in subjects with circadian rhythm sleep disorders, **262,** 832
Melphalan
  sensitivity of human colon cancer cells to, effect of GRP78 overexpression, **257,** 361
Membrane anchoring
  steroid 21-hydroxylase, effects of missense mutations and deletions (human), **257,** 384
Membrane conductance
  mesangial cells from stroke-prone spontaneously hypertensive and WKY rats, effects of cytosolic Ca^{2+}, **256,** 273
Membrane potential
  mitochondrial, *see* Mitochondrial membrane potential
Membrane proteins
  erythrocyte, modification by AGEs during aging in circulation (human), **258,** 123
  Hg^{2+}-binding MerC, functional roles of Cys-22, Cys-25, Cys-127, and Cys-132 residues, **255,** 307

Membranes
  antioxidant effects of immediate and long-term estradiol treatment of MCF-7 breast cancer cells, **260,** 410
  artificial, MAL incorporation into, lipid requirements for, **266,** 330
  brain, nociceptin binding sites (*Rana esculenta*), **260,** 592
  cellular, conformation of CD4 anchored in, changes induced by soluble recombinant HIV envelope glycoprotein gp120, **265,** 428
  compensatory retrieval, role of actin, **266,** 652
  glycolipid-enriched, *see* Glycolipid-enriched membranes
  gp41-mediated fusion, block by gp41-derived peptides, **265,** 625
  helix bundles spanning, surface roughness, comparison to water-soluble helix bundles, **263,** 714
  inner mitochondrial, in human glioma cell line, Ca^{2+}-activated K channel of BK-type, **257,** 549
  intracellular, in 3T3-L1 adipocytes, phospholipase D isoform PLD2a localization, **254,** 734
  lipid peroxidation induced by H$_2$O$_2$, attenuation by constitutive hsp70 (H9c2 cells), **265,** 279
  nuclear, sphingomyelin–cholesterol changes in liver after hepatectomy (rat), **262,** 692
  platelet surface, isolated, effects on DNA synthesis and proliferation of bovine coronary artery SMC, **259,** 341
  Pseudomonas aeruginosa outer membrane, permeability barrier, interplay with efflux pumps in fluorescent dye accumulation, **261,** 452
  synaptic, RalA dissociation from, induction by Ca^{2+}/calmodulin (rat), **263,** 765
  synthetic phytanyl-chained glycolipid vesicles, as matrix for functional reconstitution of cyanobacterial photosystem II complex, **265,** 734
  xenomembrane, human factor H and I function on, **265,** 556
Membrane shedding
  induction by crosslinking of plasmalemmal cholesterol in lymphocytes (mouse), **260,** 516
Membrane voltage
  mesangial cells from stroke-prone spontaneously hypertensive and WKY rats, effects of cytosolic Ca^{2+}, **256,** 273
Memory
  role of deubiquitinating enzymes, **266,** 633
Memory T cells
  allergen-specific, telomerase activation induced by natural antigen in bronchial asthma (human), **259,** 617
MEN1
  ortholog in zebrafish, characterization, **264,** 404
Menadione
  induced necrosis, and CD95-induced apoptosis, comparison in HepG2 cells, **255,** 6
Meningioma
  pathogenesis, noninvolvement of *SMARCB1* gene, **257,** 886
Menkes protein
  role in copper homeostasis, **261,** 225
MEP1A gene
  related sequences, identification and localization in human genome, **261,** 163
MerC
  binding of Hg^{2+}, functional roles of Cys-22, Cys-25, Cys-127, and Cys-132 residues, **255,** 307
Mercury
  Hg^{2+}, binding by MerC, roles of Cys-22, Cys-25, Cys-127, and Cys-132 residues, **255,** 307
Mersalyl
  modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
Mesangial cells
  advanced glycation end product-induced PPARγ gene expression (rat), **264,** 441
  angiotensin II-induced p44/42 MAP kinase activity, inhibitory effect of focal adhesion, mediation by integrins (human), **261,** 820
  angiotensin II signal transduction pathways, role of focal adhesion and GTPase activating proteins (human), **257,** 234
  EGF-induced MAP kinase-dependent Elk-1 transactivation and DNA synthesis, inhibition by BMP-2 (rat), **258,** 490
  from stroke-prone spontaneously hypertensive and WKY rats, membrane voltage and conductance, effects of cytosolic Ca^{2+}, **256,** 273
  survival, control by extracellular signal-regulated kinase (rat), **264,** 696
Mesenchyme
  embyronic lung, tenascin expression (rat), **263,** 597
  stem cells, monoclonal antibody SH-2 raised against, recognition of epitope on endoglin (human), **265,** 134
Mesoderm
  somitic, hesr-1 expression (mouse), **260,** 459
Mesothelioma cells
  mitochondrial content, relationship to δ-aminolevulinic acid-induced protoporphyrin IX levels *in vitro* (H-MesO-1 cells), **265,** 315
Messenger RNA
  cytokine, RNA recognition motifs of human neuronal ELAV-like proteins involved in binding to, **256,** 263
  dodecamer sequence, binding protein, purification and characterization from yeast mitochondria, **261,** 740
  effect on GLUT1 gene expression, **263,** 265
  expression, effect of dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
  stability
    effect of AU-rich 3′ untranslated region of human MDR1 mRNA, **261,** 627
    farnesyltransferase gene mRNA, effects of insulin, **254,** 243
    role of overlap of CHOP/GADD153 and methionyl-tRNA synthetase genes (human), **262,** 31
  synthesis in yeast, activator-specific requirement for general transcription factor IIE, **261,** 734
  transgenic, species-specific alternatively spliced, in mammary glands of pigs, rabbits, and mice, **257,** 843
Meta-cleavage operons
  conserved and hybrid, sequence and gene order in PAH-degrading *Burkholderia* RP007, **262,** 308
Metal-catalyzed oxidation
  susceptibility of proteins to, increase due to conversion of lysine to N^{ϵ}-(carboxymethyl)lysine, **264,** 207
Metal cofactor
  absence in orotidine 5′-monophosphate decarboxylase, **259,** 133
Metallocarboxypeptidase Z
  purification and characterization (human), **256,** 564
Metalloendopeptidases
  class located in basidiomycetes, *Armillaria mellea* lysine-specific proteinase as member of, **262,** 60
Metalloenzyme
  identification of carboxyl methyltransferase modifying G proteins as, **261,** 790
Metalloproteinase-disintegrins
  cDNAs with testis-specific gene expression, isolation (human), **263,** 810
Metallothionein
  MT-I and -II genes, transcriptional induction in livers of Cu,Zn-superoxide dismutase knockout mice, **264,** 735
Metal transport
  cobalt ion unidirectional transport from apical to basolateral compartment in polarized MDCK cells, **257,** 289
Metastasis
  osteosarcoma undergoing, differentially expressed genes in, cloning by modified cDNA-AFLP method (rat), **261,** 35

Metastasis (*continued*)
  pancreatic adenocarcinoma cell lines with high potential for, expression of high levels of ezrin (human), **258,** 395
  pulmonary, B16-BL6 melanoma cells, effect of laminin peptide YIGSR
    after bioconjugation with poly(styrene co-maleic acid) (mouse), **255,** 75
    after bioconjugation with polyvinyl pyrrolidone (mouse), **264,** 763
  RECK gene suppressing, *ras*-mediated downregulation, role of Sp1 site (mouse), **264,** 668
Methionine
  residues in prion proteins, selective oxidation, **259,** 352
Methionine synthase
  mammalian, posttranscriptional regulation by B_{12}, **259,** 436
Methionyl-tRNA synthetase
  and CHOP/GADD153, gene overlap in conserved region controlling mRNA stability (human), **262,** 31
2-Methoxyestradiol
  inhibition of TNF-α-stimulated aromatase (human), **261,** 214
1-Methyladenine
  regulation of 26S proteasome assembly in starfish oocytes, **254,** 338
N-Methyl-D-aspartate
  cerebellar granule cells stimulated with, reactive oxygen species production, **256,** 320
  responses in cultured human astrocytes, enhancement by store Ca^{2+} depletion, **259,** 661
Methylation
  abnormal patterns in global DNA and within CpG islands, detection, **262,** 624
  *Bss*HII sites in rat CCK_A receptor gene promoter, tissue specificity and postnatal development and, **264,** 29
  DNA, analysis with bisulfite treatment and PCR–SSCP in colorectal cancer with microsatellite instability (human), **262,** 671
  hypermethylation, association with IL-6 gene repression (human breast cancer cells), **258,** 644
  polypeptides *in vitro* by type I protein-arginine *N*-methyltransferases, effects of RNase treatment of yeast and mammalian cell extracts, **259,** 391
Methylbenzoquinone
  oxidative damage of DNA potentially leading to carcinogenesis and reproductive dysfunction (human), **261,** 478
6-Methyl-3′-bromoflavone
  high-affinity binding to benzodiazepine binding site of $GABA_A$ receptor and antagonism of diazepam effects (mouse), **262,** 643
5-Methylcytosine
  in CpG sites, relationship to reactivity of nearest neighboring guanines toward aflatoxin B_1-8,9-epoxide, **254,** 114
3,4-Methylenedioxymethamphetamine
  effect on type I collagen mRNA levels of hepatic stellate cell line, **259,** 678
Methylglyoxal
  increase in human uremic plasma, *in vivo* determination, **256,** 89
Methylhydroquinone
  oxidative damage of DNA potentially leading to carcinogenesis and reproductive dysfunction (human), **261,** 478
N-Methyl-*N*′-nitro-*N*-nitrosoguanidine
  hamster cells treated with, overexpressing dominant negative mutant of poly(ADP-ribose) polymerase, NAD^+ consumption in, **265,** 525
Methyl palmoxirate
  effect on UCP3 expression in fasted and refed mice, **258,** 464
1-Methyl-4-phenylpyridinium
  induced apoptosis, glucose protection from, role of mitochondrial membrane potential and ATP synthase (PC12 cells), **257,** 440
Metoprolol
  effects on mitochondrial DNA alterations in Adriamycin-induced cardiotoxicity (rat), **254,** 651
MFG-E8
  mRNA splice variant with exon for multiply O-glycosylated domain, lactation-dependent expression (mouse), **254,** 522
MG132
  effects on HSF1 activation upon heat shock and during post-heat-shock recovery (murine embryonic fibroblasts), **264,** 352
  hyperphosphorylation of HSF1 and induction of hsp70 and hsp27 expression, **254,** 264
Micelles
  reversed, malic dehydrogenase in, regulation by pressure application, **254,** 685
Microcystis aeruginosa K-81
  psbA gene, light-dependent and rhythmic transcripts in homologous/heterologous cyanobacterial cells, **255,** 47
Microcystis viridis
  mannan-binding lectin MVL isolation and characterization, **265,** 703
Microglia
  activated with β-amyloid and IFN-γ, production of NO and TNF-α, inhibition by α-MSH peptides (murine N9 cells), **263,** 251
Microphthalmia-associated transcription factor
  interaction with PU.1 and c-Fos and effect on subcellular localization, **254,** 384
  role in regulation of melanocyte differentiation marker TRP-1 (human), **256,** 657
Microsatellite instability
  colorectal cancer with, DNA methylation in, analysis by bisulfite treatment and PCR–SSCP (human), **262,** 671
Microsatellites
  transcribed dinucleotide, and associated genes, mapping (channel catfish), **259,** 190
Microsensors
  detection of multiple patterns of oscillatory oxygen consumption in single mouse pancreatic islets, **259,** 331
  direct measurement of nitric oxide production by osteoclasts, **259,** 73; *erratum,* **265,** 770
Microsomes
  cytochrome P450 2B4, electron donor function of mitochondrial adrenodoxin toward, analysis (rabbit liver), **254,** 83
  hepatic, cleavage enzymes for sterol regulatory element binding protein (hamster), **258,** 542
  intestinal, cytochrome P450 3A isozyme detection (rat), **255,** 394
Microtubules
  assembly, and glucose metabolism, enhancement in neuronal systems *in vitro,* and decreased sensitivity to copper toxicity, **264,** 605
  assembly and stability, promotion by Ncd tail domain, **258,** 39
  damage, Bcl-2 phosphorylation and proteasome-dependent degradation in mitotic-arrested cells after, analysis (NIH-OVCAR-3 cells), **262,** 823
  destabilization by pyruvate kinase *in vitro* (bovine brain), **254,** 430
  role in bistratene A-induced block in HL-60 cell cytokinesis, **260,** 80
  self-organization in egg extracts, induction by Ran GTPase (*Xenopus laevis*), **262,** 571
MIDA1
  DNA binding activities, conversion by association with Id1, **266,** 147
Middle cerebral artery
  myogenic tone, nonspecific inhibition by MEK1 inhibitor PD98059 (rat), **257,** 523
Midgut
  tachykinin from, identification by ESI-Qq-oa-TOF mass spectrometry (*Schistocerca gregaria*), **266,** 237
Milk
  angiogenin-1 and lactogenin isolation and characterization (bovine), **263,** 187

  - HMG-like protein in, stimulation of proliferation of osteoblastic MC3T3-E1 cells (bovine), **261,** 113
  - human, genotoxicity of extracts and detection of DNA damage in exfoliated cells from breast milk, **257,** 319; *erratum,* **259,** 494
- Milk fat globule glycoprotein
  - MFG-E8, mRNA splice variant with exon for multiply O-glycosylated domain, lactation-dependent expression (mouse), **254,** 522
- Mineralocorticoid/glucocorticoid response element
  - identification in Na/K ATPase α1 gene promoter (human), **266,** 5
- Mineralocorticoid receptor
  - rapid nongenomic effects of aldosterone in absence of, analysis in knockout mouse, **266,** 257
- Minisatellite
  - hypervariable, Pc-1, intramolecular quadruplex formation of G-rich strand (mouse), **264,** 327
- Minithioredoxin
  - folded and functional peptide fragment of thioredoxin, **261,** 676
- Minocycline
  - effects on Na$^+$/K$^+$ pump activity in Calu-3 human airway cells, **260,** 13
- Mistletoe lectin I
  - *Viscum album,* crystal structure, **257,** 418
- Mitochondria
  - ADP/ATP carrier, tandem-repeated homodimer of, functional expression in *Saccharomyces cerevisiae,* **262,** 726
  - adrenodoxin, electron donor function toward hepatic microsomal cytochrome P450 2B4 (rabbit), **254,** 83
  - cardiac, isolated, origin of guanine nucleotides (rat), **257,** 466
  - confirmation of intactness, and carnitine palmitoyltransferase I activity totally inhibited by malonyl CoA (rat liver), **258,** 778
  - content in neoplastic cells, relationship to δ-aminolevulinic acid-induced protoporphyrin IX levels *in vitro,* **265,** 315
  - cytochrome *c*-mediated extramitochondrial NADH oxidation, modulation by contact site density, **259,** 325
  - depolarization, caspase activation after, prevention by 4b,5,9b,10-tetrahydroindeno[1,2-*b*]indole: inhibition of apoptosis (Jurkat cells), **264,** 622
  - detection of separate transhydrogenase activities in plants, **265,** 106
  - dysfunction mediated by paclitaxel, resistance of human leukemia cells to, increase due to loss of Bcl-2 phosphorylation loop domain, **259,** 67
  - fatty acid oxidation, role of acetyl-CoA carboxylase β (H9c2 cells), **254,** 657
  - F$_0$F$_1$-ATPase, inhibition by piceatannol via targeting of F$_1$ complex (rat brain), **261,** 499
  - functional inhibition in HL-60 cells, role of apoptosis and CD14 expression, **263,** 294
  - hepatic, truncated form of CYP27A purified from, biochemical characterization (rabbit), **263,** 663
  - IgG-induced changes in, association with lymphoblastoid cell apoptosis induced by IgG (human), **264,** 896
  - inner membrane, in human glioma cell line, Ca^{2+}-activated K channel of BK-type, **257,** 549
  - interaction with C-terminus of bax: evaluation as membrane addressing/anchoring signal, **260,** 582
  - membrane potential, *see* Mitochondrial membrane potential
  - with mtDNA mutations, differentiation of myoblasts repopulated with, long-term analysis (human), **266,** 179
  - permeability transition, potentiation by chronic ethanol treatment (rat), **265,** 405
  - plant, promoter sequences, compilation and analysis: divergent evolution of monocot and dicot mitochondria, **256,** 409
  - RNA dodecamer sequence binding protein, purification and characterization (*Saccharomyces cerevisiae*), **261,** 740
  - small subunit ribosomal protein S7, identification (bovine), **266,** 141
  - sulfonylurea receptor, modification by thiol reagents (bovine), **262,** 255
  - superoxide radical production, detection with chemiluminescent probe lucigenin (human), **262,** 80
  - yeast, prokaryotic iron superoxide dismutase location in, role in protective effect against oxidative stress, **256,** 63
- Mitochondrial biogenesis genes
  - upregulation in mtDNA-depleted HeLa cells, role of oxidative stress, **258,** 44
- Mitochondrial DNA
  - alterations in Adriamycin-induced cardiotoxicity, effects of nimesulid and metoprolol (rat), **254,** 651
  - deleted, detection by long-extension PCR, compromise by technical artifacts (human heart), **254,** 507
  - deletions in cardiac tissue, gross mosaic distribution (human), **254,** 152
  - depleted HeLa cells, upregulation of mitochondrial biogenesis genes in, role of oxidative stress, **258,** 44
  - from Huntington's disease patients, cybrid cell lines containing, characterization, **261,** 701
  - mutated, mitochondria harboring, differentiation of myoblasts repopulated with, long-term analysis (human), **266,** 179
  - mutations
    - associated with impaired insulin secretion, evaluation of pancreas from patients with, **259,** 149
    - cosegregation with pathophysiological U wave, **257,** 228
  - in regulation of energy metabolism in human cells in aging and diabetes, **266,** 662
  - R-loop in replication origin, resolution by Holliday junction-specific helicase RecG (human), **255,** 1
- Mitochondrial membrane potential
  - IgG-induced changes in, association with lymphoblastoid cell apoptosis induced by IgG (human), **264,** 896
  - loss after TRAIL-induced Bid cleavage by caspase-8 resulting in apoptosis (BJAB cells), **265,** 130
  - reduction in p53-induced senescence (human), **261,** 123
  - role in glucose protection from MPP$^+$-induced apoptosis (PC12 cells), **257,** 440
  - tributyltin-induced loss, role of calcium (Jurkat cells), **266,** 460
- Mitochondrial processing peptidase
  - multiple-site recognition of precursor proteins, **265,** 611
- Mitochondrial stress assay
  - effect of dielectrophoretic manipulation (BHK21 C-13 cells), **257,** 687
- Mitochondrial targeting sequence
  - manganese superoxide dismutase gene, in German Parkinson disease patients, **255,** 749
- Mitogen-activated protein kinase, *see* MAP kinase
- Mitogenesis
  - EGF-induced, in cultured rat hepatocytes, role of STAT activation, **258,** 565
  - insulin-like growth factor binding protein-6 effects in osteoblastic osteosarcoma Saos-2/B-10 cells, **263,** 786
- Mitomycin C
  - cancer cells treated with, STAT1-independent upregulation of FADD and procaspase-3 and -8 (human), **256,** 603
- Mitosis
  - during early cleavage of *Paracentrotus lividus* embryos, role of constitutive hsp70, **260,** 143
  - entry of HeLa cells into, nucleophosmin/B23 mRNA changes during, **257,** 865
- Mitotic arrest
  - and apoptosis, as independent effects of okadaic acid in K562 leukemia cells, **260,** 256
  - Bcl-2 phosphorylation and proteasome-dependent degradation in, after microtubule damage (NIH-OVCAR-3 cells), **262,** 823

Mitotic extract
  human somatic cells, identification and characterization of nuclear pore subcomplexes, **254,** 417
Mitotic regulator protein
  NIMA, of *Aspergillus nidulans,* related murine STK2 serine/threonine kinase, activity and substrate specificity, **264,** 449
mi transcription factor
  region responsible for synergy with PEBP2/CBF, identification, **261,** 53
MKLP-1
  C-terminal domains, nuclear localization in HeLa and insect cells, **260,** 605
mNSC1
  expression in mammalian cells, **265,** 13
Mn superoxide dismutase
  altered levels in progeria skin fibroblasts, **257,** 163
  gene, mitochondrial targeting sequence and coding region polymorphisms in German Parkinson disease patients, **255,** 749
  gene polymorphisms, association with nonfamilial idiopathic dilated cardiomyopathy in Japanese, **261,** 332
  induction in MRC-5 cells persistently infected with Sindbis virus, **261,** 139
MOK
  biochemical properties and physiological functions, **266,** 291
Molecular carriers
  Fabry disease, detection by fluorescent chemical cleavage of mismatches, **257,** 708
Molecular design
  tumor necrosis factor α conjugated with polyvinyl pyrrolidone, **257,** 448
Molecular mechanics
  and role of Trp-187 in annexin V–membrane interaction, **254,** 484
Molecular structure, *see also* Conformation; Crystal structure; Secondary structure
  ω-conotoxin MVIID in solution, determination by 2D ^{1}H NMR, **254,** 32
  cytochrome P450, **266,** 690
  ervatamin C, **264,** 635
  heregulin-α in solution, **256,** 156
  mistletoe lectin I from *Viscum album,* **257,** 418
  mitochondrial processing peptidase: multiple-site recognition of precursor proteins, **265,** 611
  odorant-binding proteins (*Bombyx mori*), **266,** 386
  papain–CLIK148 complex: analysis of inhibition mechanism of cathepsin L-specific inhibitors, **266,** 411
  pleckstrin homology domain of Tec protein kinases, **265,** 151
  protein structural class determination, key driving force in, **264,** 216
  soybean lipoxygenase, analysis with fluorescein 5′-isothiocyanate, **265,** 489
  3D, hemagglutinin–neuraminidase from Sendai virus, **262,** 401
Molecular switch
  for expansion of genetically modified hematopoietic cells, G-CSF–gyrase B fusion gene as type of, **260,** 9
Moloney murine leukemia virus
  LTR, transgene expression driven by, negative regulation by activated macrophages, **257,** 74
Molybdenum
  and vanadium, supplements in Burk's nitrogen-free growth medium, regulated expression of *nifM* of *Azotobacter vinelandii* in response to, **264,** 186
Mono-ADP-ribosylation
  proteins, by NAD-utilizing human Sir2-like proteins, **260,** 273
Monoblastic leukemia cells
  resistance to paclitaxel-mediated mitochondrial dysfunction and apoptosis, increase due to loss of Bcl-2 phosphorylation loop domain (U937 cells), **259,** 67
Monoclonal antibodies
  for analysis of abnormal prion protein, **265,** 652
  detection of epitopes of murine osteopontin, **257,** 6
  differentiation of desmosome-form and nucleus-form pinin, **263,** 192
  generated against chick embryo neural retina, characterization of MARCKS identified by, **257,** 480
  to murine platelet glycoprotein IIb/IIIa and other proteins, preparation from hamster–mouse interspecies hybridomas, **262,** 167
  SH-2, raised against human mesenchymal stem cells, recognition of epitope on endoglin, **265,** 134
  tumor-tissue endothelium-specific, for tumor vascular targeting (mouse, rat), **260,** 346
Monocyte chemoattractant protein-1
  gene regulatory region, polymorphisms influencing MCP-1 expression (human), **259,** 344
Monocyte-dendritic cells
  thymus and other lymphoid tissues, expression of autoimmune regulator (human), **257,** 821
Monocytes
  adherence to vascular endothelial cells, enhancement by PPARγ agonists via increased ICAM-1 expression (human), **263,** 718
  adipocyte fatty acid binding protein gene induction by PPARγ (human), **261,** 456
  Cla-1 expression, inhibition by lipopolysaccharide (human), **262,** 251
  with engineered human proinsulin cDNA, insulin secretion, effects of differentiation (THP-1 cells), **265,** 361
  ferritin light chain gene expression, regulation by oxidized LDL (THP-1 cells), **265,** 577
  HL-60 cell differentiation to, induction of nuclear translocation of phosphatidylinositol 3-kinase and PI-specific PLC isoforms, **259,** 314
  human MD-1 homologue as BCG-regulated gene product in, **256,** 325
  IL1HY1 gene induction by phorbol ester and lipopolysaccharide in THP-1 cells, **263,** 702
  and lymphocytes, from peripheral blood, cell-specific differences in PMA regulation of IL-6 expression (human), **260,** 577
  NF-κB activation by angiotensin II (human), **257,** 826
  shedding of CD163 by PKC-regulated process after phorbol ester treatment, **256,** 110
Monocytic leukemia cells
  vitamin D_3-differentiated, IL-6 production, induction by S-form LPS (THP-1 cells), **257,** 327
Monolignols
  formation in loblolly pine, multisite modulation of flux during, **261,** 652
Mononuclear cells
  GTP cyclohydrolase I gene expression, in hereditary progressive dystonia with marked diurnal fluctuation, **260,** 747
  peripheral blood, circulating osteoclast precursors, direct action of 1,25-dihydroxyvitamin D_3 and prostaglandin E_2 (human), **264,** 590
Monooxygenase
  cytochrome P4501A1-dependent activity, effect of vitamins A and K (rat), **262,** 565
Monosaccharides
  binding by recombinant soluble CD69 dimer produced in *Escherichia coli,* **266,** 19
  dietary supplements, for treatment of human glycosylation disorders, **255,** 189
Morphogenesis
  ductal, by mammary epithelial cells, alteration by chromogranin A, **259,** 563
Morphological change
  and angiogenesis, in ovary, role of angiogenin (bovine), **257,** 182
  and expression of β-galactosidase activity, senescence-associated, triggering by TGF-β in cancer cells, **255,** 110
Mpl ligand
  megakaryocyte differentiation induced by, TAF$_{II}$32 isoform repression as part of program of genes regulated during, **262,** 55

MPP$^+$, *see* 1-Methyl-4-phenylpyridinium
Mrf-2
  DNA-binding domain, recognition of five-base core sequence through major- and minor-groove contacts, **258,** 326
MRK
  biochemical properties and physiological functions, **266,** 291
mRNA differential display
  detection of genes involved in *Mycobacterium tuberculosis* virulence, **258,** 94
mRNA editing
  apolipoprotein B, detection by peptide nucleic acid-mediated PCR clamping, **259,** 311
MRP8
  S100 family member, murine B cell surface antigen with homology to, characterization, **263,** 17
MS-209
  direct interaction with multidrug resistance protein in human gastric cancer cells, **255,** 618; *erratum,* **258,** 816
mSin3A
  transcription repressor associated with, encoding by leukemia-associated *TEL* gene, **264,** 871
MTII
  analogs modified at N-terminus, selectivity at melanocortin receptors 3, 4, and 5 (human), **261,** 209
MUC1 antigens
  reaction with SEA-scFv bifunctional antibody, **256,** 223; *erratum,* **259,** 230
MUC3 gene
  3′ region, genomic organization and structure (human), **263,** 728
  encoding of transmembrane mucin and alternative splicing (human), **261,** 83
Mucin
  membrane-bound and soluble forms, prediction by alternative splicing of *MUC3* gene (human), **263,** 728
  stimulation of macrophages through macrophage scavenger receptor, **264,** 276
  transmembrane, encoding by MUC3 gene (human), **261,** 83
Mucor rouxii
  Δ^{12}-desaturase gene, heterologous expression in *Saccharomyces cerevisiae,* **263,** 47; *erratum,* **265,** 771
Multidrug resistance
  associated phenotype, effect on differentiation of human colon carcinoma cell line, **259,** 43
  LaMDR1 gene for, structural and functional analysis in *Leishmania amazonensis,* **255,** 289
  leukemia with, treatment with P-glycoprotein substrates, induction of accelerated disease course, **266,** 167
  MRP-mediated, in human lung cancer cells, reversal by RU486 (GLC4/Sb30 cells), **258,** 513
Multidrug resistance-associated protein
  direct interaction with quinoline derivative MS-209 in human gastric cancer cells, **255,** 618; *erratum,* **258,** 816
  mediated multidrug resistance in human lung cancer cells, reversal by RU486, **258,** 513
  role in selective potentiation of drug cytotoxicity by NSAIDs in human glioma cells, **259,** 600
Multidrug resistance gene
  MDR1, AU-rich 3′ untranslated region of mRNA, inefficient mRNA destabilization function (human), **261,** 627
  MDR1-encoded P-glycoprotein, drug-induced, role in phosphatidylcholine transport in MDR3-negative epithelial cell lines, **262,** 121
Multidrug resistance pump
  inhibition, and cellular calcein retention, in human leukemic lymphoblasts, effects of MDR pump inhibitors, **257,** 410
Multiple endocrine neoplasia
  MEN2B mutation, Ret with, mediation of PI 3-kinase activity and phosphorylation state of downstream signaling molecules (human), **262,** 68
  type 1, *MEN1* ortholog in zebrafish, characterization, **264,** 404
Multiple myeloma
  development, role of ICSAT (mouse), **260,** 329
Multiple myeloma cells
  surface antigen HM1.24 preferentially overexpressed on, cloning and characterization (human), **258,** 583
Murine leukemia virus
  vector particles, protection from human complement, **264,** 1
Muscarinic acetylcholine receptors
  stimulation in exocrine acinar cells, millisecond analysis of Ca^{2+} initiation sites evoked by, **259,** 656
Muscarinic cholinergic receptors
  M_3, and EGF receptors, activation of mutually inhibitory signaling cascades in human neuroblastoma SH-SY5Y cells, **255,** 774
Muscle, *see also* Skeletal muscle
  androgen receptor mRNA levels (Japanese eel), **254,** 378
  body wall, effects of *Caenorhabditis elegans* KPSFVRFamide (*Ascaris suum*), **254,** 222
  carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  cardiac
    ACTN2 gene encoding α-actinin-2 sarcomeric isoform, fine mapping and genomic structure, **265,** 256
    APOBEC-2 specific to, cloning and properties (human, mouse), **260,** 398; *erratum,* **263,** 264
    deleted mitochondrial DNA, detection by long-extension PCR, compromise by technical artifacts (human), **254,** 507
    detergent-skinned fiber bundles, method for exchanging troponin subunits (rat), **263,** 219
    differentiation of ventrally emigrating neural tube cells into, analysis (chicken), **254,** 601
    integrin $\alpha 7$ gene transcripts, structure, genetic localization, and identification (human), **260,** 357
  differentiation, in L6 myoblasts, time course of M-type 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase expression during, **259,** 250
  D-glucose and D-glucose pentaacetate ester metabolism in GLUT4 null mice, **264,** 855
  OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  telethonin homologue expression: sarcomeric protein (mouse), **257,** 699
  TIP120B specifically expressed in, cDNA isolation (rat), **261,** 911
Muscle cells
  cardiac, *see* Cardiomyocytes
  developmental expression of sarcoglycan gene products *in vitro* (mouse), **262,** 88
  differentiation and mitochondrial fatty acid oxidation, role of acetyl-CoA carboxylase β (H9c2 cells), **254,** 657
  in Duchenne muscular dystrophy, increased number of caveolae and caveolin-3 overexpression, **261,** 547
Muscular dystrophy, *see also* Duchenne muscular dystrophy
  cardiac and skeletal muscle abnormalities, NMR studies and molecular physiology, **266,** 723
Mutagenesis, *see also* Site-directed mutagenesis
  cobrotoxin from Taiwan cobra, **263,** 652
  gene trap insertional, removal of Crk-II in mutant mice for analysis of Crk-II role in embryonic development, **266,** 569
  prostaglandin EP3 receptor: key amino acid residue for governing G protein association and activation steps, **255,** 164
Mutagenicity
  1,2-epoxy-3-(*p*-nitrophenoxy)propane, **261,** 844

Mutants
  L-aspartase, inactive aggregated, recovery of catalytic activity (*Escherichia coli*), **264,** 596
  coactivator UTF1, C-terminally truncated, stimulation of transcription from variety of gene promoters through TATA box, **258,** 519
  Cu,Zn superoxide dismutase, superefficient, engineering (*Photobacterium leiognathi*), **256,** 425
  CYP2C9 alleles, frequencies in Swedish population, **254,** 628; *erratum,* **258,** 227
  Escherichia coli lacking NADP$^+$-dependent isocitrate dehydrogenase, radiation sensitivity, **254,** 647
  green fluorescent protein, with enhanced sensitivity for microanalysis at 488-nm excitation, **264,** 556
  hepatocyte growth factor deleted variant, with Ala substitution in N-terminal basic region, activity *in vivo* (mouse, rat), **254,** 363
  heregulin-α N-terminal mutant with suppressed activity, **256,** 156
  hfq::cat, overproduction of outer-membrane proteins FepA and FhuE responsible for iron transport (*Escherichia coli*), **264,** 525
  Mycobacterium smegmatis defective in 1-D-*myo*-inosityl-2-amino-2-deoxy-α-D-glucopyranoside and mycothiol biosynthesis, characterization, **255,** 239
  PPARγ2, COOH-terminally truncated, inhibition of adipogenesis in 3T3-L1 cells, **264,** 93
Mutations
  acetolactate synthase regulatory subunit, effect on sensitivity to end-product inhibition (*Streptomyces cinnamonensis*), **266,** 162
  apo A-I variant Arg173Pro associated with cardiac and cutaneous amyloidosis (human), **257,** 584
  C3aR, point and deletion mutations in large extracellular loop and vicinity (guinea pig), **263,** 357
  carnitine transporter OCTN2, in systemic primary carnitine deficiency (human), **261,** 484
  compound heterozygote in TTR gene with high serum transthyretin and retinol binding protein levels, **264,** 365
  cop promoter, effects on *in vivo* regulation of *Enterococcus hirae* by Cu(I) and Cu(II), **259,** 443
  CYP2A6 gene deletion, associated reduction of susceptibility to lung cancer (human), **261,** 658
  CYP21, functional analysis in Spanish patients with congenital adrenal hyperplasia, **262,** 635
  *DNASE1*6* allele of human DNase I polymorphism encoding Arg to Cys substitution responsible for instability, **260,** 280
  DOC-1R, analysis in various cancer cell lines (human), **255,** 59
  frequency, increase due to nonenzymatic glycation adduct of DNA N^2-(1-carboxyethyl)deoxyguanosine, **264,** 544
  α-galactosidase A, detection in Fabry disease using fluorescent chemical cleavage of mismatches, **257,** 708
  hepatocyte nuclear factor-1α, associated with diabetes, analysis (human), **266,** 196
  heterozygous splice site, in COL6A1, leading to in-frame deletion of α1(VI) collagen chain in Italian family with Bethlem myopathy, **258,** 802
  HLA class I-restricted T cell epitope on hepatitis B surface antigen, hot spot in chronic carriers and hepatocellular carcinoma (human), **262,** 757
  in hypoglycemic phenotype of very long chain acyl-CoA dehydrogenase deficiency, identification, **264,** 483
  interleukin-12 receptor β2 chain gene, in atopic subjects, **266,** 551
  Kv1.3 T0 domain, resulting in gain-of-function, analysis (rabbit), **254,** 54
  lipoamide dehydrogenase deficiency-associated, in interface domain (human), **262,** 163
  melanocortin-1 receptor loss-of-function mutations, frequency and association with red hair (human), **260,** 488
  melatonin 1a receptor, in subjects with circadian rhythm sleep disorders, **262,** 832
  MEN2B, Ret with, mediation of phosphatidylinositol 3-kinase activity and phosphorylation state of downstream signaling molecules (human), **262,** 68
  mitochondrial DNA
    cosegregation with pathophysiological U wave, **257,** 228
    deletions in cardiac tissue, gross mosaic distribution (human), **254,** 152
    mitochondria harboring, differentiation of myoblasts repopulated with, long-term analysis (human), **266,** 179
  mitochondrial gene, associated with impaired insulin secretion, evaluation of pancreas from patients with, **259,** 149
  p53 at position 277, modification of DNA-binding specificity *in vitro* (human), **263,** 1
  p53 and *scid* genes, cooperativity in lymphomagenesis in doubly heterozygous mice, **255,** 99
  para-type sodium channel gene from pyrethroid-resistant cattle tick, point mutation in, **261,** 558
  peroxisome proliferator-activated receptor γ, Pro12Ala missense mutation, relationship to diabetes mellitus, **254,** 450
  plasma membrane Ca^{2+}-ATPase gene, point mutation as cause of deafness in *Wriggle Mouse Sagami,* **261,** 773
  Ret, at aspartic acid 631 identified in sporadic pheochromocytoma, mechanism of Ret activation by, **255,** 587
  sep1+ forkhead transcription factor deletion, effect on hyphal growth (*Schizosaccharomyces pombe*), **263,** 465
  spontaneous *tonB* deletions in *polA1* strain of *E. coli,* DNA sequence analysis, **261,** 584
  Src SH3 domain: critical amino acid substitutions for c-Src oncogenic conversion, **263,** 759
  steroid 21-hydroxylase, missense and deletion mutations, effects on membrane anchoring and function (human), **257,** 384
  sterol 14α-demethylase by G464S substitution, induction of fluconazole resistance in clinical strains of *Candida albicans,* **262,** 174
  transforming growth factor β receptor type II, and TGF-β signaling pathways, **259,** 385
  transthyretin val30met, targeting, inosine$^{15.1}$ hammerhead ribozymes for, **260,** 313
  troponin T, Arg278Cys missense mutation at carboxyl terminal, functional consequences (human), **261,** 79
  trypsinogen, Arg117→His, stabilizing effects: unifying pathomechanism for hereditary pancreatitis (rat), **264,** 505
  vasoactive intestinal peptide/pituitary adenylate cyclase activating peptide receptor 1 at threonine 343, activating effects (human), **254,** 15
  vitamin D$_3$ receptor, point mutations in putative helices 4 and 5, effect on conformation and ligand binding (human), **264,** 478
  Wriggle Mouse Sagami, point mutation in plasma membrane Ca^{2+}-ATPase gene as cause of deafness in, **261,** 773
  XLRS1 gene, recurrent missense and nonsense mutations in families with X-linked retinoschisis, **256,** 317
mutM homologue type 1a
  as major repair enzyme for 8-hydroxyguanine lesions in human cells, **258,** 605
Myasthenia gravis
  and rippling muscles, associated autoantibodies recognizing skeletal muscle proteins, identification, **264,** 430
Myc
  role in human telomerase promoter activity in normal and tumor cells, **263,** 361
Myc-associated zinc finger protein
  DNA-binding and transcriptional activities, regulation by casein kinase II, **262,** 198
Mycobacterium smegmatis
  isoniazid accumulation, modulation by proton motive force-driven and ATP-dependent extrusion mechanisms, **256,** 682

  mutants defective in 1-D-*myo*-inosityl-2-amino-2-deoxy-α-D-glucopyranoside and mycothiol biosynthesis, characterization, **255,** 239
Mycobacterium tuberculosis
  KatG activity as peroxynitritase, **256,** 485
  virulence genes, mRNA differential display study, **258,** 94
Mycothiol
  biosynthesis, *Mycobacterium smegmatis* mutants defective in, characterization, **255,** 239
Myelomonoblastic leukemia cells
  cell growth suppression by troglitazone, role of induction of p21WAF1/CIP1 Cdk inhibitor (KPB-M15 cells), **261,** 833
Myelomonocytic leukemia cells
  U937, *see* U937 cells
  WEHI-3, nuclear localization of PU.1 and c-Fos, effects of microphthalmia-associated transcription factor, **254,** 384
Myeloperoxidase
  bacterial killing in neutrophil phagosome mediated by, role of singlet oxygen (human), **262,** 647
Myeloperoxidase–hydrogen peroxide system
  oxidation of α1-proteinase inhibitor by, promotion of binding to IgA, **255,** 562
Myf5
  MEF2-mediated recruitment, transcriptional activation of myogenin gene by, inhibition by adenovirus E1A protein, **265,** 222
Myoblasts
  calpastatin isoform expression (C2C12 cells), **260,** 339
  cell-specific reporter gene expression from *Drosophila NK-1* promoter, positive *cis*-acting elements involved in, analysis (C2C12 cells), **257,** 538
  constitutive hsp70, attenuation of H_2O_2-induced membrane lipid peroxidation (H9c2 cells), **265,** 279
  differentiation into osteoblast lineage, induction by BMP-2 expression via adenoviral vector (C2C12 cells), **262,** 739
  with engineered human proinsulin cDNA, insulin secretion, effects of differentiation (C2C12 cells), **265,** 361
  glucose uptake and lactate production, stimulation by factor from pancreatic and colonic cancer cells (L6 cells), **260,** 626
  H9c2, JNK activation and DNA fragmentation, role of Ca^{2+} (rat), **262,** 350
  muscle differentiation, M-type 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase expression during, time course (L6 cells), **259,** 250
  repopulated with mitochondria harboring mtDNA mutations, differentiation, long-term analysis (human), **266,** 179
  uncoupling protein 3 upregulation in myotubes by fatty acid (C2C12 cells), **258,** 464
Myocyte enhancer factor 2
  Myf5 recruitment mediated by, transcriptional activation of myogenin gene, inhibition by adenovirus E1A protein, **265,** 222
Myocytes
  cardiac, *see* Cardiomyocytes
Myofibrils
  skeletal muscle, transverse elasticity, atomic force microscopic study (rabbit), **256,** 13
Myofibroblasts
  scleroderma, serum starvation-induced cell death, rescue by IL-1 (human), **255,** 129
Myogenic tone
  rat middle cerebral arteries, nonspecific inhibition by MEK1 inhibitor PD98059, **257,** 523
Myogenin
  gene transactivation by MEF2-mediated recruitment of Myf5, inhibition by adenovirus E1A protein, **265,** 222
Myoglobinuria
  acute renal injury, renal regneration after, mediation by extracellular signal-regulated kinase (rat), **254,** 88
MyoK
  identification and sequencing in *Dictyostelium:* class I myosin, **255,** 711
Myometrium
  contractions, effects of 2-aminoethoxydiphenyl borate (rat), **264,** 979
  term, human MafF homologue specifically binding to oxytocin receptor gene in, molecular cloning, **264,** 86
Myosin
  ATP-dependent interaction with actin, inhibitory effect of phosphorylated myosin light chain kinase, **261,** 95
  autoantibodies, subclass specificity in idiopathic dilated cardiomyopathy, **259,** 255
  cross-bridges
    binding to thin filaments of skeletal muscle (rabbit), **258,** 628
    functioning in myocardial fibers of normal heart, inhibition by hypoxic endothelial superfusate (human), **262,** 64
  heavy chain
    type B, homologue with altered expression in Rat 6 cells transformed by mutant p53^{val135}, identification and characterization, **266,** 472
    type IIx, expression in Duchenne muscular dystrophy (human), **255,** 466
  mutant subfragment-1, elasticity on functionalized silver surface (*Dictyostelium*), **261,** 276
  MyoK identification and sequencing from *Dictyostelium,* **255,** 711
  nonmuscle heavy chain IIB inserted isoform, developmentally regulated expression in rat brain, **259,** 29
  organelles with, reverse motion along actin filament bundles in characean internodal cell, **257,** 223
Myosin II
  identification as binding protein to PH domain of protein kinase B, **255,** 169
Myosin V
  from PC12 cells, characterization, **262,** 98
Myosin-light-chain kinase
  phosphorylated, inhibitory effect on ATP-dependent actin–myosin interaction, **261,** 95
Myosin-light-chain-phosphatase
  130-kDa regulatory subunit, expression, subcellular localization, and cloning in aortic endothelial cells (pig), **254,** 490
  smooth muscle, small subunit, effects on Ca^{2+} sensitivity of contractile apparatus in permeabilized renal artery (pig), **254,** 158
Myotonic dystrophy
  pathogenesis, hypothesis: *trans* RNA interference caused by expanded CTG trinucleotide repeat (human), **264,** 76
Myotubes
  C2C12, uncoupling protein 3 upregulation by fatty acid, **258,** 464
Myricetin
  inhibition of glucose uptake in U937 cells, **260,** 568
Myristoylation
  single protein in ocular lens (bovine, rat), **256,** 652
S-Myristoylation
  proteins in *Leishmania,* detection with heterologous reporter, **256,** 569
Myristoyl-CoA:protein *N*-myristoyltransferase-1
  genomic organization (human), **257,** 284
Myristylation
  identification and characterization of myristylated and palmitylated Ser/Thr protein kinase (human, mouse), **259,** 533

N

^{15}N
  hyperfine-shifted resonances in Fe_2S_2 ferredoxins, assignment strategy, **258,** 54

- Na^+ bicarbonate cotransporter
  - pancreatic, cloning and immunolocalization (rat), **264,** 291
- NAD
  - metabolism by human Sir2-like proteins: cDNAs with homology to yeast SIR2 gene, **260,** 273
- NAD^+
  - consumption in carcinogen-treated cells overexpressing dominant negative mutant of poly(ADP-ribose) polymerase (hamster), **265,** 525
  - interaction of human NAD^+-dependent 15-hydroxyprostaglandin dehydrogenase with, role of Thr-188, **257,** 414
  - precursors nicotinic acid and nicotinamide, upregulation of G6PD and GAPDH mRNA in Jurkat cells, **255,** 133
- NAD^+-dependent 15-hydroxyprostaglandin dehydrogenase
  - interaction with NAD^+, role of threonine 188 (human), **257,** 414
- NADH
  - and Cu(II), oxidative DNA damage by nitrosobenzene in presence of, **257,** 555
  - extramitochondrial, cytochrome *c*-mediated oxidation, modulation by contact site density (rat), **259,** 325
- NADH peroxidase
  - rubrerythrin activity as, demonstration (*Clostridium perfringens, Desulfovibrio vulgaris*), **255,** 317
- NADPH
  - stimulation of specificity for estrone reduction by human estrogenic 17β-hydroxysteroid dehydrogenase, **259,** 489
- NAD(P)H
  - fluorescence, for metabolic response of rat B and non-B pancreatic islets, **262,** 346
- NADPH binding site
  - in gp91-*phox,* synthetic peptides corresponding to, uncompetitive inhibition of superoxide generation, **257,** 124
- NADPH oxidase
  - activation
    - in macrophages, induction by oxidized LDL via its protein moiety (human), **263,** 804
    - novel role for Rac: Rac1 disruption of p67*phox*/p40*phox* binding, **263,** 118
  - GTPγS-induced, reconstitution in streptolysin O-permeabilized neutrophils by cytosolic fractions (human), **265,** 29
  - leukocyte, subunit $p47^{phox}$, conformational changes induced by phosphorylation, **259,** 38
  - neutrophil, activation, inhibition by specific SAPK2/p38 inhibitor SB 203580 (human), **259,** 465
  - reactive oxygen species produced by, role in tyrosine phosphorylation in B- and T-lineage lymphoid cells (human), **255,** 262
- NADPH-P450 reductase
  - from yeast, and rat P450 1A1, electrostatic interaction in mixed and fused systems, **257,** 273
- NAD(P)H:quinone reductase
  - activation inducer benzyl isothiocyanate, temporal effects in HT29 cells: activation of JNK prior to AP-1 and NF-κB, **257,** 149
- Na^+/H^+ exchange
  - activation, implications of sphingosylphosphorylcholine activation of G_q, $G_{i\text{-}2}$, and $G_{i\text{-}3}$ in thyroid FRTL-5 cells, **258,** 812
  - and protein kinase C, role in CD11a mRNA and protein induction by IFN-γ, LPS, and TNF-α in tissue macrophages, **257,** 635
- Na^+,K^+-ATPase
  - high-affinity ATP-binding site, acidity of microenvironment of, **254,** 215
  - regulation by reversible phosphorylation during hibernation (ground squirrel), **254,** 424
  - role in hydrophobic behavior of brain membrane tubulin, **253,** 824; *erratum,* **257,** 642
  - subunit α1 gene promoter, mineralocorticoid/glucocorticoid response element in, identification (human), **266,** 5
- Na^+/K^+ pump
  - capacity in Calu-3 human airway cells, inhibition by tetracyclines, **260,** 13
- Nanoparticles
  - L-A virus, *in vitro* selective RNA synthesis with, **263,** 23
- β-Naphthoflavone
  - induction of Cu/Zn-superoxide dismutase gene, xenobiotic responsive element for, analysis (rat), **256,** 133
- Naringenin
  - inhibition of glucose uptake in U937 cells, **260,** 568
  - interactions in gastrointestinal tract and effect of glycosylation (rat), **265,** 410
- Natriuretic peptide receptors
  - NPR-A, bovine, affinity photolabeling with *p*-benzoylbenzoylated [N,C,rANP(1–28)]pBNP32 derivatives, **258,** 81
- Natriuretic peptide system
  - functional expression in human ocular nonpigmented ciliary epithelial cells, **258,** 21; *erratum,* **264,** 1007
- Natural killer cells
  - intracellular Ca^{2+} mobilization, effect of differential utilization of cyclic ADP-ribose pathway, **262,** 467
- NBS1 protein
  - full-length, expression, restoration of normal radiation responses in cells from Nijmegen breakage syndrome patients, **265,** 716
- Ncd
  - tail domain, promotion of microtubule assembly and stability, **258,** 39
- Nck
  - gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
- *Ndr2* gene
  - identification, tissue specificity, and response to N-myc (mouse), **266,** 208
- *Ndr3* gene
  - identification, tissue specificity, and response to N-myc (mouse), **266,** 208
- Necrosis
  - and apoptosis, comparative study in HepG2 cells, **255,** 6
  - cardiomyocytes at embryonic stage, induction by targeted disruption of TREB5 gene (mouse), **261,** 350
  - hepatic
    - areas undergoing, macrophage migration into, role of osteopontin (rat), **256,** 527
    - subsequent vascular endothelial growth factor expression in nonparenchymal and parenchymal cells (rat), **254,** 587
  - nitric oxide switching of apoptosis in Jurkat cells to, mechanism, **258,** 215
  - role of lipid peroxidation in wheat hybrid, **262,** 109
  - taxol-induced, in breast cancer cells at high taxol concentration, **263,** 398
  - triggering by TNF-α in IEC-6 cells with complete inhibition of caspase cascade, **260,** 159
  - WEHI-164 cells, induction by TNF, association with cell cycle stage-dependent patterns of caspase activation, **261,** 385
- NEDD8
  - conjugation site, identification in human cullin-2, **257,** 100
- NEFA
  - heterologous overexpression and analysis of EF-hand Ca^{2+}-binding sites (human), **260,** 1
- Negative regulatory element
  - HIV-1 LTR, interactions with several transcription factors of nuclear extracts, real-time study, **264,** 6
  - upstream regulatory element contributing to hepatocyte-specific expression of rat serum amyloid A1 gene, **264,** 395
- NELL proteins
  - epidermal growth factor-related domain, role in interaction with protein kinase C, **265,** 752

  neural, NELL1 and NELL2, biochemical characterization and expression analysis (rat), **265,** 79
Nemo-like kinase
  biochemical properties and physiological functions, **266,** 291
Nemonapride
  tritiated, primate cerebral cortical dopamine D4-like binding sites labeled by, substantial 5-HT2A receptor portion in, **255,** 367
Neoglycoconjugate
  adamantyl globotriaosyl ceramide: monovalent soluble mimic inhibiting verotoxin binding to glycolipid receptor, **257,** 391
Neointima
  formation after carotid cuff injury in apoE null mice, reduction by reconstituted HDL containing human apoA-1, **264,** 465
Neoplastic cells
  mitochondrial content, relationship to δ-aminolevulinic acid-induced protoporphyrin IX levels *in vitro,* **265,** 315
Neprilysin
  cleavage enzyme for sterol regulatory element binding protein homologous to, in hamster liver microsomes, **258,** 542
NEP sequence
  conserved, in endoglycoceramidase from *Rhodococcus* sp. M-777, Glu residue in, essential role in enzymatic activity, **260,** 89
Nerve
  sciatic, crush injury, upregulated uridine kinase in ventral horn after, identification by RLCS (rat), **266,** 104
Nerve growth factor
  expressed in *E. coli,* viability and plasmid stability of vectors encoding, effect of selection marker (human), **258,** 29
  neurite outgrowth in PC12 cells induced by, promotion by prostaglandin J_2 and metabolites, **258,** 50
Neural floor plate
  follistatin-related protein localization (*Xenopus laevis*), **254,** 42
Neural network
  in planarian, analysis with antibody against planarian synaptotagmin homologue, **260,** 426
Neural plakophilin-related *armadillo*-repeat protein/δ-catenin
  interaction with synaptic scaffolding molecule, **256,** 456
Neural retina
  chick embryo, mAb generated against, characterization of MARCKS identified by, **257,** 480
Neural tissue
  roles of NELL1 and NELL2 proteins (rat), **265,** 79
Neural tube cells
  ventrally emigrating, differentiation into heart muscle (chicken), **254,** 601
Neurite outgrowth
  laminin-mediated
    role of protein kinase C (PC12 cells), **256,** 98
    role of protein tyrosine phosphorylation (PC12 cells), **262,** 713
  nerve growth factor-induced, in PC12 cells, promotion by prostaglandin J_2 and metabolites, **258,** 50
Neuroblastoma cells
  adhesion function of acetylcholinesterase, localization at peripheral anionic site, **258,** 758
  apoptosis, early phase, lipoxygenase-dependent ultraweak light emission in, analysis (CHP100 cells), **265,** 758
  cell-specific reporter gene expression from *Drosophila NK-1* promoter, positive *cis*-acting elements involved in, analysis (NG108-15 cells), **257,** 538
  differentiated by FGF 1 overexpression, upregulation of BCL-2 in SH-SY5Y cells, **258,** 745
  differentiating, HASH-1 downregulation in, **256,** 557
  dopaminergic, peroxynitrite-induced apoptosis, effect of MAP kinase (SH-SY5Y cells), **263,** 504
  mutually inhibitory interactions in signaling cascades activated by muscarinic M_3 and EGF receptors (SH-SY5Y cells), **255,** 774
  neuronal differentiation by trichostatin A and butyrolactone I (mouse Neuro 2a cells), **256,** 372
  NG108-15, ERG current inactivation (mouse), **263,** 510
  procaspase-3 and poly(ADP-ribose) polymerase as calpain substrates (human SH-SY5Y cells), **263,** 94
  transglutaminase-overexpressing, effects of glutamine repeat length (SK-N-BE cells), **260,** 150
Neurodegeneration
  protective effects of genistein: murine models of familial ALS and stroke, **258,** 685
Neurodegenerative disease
  in human, role of apoptosis, **266,** 699
  role of deubiquitinating enzymes, **266,** 633
Neurodegenerative disorders
  extended polyglutamine associated with, relationship to caspases, **257,** 724
Neuroepithelioma cells
  N-oleoylethanolamine inhibition of natural ceramide glucosylation, implications for apoptosis (CHP-100 cells), **255,** 456
Neuroglial cells, *see* Glial cells
Neuroglian
  activation of cytoskeleton assembly pathways in *Drosophila* S2 cells by mechanisms independent of DE-cadherin, **265,** 372
Neuronal apoptosis inhibitory protein
  distinct transcripts of gene for, identification (human), **264,** 998
Neuronal Cdk5 activator
  activation domain, complex between Cdk5 and, model, **259,** 420
Neuronal cell death inducible putative kinase
  NIPK, identification (rat), **258,** 260
Neuronal differentiation
  Neuro 2a cells, by trichostatin A and butyrolactone I, **256,** 372
Neuronal systems
  cell-free, enhanced microtubule assembly *in vitro* and decreased sensitivity to copper toxicity in, **264,** 605
Neurons
  apoptosis, kinase-like gene induced during, identification (rat), **258,** 260
  Bcl-2 protein expression during oxidative stress, regulation (frog), **260,** 522
  BDNF and c-*fos* gene promoters, non-mediated activation in primary culture (rat), **261,** 233
  cerebellar, apoptosis, induction by cholestanol (rat), **256,** 198
  developing, transcription of calcium transporters and channels in, control by calcium, **266,** 624
  and glial cells, of rat brain, expression of homologous cytochrome b_5s, **256,** 330
  ischemic delayed damage, protective effects of prostaglandin I_2 analogs (gerbil), **265,** 301
  and lymphocytes, activation of soluble guanylate cyclase in, impairment by chronic hyperammonemia (rat), **257,** 405
  oxidative stress, compounds inducing glutathione *S*-transferase isoforms defending against, analysis (IMR-32 cells), **262,** 591
  related morphology, and G_1 arrest, induction by IL-6 in LNCaP prostate tumor cells, **257,** 609
Neuropeptides
  insect, displacement of binding of *Conus anemone* venom to $[^3H]$neuropeptide Y, **262,** 180
  islet, contributing to glucose-stimulated insulin secretion in mouse, PACAP identification as, **256,** 664
  PrP106–126, aggregation *in vitro,* prevention by clusterin, **259,** 336
Neuropeptide Y
  ^3H-labeled, binding to crude venom of *Conus anemone,* high-affinity displacement by insect neuropeptides, **262,** 180

Neuropeptide Y (*continued*)
  and hypocretin/orexin, content in hypothalamus, effects of chronic leptin injections (rat), **258,** 119
Neuropeptide Y receptor
  Y_1 subtype, antagonist J-104870, anorexigenic effect on NPY-mediated feeding (human, rat), **266,** 88
Neurotoxicity
  amyloid β peptide, enhancement by αB-crystallin (rat), **262,** 152
  styrene and styrene oxide: effects on dopamine transport in purified rat striatal synaptic vesicles, **255,** 70
α-Neurotoxin
  Oh-6A and Oh-6B, identification as disulfide isomers in king cobra venom, **254,** 104
β-Neurotoxin
  New World scorpion *Centruroides sculpturatus,* solution structure, **254,** 406
Neurotoxins
  snake, three classes of, comparison by homology modeling and computer simulation graphics, **257,** 500
Neurotrophic factor
  glial cell-derived, induction of barrier function of endothelial cells forming blood–brain barrier (pig), **261,** 108
Neurotrophins
  expressed in *E. coli,* viability and plasmid stability of vectors encoding, effect of selection marker (human), **258,** 29
Neutral sphingomyelinase
  increasing ceramide content in human keratinocytes by, enhancement of 92-kDa gelatinase production, **260,** 634
Neutrophil chemotactic factor
  collagen XIV 16-kDa fragment acting as, purification from granulation tissue (rat), **256,** 642
Neutrophil elastase
  inhibition by human and murine secretory leukocyte protease inhibitor (mouse), **254,** 614
Neutrophil peptide 2
  rabbit, synthetic peptides corresponding to β-hairpin loop of, mitochondrial activity, **254,** 281
Neutrophils
  accelerated adhesion to ROS-treated endothelial cells in absence of *de novo* protein synthesis (human), **257,** 214
  cell-free system, superoxide generation in, uncompetitive inhibition by synthetic peptide for NADPH binding site in gp91-*phox,* **257,** 124
  damage of basement membrane, protective effect of peptide from collagen type IV α3 chain (human), **261,** 247
  extravasation *in vivo,* role of inducible NOS (rat), **257,** 684
  FcγRIIIb shedding from, induction by actin polymerization (human), **255,** 568
  filamentous actin content, oscillation regulation (human), **262,** 479
  leukotriene B_4 receptor expression (rat), **262,** 806
  NADPH oxidase activation, inhibition by specific SAPK2/p38 inhibitor SB 203580 (human), **259,** 465
  phagosome, myeloperoxidase-mediated bacterial killing in, role of singlet oxygen (human), **262,** 647
  phospholipase D stimulation by fMet-Leu-Phe, role of MAP kinase (human), **264,** 371
  serine proteinases, inhibition by human and murine secretory leukocyte protease inhibitor (mouse), **254,** 614
  streptolysin O-permeabilized, GTPγS-induced NADPH oxidase activity in, reconstitution by cytosolic fractions (human), **265,** 29
  superoxide generation, effects of steroidal saponins of *Anemarrhenae* rhizomes (human), **259,** 636
NF1
  mediation of repression of GLUT4 promoter by cAMP, **260,** 600
NFIL-6
  and USF and huGATA-3, of nuclear extracts, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
NF-κB
  activation
    by angiotensin II in human monocytes, **257,** 826
    by cellular enrichment with polyunsaturated fatty acids (human), **265,** 116
    in cerebral endothelial cells, inhibition by zinc ionophore pyrithione (bovine), **259,** 505
    role in induction of iNOS gene transcription by hepatic ischemia/reperfusion (rat), **261,** 917
  binding, rapid induction during liver cell isolation and culture, inhibition by *L-NAME,* **257,** 145
  mechanism of regulation: carbachol activation of IκB-kinase in isolated canine gastric parietal cells, **261,** 877
  ox-LDL-mediated activation in human coronary artery endothelial cells, reduction by γ-tocopherol, **259,** 157
  role in bacterial lipopolysaccharide effect on prostaglandin production by astrocytes (rat), **263,** 570
  role in hepatic α1-acid glycoprotein gene induction by phenobarbital (rat), **254,** 93
  role in matrix metalloproteinase-1 and -3 upregulation in rabbit dermal fibroblasts, **264,** 561
  transcriptional activation of iNOS dependent on, role in glycated serum albumin-induced production of nitric oxide in VSMC, **259,** 128
NF-κB/IκB complex
  purified recombinant, functional characterization, **260,** 691
Nickel
  detoxification in yeast, role of Spt7p via regulation of vacuolar polyphosphate level, **257,** 835
Nickel(II) acetate
  CHO cells treated with, differential expression of vimentin, hSNF2H homologue, and H ferritin, **258,** 592
Nicotinamide
  upregulation of glyceraldehyde-3-phosphate dehydrogenase and glucose-6-phosphate dehydrogenase mRNA in Jurkat cells, **255,** 133
Nicotine
  metabolism, significance of homozygous *CYP2A6* deletion (human), **262,** 146
  regulation of bFGF and TGF-β_1 production in bovine aortic endothelial cells, **257,** 306
Nicotinic acid
  upregulation of glyceraldehyde-3-phosphate dehydrogenase and glucose-6-phosphate dehydrogenase mRNA in Jurkat cells, **255,** 133
Niemann-Pick C1 gene
  genomic organization and polymorphisms (human), **261,** 493
nifM
  Azotobacter vinelandii, regulated expression in response to molybdenum and vanadium supplements in Burk's nitrogen-free growth medium, **264,** 186
Nigerythrin
  NADH peroxidase activity, demonstration (*Clostridium perfringens, Desulfovibrio vulgaris*), **255,** 317
Nijmegen breakage syndrome
  cells from patients with, radiation responses, restoration by expression of full-length NBS1 protein, **265,** 716
NIMA
  mitotic regulator protein of *Aspergillus nidulans,* related murine STK2 serine/threonine kinase, activity and substrate specificity, **264,** 449
Nimesulid
  effects on mitochondrial DNA alterations in Adriamycin-induced cardiotoxicity (rat), **254,** 651

Nine-heme cytochrome *c*
  gene sequence (*Desulfovibrio desulfuricans*), **262,** 629
Nip3
  induction of apoptosis in p53 null mouse cerebellum cells, effects of wild-type and mutated p53 and Id proteins, **255,** 722
Nitration
  proteins in peroxynitrite-treated skin *in vitro* (rat), **262,** 781
Nitric oxide
  donors of, selective potentiation of thrombin-stimulated p70^{S6k} and morphological changes in Swiss 3T3 cells, **266,** 352
  effect on ICAM-1 expression on cancer cells, **257,** 395
  effect on myocyte contractile function, role of troponin I phosphorylation, **256,** 398
  exogenous, effects on lung fibroblast viability and DNA fragmentation (human), **262,** 685
  inhibitory effects
    apoptosis execution in Jurkat cells at distinct ATP-dependent steps upstream and downstream of mitochondrial cytochrome *c* release, **258,** 215
    HIV-1 replication in astrocytoma cells (human), **254,** 200
    HIV-1 reverse transcriptase activity, **258,** 624
    ornithine decarboxylase by S-nitrosylation, **262,** 355
  production
    basal vascular, validation of lucigenin as chemiluminescent probe for, **254,** 319
    glycated serum albumin-induced, in VSMC by NF-κB-dependent transcriptional activation of iNOS, **259,** 128
    by microglial cells activated with β-amyloid and IFN-γ, inhibition by α-MSH peptides, **263,** 251
    by osteoclasts, direct microsensor measurement, **259,** 73; *erratum,* **265,** 770
  and prostanoids, production in infarcted heart *in situ* and effect of aspirin (rabbit), **257,** 488
  regulation of reduced-folate transporter in cultured human retinal pigment epithelial cells, **257,** 279
  release
    in heart, stimulation by blood flow, role of stretch-activated ion channels (guinea pig), **261,** 6
    induced by vascular endothelial growth factor receptor-2 in response to VEGF-A stimulation in endothelial cells (human, pig), **265,** 636
    nongenomic stimulation by estrogen in BAECs, mediation by estrogen receptor α localized in caveolae, **263,** 257
  role in hypoxia-induced pulmonary hypertension (rat), **254,** 100
  stimulation of chronic ceramide formation in bovine glomerular endothelial cells, **258,** 60
Nitric-oxide reductase
  substrate inhibition, kinetic analysis (*Paracoccus denitrificans*), **262,** 562
Nitric-oxide synthase
  endothelial
    activation in paced cardiac myocytes, Ca^{2+}-independent alteration of contractile activity by, role of troponin I phosphorylation (rat), **256,** 398
    mRNA
      induction by shear stress, role of intracellular Ca^{2+} and G-protein signals and modulation by PI 3-kinase (bovine), **254,** 231; *erratum,* **256,** 255
      upregulation, role in regression of atherosclerosis in rabbit aorta by HMG-CoA reductase inhibitor, **259,** 414
    nuclear translocation in vascular endothelial cells, induction by VEGF, **256,** 192
  flavin semiquinone, reactivity in arginine oxygenation to N^G-hydroxyarginine, **250,** 36; *erratum,* **256,** 447
  immunolabeling in CNS and peripheral tissues (sea slugs), **262,** 545
  inducible
    downregulation by sulglycotide in gastric mucosal inflammatory responses to *Helicobacter pylori* LPS (rat), **261,** 15
    gene expression in aortic smooth muscle cells, effect of sesquiterpene lactones (rat), **262,** 375
    gene transcription, induction by hepatic ischemia/reperfusion by activation of NF-κB (rat), **261,** 917
    NF-κB-dependent transcriptional activation, role in glycated serum albumin-induced production of NO in rat VSMC, **259,** 128
    role in leukocyte extravasation *in vivo* (rat), **257,** 684
    stoichiometric Arg binding in oxygenase domain, requirement for single molecule of tetrahydrobiopterin per dimer (mouse), **257,** 344
  isoforms of, electron transfer in, rapid kinetic studies (bovine, mouse, rat), **265,** 184
  role in rapid induction of NF-κB binding during liver cell isolation and culture (rat), **257,** 145
Nitrilase
  catalysis of amide and nitrile hydrolysis (*Rhodococcus rhodochrous*), **253,** 662; *erratum,* **255,** 549
Nitriles
  hydrolysis by nitrilase (*Rhodococcus rhodochrous*), **253,** 662; *erratum,* **255,** 549
Nitrite
  potentiation of hypochlorous acid-induced DNA base modification, **257,** 572
Nitrite reductase
  copper-containing, gene cloning, sequencing, and transcriptional studies (*Alcaligenes xylosoxidans*), **255,** 427
Nω-Nitro-L-arginine methyl ester
  inhibition of rapid induction of NF-κB binding during liver cell isolation and culture, **257,** 145
Nitrogenase
  nifM of *Azotobacter vinelandii,* regulated expression in response to molybdenum and vanadium supplements in Burk's nitrogen-free growth medium, **264,** 186
Nitrogen-containing bisphosphonates, *see* Bisphosphonates, nitrogen-containing
Nitrogen-free medium
  molybdenum and vanadium supplements in, regulated expression of *nifM* of *Azotobacter vinelandii* in response to, **264,** 186
Nitrogen regulator II
  glnL encoding, *in vitro* transcription, stimulation by heat shock protein (*Escherichia coli*), **258,** 341
Nitrosobenzene
  induction of oxidative DNA damage in presence of NADH and Cu(II), **257,** 555
S-Nitrosothiols
  reductive assays, implications for measurements in biological systems, **252,** 535; *erratum,* **262,** 845
S-Nitrosylation
  as mechanism of NO inhibition of ornithine decarboxylase, **262,** 355
3-Nitrotyrosine
  loss on exposure to hypochlorous acid: *in vivo* biomarker potential, **258,** 168
NK-1 homeobox gene
  Drosophila, cell-specific expression, *cis*-acting positive element responsible for, **257,** 538
NLK
  biochemical properties and physiological functions, **266,** 291
NMDA, *see N*-Methyl-D-aspartate
N-myc
  response of *Ndr2* and *Ndr3* genes to, analysis (mouse), **266,** 208
Nociceptin
  binding sites in frog membranes, **260,** 592

Nodulation protein
  NodO, secondary structure, effects of calcium and protons (*Rhizobium leguminosarum* biovar *viciae*), **263,** 516
Noggin
  and bone morphogenetic protein-4, coordinate regulation of progression of chondrogenic differentiation in mouse ATDC5 clonal EC cells, **260,** 240
Noncovalent interactions
  protein/DNA, electrospray ionization mass spectrometry, **257,** 1
Nonendocrine cells
  with engineered human proinsulin cDNA, insulin secretion, effects of differentiation, **265,** 361
Nonenzymatic glycation
  DNA adduct N^2-(1-carboxyethyl)deoxyguanosine formed by, induction of single-strand breaks and augmentation of mutation frequencies, **264,** 544
Nongenomic action
  estrogen, in stimulation of NO release, mediation by estrogen receptor α localized in caveolae, **263,** 257
Nonpigmented ciliary epithelial cells
  human ocular, functional expression of natriuretic peptide system, **258,** 21; *erratum,* **264,** 1007
Non-small cell lung carcinoma
  difference in procaspase expression (human), **262,** 381
  genomic DNA from, analysis by arbitrarily primed PCR fingerprinting (human), **258,** 271
Nonsteroidal anti-inflammatory drugs
  selective potentiation of drug cytotoxicity in human glioma cells, role of MRP and COX-1, **259,** 600
Nonstructural protein 2
  hepatitis C virus, generated by NS2-3 autocleavage, requirement for NS5A phosphorylation, **254,** 572
  from parvovirus minute virus of mice, nuclear export, mediation by CRM1, **264,** 144
Norepinephrine
  effect on intracellular Ca^{2+} in smooth muscle cells (SVSC cells), **264,** 774
  secretion and synthesis in cultured adrenal medullary chromaffin cells, stimulation by leptin (pig), **261,** 426
  stimulation of HGF expression in embryonic lung fibroblasts (human), **262,** 76
Notochord
  follistatin-related protein localization (*Xenopus laevis*), **254,** 42
NPM
  N-terminal half, dissociation from nucleoli of HeLa cells after anticancer drug treatments, **264,** 305
nRap GEP
  synaptic scaffolding molecule-binding, with function as neural GDP/GTP exchange protein for Rap1, analysis (human), **265,** 38
Nrf2
  binding to electrophile response element, role in upregulation of human γ-glutamylcysteine synthetase regulatory subunit gene, **261,** 661
NS5A protein
  hepatitis C virus, phosphorylation by casein kinase II, **257,** 777
NS5 protein
  dengue virus, 37-amino-acid interdomain of, functional NLS and inhibitory CK2 site, **257,** 731
Nuclear extracts
  several transcription factors of, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
Nuclear factor
  tissue-specific, recognized E-box motif, role in BMP-4 gene expression in osteogenic cells, **263,** 560
Nuclear factor κB, *see* NF-κB
Nuclear factor Y
  interaction of human ZHX1 with, **261,** 614
Nuclear localization
  c-Fos and PU.1, effects of microphthalmia-associated transcription factor (WEHI-3 cells), **254,** 384
  kinesin-like protein MKLP-1 C-terminal domains, **260,** 605
  redistribution of activated caspase-3 to nucleus during butyric acid-induced apoptosis of colorectal cancer cells, **260,** 775
  survival motor neuron proteins in skeletal muscle (mouse), **254,** 10
  TBP-interacting protein 120A (HEp-2 cells), **266,** 123
Nuclear localization signals
  and inhibitory CK2 site, in dengue virus NS5 protein 37-amino-acid interdomain, **257,** 731
  multiple, in HSV-1 thymidine kinase, characterization, **264,** 338
  spacing, and efficiency of nuclear import of nonnuclear proteins, **256,** 278
Nuclear magnetic resonance
  determination of binding sites of peptide ligand on death domain of p75 neurotrophin receptor, **255,** 104
  Fe$_2$S$_2$ ferredoxins: assignment strategy for hyperfine-shifted ^{13}C and ^{15}N resonances, **258,** 54
  heart studies, linking to physiological genomics, **266,** 723
  two-dimensional ^{1}H, ω-conotoxin MVIID in solution, **254,** 32
Nuclear membrane
  lipid composition changes, effects on RNA nucleocytoplasmic transport (rat), **258,** 476
  sphingomyelin–cholesterol changes in liver after hepatectomy (rat), **262,** 692
Nuclear pore complex
  oxalate binding protein gp210, oxalate-induced and cell cycle-dependent expression (Vero cells), **266,** 72
  subcomplexes, identification and characterization in mitotic extract of human somatic cells, **254,** 417
Nuclear respiratory factor 1 gene
  upregulation in mitochondrial DNA-depleted HeLa cells, role of oxidative stress, **258,** 44
Nucleases
  recognition of sequence-directed structure of ssDNA backbone, **256,** 532
Nucleic acid binding domains
  with distinct specificities, in human ribosomal protein L7, **258,** 530
Nucleic acids
  association with lysozyme, **266,** 366
Nucleocytoplasmic transport
  RNA, effect of changes in nuclear membrane lipid composition (rat), **258,** 476
Nucleolus
  HeLa cells, dissociation of N-terminal half of NPM after anticancer drug treatments, **264,** 305
Nucleophosmin/B23
  mRNA changes during entry into mitosis (HeLa cells), **257,** 865
  N-terminal half, dissociation from nucleoli of HeLa cells after anticancer drug treatments, **264,** 305
Nucleotide excision repair proteins
  XPA, single metal-binding domain in, EXAFS study (*Xenopus laevis*), **254,** 109
Nucleotide sequence, *see* Sequence studies
Nucleus
  activated caspase-3 redistribution to, during butyric acid-induced apoptosis of colorectal cancer cells, **260,** 775
  apoptosis-associated changes, control by DNA-fragmenting factor, **254,** 552
  in cancer cells, proteasome accumulation induced by glucose starvation and hypoxia (human), **258,** 448

  caveolin-1, endothelial NO synthase, and Flk-1/KDR translocation to, induction by VEGF in vascular endothelial cells (bovine), **256,** 192
  c-Fos and PU.1 localization to, effects of microphthalmia-associated transcription factor (WEHI-3 cells), **254,** 384
  and desmosome, pinin in, differentiation by antibodies, **263,** 192
  erythrocyte, isolation of crosslinked telomere–protein complexes (chicken), **254,** 517
  estrogen receptors, activation by U73122 and U73343 (SKBR-3 cells), **261,** 340
  export of nonstructural protein 2 from parvovirus minute virus of mice, mediation by CRM1, **264,** 144
  extracts of, transcription factors in, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
  hepatoma-derived growth factor HRP-3 translocation to, analysis (human, mouse), **266,** 81
  intact, associated telomerase in human leukemia CEM cells, enzymatic activity, **265,** 51
  kinesin-like protein MKLP-1 C-terminal domain localization to, **260,** 605
  membrane
    lipid composition changes, effects on RNA nucleocytoplasmic transport (rat), **258,** 476
    sphingomyelin–cholesterol changes in liver after hepatectomy (rat), **262,** 692
  nonnuclear protein import, and location and number of nuclear localizing signals, **256,** 278
  phosphatidylinositol 3-kinase and PI-specific PLC isoform translocation to, induction by monocytic differentiation of HL-60 cells, **259,** 314
  role in intracellular acidification during apoptosis, **254,** 821
  survival motor neuron protein localization to, in skeletal muscle (mouse), **254,** 10
  TBP-interacting protein 120A localization (HEp-2 cells), **266,** 123
  TIMP-1 fusion protein translocation to, after binding to MCF-7 breast carcinoma cells, **257,** 494
Nude mouse
  hair follicles, serine protease overexpressed in, **258,** 374

O

Obesity
  acute effects of exercise on circulating leptin in lean and genetically obese *fa/fa* rats, **255,** 698
  decreased levels of adipose-specific protein adiponectin (human), **257,** 79
  dietary, and food restriction, effects on hypothalamic levels of agouti-related protein, α-MSH, and pro-opiomelanocortin (rat), **258,** 574
  effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
  and fat distribution, in Japanese men, effect of Gln27Glu β_2-adrenergic receptor variant, **258,** 138
  hepatic *CYP2E1* and *CYP4A* gene regulation in, analysis in *ob/ob* mice and *fa/fa* Zucker rats, **255,** 300
Occludin
  interaction with connexin 32, **266,** 222
OCIF, *see* Osteoclastogenesis inhibitory factor
OCTN2
  fusion with GFP, subcellular localization and functional restoration of carnitine uptake in carnitine transporter-defective cell lines (human), **264,** 909
Oculomedin
  induction by mechanical stretching in human trabecular cells of eye, **259,** 349
Oculomotor system
  extraocular muscle calcium homeostasis development and visuomotor system maturation (rat), **257,** 678
ODF/OPGL/TRANCE/RANKL
  regulation of osteoclast differentiation and function, **256,** 449
Odorant binding proteins
  identification and cloning (*Phyllopertha diversa*), **263,** 832
Okadaic acid
  ceramide synergism with, in induction of IκB degradation, **263,** 63
  K562 leukemia cells treated with, apoptosis and mitotic arrest as independent effects, **260,** 256
  stimulation of expression of vascular endothelial growth factor gene, **265,** 584
Oleic acid
  upregulation of uncoupling protein 3 in C2C12 myotubes, **258,** 464
N-Oleoylethanolamine
  inhibition of glucosylation of natural ceramides in CHP-100 neuroepithelioma cells, implications for apoptosis, **255,** 456
Olfactory bulb
  accessory, region-specific Fos expression, induction by protease-sensitive urinary pheromones (rat), **260,** 222
  adenylate kinase 1 localization (rat), **254,** 618
  expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
Olfactory mucosa
  cytochrome P450 and steroid hydroxylase activity (mouse), **266,** 262
  retinoic acid biosynthesis and retinoid receptors, in adult mice, **256,** 346
Oligodendrocyte precursors
  primary, β1 integrin cytoplasmic domain regions involved in migration and survival, mapping (rat), **259,** 121
Oligodeoxyribonucleotides
  photoaffinity labeling of HSV-1 single-strand DNA-binding protein with, **264,** 493
Oligomannosides
  free and N-linked, as markers of quality control of newly synthesized glycoproteins, **258,** 1
Oligomerization
  atrial and brain natriuretic peptide pro-protein amino-terminal regions via leucine zipper-like coiled-coil motifs, **255,** 495
  proteins, sequences mediating, identification in *Escherichia coli,* genetic screen for, **266,** 243
Oligonucleotides
  antisense, to cardiac Na$^+$/Ca$^+$ exchanger, effects on calcium dynamics in cultured cardiac myocytes (rat), **260,** 117
  interaction with cationic surfactants: duplex stabilization from coupled cooperativity in ligand binding, **263,** 41
Oligosaccharides
  chain length, effect on chaperone association and intracellular transport of MHC class I proteins, **262,** 473
  N-linked, from vomeromodulin, structural identification (rat), **255,** 451
  O-linked: preferential binding of human serum IgG3 subclass to asialo-, agalacto-IgA1/Sepharose, **264,** 424
Oligosaccharyltransferase
  in endoplasmic reticulum, functions of multiple subunits, **266,** 684
Olpadronate
  and NH$_2$-olpadronate, inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
Oncogenes
  isolation from mammary tumors by retrovirus expression cloning system (rat), **265,** 7
Oncogenesis
  role of deubiquitinating enzymes, **266,** 633
ONO-4057
  leukotriene B$_4$ receptor antagonist, immunosuppressive effect *in vitro* (murine T cells), **264,** 321
Oocytes
  26S proteasome assembly, regulation by maturation-inducing hormone (starfish), **254,** 338

Oocytes (*continued*)
  cyclosome phosphorylation, role in stimulation by Fizzy/cdc20 (clam), **260,** 193
  injected with Ntcp and oatp1 cRNAs, in identification of thyroid hormone transporters (*Xenopus laevis*), **254,** 497
  metaphase 2 stage, tyrosine phosphorylation of STAT3 by leptin via leptin receptor (mouse), **256,** 480
  recognition, associated sperm–oocyte binding protein SOB1, cDNA cloning and characterization (human), **259,** 60
  Xenopus, in identification of mammalian brain sulfate transporter, **263,** 123
Operon
  Halobacterium halobium region homologous to *E. coli* α-operon, cloning, sequencing, and characterization of ribosomal protein and RNA polymerase genes, **264,** 24
Opioid receptors
  gene expression in pineal gland (rat), **262,** 775
δ Opioid receptors
  affinity labeling by DSLET-Mal, **265,** 513
Optical absorption spectroscopy
  fuscoredoxin, overexpressed (*Escherichia coli*), **260,** 209
Optical mapping
  DNA polymerase I-mediated addition of labeled substrate to fixed DNA molecules, **254,** 466
Optical properties
  single ion channels, measurement using artificial lipid bilayer formed on agarose-coated glass, **265,** 595
Orexin
  distribution in brain and regulation upon fasting (rat), **256,** 495
  suppression of pulsatile secretion of luteinizing hormone in ovariectomized rat, **264,** 759
Orexin-A
  stimulation of gastric acid secretion after central administration to conscious rats, **254,** 623
Orexin/hypocretin
  and neuropeptide Y, content in hypothalamus, effects of chronic leptin injections (rat), **258,** 119
Organic anion transporters
  renal, hOAT1 and hOAT3, molecular cloning and characterization (human), **255,** 508
Organic anion transporting polypeptide
  role in hepatic uptake of thyroid hormones, analysis in cRNA-injected *Xenopus* oocytes, **254,** 497
  role in hepatocyte uptake of MRI contrast agents, **257,** 746
Organogenesis
  early, in embryonic lung, tenascin downregulation in, analysis (rat), **263,** 597
Ornithine decarboxylase
  activity during cell cycle of CHO cells, half-life, **263,** 13
  activity in developing chick embryos after exposure to 60-Hz magnetic fields, **265,** 211
  gene expression, regulation by ZBP-99, **262,** 113
  and histidine decarboxylase, PEST regions containing C-termini of, roles in protein degradation (rat), **257,** 269
  inhibition by NO by S-nitrosylation, **262,** 355
Orotidine 5′-monophosphate decarboxylase
  absence of metal cofactor in, **259,** 133
Osmosensing
  and regulation of cell function, **255,** 551
Osmosignaling
  and regulation of cell function, **255,** 551
Osmotic regulation
  phospholipase C-δ1 subcellular localization in MDCK cells, **254,** 284
Osmotic response
  signal transduction in rat VSMC: control of osmotically induced aldose reductase expression by cell kinases and phosphatases (rat), **255,** 12
Osmotic stimuli
  transients in cytoplasmic free Ca^{2+} in human osteoblast-like cells stimulated by, **263,** 206
Osmotic stress
  regulation of Δ^1-pyrroline-5-carboxylate synthetase 1 gene expression in *Arabidopsis thaliana,* **261,** 766
  Syk activation in B cells induced by, role of receptor aggregation and reactive oxygen species, **262,** 231
Osteoarthritis
  developing spontaneous, association with collagen remodeling (mouse), **258,** 763
  fibroblastic synoviocytes from patients with, m-calpain mRNA expression, downregulation by inflammatory cytokines, **266,** 341
Osteoblastic osteosarcoma cells
  parathyroid hormone/PTH-related peptide receptor expression in, gene promoter element enhancing (ROS 17/2.8 cells), **258,** 336
Osteoblast-like cells
  cocultured with bone marrow-derived hematopoietic cells, BMP-2 effect on osteoclast-like cell formation (mouse), **259,** 97
  growth hormone effects on focal adhesion kinase and actin stress fiber (human Saos2 cells), **263,** 100
  parathyroid hormone-regulated production of stem cell factor (human), **255,** 778
  spontaneous and stimulated transients in cytoplasmic free Ca^{2+} (human), **263,** 206
Osteoblasts
  calvarial, bone morphogenetic protein-3b gene expression correlated with differentiation (rat), **256,** 419
  cyclooxygenase-2 gene, transcriptional regulation by diverse ligands (mouse), **264,** 865
  cyclooxygenase-2 and prostaglandin E_2 expression, effect of low-intensity pulsed ultrasound (mouse), **256,** 284
  differentiation of bovine microvascular pericytes to, induction by AGEs, **258,** 353
  efp expression and regulation in primary culture (rat), **261,** 412
  lineage, differentiation of C2C12 myoblasts into, induction by BMP-2 expression via adenoviral vector, **262,** 739
  osteoclast differentiation factor and osteoclastogenesis inhibitory factor production, regulation by bFGF: induction of osteoclast formation (mouse), **265,** 158
  peroxisome proliferator-activated receptor γ gene expression (rat), **260,** 122
  proliferation, stimulation by HMG-like protein in bovine milk (MC3T3-E1 cells), **261,** 113
  serial passage, effect on function and on responsiveness to TGF-β1 and BMP-2 (MC3T3-E1 cells), **265,** 246
  stem cell factor production regulated by parathyroid hormone (human), **255,** 778
Osteoblasts/stromal cells
  support of osteoclast formation, effect of expression of OCIF and osteoclast differentiation factor (mouse), **257,** 719
Osteoclast differentiation factor, *see also* ODF/OPGL/TRANCE/RANKL
  and osteoclastogenesis inhibitory factor
    production, reciprocal regulation by bFGF in induction of osteoclast formation (mouse), **265,** 158
    reciprocal gene expression, regulation of osteoclast formation, **257,** 719
  production, suppression by bFGF in inhibition of 1α,25-dihydroxyvitamin D_3-induced osteoclast formation (mouse), **265,** 45
  upregulation, role in BMP-2 enhancement of osteoclast formation in presence of IL-1α (mouse), **259,** 97

Osteoclast-like cells
  formation, inhibition by high extracellular Ca^{2+} by acting on calcium-sensing receptor in precursor cells (mouse), **261,** 144
Osteoclastogenesis inhibitory factor
  and osteoclast differentiation factor
    production, reciprocal regulation by bFGF in induction of osteoclast formation (mouse), **265,** 158
    reciprocal gene expression, regulation of osteoclast formation, **257,** 719
Osteoclastoma
  thrombospondin expression (human), **263,** 389
Osteoclast precursors
  calcium-sensing receptor, role in inhibition of osteoclast-like cell formation by high extracellular Ca^{2+} (mouse), **261,** 144
  circulating, direct action of 1,25-dihydroxyvitamin D$_3$ and prostaglandin E$_2$ (human), **264,** 590
  17β-estradiol-induced apoptosis (human FLG 29.1 cells), **255,** 680
Osteoclasts
  calcineurin-A α and β isoforms in, molecular and functional evidence, **254,** 248
  differentiation
    effect of extracellular calcium concentrations *in vitro* (mouse), **265,** 484
    in hematopoietic cell cultures stimulated with RANKL and M-CSF, enhancement by TGF-β, **265,** 233
    regulation by ODF/OPGL/TRANCE/RANKL, **256,** 449
  formation
    1α,25-dihydroxyvitamin D$_3$-induced, inhibition by bFGF via suppression of osteoclast differentiation factor production (mouse), **265,** 45
    enhancement by BMP-2 in presence of IL-1α, role of upregulation of ODF and cyclooxygenase-2 (mouse), **259,** 97
    induction by bFGF by reciprocal regulation of osteoclast differentiation factor and osteoclastogenesis inhibitory factor production (mouse), **265,** 158
    regulation by reciprocal gene expression of OCIF and osteoclast differentiation factor (mouse), **257,** 719
    support by activated T lymphocytes *in vitro* (human), **265,** 144
  function, regulation by ODF/OPGL/TRANCE/RANKL, **256,** 449
  lysosomal cysteine proteinases and matrix metalloproteinases, in bone resorption: modes of action (rabbit), **258,** 173
  nitric oxide production, direct microsensor measurement (chicken), **259,** 73; *erratum,* **265,** 770
  regulation by substance P (rabbit), **262,** 418
  single integrin molecule adhesion forces in intact cells, AFM measurement (rat), **259,** 645
Osteocytes
  alveolar, synergistic effect of parathyroid hormone and stretching (human), **264,** 719
Osteogenic cells
  BMP-4 gene expression, role of E-box motif, **263,** 560
Osteopontin
  expression
    enhancement by high glucose in cultured aortic smooth muscle cells (rat), **258,** 722
    in Kupffer cells and hepatic macrophages and stellate cells after CCl$_4$ intoxication (rat), **256,** 527
  murine, epitopes, detection by monoclonal antibodies, **257,** 6
Osteoporosis
  genetic marker: association of bone mineral density with PPARγ gene polymorphism, **260,** 122
Osteoprotegerin ligand, *see also* ODF/OPGL/TRANCE/RANKL
  mRNA, upregulation by Indian hedgehog in chondrocytic EC cells, **257,** 814
Osteosarcoma
  metastatic, differentially expressed genes in, cloning by modified cDNA-AFLP method (rat), **261,** 35
Osteosarcoma cells
  Ca^{2+} and extracellular acidification rate responses to parathyroid hormone fragments (ROS 17/2, SaOS-2 cells), **266,** 448
  osteoblastic Saos-2/B-10 cells, mitogenic and antiapoptotic effects of IGF binding protein-6, **263,** 786
Otx proteins
  function and evolution, review, **258,** 229; *erratum,* **260,** 575
Outer-membrane proteins
  FepA and FhuE, responsible for iron transport, overproduction in *E. coli hfq::cat* mutant, **264,** 525
Ovalbumin
  humoral response with vaccine delivery system using immunopotentiating fusogenic liposomes, **261,** 824
Ovarian carcinoma cells
  multidrug-resistant 2780AD cells, chemosensitization, inhibition by hexanoylglucosylceramide, **266,** 492
  proteasome accumulation induced by glucose starvation (A2780 cells), **258,** 448
  telomerase activity, upregulation by hypoxia via MAP kinase signaling (A2780 cells), **260,** 365
Ovarian follicles
  angiogenin localization and mRNA expression (bovine), **257,** 182
  cloning and expression of two carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNAs (rainbow trout), **255,** 123
Ovary
  expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
  gonadotropin receptor cDNA expression (amago salmon), **263,** 584
  gonadotropin receptor GTH-RI cDNA expressed in, cloning and functional characterization (amago salmon), **265,** 366
  morphological change and angiogenesis in, role of angiogenin (bovine), **257,** 182
  phosphatase activity resistant to SDS and pronase treatments (*Xenopus laevis*), **264,** 689
Ovomucoid
  third domain, chemical modification, characterization of residues in human IgE- and IgG-binding sites, **261,** 610
Oxacillin
  effect on expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
Oxalate
  induction of expression of nuclear pore complex oxalate binding protein gp210 (Vero cells), **266,** 72
Oxidation
  glutathione-dependent modification of protoporphyrin and other dicarboxylic porphyrins by mammalian and plant peroxidases, **259,** 195
  metal-catalyzed, susceptibility of proteins to, increase due to conversion of lysine to N^{ϵ}-(carboxymethyl)lysine, **264,** 207
Oxidative damage to DNA
  Fenton reaction-mediated, protective effect of kinetin, **265,** 499
  implications of discrepancies in measurement of UVC-induced 8-oxo-2′-deoxyguanosine by HPLC-EC and GC-MS, **259,** 374
  by minor toluene metabolites, related carcinogenesis and reproductive dysfunction (human), **261,** 478
  modulation by tomato consumption (human), **262,** 828
  by nitrobenzene metabolite in presence of NADH and Cu(II) (bovine), **257,** 555
Oxidative injury
  hepatocytes, protection by ursodeoxycholic acid via antioxidant induction, **263,** 537
  induction of cyclooxygenase activation in experimental hepatotoxicity (rat), **254,** 764
Oxidative phosphorylation
  regulation in human cells in aging and diabetes, **266,** 662

Oxidative stress
  Bcl-2 protein expression during, regulation in frog neuronal and human endothelial cells, **260,** 522
  and cell death mode: comparison of apoptosis and necrosis in HepG2 cells, **255,** 6
  diseases associated with, potential therapy, implications of G6PD and GAPDH mRNA upregulation by NAD$^+$ precursors in Jurkat cells, **255,** 133
  diseases of glycooxidative stress, relevance of protein aging by carboxymethylation of lysines, **260,** 332
  glutathione *S*-transferase isoforms defending against, compounds inducing, analysis in neuronal IMR-32 cells, **262,** 591
  heart, protection by manganese dipyridoxyl diphosphate in *ex vivo* rat model, **254,** 768
  induced high-molecular-weight aggregate of α-/γ-crystallins, formation (rat), **260,** 60
  induction by cellular enrichment with polyunsaturated fatty acids (human), **265,** 116
  manifestation in pathogenesis of arterial hypertension (ISIAH rat), **263,** 450
  neuronal survival against, role of glutaredoxin: GRX distribution in rat brain, **258,** 390
  in newborn infants with/without asphyxia, as measured by plasma antioxidants and free fatty acids, **257,** 244
  photochemical, associated *in vivo* lens-specific regulation of thioredoxin-1 in Emory mouse, **265,** 345
  role in upregulation of mitochondrial biogenesis genes in mtDNA-depleted HeLa cells, **258,** 44
  TCDD-mediated, in CYP1A2 knockout mice, **264,** 376
  thiamine deficiency *in vivo* model of, fiber cell degeneration in mouse lens produced by, **258,** 703
  transcriptional activation of apurinic/apyrimidinic endonuclease by, role of CREB, **261,** 859
  yeast, protective effects of cloned prokaryotic iron superoxide dismutase, **256,** 63
Oxindole I
  inhibition of cyclin D1–cdk4, **260,** 768
8-Oxo-2′-deoxyguanosine
  UVC-induced, discrepancies in measurement of, **259,** 374
Oxygen
  deprivation, *Drosophila* response to, role of cyclin-dependent kinase 5 activator-like molecule, **261,** 459
  ground and excited singlet state, role in red light-induced stimulation of *E. coli* cell growth, **257,** 753
  oscillatory consumption in single mouse islets of Langerhans, multiple patterns of, detection, **259,** 331
  production from H_2O_2 by copper–adenine catalyst, **263,** 672
  singlet
    photochemically generated, oxidation of hypotaurine to taurine, effect of azide, **254,** 661
    role in myeloperoxidase-mediated bacterial killing in neutrophil phagosome (human), **262,** 647
Oxygenase domain
  inducible nitric-oxide synthase, stoichiometric Arg binding, requirement for single molecule of tetrahydrobiopterin per dimer, **257,** 344
Oxygen evolution
  photosystem II reconstituted with recombinant 12-kDa extrinsic protein of red alga *Cyanidium caldarium,* **260,** 245
Oxygen radicals
  formation in solutions of 7,8-dihydroneopterin, **264,** 262
Oxyluciferin
  dissociated from *Photinus pyralis* luciferase system, emission of light, **265,** 273
Oxysterol binding protein
  mRNA level in HepG2 cells, effects of 15-ketosterols, **259,** 688
Oxytocin receptor gene
  in term myometrium, human MafF homologue specifically binding to, molecular cloning, **264,** 86

P

$P2Y_1$ receptor
  antagonism by benzoyl ATP (human, rat), **256,** 94
$P2Y_2$ receptor
  MAPKK-dependent growth factor-induced upregulation in rat VSMC, **258,** 648
p8
  mRNA expression *in vivo* and *in vitro,* induction by LPS (rat), **260,** 686
p15^{INK4B}
  Rb-independent inhibition of cell growth, **262,** 534
p21
  direct interaction with retinoblastoma tumor suppressor protein, **263,** 35
  p53-dependent radiation response in SV40-immortalized human fibroblasts, **257,** 168
p21$^{Cip1/Waf1}$
  zinc finger protein Ciz1 interacting with, cloning and characterization (human), **264,** 457
p21^{ras}
  p21^{ras}/Erk signaling pathway induced by acidic FGF, potentiation by cytodifferentiation of cultured astrocytes (rat), **260,** 441
  phosphatidylinositol 3-kinase-dependent MAP kinase activation via, in endothelial cells exposed to cyclic strain, **257,** 668
p21^{WAF}
  zinc-finger transcription factor binding to promoter of, GADD34-like gene interacting with, cloning, **256,** 249
p21WAF1/CIP1
  induction, role in troglitazone suppression of cell growth of myeloid leukemia cell lines, **261,** 833
p22$^{PRG1/IEX-1}$
  mutant nonspliced variant IEX-1L, lack of *in vivo* expression (Jurkat cells), **262,** 139
p27
  modulation of cell cycle progression and chemosensitivity in human malignant glioma, **261,** 890
p27^{Kip1}
  direct interaction with 73-kDa heat shock cognate protein during G1/S transition (rat FRTL-5 cells), **257,** 340
  induction by IL-6, role in IL-6 induction of G_1 arrest in LNCaP prostate tumor cells, **257,** 609
p38 kinase
  role in interferon stimulatory response element activation by hepatocyte isolation (rat), **263,** 627
p38 MAP kinase
  activation and activity, effects of pyridinylimidazole compound SB 203580, **263,** 825
  activation by cell swelling in epithelial A6 cells, **266,** 547
  agonist-stimulated activation in platelets, potentiation by thrombopoietin (human), **261,** 58
  inhibitor SB203580, alleviation of UV-induced phosphorylation of p53 at serine 389 and p53 activation, **261,** 464
  negative regulation of ERK1/2-mediated growth of AIDS-associated Kaposi's sarcoma cells, **264,** 676
  regions required for substrate binding and phosphorylation, identification, **266,** 284
  regulation by human α_{1A}-adrenoceptors expressed in Rat-1 cells, **261,** 372
  role in serum induction of collagen X promoter (MCT cells), **262,** 50
  TNF-α-induced activation, negative regulation by thioredoxin, **258,** 443

p38 stress-activated protein kinase
  activation by hepatocyte isolation: induction of gene 33 expression (rat), **254,** 728
p40*phox*
  –p67*phox* binding, disruption by Rac1: novel role for Rac in NADPH oxidase activation, **263,** 118
p42KKIALRE
  biochemical properties and physiological functions, **266,** 291
p44
  outer surface membrane antigen of human granulocytic ehrlichiosis agent, expression changes as measure of infection and antimicrobial susceptibility in HL-60 cells, **257,** 351
p44 MAP kinase/ERK1
  phosphorylation of CBP histone acetyl transferase *in vitro,* stimulation of activity (NIH3T3 cells), **262,** 157
p44/p42 MAP kinase
  angiotensin II-induced activity in human mesangial cells, inhibitory effect of focal adhesion, mediation by integrins, **261,** 820
  human somatostatin sst_4 receptor-mediated stimulation, role of PI 3-kinase, **263,** 239
p53
  activation in MDM2-overexpressing BL2 cells through phosphorylation, **264,** 860
  apoptosis induced by, as safeguard against cancer, **265,** 1
  comparative gene expression profiling in response to, in human lung cancer cell line, **264,** 891
  dependent apoptotic cells, isolation of differentially expressed cDNAs (human colon cancer cells), **261,** 864
  DNA-binding specificity *in vitro,* modification by mutations at position 277 (human), **263,** 1
  downregulation of estrogen receptor-responsive genes by interference with binding of ER to estrogen-responsive elements (HeLa cells), **264,** 359
  Fas expression dependent on, induced by apoptotic stimuli, relationship to JNK activation, **256,** 595
  and mdm2, cellular levels, effect of arsenic, **263,** 446
  mutant $p53^{val135}$, genes with altered expression in Rat 6 cells transformed by, identification and characterization, **266,** 472
  mutants, phosphorylation at serine-15 or serine-315, inhibition of, resulting partial restoration of wild-type p53 function, **261,** 256
  radiation response of p21 dependent on, in SV40-immortalized human fibroblasts, **257,** 168
  role in DNA double strand break repair of episomal vectors in lymphoblasts (human), **264,** 702
  role in heat-induced G1 arrest (HeLa, NCI-H1299 cells), **266,** 377
  senescence induced by, reduction of mitochondrial membrane potential in, and effect on permeability transition pore responsiveness (human), **261,** 123
  UV-induced phosphorylation by p38 MAP kinase at serine 389 and activation, alleviation by SB203580, **261,** 464
  wild-type, regularly spliced, reduced levels in poly(ADP-ribose) polymerase-deficient fibroblasts, compensatory expression of p73 (mouse), **255,** 399
  wild-type and mutated, effects on induction of apoptosis by adenovirus E1A, c-Myc, Bax, and Nip3 in p53 null mouse cerebellum cells, **255,** 722
p53 gene
  and *scid* gene, mutations in, cooperativity in lymphomagenesis in doubly heterozygous mice, **255,** 99
p53 peptide
  interaction with S100A1, role of S100A1 C-terminal extension, **254,** 36
p53-responsive genes
  isolation of differentially expressed cDNAs from p53-dependent apoptotic cells (human colon cancer cells), **261,** 864
p56KKIAMRE
  biochemical properties and physiological functions, **266,** 291
$p56^{Lck}$
  calcium-induced phosphorylation in human T cells via calmodulin-dependent kinase, **259,** 283
p62
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
p67*phox*
  –p40*phox* binding, disruption by Rac1: novel role for Rac in NADPH oxidase activation, **263,** 118
p70 S6 kinase
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
  thrombin-stimulated activity in Swiss 3T3 cells, selective potentiation by NO donors, **266,** 352
p73
  compensatory expression in poly(ADP-ribose) polymerase-deficient fibroblasts in response to reduced level of regularly spliced wild-type p53 (mouse), **255,** 399
p75 neurotrophin receptor
  death domain, peptide ligand to, selection and NMR determination of binding sites, **255,** 104
p85
  gene regulating cytokinesis initiation in *Tetrahymena,* molecular cloning, **264,** 112
  subunit of PI3 kinase, lack of binding to human Flt3 receptor in hematopoietic cells: complex formation with SHP2, SHIP, and tyrosine-phosphorylated proteins, **254,** 440
p90 S6 kinase
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
p100
  human, *Histoplasma capsulatum* homologue of, expression during infection of murine macrophages, **254,** 605
  tyrosine phosphorylated, association with PI3 kinase subunit p85 in hematopoietic cells: lack of p85 association with human Flt3 receptor, **254,** 440
p107
  strong cyclin A interaction compared to E2F1 domain, association with less efficient DP1 phosphorylation, **258,** 596
p120
  tyrosine phosphorylated, association with PI3 kinase subunit p85 in hematopoietic cells: lack of p85 association with human Flt3 receptor, **254,** 440
$p120^{Cbl}$
  as downstream substrate of Hck protein-tyrosine kinase, **257,** 129
$p130^{Cas}$
  promotion of fibroblast movement, migration, and spreading, **262,** 25
p140
  replication factor C large subunit, telomere-binding activity (human), **258,** 482
p150,95
  α subunit, binding of fibrinogen, **264,** 630
PACAP, *see* Pituitary adenylate cyclase activating peptide
Paclitaxel, *see also* Taxol
  acceleration of course of multidrug resistant leukemia, **266,** 167
  apoptosis and mitochondrial dysfunction mediated by, resistance of human leukemia cells to, increase due to loss of Bcl-2 phosphorylation loop domain, **259,** 67
  inhibition of TNF-α-stimulated aromatase (human), **261,** 214

- Palmitoleic acid
  - plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
- Palmitoylation
  - SNAP-23 and SNAP-25 *in vivo,* **258,** 407
- Palmitylation
  - identification and characterization of myristylated and palmitylated Ser/Thr protein kinase (human, mouse), **259,** 533
- Pamidronate
  - inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
- Pancreas
  - adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  - fetal
    - CCK$_A$ receptor expression and localization, ontogeny and species differences (human, mouse, pig, rat), **260,** 820
    - chloride–bicarbonate exchangers (human), **263,** 315
  - Na$^+$ bicarbonate cotransporter, cloning and immunolocalization (rat), **264,** 291
  - p8 mRNA expression *in vivo* and *in vitro* in response to LPS (rat), **260,** 686
  - from patients with mitochondrial gene mutation associated with impaired insulin secretion, evaluation, **259,** 149
  - postnatal development, DNA demethylation during, correlation with cholecystokinin type A receptor gene expression (rat), **264,** 29
- Pancreatic acinar cells
  - actin role in regulated exocytosis and compensatory membrane retrieval, **266,** 632
  - AR42J
    - p8 mRNA expression, induction by LPS, **260,** 686
    - SNARE protein expression and adenoviral transfection, **260,** 781
    - sorting of constitutive secretory protein to regulated secretory pathway, **257,** 545
  - cholecystokinin-evoked Ca^{2+} waves, modulation by activation of cPLA$_2$, PLD, and PKC (mouse), **261,** 726
  - cholecystokinin-induced paxillin redistribution (rat), **254,** 400
  - cyclooxygenase-2 transcription and amylase secretion, effects of induction of acute pancreatitis (rat), **265,** 545
  - receptor-operated Ca^{2+} influx and refilling in, distinct characteristics (rat), **256,** 579
- Pancreatic adenocarcinoma
  - retinoid anticancer studies using, optimization of treatment conditions for, **257,** 596
- Pancreatic adenocarcinoma cells
  - cell lines with high metastatic potential, expression of high levels of ezrin (human), **258,** 395
- Pancreatic beta cells
  - adenylyl cyclase subtype expression (human, rat), **254,** 703
  - calcium-sensing receptor expression (rat), **264,** 615
  - Gαolf identification by RT-PCR in purified normal cells from rat models of non-insulin-dependent diabetes, **254,** 269
  - glucose-induced Ca^{2+} transients, synchronization by diffusible factor (ob/ob mouse), **254,** 436
  - insulin exocytosis from immature or mature secretory granules, α-SNAP function (rat), **260,** 127
  - K$_{ATP}$ channel, Kir6.2 subunit, low-affinity binding sites for glibenclamide (murine MIN6 cells), **257,** 766
- Pancreatic cancer
  - Smad6 overexpression (human), **255,** 268
- Pancreatic cancer cells
  - apoptosis, morphological changes, and carbonic anhydrase expression, induction by lipoxygenase inhibition (human), **266,** 392
  - conditioned media from, effect on glucose uptake and lactate production in L6 myoblasts (PANC-1 cells), **260,** 626
  - epidermal growth factor receptor phosphorylation, reduction by phorbol ester via tyrosine phosphatase activation (human), **265,** 728
  - growth, TGF-β-induced inhibition, suppression by Smad6 (COLO-357 cells), **255,** 268
  - proliferation, effects of lipoxygenase inhibitors (human), **261,** 218
- Pancreatic cancer conditioned medium
  - glucose metabolic alterations induced in isolated perfused rat hepatocytes by, **257,** 622
- Pancreatic islets
  - adenylyl cyclase type 3 full-length cDNA expression (human), **254,** 548
  - B and non-B, metabolic response to D-glucose and hexose esters (rat), **262,** 346
  - function, effects of acute or prolonged exposure to leptin (human), **256,** 637
  - Gαolf identification by RT-PCR in rat models of non-insulin-dependent diabetes, **254,** 269
  - D-glucose and D-glucose pentaacetate ester metabolism in GLUT4 null mice, **264,** 855
  - intracellular ATP concentration, regulation under conditions of reduced ATP consumption (rat), **261,** 439
  - PACAP identification as islet neuropeptide contributing to glucose-stimulated insulin secretion (mouse), **256,** 664
  - single, detection of multiple patterns of oscillatory oxygen consumption (mouse), **259,** 331
- Pancreatic lipase
  - inhibition by specific chiral isomers of β-lactone DU-6622, **265,** 536
- Pancreatic thread protein
  - human, with possible Alzheimer's role, secondary structure in solution at acid pH, **258,** 653
- Pancreatitis
  - acute, induction in pancreatic acinar cells, stimulation of cyclooxygenase-2 transcription and inhibition of amylase secretion (rat), **265,** 545
  - hereditary, unifying pathomechanism: rat trypsin stabilization by mutation Arg117→His, **264,** 505
- Papain
  - complex with CLIK148, crystal structure: analysis of inhibition mechanism of cathepsin L-specific inhibitors, **266,** 411
  - urine preparation treated with, induction of region-specific Fos expression in rat accessory olfactory bulb, **260,** 222
- Parathyroid carcinoma
  - molecular diagnosis with telomerase repeat amplification protocol (human), **265,** 252
- Parathyroid gland
  - Rab3 isoform cloning and localization (bovine, human, rat), **255,** 645
- Parathyroid hormone
  - fragments, effects on cytosolic free Ca^{2+} and extracellular acidification rate in ROS 17/2 and SaOS-2 cells, **266,** 448
  - regulation of stem cell factor production in human osteoblasts and osteoblast-like cells, **255,** 778
  - and stretching, synergistic effect on alveolar osteocytes (human), **264,** 719
- Parathyroid hormone/parathyroid hormone-related peptide receptor
  - gene promoter element enhancing expression in rat osteoblastic osteosarcoma cells, **258,** 336
- Parathyroid hormone-related protein
  - suppression in breast cancer cells by calcitonin, **265,** 260
- Parkinson disease
  - manganese superoxide dismutase gene from German patients, mitochondrial targeting sequence and coding region polymorphisms, **255,** 749
- Parotid acinar cells
  - Ca^{2+} initiation sites evoked by muscarinic receptor stimulation, millisecond analysis (rat), **259,** 656
  - vesicles isolated from basolateral region of plasma membrane, acetate and formate uptake (sheep), **259,** 606

Parotid cells
  apical plasma membrane, aquaporin-5 trafficking to, induction by α_1-adrenoceptor (rat), **265,** 94
Parthenolide
  effect on NO synthase gene expression in rat aortic smooth muscle cells, **262,** 375
Partition proteins
  SopA and SopB, of F plasmid, interaction, **263,** 113
Parturition
  term myometrium, human MafF homologue specifically binding to oxytocin receptor gene in, molecular cloning, **264,** 86
Parvovirus minute virus of mice
  nonstructural protein 2, nuclear export, mediation by CRM1, **264,** 144
Parvulin
  eukaryotic homologues, identification: subfamily of peptidylprolyl *cis-trans*-isomerases, **259,** 557
Pax2
  repression of gene transcription, mediation by paired domain DNA recognition motif (zebrafish), **266,** 532
Pax4
  paired homeobox protein, DNA binding and transactivation properties, **259,** 510
Paxillin
  cholecystokinin-induced redistribution in rat pancreatic acinar cells, **254,** 400
  tyrosine phosphorylated, binding by Chk in blastic T cells (human), **256,** 668
[N,C,rANP(1–28)]pBNP32 derivatives
  p-benzoylbenzoylated, development, and affinity photolabeling of bovine natriuretic peptide receptor type A, **258,** 81
PC cell-derived growth factor
  expression in breast cancer cells, stimulation by estradiol, **256,** 204
PCR clamping
  peptide nucleic acid-mediated, detection of apolipoprotein B mRNA editing, **259,** 311
PCR fingerprinting
  arbitrarily primed, detection of DNA abnormalities: *MDM2* amplification in mediastinum fibrosarcoma, **258,** 271
PD098059
  inactivation of extracellular signal-regulated kinase, role in cell survival (rat mesangial cells), **264,** 696
PD98059
  MAP kinase kinase inhibitor, induction of apoptosis in human luteinized granulosa cells, **263,** 143
  MEK1 inhibitor, nonspecific inhibition of myogenic tone in rat middle cerebral arteries, **257,** 523
PEA3
  site flanked by SP1, SP4, and GATA sites, regulation of differentiation-dependent *Brachyury* expression in P19 cells, **254,** 542
PECAM-1
  dimerization and N-glycosylation, **261,** 283
Peflin
  five-EF-hand protein, similarity to apoptosis-linked gene 2 (human), **263,** 68
Penicillin-binding protein multienzyme complexes
  identification in *Haemophilus influenzae,* **264,** 191
Penta-EF-hand proteins
  peflin, similarity to apoptosis-linked gene 2 (human), **263,** 68
Pentaerythrityl tetranitrate
  targeting of ferritin in endothelial cells (pig aorta), **261,** 28
(+)-Pentazocine
  upregulation of H^+/peptide transporter PEPT1 in Caco-2 cells, **261,** 242
PEPT1
  upregulation by σ receptor ligand in Caco-2 cells, **261,** 242
Peptidase
  cleavage enzymes for sterol regulatory element binding protein in hamster liver microsomes, **258,** 542
Peptide ligand
  to p75 neurotrophin receptor death domain, selection, and NMR determination of binding sites, **255,** 104
Peptide nucleic acids
  in vitro transcriptional and translational block of *bcl-2* gene, **264,** 537
  PCR clamping mediated by, detection of apolipoprotein B mRNA editing, **259,** 311
Peptides
  antifungal, isolation from *Aspergillus niger* and characterization, **263,** 646
  association with heat shock protein gp96 *in vivo* (mouse), **262,** 813
  autocrine induction in keratinocytes (human), **263,** 327
  bacteriophage biosensor displaying, in detection of molecular interactions, **262,** 801
  bovine lactoferrin fragments involved in inhibition of herpes simplex virus type 1 infection, **264,** 19
  calcicludine and DTX-I, structure–activity relationship (rat brain), **262,** 319
  chimeric, consisting of GHRP-6 and somatostatin, antiproliferative and GH-inhibitory activity, **259,** 379
  from collagen type IV α3 chain, protection of basement membrane against damage by neutrophils (human), **261,** 247
  Fc-binding, minimized, from protein A, induction of immunocyte proliferation and Th1-type response in mice, **258,** 141
  gp41-derived, interactions with gp41, correlation with antimembrane fusion activity, **265,** 625
  induced depolymerization of recombinant C-terminal fragment of BiP/GRP78, speçificity, **263,** 181
  α-MSH, inhibition of NO and TNF-α production by microglial cells activated with β-amyloid and IFN-γ, **263,** 251
  phosphate-containing, in calreticulin, **259,** 233
  proteolytically cleaved fragment of bacterial protein A, functional mimicry by, **260,** 111
  SDF-1 N-terminal, biological activity, enhancement by attachment of C-terminus, **264,** 42
  streptokinase C-terminal, circulating antibodies against, in normal blood donors, **263,** 454
  synthetic
    analysis of role of postively charged residues in CXCR4 recognition, **263,** 691
    β-hairpin loop of rabbit defensin NP-2, mitochondrial activity, **254,** 281
    calmodulin fragments, in analysis of structural features of CaM phosphorylation by CK2, **256,** 442
    laminin-related YIGSR, bioconjugation
      with poly(styrene co-maleic acid) and effect on lung metastasis of B16-BL6 melanoma cells, **255,** 75
      with polyvinyl pyrrolidone, increase of YIGSR antimetastatic effect due to longer plasma half-life (mouse), **264,** 763
    leucine zipper peptides rich in glycine and sarcosine, in probing of roles of side chains and backbone in protein structure, **265,** 350
    NADPH binding site in gp91-*phox,* uncompetitive inhibition of superoxide generation, **257,** 124
    prion peptide 106–126
      aggregation *in vitro,* prevention by clusterin, **259,** 336
      and full-length PrP, spontaneous deamidation and isomerization of Asn108 in, **261,** 578
  thioredoxin fragment, folded and functional: minithioredoxin, **261,** 676
  with threonine residues at P1′ position, endopeptidase with strict specificity (*Archachatina ventricosa*), **256,** 307
  thrombin receptor agonist, induced Ca^{2+} mobilization in platelets, synergistic effect of thrombopoietin (human), **263,** 230

Peptidylprolyl *cis-trans*-isomerase
  subfamily: identification of eukaryotic parvulin homologues, **259,** 557
Periadventitial cuff
  induced carotid injury in apoE null mice, VCAM-1 expression and neointima formation after, reduction by reconstituted HDL containing human apoA-1, **264,** 465
Pericytes
  microvascular, calcification, acceleration by AGEs (bovine), **258,** 353
  retinal, migration, effect of angiotensin II (bovine), **266,** 382
Periodontal ligament
  extracellular role of S100A4 (bovine), **255,** 416
Peripheral blood lymphocytes
  HIV-1 infection, role of pertussis toxin-sensitive G protein-coupled signaling and mediation of cAMP downregulation (human), **256,** 429
Peripheral blood mononuclear cells
  circulating osteoclast precursors, direct action of 1,25-dihydroxyvitamin D_3 and prostaglandin E_2 (human), **264,** 590
PERK/PEK
  role in inhibition of protein synthesis in leukemia cells by flavonoids, **265,** 589
Perlecan
  deposition by mammary epithelial cells, promotion by chromogranin A, **259,** 563
  domain I, expression as recombinant heparan sulfate proteoglycan with 20-kDa glycosaminoglycan chains (human), **256,** 542
  domain V, localization of glycosaminoglycan substitution sites (mouse), **265,** 680
Permeability transition
  mitochondrial, potentiation by chronic ethanol treatment (rat), **265,** 405
Permeability transition pore
  mitochondrial, altered responsiveness in p53-induced senescence (human), **261,** 123
Peroxidases
  mammalian and plant, GSH-dependent oxidative modification of protoporphyrin and other dicarboxylic porphyrins, **259,** 195
Peroxidasin
  human homologue of *Drosophila* dPxn gene, activation in p53-dependent apoptotic cells, **261,** 864
Peroxiredoxin I
  silica-induced, rapid degradation in Rat2 cells, **265,** 541
Peroxiredoxin II
  silica-induced, rapid degradation in Rat2 cells, **265,** 541
Peroxiredoxin gene
  isotype from Chinese cabbage, cloning and expression and comparison to 2Cys-peroxiredoxin from same plant, **258,** 768
Peroxisomal protein
  Yor180Cp, of fatty acid metabolism in yeast, preliminary characterization, **260,** 28
Peroxisome proliferator-activated receptor α
  direct binding of fatty acids and eicosanoids (human), **260,** 609
  effects on UCP-1 expression and rosiglitazone-induced PPARγ-mediated effects on UCP-1 mRNA in fetal brown adipocytes (rat), **264,** 311
Peroxisome proliferator-activated receptor γ
  activation with rosiglitazone in adipocytes, regulation of gene expression (human), **265,** 265
  agonists of, enhancement of vascular endothelial adhesiveness by increase of ICAM-1 expression (human), **263,** 718
  expression in aortic smooth muscle cells (rat), **247,** 353; *erratum,* **255,** 549
  gene expression in cultured rat mesangial cells, advanced glycation end product-induced, **264,** 441
  gene polymorphism, association with bone mineral density, and gene expression in rat osteoblasts, **260,** 122
  increased expression in Alzheimer's disease brains, **254,** 582
  induction of adipocyte fatty acid binding protein gene expression in monocytes (human), **261,** 456
  inhibition of c-*MET* expression in gastric cancer cells via suppression of *Ets* (human), **265,** 453
  ligand 15-deoxy-$\Delta^{12,14}$-prostaglandin J_2, induction of apoptosis in JEG3 choriocarcinoma cells, **262,** 579
  ligand-dependent induction of STAT1, STAT5A, and STAT5B during adipogenesis (NIH-3T3 cells), **262,** 216
  mediated rosiglitazone-induced increase in UCP-1 mRNA in fetal brown adipocytes, attenuation by PPARα activation (rat), **264,** 311
  PPARγ1, expression in white blood cells, dynamic regulation by acute endotoxemia (pig), **263,** 749
  PPARγ2, COOH-terminally truncated mutant, inhibition of adipogenesis in 3T3-L1 cells, **264,** 93
  Pro12Ala missense mutation, relationship to diabetes mellitus, **254,** 450
  role in endothelial function: PAI-1 downregulation by thiazolidinediones, **258,** 431
  role in vascular endothelial function (bovine), **254,** 757
Peroxisome proliferator-activated receptor γ coactivator-1
  expression in skeletal muscle, role of β_3-adrenergic receptor and/or putative β_4-adrenergic receptor (mouse), **261,** 870
Peroxisomes
  β-oxidation of branched-chain fatty acids, role of carnitine octanoyltransferase (human), **263,** 213
Peroxisome targeting signal 1
  C-terminal, heterogeneity in *PEX5*-defective patients, **262,** 504
Peroxynitritase
  KatG activity as, in *Mycobacterium tuberculosis,* **256,** 485
Peroxynitrite
  induced apoptosis in dopaminergic neuroblastoma SH-SY5Y cells, effect of MAP kinase (human), **263,** 504
  induction of phospholipid hydroperoxide formation in rat brain synaptosomes, and inhibition by α-tocopherol, **257,** 651
  oxidation of tetrahydrobiopterin, implications for vascular endothelial function, **263,** 681
  reaction with biological nitrogen-containing cyclic molecules by radical pathway, **259,** 460
  skin treated with, formation and loss of nitrated proteins *in vitro* (rat), **262,** 781
Pertussis toxin
  G protein-coupled signaling sensitive to, role in HIV-1 infection in PBLs, **256,** 429
  signal transduction pathway sensitive to, activation by serum amyloid A in induction of mast cell chemotaxis (human), **254,** 143
PEST regions
  C-terminus, of mammalian ornithine decarboxylase and histidine decarboxylase, different roles in protein degradation, **257,** 269
Peutz–Jeghers syndrome
  mutant LKB1 in, loss of cytoplasmic retention ability (human), **261,** 750
P-glycoprotein
  gp170, overexpression in human colon carcinoma cell line, effect on differentiation, **259,** 43
  inhibition by hexanoylglucosylceramide in multidrug-resistant ovarian carcinoma 2780AD cells, **266,** 492
  MDR1, drug-induced, role in phosphatidylcholine transport in MDR3-negative epithelial cell lines, **262,** 121
  MDR1 gene encoding, mRNA AU-rich 3′ untranslated region, inefficient mRNA destabilization function (human), **261,** 627
  substrates of, acceleration of course of multidrug resistant leukemia, **266,** 167
pH
  alkaline, high pH-inducible gene *SHC1* required for growth in *Saccharomyces cerevisiae* at, identification, **255,** 116

  role in inhibition by unconjugated bilirubin of glutamate uptake by cortical astrocytes *in vitro* (rat), **265,** 67
Phagosome
  neutrophil, myeloperoxidase-mediated bacterial killing in, role of singlet oxygen (human), **262,** 647
Phanerochaete chrysosporium
  two-component tetrachlorohydroquinone reductive dehalogenase system from, **257,** 901; *erratum,* **259,** 232
Pharbin
  induction of dendritic appearances in fibroblasts (mouse), **261,** 188
Phenobarbital
  CYP2B1 and CYP2B2 gene expression induced by, role of phosphorylation/dephosphorylation steps (rat hepatocytes), **264,** 530
  induction of hepatic α1-acid glycoprotein gene, role of NF-κB (rat), **254,** 93
  primary hepatocyte cultures from mice treated with, EGF-induced receptor autophosphorylation in, **260,** 483
Phenobarbitone, *see* Phenobarbital
Phenoloxidase
  extracellular low-molecular mass component from *Thermoascus aurantiacus* with activity of, isolation and partial characterization, **256,** 20
Phenol red
  and retinoid anticancer effects in pancreatic adenocarcinoma model: treatment optimization, **257,** 596
Phenol sulfotransferase
  bovine, and coenzyme A, inhibition and binding studies, **261,** 815
Phenotype
  partial D category D^{Va}, genomic organization: detection of D^{Va}-like phenotype (human), **254,** 786
Phenylalanine
  Phe-138 in second intracellular loop of human thromboxane receptor, critical role in receptor–G-protein coupling, **264,** 171
  role in anti-dsDNA autoantibody cross-reaction with phosphoprotein P1 (human), **263,** 334
L-Phenylalanine
  transport, role in melanogenesis (human), **262,** 423
Phenylalanyl-tRNA synthetase
  human, cloning, sequencing, and expression, **255,** 765
Phenylhydronitroxide radical
  role in oxidative DNA damage by nitrosobenzene in presence of NADH and Cu(II), **257,** 555
Phenylpropanoid pathway
  monolignol formation in loblolly pine, multisite modulation of flux during, **261,** 652
Pheochromocytoma
  sporadic, mutation at Asp 631 of Ret identified in, mechanism of Ret activation by, **255,** 587
Pheochromocytoma PC12 cells
  CDK4-mediated apoptotic cascade, **260,** 806
  MPP$^+$-induced apoptosis, glucose protection from, role of mitochondrial membrane potential and ATP synthase, **257,** 440
  myosin V from, characterization, **262,** 98
  nerve growth factor-induced neurite outgrowth, promotion by prostaglandin J$_2$ and metabolites, **258,** 50
  protein tyrosine dephosphorylation in, stimulation by laminin, **262,** 713
  in study of hairpin ribozyme specificity *in vivo,* **257,** 356
Pheromone-binding protein
  structural analysis and disulfide-bridge pairing (*Bombyx mori*), **266,** 386
Pheromones
  protease-sensitive urinary, induction of region-specific Fos expression in rat accessory olfactory bulb, **260,** 222
Phlebia radiata
  manganese peroxidase from, mediated lipid peroxidation, coupling with destruction of nonphenolic lignin model compounds and ^{14}C-labeled lignins, **259,** 212
phnIJ genes
  encoding acetaldehyde dehydrogenase (acylating) and 4-hydroxy-2-oxovalerate aldolase in *Pseudomonas* sp. DJ77, cloning and evolution, **256,** 469
Phorbol myristate acetate
  activation of neutrophil NADPH oxidase, inhibition by specific SAPK2/p38 inhibitor SB 203580, **259,** 465
  ceramide synergism with, in induction of IκB degradation, **263,** 63
  and excitotoxins, effects on ROS production in cerebellar granule cells, **256,** 320
  HIV-1 activation in U1 cells induced by, role of poly(ADP-ribose) polymerase modulation of LTR function, **262,** 285
  induced histamine release by rat mast cells, effect of HCO$_3^-$, **260,** 71
  induction of *IL1HY1* gene in THP-1 cells, **263,** 702
  induction of PKC activation leading to CD163 shedding from monocytes, **256,** 110
  reduction of EGF receptor phosphorylation in pancreatic cancer cells by tyrosine phosphatase activation (human), **265,** 728
  regulation of IL-6 expression, cell-specific differences (human lymphocytes, monocytes), **260,** 577
Phosphatase
  model PP2C → PP1 activation cascade via dual control of inhibitor-1 and DARPP-32 dephosphorylation by inositol glycan putative insulin mediators, **255,** 150
  in ovary, activity resistant to SDS and pronase treatments (*Xenopus laevis*), **264,** 689
  secreted activity in *Trypanosoma cruzi,* induction by platelet-activating factor, **266,** 36
Phosphatase/kinase cascade
  stress-activated, of *Bacillus subtilis* σ^B, activity in *E. coli,* **257,** 106
Phosphate
  inorganic, regulation of CryIVA protoxin, **262,** 359
Phosphate-containing peptide
  putative, in calreticulin, **259,** 233
Phosphate depletion
  enhancement of tissue-nonspecific alkaline phosphatase gene expression in marrow stromal cell line ST2, **265,** 24
Phosphate transporter
  sodium-dependent, expressed in human lung and small intestine, cloning and characterization, **258,** 578
Phosphatidylcholine
  biosynthesis
    by CHO cells, inhibition by diethanolamine, **262,** 600
    CTP:phosphocholine cytidylyltransferase in, regulatory mechanisms and functions, **257,** 643
  transport in MDR3-negative epithelial cell lines via drug-induced MDR1 P-glycoprotein (human), **262,** 121
Phosphatidylcholine hydroperoxide
  plasma, reduction by apolipoprotein B-100 (human), **259,** 185
Phosphatidylinositol
  arachidonate in, substitution by non-methylene-interrupted polyunsaturated fatty acids (HepG2 cells), **264,** 683
Phosphatidylinositol 3-kinase
  activity, and phosphorylation of downstream signaling molecules, mediation by Ret with MEN 2B mutation (human), **262,** 68
  and Akt/PKB, activations in ZDF liver, insulin signaling between, impairment by hyperglycemia (rat), **266,** 252
  and G proteins, role in secretory IgA-mediated basophil activation (human), **264,** 575
  MAP kinase activation dependent on, via p21ras in endothelial cells exposed to cyclic strain, **257,** 668

Phosphatidylinositol 3-kinase (*continued*)
  modulation of nitric-oxide synthase mRNA induction by shear stress (bovine aorta), **254,** 231; *erratum,* **256,** 255
  nuclear translocation, induction by monocytic differentiation of HL-60 cells, **259,** 314
  p85 subunit, lack of binding to human Flt3 receptor in hematopoietic cells: complex formation with SHP2, SHIP, and tyrosine-phosphorylated proteins, **254,** 440
  p85α regulatory subunit, mRNA expression in adipocytes, regulation by PPARγ activation with rosiglitazone (human), **265,** 265
  and phospholipase C-γ signaling pathways of PDGF receptor, role in JNK/SAPK activation by PDGF in A431 cells, **261,** 641
  PI3K–Akt kinase signaling pathway, $\beta 4$ integrin subunit rescue of A431 cells from apoptosis via, **264,** 127
  products of, thrombin-induced formation in platelets, dependence on synergistic autocrine stimulation (human), **263,** 780
  role in insulin and glucagon regulation of CYP2E1 expression (rat), **266,** 304
  role in negative regulation of $\alpha_3\beta_1$ integrin expression by H-Ras in endothelial cells, **257,** 95
  signaling via, in regulation of immediate early gene expression in preadipocytes (3T3-L1 cells), **265,** 664
Phosphatidylinositol 3,4,5-trisphosphate receptor
  centaurin-α_1 function as, analysis (human), **262,** 237
Phosphatidylserine
  exposure during apoptosis, cell-type specificity and correlation with plasma membrane phospholipid scramblase expression, **266,** 504
  liposomes containing, uptake by liver cells *in vivo* and by sinusoidal liver cells in primary culture (rat), **256,** 57
  surface exposure on human erythrocytes, detection using annexin V-ferrofluid, **258,** 199
  synthesis in Jurkat T cells, regulation: caffeine bypass of CD3/TCR-induced protein-tyrosine kinases and calcium signals, **266,** 497
6-Phosphofructo-2-kinase/fructose 2,6-bisphosphatase
  hepatic cDNA for, isolation (chicken), **190,** 397; *erratum,* **259,** 711
  M-type, promoter activation at late stage of muscle differentiation (L6 myoblasts), **259,** 250
  placental-type, tissue distribution (rat), **257,** 177
Phosphoglycerate mutase m gene
  rat, 1.3-kb upstream 5′ region, conferral of testis and skeletal muscle-specific expression in transgenic mice, **263,** 244
Phosphoinositide 3-kinase
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
  p110α gene, cloning, structural organization, and chromosome localization (mouse), **262,** 438
  role in human somatostatin sst$_4$ receptor-mediated stimulation of p44/p42 MAP kinase and extracellular acidification, **263,** 239
Phosphoinositides
  hydrolysis, enhanced by phospholipase C$\beta 1$ or $\gamma 1$ overexpression, effects on stimulus-induced insulin release in MIN6 cells, **254,** 77
Phospholamban
  Ca^{2+}/CaM-dependent phosphorylation of Ca^{2+}-ATPase uncoupled from, stimulation of Ca^{2+} pumping in cardiac SR (rabbit), **258,** 66
Phospholipase
  activity, of ricin RCA$_{60}$, **258,** 252; *erratum,* **260,** 835
Phospholipase A$_2$
  activation, phospholipase D-dependent pathway, enabling by differentiation of U937 cells, **260,** 232
  Ca^{2+}-independent, requirement for $\alpha 2$-adrenergic-induced preadipocyte spreading, **265,** 572
  cytoplasmic, activation, modulation of cholecystokinin-evoked Ca^{2+} waves in mouse pancreatic acinar cells, **261,** 726
  mediated arachidonic acid release and cell spreading in NIH-3T3 cells, optimization by $\beta 1$-integrin cytosolic domain, **258,** 306
  secretory, induction of PLCγ-1 activation and Ca^{2+} mobilization in 1321N1 human astrocytoma cells, mechanism, **260,** 99
Phospholipase C
  inhibitors U73122 and U73343, activation of nuclear estrogen receptors (SKBR-3 cells), **261,** 340
  phosphatidylcholine-dependent, detection in hepatic chromatin and activity (rat), **265,** 640
  phosphatidylinositol-specific
    nuclear translocation, induction by monocytic differentiation of HL-60 cells, **259,** 314
    release of GPI-anchored carboxypeptidase M by, upregulation of enzyme synthesis (MDCK cells), **258,** 204
  related protein PCL-L$_2$, identification and characterization (human), **266,** 97
Phospholipase Cβ
  isozyme localization in cerebellum (mouse), **265,** 473
Phospholipase C$\beta 1$
  overexpression, phosphoinositide hydrolysis enhanced by, effects on stimulus-induced insulin release in MIN6 cells, **254,** 77
Phospholipase Cγ
  bovine aortic, association of heterotrimeric G proteins with, **258,** 425
  and phosphatidylinositol 3-kinase signaling pathways of PDGF receptor, role in JNK/SAPK activation by PDGF in A431 cells, **261,** 641
Phospholipase C$\gamma 1$
  complexation of EGF receptor with, disruption by chronic ethanol consumption, relevance to impaired hepatocyte proliferation (rat), **257,** 89
  overexpression, phosphoinositide hydrolysis enhanced by, effects on stimulus-induced insulin release in MIN6 cells, **254,** 77
  secretory PLA$_2$-induced activation in 1321N1 human astrocytoma cells, mechanism, **260,** 99
Phospholipase C$\delta 1$
  molecular cloning and expression analysis (mouse), **261,** 393
  PH domain-dependent translocation in MDCK cells, real-time visualization: response to hypo-osmotic stress, **254,** 284
  pleckstrin homology domain, antibodies to, inhibition of Ins(1,4,5)P$_3$-mediated Ca^{2+} release from endoplasmic reticulum (RBL cells), **260,** 42
Phospholipase D
  activation, modulation of cholecystokinin-evoked Ca^{2+} waves in mouse pancreatic acinar cells, **261,** 726
  dependent pathway of cytosolic PLA$_2$ activation, enabling by differentiation of U937 cells, **260,** 232
  PLD1b and PLD2a isoforms, expression in 3T3-L1 adipocytes in distinct subcellular compartments, **254,** 734
  stimulation by fMet-Leu-Phe in human neutrophils, role of MAP kinase, **264,** 371
  v-Raf-induced activation, Ral- and Rho-dependent mechanisms, **255,** 502
Phospholipid hydroperoxides
  peroxynitrite-induced formation in rat brain synaptosomes and inhibition by α-tocopherol, **257,** 651
Phospholipids
  membrane, oxidation, effects of immediate and long-term estradiol treatment of MCF-7 breast cancer cells, **260,** 410
Phospholipid scramblase
  plasma membrane, expression, correlation with phosphatidylserine exposure during apoptosis, **266,** 504
Phospholipid transfer protein
  promoter activity, reduction by fibrate, DNA sequences responsible for, identification (human), **264,** 802
Phospholipid vesicles
  heterogeneously sized, protein-induced fusion, **262,** 586

Phosphoprotein P1
  acidic ribosomal, cross-reaction with anti-dsDNA antibodies, role of phenylalanines in C-terminal hydrophobic cluster (human), **263,** 334
Phosphorescence spectroscopy
  bacterial luciferase α subunit Trp182, Trp194, and Trp250 residues, **263,** 820
Phosphorylation
  agonist-induced, C5a receptor in COS-7 cells, effects of overexpression of wild-type and catalytically inactive GRK2 and GRK6, **259,** 224
  Ak52 at Ser^{473} equivalent residue (human), **257,** 906
  β-amyloid precursor protein cytoplasmic domain at Ser655 by APP kinase I from rat brain, **258,** 300
  axin, by glycogen synthase kinase 3β, site for, modulation of interaction with β-catenin and Tcf-mediated gene expression, **266,** 28
  Bcl-2
    association with lymphoblastoid cell apoptosis induced by IgG (human), **264,** 896
    in mitotic-arrested cells after microtubule damage (NIH-OVCAR-3 cells), **262,** 823
    role in resistance of human leukemia cells to paclitaxel-mediated mitochondrial dysfunction and apoptosis, **259,** 67
  BRCA1 by casein kinase 2, **260,** 658
  Ca^{2+}/CaM-dependent, of Ca^{2+}-ATPase, uncoupled from phospholamban, stimulation of Ca^{2+} pumping in cardiac sarcoplasmic reticulum (rabbit), **258,** 66
  calmodulin by protein kinase CK2, structural features, **256,** 442
  CBP histone acetyl transferase by p44 MAP kinase/ERK1 *in vitro,* stimulation of activity, **262,** 157
  Cdk2–cyclinE complex, inhibition, role in inhibition of VSMC proliferation by eicosapentaenoic acid and docosahexaenoic acid, **254,** 502
  cyclosome, role in stimulation by Fizzy/cdc20 (clam oocytes), **260,** 193
  dephosphorylation, *see* Dephosphorylation
  differential, at serine residues, role in regulation of IκB-α activity, **257,** 798
  DP1 by cyclin A–Cdk2 in multiprotein complexes, greater efficiency via weak-interacting domain, **258,** 596
  enhancement of DNA-binding activity of FAC1, **260,** 785
  epidermal growth factor receptor in pancreatic cancer cells, reduction by phorbol ester via tyrosine phosphatase activation (human), **265,** 728
  glycerol by glycerol kinase, ATP-dependent, implication of X-ray structure of GK complexed with ATP analog, **259,** 640
  GRK6 autophosphorylation in COS-7 cells, **259,** 224
  hepatitis C virus NS5 protein, requirement of NS2 generated by NS2-3 autocleavage, **254,** 572
  hepatitis C virus NS5A protein by casein kinase II, **257,** 777
  HSF1 hyperphosphorylation by proteasome inhibitors MG132 and lactacystin, **254,** 264
  human caspase-9 by Akt, site for, absence in mouse caspase-9, **264,** 550
  human MAD1 by BUB1 kinase *in vitro,* **257,** 589
  insulin receptor substrate 1, inhibition in isolated adipocytes from cachectic tumor-bearing rats, **256,** 676
  leukocyte NADPH oxidase subunit p47^{phox}, associated conformational changes, **259,** 38
  myosin light chain kinase, inhibitory effect on ATP-dependent actin–myosin interaction, **261,** 95
  oxidative, regulation in human cells in aging and diabetes, **266,** 662
  p38 MAP kinase regions required for, identification, **266,** 284
  p53 by anticancer drugs in MDM2-overexpressing BL2 cells, **264,** 860
  p53 mutants at serine-15 or serine-315, inhibition of, resulting partial restoration of wild-type p53 function, **261,** 256
  p56^{Lck}, calcium-induced, in human T cells via calmodulin-dependent kinase, **259,** 283
  phosphatidylinositol 3-kinase downstream signaling molecules, mediation by Ret with MEN 2B mutation (human), **262,** 68
  phosphodiesterase 10A2: alternative splice variant of human cAMP- and cGMP-hydrolyzing PDE, **261,** 551
  PKD1-encoded protein C-terminal domain, sites of, identification, **259,** 356
  polycystin-1 C-terminal cytosolic domain by protein kinase A *in vitro,* major site of, identification, **259,** 539
  receptor autophosphorylation induced by EGF in primary hepatocytes isolated from phenobarbitone-treated mice, **260,** 483
  reversible, regulation of ground squirrel Na^+/K^+-ATPase activity during hibernation, **254,** 424
  ribosomal protein L5 by protein kinase CKII, **263,** 475
  role in regulation of muscle chloride channel ClC-1 (mouse), **261,** 528
  SAG protein containing Ring-H2 finger motif by protein kinase CKII in yeast two-hybrid system, **263,** 743
  sarcoplasmic reticulum Ca^{2+}-ATPase at serines in intact beating rabbit heart, **264,** 241
  Sp1 by Erk 2, stimulation of DNA binding, **254,** 454
  Tctex2-related outer arm dynein light chain at activation of sperm motility, **256,** 177
  TRAF2, inhibition of binding to CD40 cytoplasmic domain, **256,** 620
  troponin I, role in effects of NO on myocyte contractile function, **256,** 398
  tyrosine, *see* Tyrosine phosphorylation
  ultraviolet-induced, p53 by p38 MAP kinase at serine 389, alleviation by SB203580, **261,** 464
Phosphorylation/dephosphorylation
  androgen receptor, as determinant of androgen agonistic or antagonistic activity, **259,** 21
  B subunit of DNA polymerase α–primase complex, in early embryogenesis of *Drosophila,* **254,** 372
  role in phenobarbital-induced gene expression of CYP2B1 and CYP2B2 in rat hepatocytes, **264,** 530
Phosphoserines
  amino-terminal, on IκB-α, as phosphorylation targets leading to inactivation upon stimulation, **257,** 798
Photoaffinity labeling
  herpes simplex virus type 1 single-strand DNA-binding protein with oligodeoxyribonucleotides, **264,** 493
Photoaffinity labels
  p-benzoylbenzoylated [N,C,rANP(1–28)]pBNP32 derivatives, development and affinity photolabeling of bovine NPR-A, **258,** 81
Photochemical analysis
  ATP-binding site of annexin VI, **263,** 775
Photochemical oxidative stress
  associated *in vivo* lens-specific regulation of thioredoxin-1 in Emory mouse, **265,** 345
Photochromic lipid
  sensitized liposomes, fast laser-induced solute release, **262,** 406
Photocleavage
  site-specific, bovine serum albumin with Schiff base, **265,** 311
Photodynamic therapy
  apoptosis induced by, in mouse lymphoma cells, role of cytochrome *c* leakage, **255,** 673
  with phthalocyanine 4, apoptosis induced by, resistance in Niemann–Pick human lymphoblasts, **258,** 506
  role of free radicals, physicochemical modeling, **255,** 360
Photoreceptor cells
  guanylate cyclase subtype expression (medaka), **255,** 216
  site of arylalkylamine *N*-acetyltransferase circadian expression (rat), **248,** 115; *erratum,* **261,** 546
Photoreduction
  by N-terminal truncated cytochrome P450 2B4, **263,** 678
Photosensitization
  wild and mutant *Escherichia coli* strains by *meso*-tetra(*N*-methyl-4-pyridyl)porphine, **256,** 84

Photostimulation
  red light-induced stimulation of *E. coli* cell growth, role of ground and excited singlet state oxygen, **257,** 753
Photosystem II
  cyanobacterial, functional reconstitution with synthetic phytanyl-chained glycolipid vesicle membrane, **265,** 734
  D1 protein gene *psbA,* light-dependent and rhythmic transcripts in homologous/heterologous cyanobacterial cells, **255,** 47
  recombinant 12-kDa protein, functional studies, and *psb*U gene cloning and expression (*Cyanidium caldarium*), **260,** 245
Phthalocyanine 4
  photodynamic therapy with, apoptosis induced by, resistance in Niemann–Pick human lymphoblasts, **258,** 506
Phylogeny
  cytochrome P450 4F7 (*Dicentrarchus labrax*), **258,** 155
  FGF family, with XFGF-20, **261,** 756
  glycogen phosphorylases: cloning of *DPGH* gene of *Drosophila,* **257,** 34; *erratum,* **263,** 263
  heat shock protein 90α (Chinook salmon), **258,** 784
  myosin superfamily, with MyoK gene from *Dictyostelium discoideum,* **255,** 711
  PEF protein family, including peflin, **263,** 68
  peroxiredoxin CprxII (Chinese cabbage), **258,** 768
  snake neurotoxins, **257,** 500
  TgBMP2/4 and other TGF-β growth factors (*Tripneustes gratilla*), **258,** 457
Physical map
  MyoK gene (*Dictyostelium discoideum*), **255,** 711
Phytase
  recombinant fungal, expressed in tobacco leaves, characterization, **264,** 201
Piceatannol
  inhibition of mitochondrial F_0F_1-ATPase by targeting of F_1 complex (rat brain), **261,** 499
Pichia pastoris
  atypical proteolytic processing of amyloid precursor fusion protein, **262,** 263; *erratum,* **263,** 596
  human recombinant granzyme B expression and purification, **261,** 251
  overexpression of human NEFA, and analysis of EF-hand Ca^{2+}-binding sites, **260,** 1
Pin1
  mice lacking, development and defective entry into cell cycle from G_0 arrest, **265,** 658
Pineal gland
  G protein and opioid receptor gene expression (rat), **262,** 775
Pineal organ
  photoreceptor cells, guanylate cyclase subtype expression (medaka), **255,** 216
Pinin
  desmosome-form and nucleus-form, differentiation by antibodies (dog), **263,** 192
Pituitary adenoma cells
  antiproliferative and GH-inhibitory activity of chimeric peptides consisting of GHRP-6 and somatostatin (human GH3 cells), **259,** 379
Pituitary adenylate cyclase activating peptide
  identification as islet neuropeptide contributing to glucose-stimulated insulin secretion (mouse), **256,** 664
Pituitary cells
  anterior, stimulated growth hormone secretion, role of SST receptor subtypes (rat), **263,** 276
  calcium influx induced by KCl, biphasic increase induced by cyclosporin A (GH3 cells), **254,** 169
PK11195
  antiapoptotic activities (U937 cells), **265,** 457
PKD1 gene
  encoded protein, C-terminal domain, identification of phosphorylation sites (human), **259,** 356
PKNβ
  identification and characterization: protein kinase PKN isoform (HeLa cells), **261,** 808
Placenta
  adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  ganglioside sialidase expression (human), **261,** 21
  gestational profile of leptin receptor mRNA expression (rat), **257,** 425
  G protein coupled receptor prominently expressed in, sequence and tissue distribution (human), **256,** 352
  heparanase *HSE1* expression (human), **261,** 183
  sodium-dependent vitamin C transporter, molecular cloning and transport function (human), **262,** 762
Placental lactogen-II
  colocalization with leptin receptor mRNA in rat trophoblast cells, **257,** 425
Plasma
  human, cardiotrophin-1 detection by immunoluminometric assay: elevated plasma CT-1 in heart failure, **261,** 567
  immunoreactive prolactin-releasing peptide concentration (rat), **257,** 264
  8-iso-prostaglandin $F_{2\alpha}$ and 15-keto-13,14-dihydro-prostaglandin $F_{2\alpha}$ in experimental hepatotoxicity (rat), **254,** 764
  laminin-related peptide YIGSR half-life in, increase by bioconjugation to polyvinyl pyrrolidone, effect on YIGSR antimetastatic activity (mouse), **264,** 763
  metabolic properties of human mannan-binding protein in, analysis (mouse), **256,** 231
  platelet-activating factor acetylhydrolase in, cellular sources (human), **261,** 511
  uremic, increase of α,β-dicarbonyl compound levels in, *in vivo* determination (human), **256,** 89
Plasma membrane
  adipocyte, fatty acid binding protein identification as caveolin (3T3-L1 cells), **255,** 34
  apical, aquaporin-5 trafficking to, induction by α_1-adrenoceptor in parotid cells (rat), **265,** 94
  Ca^{2+}-pumping activity, enhancement, senescence marker protein-30 rescue of cell death by, **254,** 1
  erythrocyte, surface exposure of phosphatidylserine, detection with annexin V-ferrofluid (human), **258,** 199
  exoplasmic surface, green fluorescent protein expression targeting to, **262,** 638
  GAP^{IP4BP} localization (RBL-2H3 cells), **255,** 421
  hepatic, vesicles, uptake of MRI contrast agents, mechanisms (rat), **257,** 746
  lymphocyte, cholesterol crosslinking in, induction of capping, membrane shedding, and endocytosis through coated pits (mouse), **260,** 516
  OCTN2–green fluorescent protein localization to, in carnitine transporter-defective cell lines (human), **264,** 909
  ovine parotid acinar cells, vesicles isolated from basolateral region, acetate and formate uptake, **259,** 606
  phospholipid scramblase expression, correlation with phosphatidylserine exposure during apoptosis, **266,** 504
  sperm, tyrosine phosphorylation of proteins in, induction by capacitation (boar), **262,** 787
  thyroid hormone transport, identification of transporters, **254,** 497
Plasma proteins
  circulating Aβ42 sequestered by, high levels in Alzheimer's disease, **257,** 787
Plasmids
  conjugation with lactose via diazocoupling, enhancement of resistance to restriction enzymes and acquisition of binding affinity to galactose-specific lectin, **260,** 323

  encoding CTL epitope derived from microorganisms, translational efficiency, codon optimization effect on, **261,** 445
  F plasmid partition proteins SopA and SopB, interaction, **263,** 113
  vectors encoding human neurotrophins expressed in *E. coli,* viability and stability of, effect of selection marker, **258,** 29
Plasminogen activator
  urokinase-type, gene induction by cytoskeletal reorganization via activation of FAK and Src and Ras/Erk signaling pathway (LLC-PK$_1$ cells), **262,** 666
Plasminogen activator inhibitor-1
  expression in human vascular endothelial cells, downregulation by thiazolidinediones, **258,** 431
  genetic analysis in Finnish patients with abdominal aortic or intracranial aneurysms, **265,** 563
Plasminogen activator inhibitor-2 gene
  TCDD-induced expression in human endometrial cells in culture, **257,** 259
Plasmodium cynomolgi
  RNA helicase-related genes, identification, **255,** 312
Plasmodium falciparum
  RNA helicase-related genes, identification, **255,** 312
Plasmodium yoelii
  CTL epitope derived from, translational efficiency of plasmid encoding, codon optimization effect on, **261,** 445
Plastid signal recognition particle
  54-kDa subunit, functional comparison with plastid SRP54, **254,** 253
Platelet-activating factor
  induction of secreted phosphatase activity in *Trypanosoma cruzi,* **266,** 36
  inhibition by GM$_2$ activator protein, **258,** 256
  neutrophils stimulated by, filamentous actin content, oscillation regulation (human), **262,** 479
Platelet-activating factor acetylhydrolase
  in plasma, cellular sources (human), **261,** 511
Platelet-derived growth factor
  activation of JNK/SAPK in A431 cells, role of phospholipase C-γ and phosphatidylinositol 3-kinase signaling pathways, **261,** 641
  binding, and PDGF-β receptor expression, in rat VSMC cultured with glucose, effects of aldose reductase inhibitor or anti-PDGF antibody, **261,** 853
  induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
  PDGF-B, expression in vascular smooth muscle cells, increase by mechanical strain (rat), **265,** 606
  transmodulation of EGF receptor, spatial organization (human fibroblasts), **261,** 695
Platelet-derived growth factor receptor
  phospholipase C-γ and PI3K signaling pathways, role in JNK/SAPK activation by PDGF in A431 cells, **261,** 641
Platelet-derived growth factor β receptor
  expression in vascular smooth muscle cells
    effects of human cytomegalovirus immediate early gene products (rat), **256,** 608
    glucose-induced increase, prevention by aldose reductase inhibitor (rat aorta), **261,** 853
    increase by mechanical strain (rat), **265,** 606
  extracellular domain, gene transfer *in vivo* by HVJ-liposome method: amelioration of bleomycin-induced pulmonary fibrosis (mouse), **265,** 503
Platelets
  activated nonaggregated, integrin-rich actin cytoskeleton of, selective association with tyrosine kinases Src, Fyn, and Lyn (human), **260,** 790
  aggregation
    aggretin inducing, molecular cloning and sequence analysis (Malayan pit viper), **263,** 723
    antagonism by benzoyl ATP (human), **256,** 94
  calcium mobilization caused by ADP or thrombin receptor agonist peptide, synergistic effect of thrombopoietin (human), **263,** 230
  fibrinogen receptor gpIIbIIIa, motif binding, detection with combinatorial chemistry, **256,** 537
  glycoprotein Ia/IIa- and glycoprotein VI-mediated signal transduction pathways, comparison (human), **256,** 114
  glycoprotein Ibα interaction with FcγIIA receptor (human), **266,** 24
  glycoprotein IIb/IIIa and other proteins, monoclonal antibodies to, preparation from hamster–mouse interspecies hybridomas, **262,** 167
  isolated surface membranes, effects on DNA synthesis and proliferation of bovine coronary artery SMC, **259,** 341
  p38 MAP kinase activation, potentiation by thrombopoietin (human), **261,** 58
  phosphatidylinositol 3-kinase product formation induced by thrombin, dependence on synergistic autocrine stimulation (human), **263,** 780
  transfusion, potential substitute: liposomes carrying von Willebrand factor-binding domain of platelet glycoprotein Ibα, **261,** 784
Pleckstrin 2
  cloning and expression (mouse), **265,** 87
Pleckstrin homology domain
  phospholipase C-δ1
    antibodies to, inhibition of Ins(1,4,5)P$_3$-mediated Ca^{2+} release from endoplasmic reticulum (RBL cells), **260,** 42
    translocation in MDCK cells dependent on, real-time visualization: response to hypo-osmotic stress, **254,** 284
  protein kinase B, myosin II identification as binding protein to, **255,** 169
  in Tec family protein kinases, structural modeling and comparisons, **265,** 151
Pleiotrophin
  dimerization, promotion by glycosaminoglycans, **266,** 437
PMAP-23
  antibiotic activity, effects of tryptophan residues, **264,** 281
Poikilothermy
  and heat shock factors: HSF1 activation at different temperatures in male germ cells and somatic cells (rainbow trout), **259,** 15
Pokeweed antiviral protein
  PAP-I, PAP-II, and PAP-III isoforms, depurination of HIV-1 RNA, **260,** 453
  recombinant, deguanylation of HIV-1 RNA, **263,** 419
polA gene
  polA1 strain of *E. coli* K12, spontaneous *tonB* deletion mutations in, DNA sequence analysis, **261,** 584
Polarity
  MDCK cells with, unidirectional transport of Co^{2+} from apical to basolateral compartment, **257,** 289
Pollen allergen
  Cha o 2 purification, identification, and cDNA cloning: major allergen of Japanese cypress pollen, **263,** 166
Poly(ADP-ribose)
  functional interaction with 20S proteasome *in vitro,* **259,** 576
Poly(ADP-ribose) polymerase
  as calpain substrate in human neuroblastoma SH-SY5Y cells, **263,** 94
  dominant negative mutant of, carcinogen-treated hamster cells overexpressing, NAD$^+$ consumption in, **265,** 525
  fibroblasts deficient in, with reduced level of regularly spliced wild-type p53, compensatory expression of p73 (mouse), **255,** 399
  hepatic, resistance to cleavage by caspases (mouse), **256,** 436
  mouse deficient in, endotoxin-induced lethality and liver apoptosis, **263,** 433
  role in phorbol ester-induced activation of HIV-1 in U1 cells by modulation of LTR function, **262,** 285
Poly(ADP-ribosyl)ation
  HIV-1 Tat protein *in vitro,* **261,** 90

Poly(ADP-ribosyl) transferase
  interaction with 20S proteasome *in vitro,* **259,** 576
Polyamines
  biosynthesis, enzymes regulating, half-lives during cell cycle in CHO cells: ornithine decarboxylase and *S*-adenosylmethionine decarboxylase, **263,** 13
  induction of *E. coli* SOS genes *recA* and *uvrA,* **264,** 584
Polycyclic aromatic hydrocarbons
  Burkholderia RP007 degrading, conserved and hybrid *meta*-cleavage operons in, sequence and gene order, **262,** 308
Polycystin-1 C-terminal domain
  major site of *in vitro* PKA phosphorylation, identification (mouse), **259,** 539
  phosphorylation sites, identification (human), **259,** 356
Poly-γ-glutamate
  synthetic system, of *Bacillus subtilis* IFO 3336, gene cloning and biochemical analysis of polymer produced by *E. coli* clone cells, **263,** 6
Polyglutamine
  extended, sequential activation of initiator and effector caspases, **257,** 724
Polyglutamine tracts
  expanded, huntingtin N-terminal fragment with, rapid aggregate formation, **256,** 361
  length and expression levels, effects on formation of intracellular aggregates, **260,** 150
Polymerase chain reaction
  arbitrarily primed PCR fingerprinting, detection of DNA abnormalities: *MDM2* amplification in mediastinum fibrosarcoma, **258,** 271
  competitive PCR, quantitative analysis of expression of mouse sialyltransferase genes, **260,** 23
  long-extension PCR, detection of deleted mitochondrial DNA, compromise by technical artifacts, **254,** 507
  PCR–RFLP, in genotyping of *CYP2A6* (human), **262,** 146
  PCR–SSCP, and bisulfite treatment, in analysis of DNA methylation in colorectal cancer with microsatellite instability (human), **262,** 671
  peptide nucleic acid-mediated PCR clamping, detection of apolipoprotein B mRNA editing, **259,** 311
  RT–PCR
    CYP3A4 and CYP2E1 levels, relationship to metabolic activity, **262,** 499
    identification of Gαolf in pancreatic B cells and islets from rat models of non-insulin-dependent diabetes, **254,** 269
Polymerization
  fibrin, thrombin-induced, incipient stage in, detection by fluorescence correlation spectroscopy, **260,** 35
  glial fibrillary acidic protein, inhibition by S100A1, role of S100A1 C-terminal extension, **254,** 36
Polymorphic repeat
  cytochrome P450 2E1 gene 5′-flanking region (human), **263,** 286
Polymorphisms
  alpha$_2$-macroglobulin DNA, association with late-onset Alzheimer's disease, **264,** 48
  deoxyribonuclease I, *DNASE1*6* allele of, encoding of Arg to Cys substitution responsible for instability (human), **260,** 280
  estrogen receptor α gene, association with sporadic Alzheimer's disease, **265,** 335
  HLA-DRB1 and *SOD2* genes, association with nonfamilial idiopathic dilated cardiomyopathy in Japanese, **261,** 332
  manganese superoxide dismutase gene coding region, in German Parkinson disease patients, **255,** 749
  in MCP-1 gene regulatory region, influencing MCP-1 expression (human), **259,** 344
  Niemann-Pick C1 gene (human), **261,** 493
  peroxisome proliferator-activated receptor γ gene, association with bone mineral density (human), **260,** 122
  promoter region of DRD4 gene associated with expression and schizophrenia, **258,** 292
  in protein targeting to glycogen/PP1R5 genomic region, screening, and association analysis with insulin action in Pima Indians, **258,** 184
  single-nucleotide, mismatch repair gene *hMLH1,* **256,** 488
  transcribed dinucleotide microsatellites and associated genes, mapping (channel catfish), **259,** 190
Polyomavirus enhancer binding protein 2
  synergy with *mi* transcription factor, region of MITF responsible for, identification, **261,** 53
Polypeptide benzyl thioesters
  long, as substrates of subtiligase, direct preparation with benzyl mercaptan, **254,** 147
Polyphosphate
  vacuolar level in *Saccharomyces cerevisiae,* role of Spt7p: nickel detoxification, **257,** 835
Polyriboinosinic acid:polyribocytidylic acid
  interferon-β secretion induced by, stimulation side-dependent asymmetry in polarized epithelial cell lines, **254,** 5
Polysaccharides
  binding by recombinant soluble CD69 dimer produced in *Escherichia coli,* **266,** 19
Poly(styrene co-maleic acid)
  laminin peptide YIGSR bioconjugated with, effect on lung metastasis of B16-BL6 melanoma cells, **255,** 75
Polyunsaturated fatty acids
  cellular enrichment with, induction of oxidative stress and activation of AP1 and NFκB (human), **265,** 116
  n-3, effects on obesity and diabetes parameters ($KK\text{-}A^y$ mouse), **259,** 85
  non-methylene-interrupted, substitution for arachidonate of phosphatidylinositol (HepG2 cells), **264,** 683
  plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
Polyvinyl pyrrolidone
  bioconjugation with laminin-related peptide YIGSR, increase of YIGSR antimetastatic effect due to longer plasma half-life (mouse), **264,** 763
  tumor necrosis factor α conjugated with, synthesis and characterization, **257,** 448
Porcine myeloid antibacterial peptide
  PMAP-23, antibiotic activity, effects of tryptophan residues, **264,** 281
Porin
  isoforms 1 and 2, gene mapping correction, **255,** 707
  in vivo modification conferring antibiotic resistance to *Enterobacter aerogenes,* **266,** 248
Porphyrins
  dicarboxylic, GSH-dependent oxidative modification by mammalian and plant peroxidases, **259,** 195
Porphyromonas gingivalis
  FimA protein, saliva-binding epitopes of, expression on surface of *Streptococcus gordonii,* **258,** 222
  gingipains from, inactivation of IL-6: Lys- and Arg-specific proteinases, **261,** 598
  lipopolysaccharide, human gingival fibroblasts stimulated with, IL-6 production, inhibition by IL-10, **263,** 372
Posterior kidney
  carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
Posttranscriptional regulation
  mammalian methionine synthase by B_{12}, **259,** 436
Potassium
  current profile, endothelial cells from resistance-sized pulmonary arteries (rat), **263,** 405

Potassium channels
  ATP-dependent, spontaneous bursting and ATP inhibition, control by N-terminus of $K_{IR}6.2$, **255,** 231
  ATP-sensitive, β-cell, Kir6.2 subunit of, characterization of low-affinity binding sites for glibenclamide, **257,** 766
  Ca^{2+}-activated
    BK-type, in inner mitochondrial membrane of human glioma cell line, **257,** 549
    large-conductance, stimulation in cultured umibilical vein endothelial cells by Evans Blue (human), **254,** 666
  as DTX-I target (rat brain), **262,** 319
  ERG current, inactivation in NG108-15 cells (mouse), **263,** 510
  inwardly rectifying, ROMK1, temperature-sensitive processing and transport (MDCK cells), **261,** 364
  voltage-gated, Kv1.3, steady-state levels, regulation by channel T0 domain (rabbit), **254,** 54
Potassium chloride
  calcium influx induced by, in GH3 pituitary cells, biphasic increase induced by cyclosporin A, **254,** 169
ppGpp
  role in spermidine-induced decrease of cell viability (*Escherichia coli*), **264,** 643
Preadipocytes
  α_2-adrenergic-induced spreading, role of Ca^{2+}-independent phospholipase A2, **265,** 572
  differentiation, role of CCAAT enhancer binding proteins (3T3-L1 cells), **266,** 677
  at early stage of adipocyte differentiation, identification of inducible genes (3T3-L1 cells), **254,** 299
  immediate early gene expression, differential regulation through multiple signaling pathways (3T3-L1 cells), **265,** 664
  metabolism and differentiation, role of regulation of stearoyl-CoA desaturase genes, **266,** 1
  uncoupling protein 3 mRNA levels in primary cultures, upregulation by etomoxir (rat), **263,** 87
  in white adipose tissue from rat, FGF-10 as growth factor for, **258,** 109
PREF-1 gene
  genomic organization and genetic mapping (bovine), **264,** 662
Pregnancy
  leptin receptor mRNA expression in rat placenta during, **257,** 425
Pregnane X receptor
  functional response element, detection in CYP3A7 gene promoter (human), **260,** 377
Prenylated protein carboxyl methyltransferase
  modifying G proteins, identification as metalloenzyme (rat), **261,** 790
Prenylated Rab acceptor
  human homologue PRA1, cDNA cloning and characterization, **258,** 657
Preosteoclasts
  circulating, direct action of 1,25-dihydroxyvitamin D_3 and prostaglandin E_2 (human), **264,** 590
  differentiation, regulation by macrophage-inflammatory protein-1α *in vitro* (pig), **254,** 773
  17β-estradiol-induced apoptosis (human FLG 29.1 cells), **255,** 680
Preprotachinin-a
  mRNA expression in keratinocytes (human), **263,** 327
Preprotein convertase
  PC2, targeting and activation into regulated secretory pathway of rMTC 6-23 cells, role of protein 7B2, **257,** 473
Presenilin-1
  carboxyl-terminal fragments, relationship to cytoskeletal abnormalities in Alzheimer's brain, **256,** 512
Pressure
  induction of DNA synthesis in aortic smooth muscle cells in threshold-dependent manner, **256,** 212
  regulation of malic dehydrogenase in reversed micelles, **254,** 685
Prevotella albensis
  complementary DNA strands, overlapping sequences with high homology to functional proteins, **263,** 58
Primates
  telomere length, human uniqueness, **263,** 308
Primordia
  shoot, of *Matricaria chamomilla,* apoptosis-like cell death induction by geraniol, **259,** 519
Prion protein
  abnormal, analysis with monoclonal antibodies, **265,** 652
  cell-lysate conversion into protease-resistant isoform: cellular chaperone implication, **258,** 470
  cellular isoform, structural dependence on solvent: spectroscopic characterization of intermediate conformation, **264,** 972
  methionine residues in, selective oxidation (chicken, mouse), **259,** 352
  peptide 106–126
    aggregation *in vitro,* prevention by clusterin, **259,** 336
    and full-length PrP, spontaneous deamidation and isomerization of Asn108 in, **261,** 578
Proacrosin gene
  promoter element, YY1 as binding factor (mouse), **257,** 871
Procaspase-2
  comparison to other procaspase expression in SCLC and NSCLC (human), **262,** 381
Procaspase-3
  as calpain substrate in human neuroblastoma SH-SY5Y cells, **263,** 94
  comparison to other procaspase expression in SCLC and NSCLC (human), **262,** 381
  STAT1-independent upregulation in cancer cells treated with cytotoxic drugs (human), **256,** 603
Procaspase-7
  comparison to other procaspase expression in SCLC and NSCLC (human), **262,** 381
Procaspase-8
  comparison to other procaspase expression in SCLC and NSCLC (human), **262,** 381
  STAT1-independent upregulation in cancer cells treated with cytotoxic drugs (human), **256,** 603
Procaspase-9
  comparison to other procaspase expression in SCLC and NSCLC (human), **262,** 381
Procathepsin E
  molecular modeling: analysis of salt-bridge interactions of propeptide and enzyme segment (human), **264,** 825
α1(I) Procollagen
  mRNA levels in hepatic stellate cell line, stimulation by MDMA, **259,** 678
Progelatinase A
  activation in fibrosarcoma HT-1080 cells, suppression by heat shock: effect on cell invasiveness, **265,** 189
Progeria
  skin fibroblasts in, altered antioxidant enzyme levels, **257,** 163
Progesterone
  in analysis of role of sex steroid milieu in plasma leptin levels in adult rats, **259,** 56
  and estradiol-17β, luteinizing hormone and prolactin surges induced by, role of leptin in female rat, **254,** 578
  induced LH and prolactin surges in ovariectomized rats, leptin stimulation of, mediation by melanocortin-4 receptor, **257,** 860

Progesterone (*continued*)
  and 11-OH derivatives, stimulation of tyrosine phosphorylation, Ca^{2+} role (human sperm), **255,** 23
11α-Progesterone
  stimulation of tyrosine phosphorylation, Ca^{2+} role (human sperm), **255,** 23
11β-Progesterone
  stimulation of tyrosine phosphorylation, Ca^{2+} role (human sperm), **255,** 23
Proinsulin
  cDNA, nonendocrine cells engineered with, secretion of insulin, effect of differentiation (human), **265,** 361
Proinsulin-like growth factor-II
  overexpression, effect on monoallelic *H19* gene expression in transfected embryonic kidney fibroblasts (human), **255,** 226
Prolactin
  apoptosis induced by, in rat corpus luteum, Fas/Fas ligand system in, **260,** 167
  BRCA1 gene upregulation in human breast cancer cell lines in response to, **258,** 284
  leptin-stimulated surges in steroid-primed ovariectomized rats, mediation by melanocortin 4 receptor, **257,** 860
  prolactin/growth hormone gene family members PLP-I, -J, -K, and -L, identification (rat), **262,** 575
  release *in vivo,* stimulation by prolactin-releasing peptide (rat), **259,** 321
  steroid-induced surges in female rat, role of leptin, **254,** 578
  surges, stimulatory effect of circulating leptin (rat), **263,** 162
Prolactin-releasing peptide
  immunoreactive, distribution and characterization in rat tissue and plasma, **257,** 264
  stimulation of prolactin release *in vivo* (rat), **259,** 321
Proline biosynthesis
  rate-limiting enzyme Δ^1-pyrroline-5-carboxylate synthetase 1, stress-responsive and developmental regulation in *Arabidopsis thaliana,* **261,** 766
Proline endopeptidase
  human, S 17092-1 as potent specific cell-permeant inhibitor of, **257,** 657
Proline-rich synapse-associated proteins
  ProSAP1 and ProSAP2, interaction with synaptic proteins of SAPAP/GKAP family, **264,** 247
Prolyl-4-hydroxylase
  α subunit, expression in atherosclerotic arterial smooth muscle cells (rabbit), **260,** 382
Promatrix metalloproteinases
  ProMMP-1 and ProMMP-3, activation, role of tissue factor pathway inhibitor-2/matrix-associated serine protease inhibitor, **255,** 94; *erratum,* **258,** 497
Promonocytes
  U1, phorbol ester-induced HIV-1 activation in, role of poly(ADP-ribose) polymerase modulation of LTR function, **262,** 285
Promonocytic leukemia cells
  U937, *see* U937 cells
Promoters
  plant mitochondrial, compilation and analysis: divergent evolution of monocot and dicot mitochondria, **256,** 409
  proximal position, recruitment of TBP and TFIIB to, stimulation of RNA polymerase II transcription without activator proteins, **256,** 45
Promyelocytic leukemia cells
  HL-60, *see* HL-60 cells
Promyelocytic leukemia zinc finger protein
  related transcription factor gene TZFP, identification and structure (human), **264,** 789
Pronase
  ovarian phosphatase activity resistant to, analysis (*Xenopus laevis*), **264,** 689
  urine preparation treated with, effect on Fos expression in rat accessory olfactory bulb, **260,** 222
Pro-opiomelanocortin
  and agouti-related protein and α-MSH, hypothalamic levels in dietary-obese and food-restricted rats, **258,** 574
N-Propanoyl-D-mannosamine
  in vivo modulation of acidic N-glycans from rat liver dipeptidyl-peptidase IV, **263,** 76
ProSAP1
  interaction with synaptic proteins of SAPAP/GKAP family (rat), **264,** 247
ProSAP2
  interaction with synaptic proteins of SAPAP/GKAP family (rat), **264,** 247
Prostacyclin
  production in infarcted heart *in situ,* relationship to NO production and effect of aspirin (rabbit), **257,** 488
Prostaglandin
  production by astrocytes, effect of bacterial lipopolysaccharide (rat), **263,** 570
Prostaglandin A_2
  apoptosis in Hep3B cells induced by, cDNAs for Sox-4 and human homolog of yeast Ssf-1 differentially regulated during, **260,** 216
Prostaglandin D_2
  synthesis in mast cells, immediate and delayed phases, roles of COX-1 and COX-2 (mouse), **265,** 205
Prostaglandin D synthase
  lipocalin-type, activity, enhancement by guanidine hydrochloride (mouse), **266,** 641
Prostaglandin E_2
  and COX-2, expression in mouse osteoblasts, effect of low-intensity pulsed ultrasound, **256,** 284
  direct action on circulating human osteoclast precursors, **264,** 590
  induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
  production, and cyclooxygenase expression, in human gingival fibroblasts stimulated with IL-1β and EGF, role of tyrosine kinases, **257,** 528
Prostaglandin E_2 receptor
  EP3, key amino acid residue for governing G protein association and activation steps, **255,** 164
Prostaglandin F receptor
  gene, genomic structure, 5′ flanking sequences, and precise localization in 1p31.1 (human), **254,** 413
Prostaglandin I_2
  analogs of, protective effects on ischemic delayed neuronal damage (gerbil), **265,** 301
Prostaglandin J_2
  and metabolites, promotion of neurite outgrowth induced by NGF in PC12 cells, **258,** 50
Δ^{12}-Prostaglandin J_2
  apoptosis in Hep3B cells induced by, cDNAs for Sox-4 and human homolog of yeast Ssf-1 differentially regulated during, **260,** 216
Prostanoids
  and nitric oxide, production in infarcted heart *in situ* and effect of aspirin (rabbit), **257,** 488
Prostate
  anterior, secretion of, association of GTPase and transglutaminase in, analysis (rat), **260,** 351
Prostate cancer cells
  activin-induced apoptosis
    identification of differentially expressed genes (LNCaP cells), **257,** 187
    suppression by antisense strategy (LNCaP cells), **265,** 669
  androgen receptor phosphorylation/dephosphorylation status, effect on androgen agonistic or antagonistic activity, **259,** 21
  cross-talk of TCDD and testosterone signal transduction pathways (LNCaP cells), **256,** 462

  interleukin-6-induced G_1 arrest via $p27^{Kip1}$ induction and neuron-like morphology (LNCaP cells), **257,** 609
  tumorigenicity, suppression, role of C-CAM1 cytoplasmic domain (DU145 cells), **263,** 797
Proteasome
  20S, functional interaction of poly(ADP-ribose) with, *in vitro* study, **259,** 576
  26S, assembly, regulation by maturation-inducing hormone in starfish oocytes, **254,** 338
  Bcl-2 degradation dependent on, in mitotic-arrested cells after microtubule damage (NIH-OVCAR-3 cells), **262,** 823
  inhibition, effect on intracellular aggregate formations, **260,** 150
  nuclear accumulation in human cancer cells, induction by glucose starvation and hypoxia, **258,** 448
  structure, function, and relationship to branched chain amino acids and hepatocyte growth factor, **266,** 647
  ubiquitin–proteasome pathway, mediation of degradation of fibrinogen chains, **261,** 590
Proteasome inhibitors
  effects on HSF1 activation upon heat shock and during post-heat-shock recovery (murine embryonic fibroblasts), **264,** 352
  induction of Alzheimer's amyloid precursor protein association with Hsc73, **254,** 804
  MG132 and lactacystin, hyperphosphorylation of HSF1 and induction of hsp70 and hsp27 expression, **254,** 264
Protein A
  minimized Fc-binding peptide from, induction of immunocyte proliferation and Th1-type response in mice, **258,** 141
  peptide fragments with Fc-binding activity, design, **256,** 6
  protective effect on zidovudine-induced apoptotic cell death (mouse), **264,** 601
  Staphylococcus aureus
    dose-dependent induction of cell proliferation or apoptosis in splenic lymphocytes, **260,** 105
    functional mimicry by proteolytically cleaved fragment, **260,** 111
  stimulation of expansion of $CD4^+/CD8^+/CD19^+/CD34^+$ cells in mice, **256,** 142
Protein ADP-ribosyltransferase
  activity of human Sir2-like proteins, **260,** 273
Protein aging
  by carboxymethylation of lysines, generation of sites for divalent metal and redox active copper binding, **260,** 332
Protein-arginine *N*-methyltransferase
  type I, *in vitro* substrate methylation by, effects of RNase treatment of yeast and mammalian cell extracts, **259,** 391
Proteinase
  arginine- and lysine-specific gingipains from *Porphyromonas gingivalis,* inactivation of IL-6, **261,** 598
  cathepsin L-type lysosomal, cleavage of retinoid X receptor α, **254,** 388
  cleavage enzymes for sterol regulatory element binding protein in hamster liver microsomes, **258,** 542
  human cytomegalovirus, activity in monomers, **259,** 370
  lysine-specific, from *Armillaria mellea,* identification as member of metalloendopeptidase class located in basidiomycetes, **262,** 60
  viral, use in switching system regulating subcellular localization of nuclear proteins, **266,** 92
Proteinase inhibitor
  isolated from Taiwan tabu serum, characterization, **263,** 610
α1-Proteinase inhibitor, *see* α_1-Antitrypsin
Proteinase K
  resistant isoform, cell-lysate conversion of prion protein into, cellular chaperone implication, **258,** 470
Protein C
  activation on endothelial cells in arteries, veins, and capillaries, function of EPCR as receptor for, **259,** 671
Protein carbonyls
  vitellogenin-6 identification as major carbonylated protein in aged nematode, **264,** 580
Protein degradation
  age-related, βA3/A1-crystallin in human lens, **258,** 632
  newly synthesized glycoproteins, role of N-linked oligomannosides, **258,** 1
  roles of C-terminus PEST regions of mammalian ornithine decarboxylase and histidine decarboxylase, **257,** 269
Protein disulfide-isomerase
  conformational changes, probing with retinol, **261,** 41
  thioredoxin reductase refolding assisted by, **255,** 17
Protein/DNA complexes
  noncovalent, electrospray ionization mass spectrometry, **257,** 1
Protein domains
  death domain of p75 neurotrophin receptor, peptide ligand to, selection and NMR determination of binding sites, **255,** 104
  mapping by λ phage display, **265,** 291
Protein engineering
  betabellin 16D: β-sandwich protein forming narrow fibrils associating into broad ribbons, **264,** 498
Protein folding
  all β-sheet protein refolding, secondary structure formation as earliest structural event: cobrotoxin, **260,** 284
  determination of protein structural class during, **264,** 216
  refolding of partially folded creatine kinase modified by 5,5′-dithio-bis(2-nitrobenzoic acid), **259,** 450
  selective oxidation of Met residues by recombinant prion protein refolded in presence of copper, **259,** 352
  thioredoxin reductase refolding assisted by groEL and protein disulfide-isomerase, **255,** 17
  tyrosinase folding and copper loading *in vivo:* calnexin and α-glucosidase II roles, **261,** 720
Protein kinase
  AMP-activated, and activator AICAR, effects on metabolism of human umbilical vein endothelial cells, **265,** 112; *erratum,* **266,** 615
  control of osmotically induced aldose reductase expression in rat VSMC, **255,** 12
Protein kinase A
  catalytic subunit activity in thyroid cell cultures, control by TSH (pig), **266,** 15
  inhibitory effects of coumarin and derivatives, **260,** 682
  phosphorylation of polycystin-1 C-terminal cytosolic domain *in vitro,* identification of major site of, **259,** 539
  role in insulin and glucagon regulation of CYP2E1 expression (rat), **266,** 304
Protein kinase B
  activation in human leukemia K562 cells by DIF-1 from *Dictyostelium discoideum,* **263,** 790
  PH domain, myosin II identification as binding protein to, **255,** 169
  and phosphatidylinositol 3-kinase, activations in ZDF liver, insulin signaling between, impairment by hyperglycemia (rat), **266,** 252
  –phosphatidylinositol 3-kinase signaling pathway, β4 integrin subunit rescue of A431 cells from apoptosis via, **264,** 127
  phosphorylation of human caspase-9, site for, absence in mouse caspase-9, **264,** 550
  regulation by heregulin in breast cancer cells, **261,** 897
Protein kinase B α
  and protein kinase C δ, opposing effects on H_2O_2-induced apoptosis in CHO cells, **264,** 840

Protein kinase B γ
  human, identification: regulatory serine phosphorylation site, **257,** 906
Protein kinase C
  activation
    enhancement of transcription factor PU.1 binding in macrophages (mouse), **254,** 211
    modulation of cholecystokinin-evoked Ca^{2+} waves in mouse pancreatic acinar cells, **261,** 726
  and ATP-evoked Ca^{2+} mobilization, in C6 glioma cells, effects of sphingosine and phorbol ester, **260,** 614
  and excitotoxin-stimulated ROS production in cerebellar granule cells, **256,** 320
  inhibitory effects of coumarin and derivatives, **260,** 682
  interaction with NELL proteins, role of NELL EGF-related domain, **265,** 752
  isoenzymes, effects of 13-hydroxyoctadecadienoic acid, **256,** 269
  isoform transcripts, differential expression in differentiating hematopoietic progenitors (human), **263,** 603
  mediation of inhibitory effects of stimulated muscarinic M_3 receptors on EGF receptor-linked signaling, **255,** 774
  and Na^+/H^+ exchange, role in CD11a mRNA and protein induction by IFN-γ, LPS and TNF-α in tissue macrophages, **257,** 635
  phorbol ester-induced activation leading to CD163 shedding by monocytes (human), **256,** 110
  regulation of adhesion of anti-CD3-activated T cells to syngeneic colon adenocarcinoma cells (mouse), **255,** 460
  regulatory domain, interaction with von Hippel-Lindau tumor suppressor protein β-domain, **263,** 491
  role in desensitization of particulate guanylate cyclase in airway smooth muscle (human), **266,** 152
  role in inhibition of calcium signaling in UV-irradiated fibroblasts (V79 cells), **261,** 504
  role in laminin-mediated neurite outgrowth, **256,** 98
  role in modulatory effect of HCO_3^- release by rat mast cells, **260,** 71
  role in osmotically induced aldose reductase expression in rat VSMC, **255,** 12
  signaling
    in histamine and sulfidoleukotriene release in human cultured mast cells, **257,** 895; *erratum,* **259,** 503
    in regulation of immediate early gene expression in preadipocytes (3T3-L1 cells), **265,** 664
Protein kinase C α
  promoter, murine, cloning and characterization: identification of retinoic acid response element, **263,** 28
Protein kinase C δ
  and protein kinase B α, opposing effects on H_2O_2-induced apoptosis in CHO cells, **264,** 840
Protein kinase CK2
  binding to and phosphorylation of BRCA1, **260,** 658
  identity with elongation factor-1 δ kinase transiently increased during sea urchin development, **266,** 425
  interaction of hnRNP A2 with, **260,** 17
  interaction with and phosphorylation of SAG protein containing Ring-H2 finger motif in yeast two-hybrid system, **263,** 743
  phosphorylating site inhibiting nuclear localization, and NLS, in dengue virus NS5 protein 37-amino-acid interdomain, **257,** 731
  phosphorylation of calmodulin, structural features in, **256,** 442
  phosphorylation of hepatitis C virus NS5A protein, **257,** 777
  phosphorylation of ribosomal protein L5, **263,** 475
  regulation of Myc-associated zinc finger protein DNA-binding and transcriptional activities, **262,** 198
Protein kinase inhibitor
  identification of coumarin derivative daphnetin as, **260,** 682
Protein kinase PKN
  isoform PKNβ, identification and characterization (HeLa cells), **261,** 808
Protein phosphatase
  control of osmotically induced aldose reductase expression in rat VSMC, **255,** 12
Protein phosphatase 1
  activation and association with retinoblastoma protein in colcemid-induced apoptosis (HeLa cells), **266,** 279
  subunit PP1R5, screening of coding and flanking regions for polymorphisms and association analysis with insulin action in Pima Indians, **258,** 184
Protein phosphatase 1 $\gamma 2$
  modulation by 78-kDa glucose-regulated protein, **259,** 300
Protein phosphatase 2A
  inhibitor activity of functional domains of template-activating factor-I, **259,** 471
Protein phosphatase inhibitor
  okadaic acid, apoptosis and mitotic arrest as independent effects in K562 leukemia cells, **260,** 256
Proteins
  artificial tandem protein of c-Myb DNA-binding domain, construction and DNA binding specificity, **262,** 94
  backbone torsional angles: determination of mean and standard deviation of dihedral angles, **257,** 348
  with carbohydrate affinity, phage display cDNA cloning, **255,** 194
  crosslinked telomere–protein complexes, isolation from erythrocyte nuclei (chicken), **254,** 517
  crosslinking to DNA induced by UV-laser, analysis: detection of sequence variations of DNA elements bound by c-Jun *in vivo,* **256,** 68
  encoded by related cDNAs C184L, C184M, and C184S from developing brain, relatedness (mouse), **263,** 737
  expression in liposomes, **261,** 238
  glycosylation, genetic defects in, sugar supplement therapy (human), **255,** 189
  histidine-tagged, expressed in bacteria, gluconic acid derivative attached to N-terminus of, identification, **262,** 793
  human 100-kDa, *Histoplasma capsulatum* homologue of, expression during infection of murine macrophages, **254,** 605
  interaction with actin, prediction based on I/LWEQ module, **266,** 135
  interferon stimulatory response element DNA–protein complexes, stimulation by hepatocyte isolation (rat), **263,** 627
  mitochondrial precursor, multiple-site recognition by mitochondrial processing peptidase, **265,** 611
  myristoylation, single protein in ocular lens (bovine, rat), **256,** 652
  S-myristoylation in *Leishmania,* detection with heterologous reporter, **256,** 569
  nitrated, formation and loss in peroxynitrite-treated skin *in vitro* (rat), **262,** 781
  nonnuclear, nuclear import in yeast, and location and number of nuclear localizing signals, **256,** 278
  N-terminal modification, His-tagged proteins expressed in bacteria, MS determination, **259,** 271
  nuclear, subcellular localization, regulation with switching system using viral protease, **266,** 92
  oligomerization, sequences mediating, identification in *Escherichia coli,* genetic screen for, **266,** 243
  phospholipase C-like, PCL-L_2, identification and characterization (human), **266,** 97
  radicals derived from, EPR detection in H_2O_2 reaction with Fe bound in mitochondrial F_1ATPase (bovine), **263,** 281
  recombinant, expressed in CHO cells in high productivity cultures, metabolic sialylation, **258,** 132
  ribosomal, *see* Ribosomal proteins

  side chains and backbone, structural roles, probing with glycine- and sarcosine-rich synthetic leucine zipper peptides, **265,** 350
  skeletal muscle, rippling muscle- and myasthenia gravis-associated autoantibodies recognizing, identification, **264,** 430
  structural class determination, correlation with amino acid composition, **264,** 216
  susceptibility to metal-catalyzed oxidation, increase due to conversion of lysine to N^{ϵ}-(carboxymethyl)lysine, **264,** 207
  tumor suppressor, potential regulation of human gene encoding HECT domain and RCC1-like repeats, **266,** 115
  tyrosine dephosphorylation, stimulation by laminin in PC12 cells, **262,** 713
  tyrosine phosphorylated, p100 and p120, association with PI3 kinase subunit p85 in hematopoietic cells: lack of p85 association with human Flt3 receptor, **254,** 440
  tyrosine phosphorylation in sperm plasma membrane, induction by capacitation (boar), **262,** 787
  unfolded, formation in endoplasmic reticulum of lens epithelial cells, induction by xanthurenic acid (bovine, pig), **265,** 600
Protein–substrate interactions
  in three-dimensional analysis of hemagglutinin–neuraminidase from Sendai virus, **262,** 401
Protein synthesis
  inhibition, and effect of ROS on adhesion of cancer cells and neutrophils to endothelial cells, **257,** 214
  in leukemia cells, inhibition by flavonoids, role of eukaryotic initiation factor 2α kinases, **265,** 589
Protein targeting to glycogen
  screening of coding and flanking regions for polymorphisms and association analysis with insulin action in Pima Indians, **258,** 184
Protein-tyrosine kinase
  CD3/TCR-induced, bypass by caffeine in inhibition of phosphatidylserine synthesis by Jurkat T cells, **266,** 497
  regulation of adhesion of anti-CD3-activated T cells to syngeneic colon adenocarcinoma cells (mouse), **255,** 460
  role in cyclooxygenase expression and PGE$_2$ production in human gingival fibroblasts stimulated with IL-1β and EGF, **257,** 528
  role in superoxide anion-induced formation of inositol phosphates in rat mesenteric artery SMCs, **259,** 239
Protein-tyrosine-phosphatase
  activation, role in phorbol ester reduction of EGF receptor phosphorylation in pancreatic cancer cells (human), **265,** 728
  PTPBR7, mammalian, inactivation of MAP kinase, **256,** 52
  putative cytosolic PTP36, isoforms A, B, C, and D, characterization (mouse), **266,** 523
Protein-tyrosine-phosphatase-α
  overexpression in adipose cells, inhibition of GLUT4 translocation (rat), **255,** 200
Protein-tyrosine-phosphatase-κ
  overexpression in adipose cells, effect on GLUT4 translocation (rat), **255,** 200
Proteoglycans
  24-kDa, in urine of cachectic cancer and AIDS patients, isolation, characterization, and distribution, **254,** 642
  articular cartilage superficial zone protein, homology with megakaryocyte stimulating factor precursor and role in growth, cytoprotection, and lubrication (bovine, human), **254,** 535
  heparan sulfate composition of alternatively spliced CD44 fusion proteins, **257,** 839
  recombinant heparan sulfate proteoglycan with 20-kDa glycosaminoglycan chains, human perlecan domain I expression as, **256,** 542
  synthesis in cultured peritoneal macrophages, modulation by serum amyloid A (mouse), **261,** 298
Proteoliposomes
  Sendai virus-coated, *in vivo* gene transfection in rat heart using, gene product identification after, **259,** 408
Proteolysis
  amyloid precursor fusion protein, atypical processing in *Pichia pastoris,* **262,** 263; *erratum,* **263,** 596
  by caspases, resistance of liver poly(ADP-ribose) polymerase to, **256,** 436
  fibrinogen chains, mediation by ubiquitin proteasome pathway, **261,** 590
  retinoid X receptor α by lysosomal cathepsin L-type protease, **254,** 388
Prothoracicotropic activity
  Samia cynthia ricini bombyxin-related peptides, **266,** 575
Protocadherin 2C
  cloning: expression in redundant manner with OL-protocadherin in developing brain (mouse), **260,** 641
Protonation
  adenophostin A, inframolecular studies: comparison with 1-D-*myo*-inositol 1,4,5-trisphosphate, **266,** 334
Proton motive force
  extrusion system driven by, modulation of isoniazid accumulation in *Mycobacterium smegmatis,* **256,** 682
Protons
  effect on secondary structure of nodulation protein NodO (*Rhizobium leguminosarum* biovar *viciae*), **263,** 516
Protoporphyrin
  and other dicarboxylic porphyrins, GSH-dependent oxidative modification by mammalian and plant peroxidases, **259,** 195
Protoporphyrin IX
  δ-aminolevulinic acid-induced levels, relationship to mitochondrial content in neoplastic cells *in vitro,* **265,** 315
Prp4
  biochemical properties and physiological functions, **266,** 291
psbA gene
  light-dependent and rhythmic transcripts in homologous/heterologous cyanobacterial cells, **255,** 47
*psb*U gene
  cloning and expression, and functional studies of recombinant 12-kDa PSII protein (red alga *Cyanidium caldarium*), **260,** 245
PSC833
  effect on calcein retention and inhibition of multidrug resistance pump in human leukemic lymphoblasts, **257,** 410
Pseudomonas aeruginosa
  fluorescent dye accumulation, role of efflux pumps and outer membrane permeability barrier, **261,** 452
Pseudomonas putida
  benzyl alcohol dehydrogenase from, catalysis by, role of allylic or benzylic stabilization, **259,** 220
Pseudomonas sp. DJ77
  phnIJ genes encoding acetaldehyde dehydrogenase (acylating) and 4-hydroxy-2-oxovalerate aldolase, cloning and evolution, **256,** 469
Pseudomonas stutzeri
  strain KC, extracellular agent of CCl$_4$ dehalogenation, identification as pyridine-2,6-bis(thiocarboxylate), **261,** 562; *erratum,* **265,** 770
  substrain ZoBell, ferricytochrome c-551 from, solution conformation, **254,** 675
Psoralen
  and ultraviolet A radiation, genotoxicity, evaluation with reconstituted three-dimensional human skin, **254,** 49
Psychrophile
  alanine racemase from *Bacillus psychrosaccharolyticus,* characterization, **256,** 333
P-type ATPase
  ATPase II, cloning, expression, and chromosomal mapping (human), **257,** 333

P-type ATPase (*continued*)
  role in copper homeostasis, **261,** 225
PU.1
  binding in macrophages, enhancement by protein kinase C activation (mouse), **254,** 211
  interaction of microphthalmia-associated transcription factor with, and effect on subcellular localization, **254,** 384
  and Sp1/3, synergistic activation of human Btk promoter, **259,** 364
Pulmonary artery
  resistance-sized, K^+ current profile endothelial cells (rat), **263,** 405
Pulmonary hypertension
  hypoxia-induced, right heart hypertrophy in, reduction by L-arginine (rat), **254,** 100
Pulsatile stretch
  activation of MAPK family members and focal adhesion kinase in cultured rat cardiac myocytes, **259,** 8
  stimulation of vascular endothelial growth factor secretion by cultured rat cardiac myocytes, **254,** 462
Pur *α*
  binding to single-stranded purine-rich DNA elements, activation by calmodulin, **255,** 406
Purinergic receptors, *see specific receptor*
Puromycin-sensitive aminopeptidase
  gene cloning and analysis (human), **258,** 234
Putidaredoxin
  hyperfine-shifted ^{13}C and ^{15}N resonances in, assignment strategy, **258,** 54
Pyrethroid insecticides
  cattle tick resistant to, point mutation in *para*-type sodium channel gene of, identification, **261,** 558
Pyridine-2,6-bis(thiocarboxylate)
  identification as extracellular agent of CCl_4 dehalogenation from *Pseudomonas stutzeri* strain KC, **261,** 562; *erratum,* **265,** 770
Pyridinolines
  as major crosslinking residues in matrix of lamprey branchial cartilages, **261,** 635
Pyridinylimidazoles
  SB 203580, effects on p38 MAP kinase activation and activity, **263,** 825
Pyrimidine dimers
  in genes, repair in Scid cells (mouse), **264,** 878
Pyrithione
  inhibition of NF-*κ*B activation in bovine cerebral endothelial cells, **259,** 505
Pyrococcus kodakaraensis KOD1
  DNA compaction profile and intracellular contents of archaeal histones from, **258,** 416
Δ^1-Pyrroline-5-carboxylate synthetase 1
  gene expression, stress-responsive and developmental regulation in *Arabidopsis thaliana,* **261,** 766
Pyrroloquinoline quinone
  glucose dehydrogenases with, water-soluble mutant with altered K_m values, site-directed mutagenesis studies on putative active site, **264,** 820
Pyruvate carboxylase
  recombinant human, functional expression, purification, and characterization, **266,** 512
Pyruvate dehydrogenase complex
  regulatory effect of thiamin pyrophosphate (pig heart), **256,** 341
Pyruvate formate-lyase-activating enzyme
  5′-deoxyadenosyl radical generated from *S*-adenosylmethionine by, capture by dehydroalanyl residue, **254,** 306
Pyruvate kinase
  as microtubule destabilizing factor *in vitro,* **254,** 430
Pyruvate kinase L
  gene promoter, carbohydrate response element-binding protein of, characterization and purification, **257,** 44
Pyruvate kinase M
  gene expression, regulation, **256,** 257

Q

Quadruplex
  intramolecular, of G-rich strand of mouse hypervariable minisatellite Pc-1, formation, **264,** 327
Quercetin
  inhibition of glucose uptake in U937 cells, **260,** 568
  inhibition of protein synthesis in leukemia cells, role of eukaryotic initiation factor 2*α* kinases, **265,** 589
  inhibition of Vpr-induced cell cycle abnormality (MIT-3 cells), **261,** 308
Quinoline derivative
  MS-209, direct interaction with multidrug resistance protein in human gastric cancer cells, **255,** 618; *erratum,* **258,** 816
Quinones
  DNA arylation mediated by, prevention by antioxidants (HL-60 cells), **262,** 769

R

Rab3
  isoforms, cloning and localization in bovine, human, and rat parathyroid glands, **255,** 645
Rab36 gene
  within region at 22q11.2 homozygously deleted in malignant rhabdoid tumors, cloning and characterization, **254,** 594
Rab-interacting protein
  human prenylated Rab acceptor PRA1, cDNA cloning and characterization, **258,** 657
Rac1
  disruption of p67*phox*/p40*phox* binding: novel role for Rac in NADPH oxidase activation, **263,** 118
  as molecular switch for cadherin-mediated cell–cell adhesion, **262,** 1
  in study of Ca^{2+} role in JNK activation and DNA fragmentation in H9c2 cells (rat), **262,** 350
Radicals
  protein-derived, EPR detection in H_2O_2 reaction with Fe bound in mitochondrial F_1ATPase (bovine), **263,** 281
Radicicol
  related LL-Z1640-2, inhibition of JNK/p38 pathways in signal-specific manner, **257,** 19
Raf-1 kinase
  activation, induction by IL-17 in U937 monocytic progenitor cells, **259,** 172
Raffinose
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
Ral
  role in v-Raf-induced activation of phospholipase D, **255,** 502
RalA
  dissociation from synaptic membranes by Ca^{2+}/calmodulin (rat), **263,** 765
Raman spectroscopy
  copper–adenine catalyst for O_2 production from H_2O_2, **263,** 672
Ran GTPase
  induction of microtubule self-organization in egg extracts (*Xenopus laevis*), **262,** 571
RANKL
  hematopoietic cell cultures stimulated by, osteoclast differentiation in, enhancement by TGF-*β*, **265,** 233
  ODF/OPGL/TRANCE/RANKL, regulation of osteoclast differentiation and function, **256,** 449

RANTES
  genomic organization, sequence analysis, and transcriptional regulation in dermal fibroblasts (human), **255,** 470
Rap1
  nRap GEP functioning as neural GDP/GTP exchange protein for, analysis (human), **265,** 38
Rapamycin
  inhibition of activation of ryanodine receptors from skeletal muscle by fatty acyl CoA–acyl CoA binding protein complex, **264,** 409
  signaling pathway targeted by, inhibition by L-asparaginase in human leukemia cells, **260,** 534
Ras
  activated, *in vivo* interaction with AF-6 (Rat1 cells),.**259,** 103
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
  H-Ras, negative regulation of $\alpha_3\beta_1$ integrin expression in ECV304 endothelial cells, **257,** 95
  signal transduction pathway dependent on, regulation of endothelial cell adherens junctions (human), **260,** 371
Ras-associating-like domain
  identification by sequence analysis in N-termini of band 4.1/JEF domains and in Grb7/10/14 adapter family, **259,** 113
Ras-binding proteins
  Ce-FLI-1, comprising leucine-rich repeats and gelsolin-like domains (*Caenorhabditis elegans*), **257,** 111
Ras/Erk signaling pathway
  activation by cytoskeletal reorganization, role in induction of urokinase-type plasminogen activator gene (LLC-PK$_1$ cells), **262,** 666
ras farnesyltransferase
  inhibitor manumycin A, inhibition of vascular smooth muscle cell proliferation and migration (rat), **264,** 915
ras oncogene
  failure to restore *in vivo* tumorigenic phenotype in embryonic stem cells lacking VEGF, **254,** 480
  RECK gene downregulation mediated by, role of Sp1 site (mouse), **264,** 668
Ras p21 GTPase-activating protein-associated protein
  105-kDa, in trophoblasts and choriocarcinoma cells (mouse), **263,** 523
Rate equations
  steady-state, derivation with two-step computer-assisted method, **265,** 448
Rb, *see* Retinoblastoma susceptibility protein
RCC1-like repeats
  and HECT domain, human gene encoding, interaction with cyclins and potential regulation by tumor suppressor proteins, **266,** 115
Reactive oxygen species
  and Ca^{2+}, intracellular, role in induction of heparin-binding EGF-like growth factor in vascular endothelial cells and SMC, **259,** 50
  copper-mediated formation during glycation reactions *in vitro,* block by lens proteins, **259,** 706
  DNA damage by, biomarkers: nitrite potentiation of HOCl-induced DNA base modification, **257,** 572
  effects on adhesion of cancer cells and neutrophils to endothelial cells in absence of *de novo* protein synthesis, **257,** 214
  EPR detection in hemolymph of moth larvae, **264,** 212
  mediation of inhibitory effects of stimulated EGF receptors on muscarinic M_3 receptor-linked signaling, **255,** 774
  produced via NADPH oxidase, role in tyrosine phosphorylation in B- and T-lineage lymphoid cells (human), **255,** 262
  production in excitotoxin-stimulated cerebellar granule cells, sources of, **256,** 320
  in regulation of energy metabolism in human cells in aging and diabetes, **266,** 662
  as risk factor in verotoxin-1-exposed rats, **260,** 813
  role in blue light-mediated signal transduction in coleoptile tips, **256,** 293
  role in osmotic stress-induced Syk activation in B cells, **262,** 231
  role in rescue of misassembled thyroglobulin in follicular lumen (human), **255,** 438
  role in upregulation of mitochondrial biogenesis genes in mtDNA-depleted HeLa cells, **258,** 44
  silica-induced generation in Rat2 fibroblasts, role in MAP kinase activation, **262,** 708
recA
  induction by polyamines (*Escherichia coli*), **264,** 584
rec A/RAD51 gene family
  mouse *TRAD/R51H3/RAD51D* gene in, multiple alternative transcripts of human homologue, **257,** 156
Receptor activator of NF-κB ligand
  hematopoietic cell cultures stimulated by, osteoclast differentiation in, enhancement by TGF-β, **265,** 233
  ODF/OPGL/TRANCE/RANKL, regulation of osteoclast differentiation and function, **256,** 449
Receptor aggregation
  role in osmotic stress-induced Syk activation in B cells, **262,** 231
Receptor autophosphorylation
  EGF-induced, in primary hepatocytes isolated from phenobarbitone-treated mice, **260,** 483
Receptor binding
  estrogen receptor by dialkyl phthalates, **254,** 311
Receptor tyrosine kinases
  receptor genes in renal cell carcinoma associated with angiogenesis, identification by differential hybridization (human), **257,** 855
RecG
  resolution of R-loop in replication origin of human mitochondrial DNA, **255,** 1
RECK gene
  ras-mediated downregulation, role of Sp1 site (mouse), **264,** 668
Recombination signal binding protein-jκ
  enhanced expression and autoimmunity in dilated cardiomyopathy (human), **266,** 432
Red light
  induced stimulation of *E. coli* cell growth, role of ground and excited singlet state oxygen, **257,** 753
Reduced-folate transporter
  regulation by nitric oxide in cultured human retinal pigment epithelial cells, **257,** 279
Reductive dehalogenase
  for tetrachlorohydroquinone, two-component system from *Phanerochaete chrysosporium,* **257,** 901; *erratum,* **259,** 232
Regucalcin
  identity with senescence marker protein-30, **254,** 1
Regulators of G protein signaling, *see* RGS proteins
Regulatory elements
  cystatin S gene (rat), **261,** 705
  upstream regulatory element contributing to hepatocyte-specific expression of rat serum amyloid A1 gene, **264,** 395
Relaxation
  skinned skeletal muscle fibers (frog), **254,** 330
Renal artery
  permeabilized, Ca^{2+} sensitivity of contractile apparatus in, effects of smooth muscle myosin phosphatase small subunit (pig), **254,** 158
Renal cell carcinoma
  receptor genes associated with angiogenesis in, identification by differential hybridization (human), **257,** 855
Reno-60
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240

Repetitive pulsed magnetic stimulation
  effects on cell proliferation and HSP70 expression in normal and malignant human cells, **261,** 689
Replication
  Epstein–Barr virus in Raji cells, switch from latency to, potentiation by cocaine, **264,** 33
  hepatitis G virus/GB virus C in human subjects, sites of, **258,** 296
  HIV-1 in human astrocytoma cells, inhibition by NO, **254,** 200
Replication factor C
  large subunit p140, telomere-binding activity (human), **258,** 482
Replication origin
  human mitochondrial DNA, R-loop in, resolution by Holliday junction-specific helicase RecG, **255,** 1
  mini-OriP, Epstein–Barr virus-based expression vector containing, construction, **264,** 938
Reproductive function
  dysfunction related to minor toluene metabolites causing oxidative DNA damage, **261,** 478
  stimulatory effect of circulating leptin: LH and PRL surges (female rat), **263,** 162
Respiration
  effect of mitochondrial DNA mutation cosegregating with pathophysiological U wave (human), **257,** 228
  inhibition by cytochrome *c* translocation associated with photodynamic therapy-induced apoptosis in lymphoma cells, **255,** 673
Respiratory burst
  in fMet-Leu-Phe-stimulated human neutrophils, relationship to ERK and phospholipase D activity, **264,** 371
  macrophage, induction by oxidized LDL via its protein moiety (human), **263,** 804
Respiratory contact sites
  density, modulation of cytochrome *c*-mediated extramitochondrial NADH oxidation, **259,** 325
Respiratory distress syndrome
  bleomycin-detectable free iron in alveolar system of preterm infants, **257,** 218
Restin
  antiangiogenic activity, comparison with endostatin: NC10 domain of human collagen XV, **255,** 735
Restriction enzymes
  plasmid resistance to, enhancement by conjugation to lactose via diazocoupling, **260,** 323
Restriction fragment length polymorphism
  PCR–RFLP, in genotyping of *CYP2A6* (human), **262,** 146
Restriction landmark cDNA scanning
  identification of upregulated uridine kinase in ventral horn after crush injury to sciatic nerve (rat), **266,** 104
Resveratrol
  effect on tumor growth in rat tumor model, **254,** 739
  selective inhibition of cytochrome P450 1A1 (human), **262,** 20
Ret
  activation by mutation at Asp 631 identified in sporadic pheochromocytoma, mechanism, **255,** 587
  with MEN 2B mutation, mediation of phosphatidylinositol 3-kinase activity and phosphorylation state of downstream signaling molecules (human), **262,** 68
Retina
  as abundant source of vitronectin mRNA (human), **258,** 524
  chick embryo neural retina, mAb generated against, characterization of MARCKS identified by, **257,** 480
  choline acetyltransferase and GLUT3 colocalization (rat), **256,** 505
  pericyte migration, effect of angiotensin II (bovine), **266,** 382
  photoreceptor cells
    guanylate cyclase subtype expression (medaka), **255,** 216
    site of arylalkylamine *N*-acetyltransferase circadian expression (rat), **248,** 115; *erratum,* **261,** 546
  vaso-obliteration and hypoxia, associated VEGF gene expression (mouse), **262,** 333
Retinal pigment epithelial cells
  nitric oxide regulation of reduced-folate transporter *in vitro* (human), **257,** 279
Retinal pigment epithelium
  as abundant source of vitronectin mRNA (human), **258,** 524
Retinoblastoma interacting zinc finger protein
  identification of DNA binding protein cooperating with estrogen receptor as, **264,** 983
Retinoblastoma protein
  association with protein phosphatase-1 in colcemid-induced apoptosis (HeLa cells), **266,** 279
  dephosphorylation, role in heat-induced G1 arrest (HeLa, NCI-H1299 cells), **266,** 377
  direct interaction of p21 cyclin-dependent kinase inhibitor with, **263,** 35
Retinoblastoma susceptibility protein
  role in inhibition of cell growth by p15^{INK4B}, **262,** 534
Retinoic acid
  biosynthesis in olfactory mucosa of adult mice, **256,** 346
  carcinoma cell lines resistant to, growth and apoptosis, effects of 4-hydroxyphenylretinamide, **254,** 636
  potentiation of TNF-α-induced ICAM-1 expression in human epidermal keratinocytes, **255,** 64
  synergism with cAMP to enhance MMP-2 basal promoter activity, **258,** 663
9-*cis*-Retinoic acid
  dependent and independent retinoid X receptor β functions, differential regulation by alternative splicing, **255,** 625
  regulation of c-erbB-4/HER4 expression in T47D breast cancer cells, **258,** 559
  regulation of retinoid X receptor in human cell lines, **260,** 729
all-*trans*-Retinoic acid
  growth inhibition effects in human colon carcinoma HT29 cells, mediation by retinoic acid receptor α, **261,** 572
  regulation of c-erbB-4/HER4 expression in T47D breast cancer cells, **258,** 559
Retinoic acid receptor
  in olfactory mucosa of adult mice, **256,** 346
Retinoic acid receptor α
  mediation of growth inhibition by retinoids in human colon carcinoma HT29 cells, **261,** 572
Retinoic acid receptor element
  identification in human cholesteryl ester transfer protein gene, **258,** 411
Retinoic acid response element
  identification in murine protein kinase C α promoter, **263,** 28
Retinoids
  anticancer effects in pancreatic adenocarcinoma model, optimization of treatment conditions for, **257,** 596
  growth inhibition effects in human colon carcinoma HT29 cells, mediation by retinoic acid receptor α, **261,** 572
Retinoid X receptor
  in olfactory mucosa of adult mice, **256,** 346
  regulation by ligand 9-*cis*-retinoic acid in human cell lines, **260,** 729
Retinoid X receptor α
  cleavage by lysosomal cathepsin L-type protease, **254,** 388
Retinoid X receptor β
  ligand-dependent and -independent functions, differential regulation by alternative splicing, **255,** 625
Retinol, *see* Vitamin A

Retinol binding protein
  and transthyretin, high serum levels, compound heterozygote with, **264,** 365
Retinoschisis
  X-linked, recurrent missense and nonsense mutations in XLRS1 gene in families with, **256,** 317
Retrotransposons
  Ty3, in yeast, reverse transcriptase activity for, cell cycle control of, **254,** 679
Retrovirus
  expression cloning system, in isolation of oncogenes from mammary tumors (rat), **265,** 7
  targeted gene transfer mediated by, using adenovirus carrying ecotropic receptor gene, for hepatoma-specific gene therapy, **265,** 550
Reverse transcriptase
  activity for yeast retrotransposon Ty3, cell cycle control of, **254,** 679
  HIV-1, inhibition by nitric oxide, **258,** 624
RFP gene
  promoter region, characterization (human), **261,** 381
RGS proteins
  RGS 1 and RGS 16, induction in response to bacterial LPS and stimulation of c-fos promoter expression (pig), **259,** 550
Rhabdoid tumors
  malignant, *Rab36* gene in region at 22q11.2 homozygously deleted in, cloning and characterization, **254,** 594
RHCE gene
  and RHD gene, spacer region, sequence analysis (human), **263,** 378
RHD gene
  from D^{Va} donors, genomic organization: detection of D^{Va}-like phenotype (human), **254,** 786
  and *RHCE* gene, spacer region, sequence analysis (human), **263,** 378
Rheumatoid arthritis
  fibroblastic synoviocytes from patients with, m-calpain mRNA expression, downregulation by inflammatory cytokines, **266,** 341
  synovial hyperplasia in, dominant and shared T cell receptor β chain variable regions inducing, **263,** 172
Rhizopus nigricans
  heat shock protein 70 induction, **265,** 494
Rho
  role in v-Raf-induced activation of phospholipase D, **255,** 502
Rho-associated kinase
  brain distribution (bovine), **263,** 575
Rhodococcus sp. M-777
  endoglycoceramidase from, enzymatic activity, essential role of Glu residue in conserved Asn-Glu-Pro sequence, **260,** 89
Rhodocytin
  induction of platelet activation by interaction with glycoprotein Ia/IIa (human), **256,** 114
Riboflavin
  complex with N-terminal truncated cytochrome P450 2B4, photoactivity and monooxygenase activities, **263,** 678
Riboflavin carrier protein
  immunological relatedness (chicken, human), **262,** 539
Ribonuclease
  isolation from fresh fruiting bodies of straw mushroom, **264,** 714
  treatment of yeast and mammalian cell extracts with, effects on substrate methylation by type I protein-arginine *N*-methyltransferases, **259,** 391
Ribonuclease A
  stability, role of valine-108 belonging to chain-folding initiation site (bovine), **265,** 356
Ribonuclease G
  involved in processing of 5′ end of 16S rRNA, encoding by *E. coli cafA* gene, **259,** 483
Ribonucleoproteins
  heterogeneous nuclear, *see* Heterogeneous nuclear ribonucleoprotein
Ribonucleotide reductase
  R2 protein, native or *p*-butoxyphenol-treated, regeneration of tyrosyl radical (mouse), **258,** 322
Ribosomal proteins
  genes, from *Halobacterium halobium* region homologous to *E. coli* α-operon, cloning, sequencing, and characterization, **264,** 24
  L5, phosphorylation by protein kinase CKII, **263,** 475
  L7, nucleic acid binding domains with distinct specificities (human), **258,** 530
  L15, gene homologue from crayfish *Orconectes limosus,* cloning and characterization, **256,** 313
  L34, inhibition of Cdk5, **255,** 631
  L41, coding gene in cycloheximide-resistant ribosomes, promoter upregulation during growth inhibition in *Candida maltosa,* **258,** 611
  S3, defective DNA repair activity, noninvolvement in chromosomal instability of Fanconia anemia cells, **264,** 518
  S7, mitochondrial homolog, identification (bovine), **266,** 141
  S21, of 40S ribosome, binding by human ribosome-associated protein LBP/p40, **256,** 385
Ribosomal RNA
  16S, 5′ end processing, *E. coli cafA* gene-encoded RNase G involved in, **259,** 483
  28S, and GAPDH, β-actin, and cyclophilin, comparison as internal standards for quantification of RNA levels under hypoxia, **259,** 523
  HL-60 cell, analysis, in quantitation of human granulocytic ehrlichiosis infectious agent, **262,** 7
Ribosome-inactivating proteins
  JIP60, alteration of ribosome conformation *in vivo* in transgenic tobacco, **258,** 572
  mistletoe lectin I from *Viscum album,* crystal structure, **257,** 418
  role in apoptosis, study involving site-specific mutagenesis of mistletoe lectin, **264,** 944
Ribosome modulation factor
  role in spermidine-induced decrease of cell viability (*Escherichia coli*), **264,** 643
Ribosomes
  30S subunit, binding of essential *E. coli* small G protein Era, **264,** 51
  40S, S21 protein of, binding by human ribosome-associated protein LBP/p40, **256,** 385
  components for protein synthesis, incorporation into liposomes, **261,** 238
  conformation, alteration by RIP-JIP60 *in vivo* in transgenic tobacco, **258,** 572
  cycloheximide-resistant, ribosomal protein L41 gene promoter in, upregulation during growth inhibition in *Candida maltosa,* **258,** 611
  eEF-2 (100-kDa) bound to, transformation to eEF-2 (65-kDa) during peptide elongation process *in vitro,* **255,** 535
Ribozymes
  hairpin, specificity *in vivo,* **257,** 356
  hammerhead, *see* Hammerhead ribozymes
Ribulose 1,5-bisphosphate carboxylase/oxygenase
  forms I and II, genes encoding, *cbbQ* genes located downstream of, effects on RubisCO activities (*Hydrogenovibrio marinus*), **265,** 177
Ricin RCA_{60}
  phospholipase activity, **258,** 252; *erratum,* **260,** 835
Rickettsia
  Cowdria ruminantium, map1 gene: member of multigene family with conserved and variable genes, **257,** 300
Rippling muscle disease
  related symptoms in myasthenia gravis, associated autoantibodies recognizing skeletal muscle proteins, identification, **264,** 430

- Risedronate
  - inhibition of isopentenyl pyrophosphate isomerase/farnesyl pyrophosphate synthase, **255,** 491
- R-loops
  - in replication origin of human mitochondrial DNA, resolution by Holliday junction-specific helicase RecG, **255,** 1
- RNA
  - β_1-adrenergic receptor transcripts, 2.75 and 3 kb, cloning and alterations in failing heart (human), **258,** 552
  - alternative splicing, *see* Alternative splicing
  - antisense, *see* Antisense RNA
  - association with lysozyme, **266,** 366
  - binding, specificity of nucleic acid binding domain 2 of human ribosomal protein L7, **258,** 530
  - double-stranded, induction of specific developmental defects in zebrafish embryo, **263,** 156
  - hepatitis C virus, conserved 3′ terminus, selective binding by heterogeneous nuclear ribonucleoprotein I, **254,** 351
  - HIV-1, depurination by pokeweed antiviral protein isoforms PAP-I, PAP-II, and PAP-III, **260,** 453
  - *in vitro* selective synthesis with L-A virus nanoparticles, **263,** 23
  - levels under hypoxia, quantification, comparison of GAPDH, β-actin, cyclophilin and 28S rRNA as internal standards for, **259,** 523
  - messenger, *see* Messenger RNA
  - nucleocytoplasmic transport, effect of changes in nuclear membrane lipid composition (rat), **258,** 476
  - pyrimidine clusters, binding to lipocortin I heterotetramer, **265,** 200
  - ribosomal, *see* Ribosomal RNA
  - S100A11, steady-state levels in human tissues, **263,** 135
  - sense and antisense, mouse insulin-like growth factor II receptor, lack of reciprocal genomic imprinting in CNS, **257,** 604
  - small cytoplasmic, upregulation, induction by depletion of *Bacillus subtilis* histone-like protein HBsu, **258,** 211
  - splicing, *see* Splicing
  - 3′ of apolipoprotein B mRNA mooring sequence, role in editosome assembly, tissue-specific differences (rat enterocytes, liver), **263,** 81
  - *TRAD* gene in human, multiple alternative transcripts, **257,** 156
  - transgenic, species-specific alternative splicing in mammary glands of pigs, rabbits, and mice, **257,** 843
  - wobble variants of unmodified form of tRNA$_1^{Ser}$, *in vitro* codon-reading specificities, **257,** 662
  - yellow fever virus 5′ noncoding region, for enhancement of hepatitis C virus production by modification of translational control, **253,** 257; *erratum,* **257,** 250
- RNA binding proteins
  - AUF1, binding to AT_1 receptor mRNA (human), **266,** 609
  - hnRNP A2 and hnRNP L, binding to 3′UTR of glucose transporter 1 mRNA and formation of complex *in vivo* (human brain tumors), **261,** 646
- RNA-dependent RNA polymerase
  - NS5, of dengue virus, functional NLS and inhibitory CK2 site in 37-amino-acid interdomain, **257,** 731
- RNA editing
  - apolipoprotein B mRNA, editing enhancement activity from chicken enterocytes, sequence elements required for, **254,** 744
- RNA helicase
  - differentially expressed, identification by gene trapping, **262,** 677
  - related genes, identification in *Plasmodium falciparum* and *P. cynomolgi,* **255,** 312
- RNA helicase II/Gu protein
  - RNA helicase activity, inhibition by Adriamycin via binding to substrate, **266,** 361
- RNA interference
  - *trans* RNA interference caused by expanded CTG trinucleotide repeat: hypothesis for myotonic dystrophy pathogenesis (human), **264,** 76
- RNA polymerase
  - gene from *Halobacterium halobium* region homologous to *E. coli* α-operon, cloning, sequencing, and characterization, **264,** 24
- RNA polymerase II
  - carboxy-terminal domain, and CTD kinase, role in activity of general transcription factor IIE in yeast, **261,** 734
  - mediator carboxy-terminal domain complex of, subunit Med8, direct binding to regulatory elements of yeast *SUC2* and *HXK2* genes, **254,** 345
  - transcription by, activation without activator proteins, stimulation by recruitment of TBP and TFIIB to proximal promoter position, **256,** 45
- RNA recognition motifs
  - human neuronal ELAV-like proteins, in binding to cytokine mRNA, **256,** 263
- RNase, *see* Ribonuclease
- Ro5-4864
  - antiapoptotic activities (U937 cells), **265,** 457
- Ro52
  - DNA-binding properties and sequence specificity (human), **259,** 665
- ROCK
  - Y-27632 inhibiting, attenuation of stellate cell contraction and portal pressure increase induced by endothelin-1 (rat), **266,** 296
- Rods
  - guanylate cyclase subtype expression (medaka), **255,** 216
- ROMK1 channel
  - temperature-sensitive processing and transport (MDCK cells), **261,** 364
- Rosiglitazone
  - activation of PPARγ, regulation of gene expression in adipocytes (human), **265,** 265
  - induced increase in UCP-1 mRNA in fetal rat brown adipocytes, PPARγ-mediated, attenuation by PPARα activation by Wy 14643, **264,** 311
- Ro/SS-A
  - 52-kDa, DNA-binding properties and sequence specificity (human), **259,** 665
- Rotation
  - *Escherichia coli* F_1-ATPase, **260,** 597
- RU486
  - reversal of MRP-mediated multidrug resistance in human lung cancer cells, **258,** 513
- Rubrerythrin
  - NADH peroxidase activity, demonstration (*Clostridium perfringens, Desulfovibrio vulgaris*), **255,** 317
- Ryanodine receptor
  - Ca^{2+} release channel
    - activation from skeletal muscle by fatty acyl CoA–acyl CoA binding protein complex, inhibition by rapamycin, **264,** 409
    - in sarcoplasmic reticulum of skeletal muscle, inhibition by ADP/ATP translocase inhibitor atractyloside (rabbit), **258,** 247
  - type 3, role in dopamine release from striatum, evidence from mutant mouse lacking the receptor, **266,** 588

S

- S100A1
  - interaction with GFAP, tubulin, TRTK-12, and p53 peptide and S100A1 inhibition of GFAP polymerization, role of C-terminal extension, **254,** 36
- S100A4
  - extracellular role in periodontal ligament (bovine), **255,** 416
- S100A11
  - steady-state RNA levels in tissues and subcellular localization (human), **263,** 135

S100 family
  MRP8, murine B cell surface antigen with homology to, characterization, **263,** 17
S 17092-1
  cell permeant, potent specific inhibition of human proline endopeptidase, **257,** 657
Saccharomyces cerevisiae
  AQY1 from, molecular and functional study, **257,** 139
  budding
    caspase-independent killing by oligomerized Ced-4, **260,** 799
    conjugation of SUMO-1 homologue Smt3 with septin ring component Cdc3 at mother-bud neck in, **259,** 582
  CLC gene mutant in, functional complementation by cloned CLC chloride channels from *Oreochromis mossambicus,* **255,** 175
  extracts, RNase treatment, effects on substrate methylation by type I protein-arginine *N*-methyltransferases, **259,** 391
  fol2 deletion, complementation by human and *Escherichia coli* genes for GTP cyclohydrolase I, **255,** 521
  functional expression of tandem-repeated homodimer of mitochondrial ADP/ATP carrier, **262,** 726
  general transcription factor IIE, activator-specific requirement for, **261,** 734
  growth at alkaline pH, identification of high pH-inducible gene *SHC1* required for, **255,** 116
  heterologous expression of *Mucor rouxii* Δ^{12}-desaturase gene, **263,** 47; *erratum,* **265,** 771
  Med8 subunit of RNA polymerase II mediator carboxy-terminal domain complex, direct binding to regulatory elements of yeast *SUC2* and *HXK2* genes, **254,** 345
  mitochondria, purification and characterization of RNA dodecamer sequence binding protein, **261,** 740
  nonapoptotic, single-strand breaks in agarose-embedded chromatin of, **264,** 388
  nuclear import of nonnuclear proteins, and location and number of nuclear localizing signals, **256,** 278
  oxidative stress, protective effects of cloned prokaryotic iron superoxide dismutase, **256,** 63
  peroxisomal protein Yor180Cp of fatty acid metabolism, preliminary characterization, **260,** 28
  retrotransposon Ty3, reverse transcriptase activity for, cell cycle control of, **254,** 679
  ribosomal DNA region, strength of autonomously replicating sequences among repeats in, **266,** 190
  transcription initiation mediated by initiator binding protein in, **255,** 157
  transformed, growth arrest activities of HIV-1 Vpr, HFRIGC sequence residues involved in, **264,** 287
  ubiquitin ligase Npi1/Rsp5, N-terminal C$_2$ domain of, role in ubiquitination and endocytosis of Gap1 permease, **257,** 561
  vacuolar polyphosphate level, role of Spt7p: nickel detoxification, **257,** 835
SAG protein
  with Ring-H2 finger motif, interaction with and phosphorylation by protein kinase CKII in yeast two-hybrid system, **263,** 743
Salicylic acid
  dose- and time-dependent induction or potentiation of Hsp70/Hsc70 expression in *Lycopersicon esculentum,* **265,** 422
Salinity
  effect on atrial natriuretic peptide gene expression in *Limulus polyphemus,* **254,** 751
Saliva-binding epitopes
  Porphyromonas gingivalis FimA protein, expression on surface of *Streptococcus gordonii,* **258,** 222
Salivary gland
  NO synthase immunolabeling (sea slugs), **262,** 545
Salivary gland cells
  aquaporin 5 gene-transfected cells, AQ5 trafficking in, role of vesicle–cytoskeleton interaction (human), **266,** 443
Salmonella mutagenicity assay
  1,2-epoxy-3-(*p*-nitrophenoxy)propane, **261,** 844
Salmonella typhimurium
  genotoxicity of human milk extracts, **257,** 319; *erratum,* **259,** 494
Salt-bridge interactions
  procathepsin E propeptide and enzyme segment, molecular modeling study (human), **264,** 825
Samia cynthia ricini bombyxin-related peptides
  prothoracicotropic activity, **266,** 575
Sandwich enzyme immunoassay
  smooth muscle-constricting 31-amino acid endothelins, **256,** 1
SAPAP/GKAP proteins
  interaction with proline-rich synapse-associated proteins ProSAP1 and ProSAP2 (rat), **264,** 247
Saponins
  steroidal, of *Anemarrhenae* rhizomes, effects on superoxide generation in human neutrophils, **259,** 636
Sarcoglycan complex
  subunits, developmental expression in cultured myoctes (mouse), **262,** 88
Sarcoma cells
  antitumor effect of TNF-α conjugated with polyvinyl pyrrolidone, **257,** 448
Sarcomeres
  mouse homologue telethonin from, developmental and functional regulation, **257,** 699
Sarcoplasmic reticulum
  90-kDa junctional protein, formation of integral part of supramolecular triad complex in skeletal muscle, **261,** 603
  Ca^{2+}-ATPase, serine phosphorylation in intact beating rabbit heart, **264,** 241
  cardiac, Ca^{2+} pumping, stimulation by Ca^{2+}/CaM-dependent phosphorylation of Ca^{2+}-ATPase uncoupled from phospholamban (rabbit), **258,** 66
  cyclic ADP-ribose-dependent Ca^{2+} release, modulation by free [Ca^{2+}] (scallop), **257,** 57
  lumen, histidine-rich Ca^{2+} binding protein in, existence as multimer (rabbit), **263,** 667
  ryanodine receptor Ca^{2+}-release channel, inhibition in skeletal muscle by ADP/ATP translocase inhibitor atractyloside (rabbit), **258,** 247
Sarcosine
  synthetic leucine zipper peptides rich in, in probing of roles of side chains and backbone in protein structure, **265,** 350
Sas3
  histone acetyltransferase activity, zinc finger motif requirement for, **266,** 405
sat-1
  identification of mammalian brain sulfate transporter, **263,** 123
SB 203580
  alleviation of UV-induced phosphorylation of p53 at serine 389 and p53 activation, **261,** 464
  effects on p38 MAP kinase activation and activity, **263,** 825
  specific inhibitor of SAPK2/p38, inhibition of neutrophil NADPH oxidase activation, **259,** 465
SBRPs
  prothoracicotropic activity (*Samia cynthia ricini*), **266,** 575
Scanning tunneling microscopy
  single-molecule, higher plant light-harvesting complex II, **256,** 288
Scatter factor, *see* Hepatocyte growth factor
Scavenger receptor cysteine-rich superfamily
  CD163 gene in genomic organization and chromosomal localization (human), **260,** 466
SCF/KL, *see* Stem cell factor/Kit ligand

Schiff base
  interaction with bovine serum albumin and site-specific photocleavage, **265,** 311
Schizophrenia
  DRD4 gene associated with, genetic polymorphism in promoter region, **258,** 292
Schizosaccharomyces pombe
  hyphal growth, from deletion of *sep1*+ forkhead transcription factor, **263,** 465
  psu1$^+$, cloning and characterization, **262,** 368
Schwannoma
  pathogenesis, noninvolvement of *SMARCB1* gene, **257,** 886
Sciatic nerve
  crush injury, upregulated uridine kinase in ventral horn after, identification by RLCS (rat), **266,** 104
scid gene
  and *p53* gene, mutations in, cooperativity in lymphomagenesis in doubly heterozygous mice, **255,** 99
Scleroderma
  myofibroblasts in, serum starvation-induced cell death, rescue by IL-1 (human), **255,** 129
Scytalone dehydratase
  inhibitor binding by catalytically impaired mutants, wild-type enzyme as reporter for, **263,** 617
Sebaceous gland
  hair follicle, in nude mouse, serine protease overexpressed in, **258,** 374
Sec24p
  yeast, family of mammalian proteins homologous to, **258,** 679
SecB
  C-terminal tail mobility (*Escherichia coli*), **264,** 949
Secondary structure
  α-operon leader pseudoknot, in *Halobacterium halobium* and *E. coli,* **264,** 24
  cytolysins in soluble and membrane-bound form, IR spectroscopic study (sea anemone), **254,** 174
  β-dystroglycan N-terminal extracellular region, **266,** 274
  formation: earliest structural event in refolding of all β-sheet protein, **260,** 284
  human pancreatic thread protein in solution at acid pH, **258,** 653
  hydroxymethyldihydropterin pyrophosphokinases, prediction, **254,** 70
  nodulation protein NodO, effects of calcium and protons (*Rhizobium leguminosarum* biovar *viciae*), **263,** 516
  prion protein cellular isoform, dependence on solvent: spectroscopic characterization of intermediate conformation, **264,** 972
Secreted alkaline phosphatase
  constitutive secretory protein, sorting to regulated secretory pathway of AR42J exocrine cells, **257,** 545
Secretory granules
  immature or mature, in rat pancreatic β cells, α-SNAP function in insulin exocytosis from, **260,** 127
Secretory leukocyte protease inhibitor
  inhibition of murine neutrophil serine proteinases (human, mouse), **254,** 614
Secretory pathway
  regulated, of AR42J exocrine cells, sorting of constitutive secretory protein to, **257,** 545
  rMTC 6-23 cells, targeting and activation of PC2 into, role of protein 7B2, **257,** 473
Secretory proteins
  constitutive secreted alkaline phosphatase, sorting to regulated secretory pathway of exocrine cells (rat AR42J cells), **257,** 545
  translocation, defect caused by depletion of *Bacillus subtilis* histone-like protein HBsu, **258,** 211
Secretory vesicles
  exocytosis, functional roles of complexin I and II, transfection analysis (PC12 cells), **265,** 691
Selection marker
  effect on viability and plasmid stability of vectors encoding human neurotrophins expressed in *E. coli,* **258,** 29
Selectively infective phage method
  selection of peptide ligand to p75 neurotrophin receptor death domain and NMR determination of binding sites, **255,** 104
Selenocysteine
  thioredoxin reductase containing, in *Caenorhabditis elegans,* **259,** 244
Seminal vesicles
  cytochrome P450 4F8 gene expression (human), **261,** 169
Sendai virus
  coated proteoliposomes, *in vivo* gene transfection in rat heart using, gene product identification after, **259,** 408
  hemagglutinin–neuraminidase, 3D model, **262,** 401
  immunogenic glycoproteins from, vaccine delivery system using fusogenic liposomes with, **261,** 824
  infected human erythrocytes, selective lysis by cobra cytotoxins, **264,** 63
Senescence
  drought-induced, associated induction of cysteine proteases not observed during natural senescence (cowpea), **255,** 324
  p53-induced, reduction of mitochondrial membrane potential in, and effect on permeability transition pore responsiveness (human), **261,** 123
  two independent programs, triggering by TGF-β in cancer cells, **255,** 110
Senescence marker protein-30
  structure and biological function, **254,** 1
SENR
  urotensin II as endogenous ligand of, identification (pig), **265,** 123
Sepharose column chromatography
  IgA1-SG/Sepharose, preferential binding of human serum IgG3 subclass to, **264,** 424
Septin rings
  Cdc3 component of, conjugation with SUMO-1 homologue Smt3 at mother-bud neck in budding yeast, **259,** 582
Sequence studies
  N-acetylglucosamine-6-sulfotransferase (human, mouse), **263,** 543
  N-acetylglucosaminyltransferase I of *Arabidopsis thaliana,* alignment with human GlcNAcT-I, **261,** 829
  acutin (*Agkistrodon acutus*), **255,** 412
  adenylate kinase isozyme 3 promoter region (human), **264,** 990
  adenylyl cyclase type 3 full-length cDNA (human), **254,** 548
  β_1-adrenergic receptor transcripts, 2.75 and 3 kb (human), **258,** 552
  aggretin (Malayan pit viper), **263,** 723
  agkisacutacin from *Agkistrodon acutus* venom, **265,** 530
  Aire gene (mouse), **255,** 483
  Akt3 (human), **257,** 906
  aldose reductase gene $5'$-flanking region (mouse), **255,** 759
  ALP cDNA: CC chemokine with unique C-terminal extension (mouse), **258,** 737
  androgenic gland hormone (*Armadillidium vulgare*), **264,** 419
  androgen receptor cDNA (Japanese eel), **254,** 378
  angiopoietin-2B (chicken), **260,** 492
  ankhzn cytoplasmic protein with ankyrin repeats hooked to zinc finger motif (mouse), **257,** 206
  annexin IV, full-length and truncated form (murine macrophages), **258,** 162
  antifungal peptide isolated from *Aspergillus niger,* **263,** 646
  Apaf-1 forms (human), **261,** 746
  APOBEC-2 (human, mouse), **260,** 398; *erratum,* **263,** 264
  Apollon protein (human), **264,** 847
  appA2 acid phosphatase/phytase gene of *E. coli* isolated from pig colon, **257,** 117

AQY1 (*Saccharomyces cerevisiae*), **257,** 139
articular cartilage superficial zone protein homologous to megakaryocyte stimulating factor precursor (bovine, human), **254,** 535
Asp fl 1: allergenic IgE-binding protein from *Aspergillus flavus,* **261,** 669
ATPase II (human), **257,** 333
ATP-binding cassette transporter 1 (human), **257,** 29
ATX1 homologue protein (rat), **265,** 509
autonomously replicating sequences among repeats in rDNA region of *Saccharomyces cerevisiae,* **266,** 190
bacterial genomes: compositional correlation studies among the three different codon positions, **266,** 66
band 4.1/JEF domains: identification of Ras-associating-like domain in N-termini, **259,** 113
Baxϵ, **254,** 779
BMAL1 gene splice variants (mouse), **260,** 760
Brachyury promoter, **254,** 542
brain-specific membrane-anchored protein cDNA (human), **264,** 55
BRAK cDNA: divergent CXC chemokine preferentially expressed in normal cells (human), **255,** 703
brevinase (*Agkistrodon blomhoffii brevicaudus* venom), **260,** 665
calpastatin isoforms (mouse), **260,** 339
CAPN8: mouse calpain isoenzyme, **260,** 671
carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNAs (rainbow trout), **255,** 123
carnitine octanoyltransferase (human), **263,** 213
caspase-9: analysis of Akt phosphorylation sites (human, mouse), **264,** 550
cathepsin F cDNA (human), **257,** 313
CD28 cDNAs generated by alternatively spliced mRNA variants (human), **259,** 34
cdaA1 p85 gene regulating cytokinesis initiation in *Tetrahymena,* **264,** 112
Cdk5 and Cdk2 sequence alignment (human), **259,** 420
CDR3 of TCR/Vβ of T cells inducing synovial hyperplasia in rheumatoid arthritis, **263,** 172
centaurin-α_1 (human), **262,** 237
c-*ERBB-2* gene *C51,* **258,** 499
Cha o 2: major allergen of Japanese cypress pollen, **263,** 166
chloride–bicarbonate exchanger genes (human), **263,** 315
cholecystokinins CCK-8 and CCK-9 bioactive regions (dog), **266,** 400
Cizl: p21$^{\text{Cip1/Waf}}$-interacting zinc finger protein (human), **264,** 457
CLC chloride channels (*Oreochromis mossambicus*), **255,** 175
CLC-K2 chloride channel gene promoter (rat), **261,** 432
collagen XIV 16-kDa fragment purified from granulation tissue (rat), **256,** 642
complementary DNA fragments from clone from *Prevotella albensis:* overlapping sequences with high homology to functional proteins, **263,** 58
consensus binding sequence of ZF5 (mouse), **255,** 528
copper-containing nitrite reductase gene (*Alcaligenes xylosoxidans*), **255,** 427
corticotropin-releasing factor receptor 2α short variant from amygdala (rat), **256,** 692
cyclinA and Nck5a* sequence alignment (human), **259,** 420
cyclin-dependent kinase 5 activator-like molecule (*Drosophila melanogaster*), **261,** 459
Cys S gene 5′-flanking region (rat), **261,** 705
cytochrome *c*-553: lipoprotein characteristics (*Bacillus pasteurii*), **264,** 380
cytochrome P450 2B10-like cDNA P16 and pseudogene-derived P21 (murine liver), **258,** 11
cytochrome P450 2E1 gene 5′-flanking region (human, rat), **263,** 286
cytochrome P450 3A isozyme from intestinal microsomes (rat), **255,** 394
cytochrome P450 4C15 of arthropod steroidogenic glands, **264,** 413
cytochrome P450 4F7 cDNA (*Dicentrarchus labrax*), **258,** 155
cytochrome P450 4F8 cDNA (human), **261,** 169
cytochrome P450 6H1 cDNA: putative ecdysone 20-hydroxylase (*Locusta migratoria*), **259,** 305
cytochrome P450 27A truncated form purified from hepatic mitochondria (rabbit), **263,** 663
cytochrome P450 94A2 (*Vicia sativa*), **261,** 156
cytokinin oxidase gene (maize), **255,** 328
Dactylin cDNA (human), **261,** 64
defensin NP-2 from rabbit and C-terminal synthetic peptides, **254,** 281
DgTI: *Dioclea glabra* trypsin inhibitor, **261,** 838
DNase II-like acid DNase (rat), **265,** 395
DNA sequences responsible for reduced promoter activity of phospholipid transfer protein by fibrate (human), **264,** 802
DOC-1 related protein DOC-1R (human), **255,** 59
Drosophila DLG homolog rDLG6 expressed in rat brain, **265,** 462
Drosophila germ cell-less homologue in mouse, **262,** 223
DYRK1B cDNA (human, mouse), **254,** 474
efp cDNA (rat), **261,** 412
EHF cDNA (human), **264,** 119
ELR-1 of *Caenorhabditis elegans,* comparison with *Drosophila* ELAV and human HuD, **260,** 646
EPM2A: mouse epilepsy gene homologue, **257,** 24
esp-1 gene (human), **266,** 564
eukaryotic initiation factor 4B from *Arabidopsis thaliana* and wheat: identification as member of multigene family, **266,** 314
factor V activating enzyme from snake venom (viper), **262,** 328
Fas associated factor 1 (human), **262,** 388
Δ-6 fatty acid desaturase (rat), **255,** 575
fdx4 region of *Aquifex aeolicus* genome: translated [2Fe–2S] protein sequence, **261,** 885
Fe65L2 gene 5′ region (human), **258,** 385
[2Fe–2S] protein (*Aquifex aeolicus*), **261,** 885
FGF-20 (*Xenopus laevis*), **261,** 756
FHL3 expressed in skeletal muscle (mouse), **255,** 245
FHL4 expressed in testis (mouse), **255,** 251
fibroblast growth factor preferentially expressed in heart (human), **255,** 717
follistatin-related protein cDNA (*Xenopus laevis*), **254,** 42
Frizzled-4 gene on chromosome 11q14-q21 (human), **264,** 955
Frizzled-10 gene (human), **262,** 39
FtsZ gene of *Acholeplasma laidlawii,* and gene product, **262,** 44
fuscoredoxin (*Escherichia coli*), **260,** 209
G7 NahB: *Pseudomonas putida* G7 *cis*-1,2-dihydro-1,2-dihydroxynaphthalene dehydrogenase, **260,** 181
GADD34-like gene interacting with zinc-finger transcription factor binding p21$^{\text{WAF}}$ promoter, **256,** 249
ganglioside sialidase (human), **261,** 21
GB-C/hepatitis G virus, complete coding sequence of European isolate, **255,** 432
general odorant-binding protein 2 (*Bombyx mori*), **266,** 386
glucuronosyltransferase GlcAT-S cDNA: HNK-1 epitope biosynthesis (rat brain), **255,** 182
glutamate-gated chloride channel homologue (*Haemonchus contortus*), **254,** 529
glycogen phosphorylase gene of *Drosophila,* **257,** 34; *erratum,* **263,** 263
Gob-5 gene expressed in intestinal goblet cells (mouse), **255,** 347
gonadotropin receptor (amago salmon), **263,** 584
gonadotropin receptor GTH-RI cDNA expressed in ovary and testis (amago salmon), **265,** 366
Grb7/10/14 adapter protein family: identification of Ras-associating-like domain, **259,** 113
growth/differentiation factor-5 gene: minimal promoter components (human), **263,** 707
guanylate cyclase subtypes expressed in photoreceptor cells of retina and pineal organ (medaka), **255,** 216

Sequence studies (*continued*)
  guanylin cDNA (pig), **259,** 141
  Hannahpep purified from venom of Indian king cobra, **266,** 488
  HBV DNA, **262,** 530
  HCV core protein, **263,** 410
  headpin, alignment with other serpins (human), **264,** 299
  heat shock cognate protein 70 splice variant occurring after chronic antidepressant treatment of frontal cortex (rat), **261,** 541
  heat shock protein 70
    induced in *Rhizopus nigricans,* **265,** 494
    reef coral, **262,** 103
  heat shock protein 90α (Chinook salmon), **258,** 784
  heat shock protein 105 gene (mouse), **256,** 75
  heparanase *HSE1* cDNA (human), **261,** 183
  hepatocyte growth factor activator inhibitor type 2 with deleted first Kunitz domain (mouse), **255,** 740
  hepatoma-derived growth factor HRP-3 (human, mouse), **266,** 81
  herpes simplex virus type 1 thymidine kinase: multiple nuclear localization signals, **264,** 338
  histone deacetylase (mouse), **263,** 482
  HM1.24 antigen and gene promoter region (human), **258,** 583
  Hox genes (medaka fish), **260,** 66
  hpkA and *hpkB* archaeal histone genes (*Pyrococcus kodakaraensis* KOD1), **258,** 416
  HSP70-1 gene: additional exon (human), **257,** 193
  human eukaryotic parvulin homologue, **259,** 557
  human MafF homologue, **264,** 86
  human NEFA variants, **260,** 1
  human p100 homologue expressed by *Histoplasma capsulatum* during infection of murine macrophages, **254,** 605
  hydroxymethyldihydropterin pyrophosphokinases, **254,** 70
  hypoxia-inducible factor α oxygen/redox-dependent degradation domain, **260,** 557
  IalA invasion gene of *Bartonella bacilliformis,* **256,** 474
  IL1HY1 gene (human), **263,** 702
  Im7 protein aligned with other DNase-type immunity proteins (*Escherichia coli*), **264,** 69
  integrin α7 gene transcripts of cardiac and skeletal muscle (human), **260,** 357
  interleukin-13 receptor α1 gene promoter (human), **265,** 387
  invertebrate urechistachykinin isolated from *Urechis unicinctus,* cDNA sequence, **263,** 848
  L15 ribosomal protein gene homologue (*Orconectes limosus*), **256,** 313
  lactogenin (bovine milk), **263,** 187
  LaMDR1 multidrug resistance gene (*Leishmania amazonensis*), **255,** 289
  LAT1 subunit of system L amino acid transporter (human), **255,** 283
  LCAT-like lysophospholipase cDNA (human), **257,** 50
  lectin multigene family (*Drosophila melanogaster*), **261,** 923
  leukotriene B_4 receptor (rat), **262,** 806
  lipophilins (human), **256,** 147
  MAb 5C3 variable regions: intracellularly expressed fragments against HBsAg, **255,** 785
  macrophin (human), **264,** 568
  mannan-binding lectin MVL isolated from *Microcystis viridis,* **265,** 703
  map1 gene of *Cowdria ruminantium,* **257,** 300
  MCP-4 gene in dermal fibroblasts (human), **255,** 470
  MD-1 cDNA (human monocytes), **256,** 325
  melanocortin-1 receptor gene promoter region (human), **262,** 452
  membrane type-1 matrix metalloproteinase substrate sequences, identification with bacteriophage peptide display library, **266,** 308
  MEN1 ortholog in zebrafish, **264,** 404
  meta-cleavage operons, conserved and hybrid operons in PAH-degrading *Burkholderia* RP007, **262,** 308
  MFG-E8 mRNA splice variant with exon for multiply O-glycosylated domain (mouse), **254,** 522
  MHC class I alleles: implications for evolutional mechanisms of HLA-A, -B, -C loci (chimpanzee), **261,** 46
  mitochondrial glycerol-3-phosphate dehydrogenase gene (human), **263,** 439
  mitochondrial small subunit ribosomal protein S7 (bovine), **266,** 141
  MUC3 gene, human, **261,** 83
    3′ region, **263,** 728
  Mucor rouxii Δ^{12}-desaturase cDNA, **263,** 47; *erratum,* **265,** 771
  murine 90.12 antigen aligned with S100 family members, **263,** 17
  mutation identification in hypoglycemic phenotype of very long chain acyl-CoA dehydrogenase deficiency, **264,** 483
  MyoK (*Dictyostelium discoideum*), **255,** 711
  myosin phosphatase 130-kDa regulatory subunit cDNA (porcine aortic endothelial cells), **254,** 490
  myristylated and palmitylated Ser/Thr protein kinase (human, mouse), **259,** 533
  Na^+ bicarbonate cotransporter, rat pancreatic, **264,** 291
  neural NELL1 and NELL2 proteins (rat), **265,** 79
  neuronal apoptosis inhibitory protein gene transcripts (human), **264,** 998
  β-neurotoxin of New World scorpion *Centruroides sculpturatus,* **254,** 406
  Niemann-Pick C1 gene 5′ flanking sequence (human), **261,** 493
  nine-heme cytochrome *c* gene in *Desulfovibrio desulfuricans,* **262,** 629
  NIPK gene: neuronal cell death inducible putative kinase (PC6-3 cells), **258,** 260
  NK-1 promoter, *Drosophila,* **257,** 538
  NPGPR gene: G protein coupled receptor predominant in placenta (human), **256,** 352
  nRap GEP (human), **265,** 38
  oculomedin (human trabecular cells), **259,** 349
  odorant binding proteins (*Phyllopertha diversa*), **263,** 832
  peflin: five-EF-hand protein (human), **263,** 68
  peptidase for sterol regulatory element binding protein in hamster liver microsomes, with homology to cathepsin B, **258,** 542
  peroxidasin homologue PRG2 (human), **261,** 864
  peroxiredoxin CprxII (Chinese cabbage), **258,** 768
  PGAM-M 5′-promoter regulatory region, comparison in human and rat, **263,** 244
  pgsBCA genes: poly-γ-glutamate of *Bacillus subtilis* IFO 3336 produced in *E. coli,* **263,** 6
  phenylalanyl-tRNA synthetase (human), **255,** 765
  phnIJ genes encoding acetaldehyde dehydrogenase (acylating) and 4-hydroxy-2-oxovalerate aldolase in *Pseudomonas* sp. DJ77, **256,** 469
  phosphodiesterase 10A1 and 10A2 cDNA, N-terminal regions (human), **261,** 551
  6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase (chicken liver), **190,** 397; *erratum,* **259,** 711
  phospholipase C-δ1 (mouse), **261,** 393
  phospholipase C-like protein PCL-L_2 (human), **266,** 97
  pinin in desmosome and nucleus, **263,** 192
  PKNβ (HeLa cells), **261,** 808
  placental leucine aminopeptidase gene 5′ end (human), **262,** 269
  plant mitochondrial promoter sequences, **256,** 409
  pleckstrin 2 (mouse), **265,** 87
  polycystin-1 C-terminal cytosolic domain: PKA phosphorylation sites, **259,** 539
  P/Q-type Ca^{2+} channel α_{1A} subunit gene 5′-upstream region (mouse), **260,** 54
  PREF-1 gene (bovine), **264,** 662
  prenylated Rab acceptor 1 cDNA (human), **258,** 657
  preproHB-EGF (hamster, monkey, mouse), **254,** 325
  prion protein: selective oxidation of Met residues (chicken, mouse), **259,** 352

ProSAP2 alignment with ProSAP1 and synamon (rat), **264,** 247
prostaglandin F receptor gene 5′ flanking sequences (human), **254,** 413
proteinase inhibitor isolated from Taiwan tabu serum, **263,** 610
protein kinase C α promoter region (mouse), **263,** 28
protein oligomerization-mediating, identification in *Escherichia coli,* genetic screen for, **266,** 243
protocadherin 2C (murine brain), **260,** 641
*psb*U gene: 12-kDa extrinsic PSII protein (red alga *Cyanidium caldarium*), **260,** 245
psu1$^+$ (*Schizosaccharomyces pombe*), **262,** 368
psychrophilic alanine racemase DNA (*Bacillus psychrosaccharolyticus*), **256,** 333
puromycin-sensitive aminopeptidase gene and protein (human), **258,** 234
putative cytosolic PTP36 isoforms A, B, C, and D (mouse), **266,** 523
Δ^1-pyrroline-5-carboxylate synthetase 1 gene promoter region (*Arabidopsis thaliana*), **261,** 766
Rab36 gene within region at 22q11.2 homozygously deleted in malignant rhabdoid tumors, **254,** 594
renal organic anion transporters hOAT1 and hOAT3 (human), **255,** 508
restin: homology with endostatin (human), **255,** 735
RFP gene promoter region (human), **261,** 381
RGS clones from porcine aorta and heart: RGS 1 and RGS 16, **259,** 550
ribosomal protein L7 C- and N-terminal nucleic acid binding domains, **258,** 530
ribosomal proteins eL18 and L15, alignments (*Halobacterium halobium*), **264,** 24
RNA helicase-related genes in *Plasmodium falciparum* and *P. cynomolgi,* **255,** 312
Sec24-like mammalian proteins homologous to yeast Sec24p, **258,** 679
sequence elements required for apolipoprotein B mRNA editing enhancement activity from chicken enterocytes, **254,** 744
serine proteinase BSSP overexpressed in hair follicles of nude mouse, **258,** 374
seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
SGLT1 gene promoter: ovine intestinal Na$^+$/glucose cotransporter, **257,** 533
SH2-containing inositol phosphatase 2 (rat), **260,** 265
sialidase cDNA (mouse brain), **258,** 727
trans-sialidase galactose-binding site (*Trypanosoma cruzi*), **262,** 549
Sir2-like proteins (human), **260,** 273
SLC-1 receptor (human), **261,** 622
Smarcb1 gene splice forms (mouse), **257,** 886
snake neutoroxin comparisons, **257,** 500
sodium channel sequence alignment: point mutation in pyrethroid-resistant cattle tick, **261,** 558
sodium-dependent phosphate transporter NaPi-3b (human), **258,** 578
sodium-dependent vitamin C transporter isolated from placenta (human), **262,** 762
SorCS expressed in murine brain, **266,** 347
Sox-4 cDNA fragment (human), **260,** 216
spacer region between RHD and RHCE genes (human), **263,** 378
sperm–oocyte binding protein 1 cDNA (human), **259,** 60
spontaneous *tonB* deletion mutations in *polA1* strain of *E. coli,* **261,** 584
Ssf-1 cDNA fragment (human), **260,** 216
ST2 gene product, novel variant form (human), **264,** 14
stanniocalcin: assignment of disulfide linkages (chum salmon), **257,** 295
stem cell factor cDNAs (human osteoblasts), **255,** 778
STK2 serine/threonine kinase (mouse), **264,** 449
sulfotransferase cDNA (mouse), **254,** 65
syntaxin 8 cDNA (human), **257,** 577
TBP-like protein cDNA (human), **255,** 137
telethonin cDNA (mouse), **257,** 699
temperature-related expressed sequence tag cDNAs during spermatogenesis (rat testis), **258,** 401
TFG cDNA and protein (mouse, nematode), **257,** 67
TgBMP2/4 gene fragment (*Tripneustes gratilla*), **258,** 457
thaumatin-like protein (French bean legumes), **263,** 130
thioredoxin gene from *Echinococcus granulosus,* **262,** 302
thioredoxin reductase (*Caenorhabditis elegans*), **259,** 244
thromboxane A$_2$ receptor gene (mouse), **256,** 391
TIP120B specifically expressed in muscle (rat), **261,** 911
tomoregulin (MKN28 cells), **266,** 593
tpis cDNA: tetratricopeptide repeat-containing protein gene (murine testis), **264,** 81
TRAD gene in human, **257,** 156
transcriptional silencer upstream of BRCA2 gene (human), **265,** 285
transforming growth factor β receptor type II subdomains, **259,** 385
TZFP gene (human), **264,** 789
UCH-6 (chick), **264,** 235
uncoupling protein 2 promoter and regulatory sequences (human), **265,** 326
uncoupling protein 3 gene 5′ flanking region (human), **258,** 278
uroguanylin cDNA (pig), **259,** 141
very-long-chain acyl-CoA synthetase cDNA (human), **257,** 615
vesicle-associated membrane protein-associated protein cDNA (human), **254,** 21
WAVE2 and WAVE3 (human), **260,** 296
WI-31133 expressed sequence tag: orphan G protein-coupled receptor, **260,** 174
Wilson disease gene 5′-flanking region (human), **259,** 206
Wiskott–Aldrich syndrome gene: genomic sequence (human), **256,** 104
X11L2 interacting with β-amyloid precursor protein (human), **255,** 663
Ximpact cDNA (*Xenopus laevis*), **256,** 162
Xsal-3 gene (*Xenopus laevis*), **264,** 151
xylanase II from alkaliphilic thermophilic *Bacillus,* **263,** 640
YOR180C gene: peroxisomal protein of fatty acid metabolism (*Saccharomyces cerevisiae*), **260,** 28
ZBP-99 cDNA isolated from Jurkat cell line library, **262,** 113
ZHX1 cDNA (human), **261,** 614

Serine
  two residues involved in catalysis by fatty acid amide hydrolase, identification, **264,** 316
Serine phosphorylation
  β-amyloid precursor protein cytoplasmic domain Ser655 by APP kinase I from rat brain, **258,** 300
  regulatory site, human Akt3 with, identification, **257,** 906
  sarcoplasmic reticulum Ca^{2+}-ATPase in intact beating rabbit heart, **264,** 241
Serine proteinase
  neutrophil, inhibition by human and murine secretory leukocyte protease inhibitor (mouse), **254,** 614
  overexpressed in hair follicles of nude mouse, **258,** 374
Serine proteinase inhibitor domain
  first Kunitz-type, spliced form of hepatocyte growth factor activator inhibitor type 2 lacking, as predominant product in mouse but not human, **255,** 740
Serine/threonine kinase
  GABA$_A$ receptor sensitivity to, in cerebellar granule cells (rat), **266,** 603
  LKB1, mutant found in Peutz–Jeghers syndrome patients, loss of cytoplasmic retention ability, **261,** 750
  myristylated and palmitylated, identification and characterization (human, mouse), **259,** 533
  STK2, related to mitotic regulator protein NIMA of *Aspergillus nidulans,* activity and substrate specificity (mouse), **264,** 449
Serotonin
  reaction with peroxynitrite by radical pathway, **259,** 460

Serotonin$_{2A}$ receptors
  biochemical localization in rat skeletal muscle, **257,** 369
  human platelet, and rat brain β_1-adrenergic receptors, recognition site properties, effects of diamide, **257,** 629
  substantial presence in dopamine D4-like binding sites labeled by [^{3}H]nemonapride in primate cerebral cortex, **255,** 367
Serpentine receptor
  MAP kinase ERK2-regulating pathway dependent on, in *Dictyostelium,* **260,** 504
Serpins
  headpin identification and cDNA cloning (human), **264,** 299
Sertraline
  chronic treatment of frontal cortex with, HSC70 splice variant occurring after, identification (rat), **261,** 541
Serum
  antibodies in, reactivity with mutant streptokinase lacking C-terminal 42 amino acids, **266,** 230
  induction of collagen X promoter, role of RAF/MEK/ERK and p38 pathways (MCT cells), **262,** 50
  induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
  regulation of caveolin expression and localization in vascular smooth muscle cells (human), **265,** 722
  and retinoid anticancer effects in pancreatic adenocarcinoma model: treatment optimization, **257,** 596
  snake, proteinase inhibitor isolation and characterization (Taiwan tabu), **263,** 610
Serum albumin, *see also* Bovine serum albumin
  human glycated, induction of NO production in VSMC by NF-κB-dependent transcriptional activation of iNOS, **259,** 128
Serum amyloid A
  induction of mast cell chemotaxis via activation of pertussis toxin-sensitive signal transduction pathway (human), **254,** 143
  modulation of proteoglycan synthesis in cultured peritoneal macrophages (mouse), **261,** 298
  rat SAA1 gene, hepatocyte-specific expression, upstream regulatory element contributing to, **264,** 395
Serum response element
  c-fos, gene expression, role of 3′ side sequences, **262,** 523
Serum starvation
  induced cell death in scleroderma myofibroblasts, rescue by IL-1 (human), **255,** 129
Sesquiterpene lactone
  effect on NO synthase gene expression in rat aortic smooth muscle cells, **262,** 375
7B2 protein
  role in PC2 targeting and activation into regulated secretory pathway of rMTC 6-23 cells, **257,** 473
Severe combined immunodeficiency
  Scid cell repair of pyrimidine dimers and single-strand breaks in genes (mouse), **264,** 878
Sex steroids
  and dexamethasone, effects on leptin expression in rat adipose tissue, **259,** 624
  milieu, role in plasma leptin levels in adult rats, **259,** 56
sFv fragment
  cloned, intracellular expression, interference with hepatitis B virus surface antigen secretion, **255,** 785
SH2-containing inositol phosphatase 2
  molecular cloning and role in regulation of insulin signaling (rat), **260,** 265
Shc
  58-kDa, detected in *Xenopus* eggs, tyrosine phosphorylation upon egg activation, **258,** 265
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
SHC1 gene
  high pH-inducible gene required for growth at alkaline pH in *Saccharomyces cerevisiae,* identification, **255,** 116
Shear stress
  induction of nitric-oxide synthase mRNA, role of intracellular Ca^{2+} and G-protein signals and modulation by PI 3-kinase (bovine), **254,** 231; *erratum,* **256,** 255
SHIP
  association of PI3 kinase subunit p85 with, in hematopoietic cells: lack of p85 association with human Flt3 receptor, **254,** 440
Shoot primordia
  Matricaria chamomilla, apoptosis-like cell death in, induction by geraniol, **259,** 519
SHP-2
  association with PI3 kinase subunit p85 in hematopoietic cells: lack of p85 association with human Flt3 receptor, **254,** 440
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
Sialidase
  brain, molecular cloning and expression (mouse), **258,** 727
trans-Sialidase
  galactose-binding site location (*Trypanosoma cruzi*), **262,** 549
Sialylation
  metabolic, recombinant proteins expressed in CHO cells in high productivity cultures, **258,** 132
Sialyl Lewis^X
  related sugars, 6-*O*-sulfation, lymph node sulfotransferase causing, purification and characterization (pig), **256,** 170
Sialyltransferase
  gene expression, quantitative analysis by competitive PCR (mouse), **260,** 23
α2,6-Sialyltransferase
  ST6Gal I, overexpression in low metastatic variant of murine lymphoblastoid cell line, association with unique ST6 Gal I mRNA, **264,** 619
Sickle cell anemia
  fetal hemoglobin levels in, role of elements at locus control region and β-globin gene cluster (human), **254,** 181
Siderophores
  extracellular low-molecular mass component from *Thermoascus aurantiacus* with phenoloxidase activity, isolation and partial characterization, **256,** 20
σ^B
  Bacillus subtilis, stress-activated phosphatase/kinase cascade of, activity in *E. coli,* **257,** 106
σ^s
  role in spermidine-induced decrease of cell viability (*Escherichia coli*), **264,** 643
σ receptor
  ligand (+)-pentazocine, upregulation of H$^+$/peptide transporter PEPT1 in Caco-2 cells, **261,** 242
Signaling protein
  for VEGF receptor-2/FLK-1, function of lipocortin V as, **258,** 713
Signal peptidase
  bacterial, enhancement of processing of recombinant single-chain antibody fragment in insect cells, **255,** 444
Signal recognition particle
  plastid and cytosolic forms, 54-kDa subunit in, functional divergence, **254,** 253
Signal transduction
  angiotensin II in human mesangial cells, role of focal adhesion and GTPase activating proteins, **257,** 234
  blue light-mediated, in coleoptile tips, role of superoxide, **256,** 293

  - calcium, EGFR-operated, impairment by chronic ethanol consumption via disruption of EGFR–PLCγ1 complexation (rat), **257,** 89
  - chemokine receptor CCR-7 stably expressed in HEK-293 cells, **263,** 685
  - cross-talk of TCDD and testosterone pathways in LNCaP prostate cancer cells, **256,** 462
  - cytokines and growth factors, molecular basis, **260,** 303
  - glycoprotein Ia/IIa- and glycoprotein VI-mediated pathways in platelets, comparison (human), **256,** 114
  - G protein-coupled, pertussis toxin-sensitive, role in HIV-1 infection in PBLs, **256,** 429
  - by β_2-integrins on granulocytes, capacity for, abolition by disruption of β_2-integrin–cytoskeletal coupling, **265,** 164
  - interleukin-17, mechanism, role of JAK/STAT pathway (U937 cells), **262,** 14
  - JNK/p38 pathways, inhibition by radicicol-related macrocyclic nonaketide LL-Z1640-2 in signal-specific manner, **257,** 19
  - mutually inhibitory cascades activated by muscarinic M_3 and EGF receptors in neuroblastoma cells, **255,** 774
  - osmotic response in VSMC: control of osmotically induced aldose reductase expression by cell kinases and phosphatases (rat), **255,** 12
  - pertussis toxin-sensitive pathway, activation by serum amyloid A in induction of mast cell chemotaxis (human), **254,** 143
  - ras-dependent pathway, regulation of endothelial cell adherens junctions (human), **260,** 371
  - ras-Erk, stimulation of gastrin promoter, and Sp1 phosphorylation by Erk 2, **254,** 454
  - sphingosine 1-phosphate angiogenic action in human umbilical vein endothelial cells, **264,** 743
  - Wnt-responsive, in endothelial cells, identification (mouse), **263,** 384

- Silica
  - induction of generation of reactive oxygen species in Rat2 fibroblasts, role in MAP kinase activation, **262,** 708
  - peroxiredoxin I and II induced by, rapid degradation in Rat2 cells, **265,** 541
- Silver
  - functionalized surface, elasticity of mutant myosin subfragment-1 on, **261,** 276
- Silymarin
  - modulation of mitogen-activated protein kinase and cell cycle regulators, **263,** 528
- Simian virus 40
  - immortalization of human fibroblasts, effect on p53-dependent radiation responses, **257,** 168
- Simian virus 40 T antigen
  - fusion proteins with, nuclear import in yeast, effect of location and number of nuclear localizing signals, **256,** 278
- Sindbis virus
  - MRC-5 cells persistently infected with, induction of Mn superoxide dismutase in, **261,** 139
- Single-strand conformation polymorphism
  - and heteroduplex analysis, plasma membrane Ca^{2+}-ATPase isoform 1 in patients with essential hypertension, **261,** 515
  - PCR–SSCP, and bisulfite treatment, in analysis of DNA methylation in colorectal cancer with microsatellite instability (human), **262,** 671
- Single-strand DNA-binding protein
  - herpes simplex virus type 1, photoaffinity labeling with oligodeoxyribonucleotides, **264,** 493
- Singlet oxygen
  - role in cytochrome P450-dependent substrate oxidations, **263,** 392
  - role in red light-induced stimulation of *E. coli* cell growth, **257,** 753
- SIR2 gene
  - yeast, homologous human cDNAs, characterization: Sir2-like proteins, **260,** 273
- Sir2-like proteins
  - human cDNAs with homology to yeast SIR2 gene: sirtuins, **260,** 273
- Site-directed mutagenesis
  - addition of veratryl alcohol oxidase activity to manganese peroxidase, **256,** 500
  - agmatinase of *E. coli:* His-163 role in catalytic activity and substrate binding, **264,** 196
  - analysis of structural requirements for development of active deoxyribonuclease II (human), **256,** 591
  - construction of tryptophanless recombinant horseradish peroxidase, **262,** 297
  - fatty acid amide hydrolase: two serine residues involved in catalysis, **264,** 316
  - mistletoe lectin: role of ribosome-inactivating protein activity in apoptosis, **264,** 944
  - pyrroloquinoline quinone glucose dehydrogenases: studies of putative active site of water-soluble mutant with altered K_m values, **264,** 820
  - tryptophanyl residues in tobacco acetolactate synthase, **259,** 136
  - Vpr of HIV-1: HFRIGC sequence residues involved in growth arrest, **264,** 287
- Skeletal muscle
  - abnormalities in muscular dystrophy, NMR studies and molecular physiology, **266,** 723
  - ACTN2 gene encoding α-actinin-2 sarcomeric isoform, fine mapping and genomic structure, **265,** 256
  - adenylyl cyclase type 3 mRNA expression (human), **254,** 548
  - APOBEC-2 specific to, cloning and properties (human, mouse), **260,** 398; *erratum,* **263,** 264
  - calpastatin isoform expression (mouse), **260,** 339
  - chloride channel ClC-1 regulation, role of phosphorylation and physiological state (mouse), **261,** 528
  - denervation, associated increase in acetylcholinesterase mRNA synthesis (chicken), **260,** 251
  - DYRK1B expression (human), **254,** 474
  - expression of uncoupling proteins and PPARγ coactivator-1, role of β_3-adrenergic receptor and/or putative β_4-adrenergic receptor (mouse), **261,** 870
  - FHL1 and FHL3 expression, comparison (mouse), **255,** 245
  - fibers, in laminin α2-deficient mice, activation of caspase-3 apoptotic pathways, **260,** 139
  - ganglioside sialidase expression (human), **261,** 21
  - 5-HT$_{2A}$ receptor, biochemical localization (rat), **257,** 369
  - insulin signaling pathway intermediates, gene expression, effects of long-term exercise (rat), **254,** 720
  - integrin α7 gene transcripts, structure, genetic localization, and identification (human), **260,** 357
  - myofibril transverse elasticity, atomic force microscopic study (rabbit), **256,** 13
  - proteins, rippling muscle- and myasthenia gravis-associated autoantibodies recognizing, identification, **264,** 430
  - relaxation of skinned fibers, mechanisms (frog), **254,** 330
  - ryanodine receptor activation by fatty acyl CoA–acyl CoA binding protein complex, inhibition by rapamycin (rabbit), **264,** 409
  - specific expression, conferral by 1.3-kb upstream 5′ region of rat phosphoglycerate mutase m gene in transgenic mice, **263,** 244
  - supramolecular triad complex, integral role of 90-kDa sarcoplasmic reticulum junctional protein (rabbit), **261,** 603
  - survival motor neuron protein subcellular localization, comparison with spinal cord (mouse), **254,** 10
  - TBP-interacting protein 120A gene expression (rat), **266,** 123
  - thin filaments, binding of myosin cross-bridges (rabbit), **258,** 628

- Skeletal muscle (*continued*)
  - UCH-6, cDNA cloning, tissue distribution, and substrate specificity (chick), **264,** 235
  - uncoupling protein 3
    - gene regulation (mouse), **258,** 464
    - mRNA, upregulation
      - in bezafibrate-treated rat, **260,** 547
      - induction by GLUT4 overexpression (mouse), **258,** 187
      - by long-term hindlimb unloading (rat), **266,** 518
- Skeletal muscle cells
  - in Duchenne muscular dystrophy, increased number of caveolae and caveolin-3 overexpression, **261,** 547
- Skin
  - aldehyde and alcohol dehydrogenase expression and localization (human), **261,** 100
  - fibroblasts, hyaluronidase expression (human), **266,** 268
  - *IL1HY1* gene expression (human), **263,** 702
  - isolation of tetratricopeptide repeat-containing protein gene *tpis* induced by differentiation of spermatogenic cells (mouse), **264,** 81
  - nude mouse, serine protease overexpressed in hair follicle, **258,** 374
  - peroxynitrite-treated, formation and loss of nitrated proteins *in vitro* (rat), **262,** 781
  - reconstituted three-dimensional, as *in vitro* model for carcinogenesis studies (human), **254,** 49
  - UVB-irradiated, expression of glutathione *S*-transferase A4-4 detoxifying 4-hydroxy-2(*E*)-nonenal (rat), **260,** 740
  - wound healing, inflammatory response of, regulatory role of IL-10 (mouse), **265,** 194
- Skp1
  - and cullin-1, βTrCP1, and βTrCP2, SCF-like complex containing, catalysis of IκBα, ubiquitination, **256,** 127
- SLC
  - recombinant, high-affinity binding by CCR-7 stably expressed in HEK-293 cells, stimulation of multiple signaling cascades, **263,** 685
- SLC-1 receptor
  - melanin-concentrating hormone as endogenous ligand of, isolation (rat), **261,** 622
- Smad1
  - functional analysis: role of amino-terminal domain (human), **258,** 366
- Smad2
  - MH1 domain, role in regulation of activin receptor-like kinase 7 signals, **254,** 707
- Smad3
  - MH1 domain, role in regulation of activin receptor-like kinase 7 signals, **254,** 707
- Smad5
  - antisense transcript to, expressed in fetal and tumor tissues: *DAMS* (human), **255,** 668
- Smad6
  - overexpression and suppression of TGF-β-induced growth inhibition in COLO-357 pancreatic cancer cells, **255,** 268
- Small cell lung carcinoma
  - difference in procaspase expression (human), **262,** 381
- Small cytoplasmic RNA
  - upregulation, induction by depletion of *Bacillus subtilis* histone-like protein HBsu, **258,** 211
- Small intestine
  - sodium-dependent phosphate transporter expressed in, cloning and characterization (human), **258,** 578
- Small proline rich 2 protein
  - N-terminal domain, ordered conformation (human), **262,** 395
- Small synaptic vesicles
  - exocytosis, functional roles of complexin I and II, transfection analysis (PC12 cells), **265,** 691
- *SMARCB1* gene
  - mouse ortholog of human gene, encoding of two splice forms, **257,** 886
- Smooth muscle
  - 31-amino acid endothelins constricting, sandwich-type enzyme immunoassays for, **256,** 1
  - airway, desensitization of particulate guanylate cyclase in, role of protein kinase C (human), **266,** 152
  - endothelium-dependent hyperpolarization, role of heterocellular gap junctional communication (rabbit), **254,** 27
  - visceral, expression of voltage-dependent large conductance channels (opossum), **264,** 929
- Smooth muscle cells
  - DNA synthesis, induction by pressure in threshold-dependent manner (human), **256,** 212
  - proliferating, alteration of increase of intracellular Ca^{2+} in, analysis (SVSC cells), **264,** 774
  - vascular, *see* Vascular smooth muscle cells
- SMRT
  - transcription repressor associated with, encoding by leukemia-associated *TEL* gene, **264,** 871
- Smt3
  - yeast homologue of SUMO-1, conjugation to Cdc3 in septin rings at mother-bud neck in budding yeast, **259,** 582
- Snake serum
  - proteinase inhibitor isolation and characterization (Taiwan tabu), **263,** 610
- Snake venom
  - agkisacutacin purification, characterization, and cDNA cloning (*Agkistrodon acutus*), **265,** 530
  - brevinase purification and characterization: heterogeneous two-chain β-fibrinogenase (*Agkistrodon blomhoffii brevicaudus*), **260,** 665
  - cytotoxins from, selective lysis of virus-infected human erythrocytes (cobra), **264,** 63
  - Hannahpep isolation, purification, and characterization (Indian king cobra), **266,** 488
  - α-neurotoxins Oh-6A and Oh-6B, identification as disulfide isomers (king cobra), **254,** 104
  - three classes of neurotoxins, comparison by homology modeling and computer simulation graphics, **257,** 500
- α-SNAP
  - function in insulin exocytosis from immature or mature secretory granules in rat pancreatic β cells, analysis, **260,** 127
- SNAP-23
  - intracellular localization to endosomal compartments, **255,** 340
  - palmitoylation *in vivo,* **258,** 407
- SNAP-25
  - palmitoylation *in vivo,* **258,** 407
- SNARE proteins
  - expression, and adenoviral transfection of amphicrine AR42J cells, **260,** 781
- SNX5
  - binding to Fanconi anemia complementation group A protein, **265,** 630
- SOB1, *see* Sperm–oocyte binding protein 1
- Sob-1, *see* Suppressor of binding protein
- Sodium
  - binding by cyclopentapeptide endothelin A selective receptor antagonists, mass spectrometric studies, **254,** 713
- Sodium/bicarbonate cotransporter
  - pancreatic, cloning and immunolocalization (rat), **264,** 291
- Sodium/calcium exchanger
  - cardiac, antisense oligonucleotides to, effects on calcium dynamics in cultured cardiac myocytes (rat), **260,** 117

Sodium channel
  para-type gene from pyrethroid-resistant cattle tick, identification of point mutation, **261,** 558
Sodium chloride
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
Sodium 2-[6-(4-chlorophenoxy)hexyl]oxirane-2-carboxylate
  upregulation of uncoupling protein 3 mRNA levels in primary cultures of rat preadipocytes, **263,** 87
Sodium-dependent vitamin C transporter
  placental, molecular cloning and transport function (human), **262,** 762
Sodium dodecyl sulfate
  ovarian phosphatase activity resistant to, analysis (*Xenopus laevis*), **264,** 689
Sodium/glucose cotransporter
  intestinal, cDNA, genomic region upstream from, isolation and characterization (sheep), **257,** 533
Sodium/potassium/chloride cotransporter
  activation in renal epithelial A6 cells by flavonoids, **254,** 368
Sodium/taurocholate cotransporting polypeptide
  role in hepatic uptake of thyroid hormones, analysis in cRNA-injected *Xenopus* oocytes, **254,** 497
Solution structure
  ω-conotoxin MVIID, determination by 2D ^{1}H NMR, **254,** 32
  ferricytochrome c-551 from *Pseudomonas stutzeri* substrain ZoBell, **254,** 675
  β-neurotoxin from New World scorpion *Centruroides sculpturatus,* **254,** 406
Solvent effects
  prion protein cellular isoform structure, **264,** 972
Somatostatin
  and GHRP-6, chimeric peptides consisting of, antiproliferative and GH-inhibitory activity, **259,** 379
  nonpeptidyl agonists, in identification of SST receptor subtypes controlling stimulated growth hormone secretion, **263,** 276
  SSTR1-selective analog, structural basis for binding specificity, **258,** 689
Somatostatin receptor
  SSTR1, binding specificity of somatostatin analog selective for, structural basis, **258,** 689
Somatostatin sst$_4$ receptor
  mediated stimulation of p44/p42 mitogen-activated protein kinase and extracellular acidification, role of PI 3-kinase, **263,** 239
Somite
  follistatin-related protein localization (*Xenopus laevis*), **254,** 42
SopA
  interaction with SopB: F plasmid partition proteins, **263,** 113
SopB
  interaction with SopA: F plasmid partition proteins, **263,** 113
SorCS
  identification and characterization (mouse), **266,** 347
Sorting nexin 5
  binding to Fanconi anemia complementation group A protein, **265,** 630
Sos
  gene expression in skeletal muscle, effects of long-term exercise (rat), **254,** 720
SOS genes
  recA and *uvrA,* induction by polyamines (*Escherichia coli*), **264,** 584
Sox-4
  and human homolog of yeast Ssf-1, differentially regulated during apoptosis induced by prostaglandin A_2/Δ^{12}-PGJ$_2$ in Hep3B cells, cDNAs for, **260,** 216
Sp1
  activation of luteinizing hormone receptor gene promoter (human), **263,** 366
  PEA3 site flanked by site for, regulation of differentiation-dependent *Brachyury* expression in P19 cells, **254,** 542
  phosphorylation by Erk 2, stimulation of DNA binding, **254,** 454
  RECK gene site binding, role in *ras*-mediated downregulation of *RECK* gene (mouse), **264,** 668
  role in basal expression of *Hmgi-c* proximal promoter (mouse), **265,** 439
  Sp regulatory element binding, in C/EBPα promoter, **266,** 677
  von Hippel-Lindau tumor suppressor domain mediating binding of, mapping, **266,** 43
Sp1/3
  and PU.1, synergistic activation of human Btk promoter, **259,** 364
Sp3
  activation of luteinizing hormone receptor gene promoter (human), **263,** 366
Sp4
  PEA3 site flanked by site for, regulation of differentiation-dependent *Brachyury* expression in P19 cells, **254,** 542
spalt gene
  Xsal-3, molecular cloning (*Xenopus laevis*), **264,** 151
Spectrin
  distribution in *Drosophila* S2 cells, effects of neuroglian and DE-cadherin, **265,** 372
  engagement in capping of FcγRII in permeabilized U937 cells, **259,** 287
Spectrophotometry
  kinetic epoxidation assay for chloroperoxidase, **266,** 301
Spectroscopy
  oxyferrous complex of heme domain of cytochrome P450 BM-3, **266,** 187
Spemann organizer
  follistatin-related protein localization (*Xenopus laevis*), **254,** 42
Spermatogenesis
  male sterility in transgenic mice expressing human activin/inhibin βA subunit gene in testis, **259,** 699
  role of estrogen (male Japanese eel), **264,** 230
  role of (HRP)-1 gene (mouse), **262,** 433
  temperature-related expressed sequence tags in rat testis during, cloning, **258,** 401
Spermatogenic cells
  differentiation, tetratricopeptide repeat-containing protein gene *tpis* induced by, isolation (mouse), **264,** 81
Spermatogonial stem cells
  renewal, stimulation by estradiol-17β in male Japanese eel, **264,** 230
Spermatozoa
  gp20 antigen homologue of leukocyte CD52, biochemical and MALDI analysis (human), **258,** 639
  low-density detergent-insoluble membrane fraction, isolation and characterization (sea urchin), **258,** 616
  motility, activation of, associated Tctex2-related outer arm dynein light chain phosphorylation (rainbow trout, salmon, sea urchin), **256,** 177
  plasma membrane, tyrosine phosphorylation of proteins in, induction by capacitation (boar), **262,** 787
  tyrosine phosphorylation in, stimulation by progesterone and 11-OH derivatives, Ca^{2+} role (human), **255,** 23
Spermidine
  cell cycle progression induced by, association with 2-deoxy-D-ribose-induced apoptosis in HL-60 cells, **257,** 460
  cell viability decrease induced by, role of ppGpp, ribosome modulation factor, and σ^s (*Escherichia coli*), **264,** 643
  increased transport in amino acid-restricted cancer cells, antizyme-dependent and -independent mechanisms (human), **256,** 646
Sperm–oocyte binding protein 1
  testis-specific, cDNA cloning and characterization (human), **259,** 60
Sphingomonas chlorophenolica
  2,6-dichloro-*p*-hydroquinone 1,2-dioxygenase characterization, **266,** 322

- Sphingomyelin
  - and cholesterol, changes in nuclear membrane in liver after hepatectomy (rat), **262,** 692
  - effect on efficiency of MAL incorporation into artificial membranes, **266,** 330
- Sphingomyelinase
  - role in phthalocyanine 4 photodynamic therapy-induced apoptosis: resistance in Niemann–Pick human lymphoblasts, **258,** 506
- Sphingosine
  - effect on ATP-evoked Ca^{2+} mobilization in C6 glioma cells, **260,** 614
- Sphingosine 1-phosphate
  - EDG3 agonist specificity for, and EDG3 signaling distinct from EDG1 and AGR16, **260,** 203
  - induction of angiogenesis in human umbilical vein endothelial cells, **264,** 743
- Sphingosylphosphorylcholine
  - activation of G_q, $G_{i\text{-}2}$, and $G_{i\text{-}3}$ in thyroid FRTL-5 cells, implications for activation of Ca^{2+} fluxes and Na^+–H^+ exchange, **258,** 812
  - EDG3 agonist specificity for, and EDG3 signaling distinct from EDG1 and AGR16, **260,** 203
- Spinal cord
  - survival motor neuron protein subcellular localization, comparison with skeletal muscle (mouse), **254,** 10
- Spinocerebellar ataxia 2 gene
  - physiological promoter, identification: CpG island for promoter activity in exon 1, **254,** 315
- Spin trap
  - in EPR detection of reactive oxygen species in hemolymph of moth larvae, **264,** 212
- Spleen
  - androgen receptor mRNA levels (Japanese eel), **254,** 378
  - calpastatin isoform expression (mouse), **260,** 339
  - heparanase *HSE1* expression (human), **261,** 183
  - *IL1HY1* gene expression (human), **263,** 702
  - OmCLC-3 and OmCLC-5 expression (*Oreochromis mossambicus*), **255,** 175
  - TBP-interacting protein 120A gene expression (rat), **266,** 123
- Splenocytes, *see* Lymphocytes, splenic
- Splicing, *see also* Alternative splicing
  - carnitine transporter OCTN2, abnormality in, associated Arg282ter mutation (human), **261,** 484
  - maize transposable element *Ds:* differential splicing from primary transcripts in endosperm and suspension cells, **261,** 798
  - tomosyn, variants, isolation and syntaxin-binding region identification, **256,** 218
- Splicing factor
  - human homolog of yeast Ssf-1, and Sox-4, differentially regulated during apoptosis induced by PGA_2/Δ^{12}-PGJ_2 in Hep3B cells, cDNAs for, **260,** 216
- Split Hand-Split Foot malformation
  - SHFM3 critical region on 10q24, mapping of human gene encoding member of F-box/WD40 proteins to, **261,** 64
- Spo0f
  - His-tagged, expressed in bacteria, N-terminal modification, MS determination, **259,** 271
- SPR2, *see* Small proline rich 2 protein
- Spt7p
  - role in vacuolar polyphosphate level of *Saccharomyces cerevisiae:* nickel detoxification, **257,** 835
- Squamous carcinoma cells
  - interferon-β secretion induced by poly I:poly C, stimulation side-dependent asymmetry (Pam-T cells), **254,** 5
- Squamous cell carcinoma
  - head and neck, cell cycle arrest in, effect of arsenic trioxide (PCI-1 cells), **265,** 400
  - oral cavity, and normal squamous epithelium, serpin differentially expressed in, identification and cloning: *headpin,* **264,** 299
  - tongue, derived NA cell line, ICAM-1 expression, effect of nitric oxide (human), **257,** 395
- Src
  - activation by cytoskeletal reorganization, role in induction of urokinase-type plasminogen activator gene (LLC-PK_1 cells), **262,** 666
  - c-Src activation of DNA binding and transcriptional activity of Stat3 (COS-7, F9 cells), **266,** 481
  - selective association with integrin-rich actin cytoskeleton of activated nonaggregated platelets, **260,** 790
  - SH3 domain, critical amino acid substitutions for c-Src oncogenic conversion, **263,** 759
- Src kinase
  - role in insulin and glucagon regulation of CYP2E1 expression (rat), **266,** 304
- SRE, *see* Serum response element
- SR protein-specific kinase
  - and LBR kinase, substrate specificity, **255,** 602
- S-SCAM
  - interaction with neural plakophilin-related *armadillo*-repeat protein/δ-catenin, **256,** 456
- Ssf-1 homolog
  - human, and Sox-4, differentially regulated during apoptosis induced by prostaglandin A_2/Δ^{12}-PGJ_2 in Hep3B cells, cDNAs for, **260,** 216
- ST2 gene
  - variant form ST2V, presence and expression in human leukemic UT-7/GM cells, **264,** 14
- Stanniocalcin
  - chum salmon, assignment of disulfide linkages in, **257,** 295
- Staphylococcal enterotoxin A
  - SEA-scFv bifunctional antibody, construction of bacterial expression system for, and functional analysis, **256,** 223; *erratum,* **259,** 230
- *Staphylococcus aureus*
  - *drp35* gene, expression, induction by cell wall-affecting antibiotics, **264,** 348
- *Staphylococcus aureus* protein A
  - dose-dependent induction of cell proliferation or apoptosis in splenic lymphocytes, **260,** 105
  - functional mimicry by proteolytically cleaved fragment, **260,** 111
  - peptide fragments with Fc-binding activity, design, **256,** 6
  - stimulation of expansion of $CD4^+/CD8^+/CD19^+/CD34^+$ cells in mice, **256,** 142
- STAT1
  - EGF-induced activation in cultured rat hepatocytes, relationship to stimulation of DNA synthesis, **258,** 565
  - PPARγ ligand-dependent induction during adipogenesis (NIH-3T3 cells), **262,** 216
  - tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
- STAT1α/1β
  - expression and association with c-MET and EGF receptor in long-term hepatocyte cultures (human), **265,** 376
- STAT2
  - tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
- STAT3
  - activation by hypoxic conditioned medium in cardiac myocytes (mouse), **264,** 436
  - DNA binding and transcriptional activity, activation by c-Src: role of serine 727 (COS-7, F9 cells), **266,** 481

EGF-induced activation in cultured rat hepatocytes, relationship to stimulation of DNA synthesis, **258,** 565
expression and association with c-MET and EGF receptor in long-term hepatocyte cultures (human), **265,** 376
IL-6-induced signaling, in primary cultures of lung fibroblasts, inhibition by α-thrombin (human), **256,** 626
tyrosine phosphorylation
by leptin via leptin receptor in metaphase 2 stage oocyte (mouse), **256,** 480
mediation by interleukin-17 (U937 cells), **262,** 14
STAT4
tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
STAT5
expression and association with c-MET and EGF receptor in long-term hepatocyte cultures (human), **265,** 376
STAT5A
PPARγ ligand-dependent induction during adipogenesis (NIH-3T3 cells), **262,** 216
STAT5AB
knockout mice, lipolysis and leptin release in adipose tissue from, effect of growth hormone, **263,** 201
STAT5B
EGF-induced activation in cultured rat hepatocytes, relationship to stimulation of DNA synthesis, **258,** 565
PPARγ ligand-dependent induction during adipogenesis (NIH-3T3 cells), **262,** 216
Stathmin
expression in HL-60 cells, alteration by bistratene A: role in inhibition of cytokinesis, **260,** 80
Statistical analysis
determination of mean and standard deviation of dihedral angles, **257,** 348
Steady-state rate equations
derivation with two-step computer-assisted method, **265,** 448
Stearoyl-CoA desaturase
genes encoding, regulation, role in cellular metabolism and preadipocyte differentiation, **266,** 1
Stellate liver cells
contraction
during activation *in vitro,* inhibition by VEGF and relationship to FLT tyrosine kinase receptor expression (rat), **258,** 674
endothelin-1-induced, attenuation by ROCK inhibitor Y-27632 (rat), **266,** 296
osteopontin expression after CCl_4 intoxication (rat), **256,** 527
Stem cell factor
parathyroid hormone-regulated production in human osteoblasts and osteoblast-like cells, **255,** 778
Stem cell factor/Kit ligand
Lyn kinase activity in Mo7e megakaryocytic cells activated by, downregulation by CHK, **259,** 611
Stem cells
mesenchymal, monoclonal antibody SH-2 raised against, recognition of epitope on endoglin (human), **265,** 134
Sterility
male, in transgenic mice expressing activin βA subunit gene in testis, **259,** 699
Steroidal saponins
from *Anemarrhenae* rhizomes, effects on superoxide generation in human neutrophils, **259,** 636
Steroid hydroxylase
activity in olfactory and vomeronasal mucosa (mouse), **266,** 262
Steroid 21-hydroxylase
membrane anchoring and function, effects of missense mutations and deletions (human), **257,** 384
mutations in Spanish patients with congenital adrenal hyperplasia, functional analysis, **262,** 635
Steroidogenic factor-1 binding elements
role in constitutive and cAMP-regulated expression of adrenocorticotropin receptor gene (human), **255,** 28
Steroidogenic glands
arthropod, cytochrome P450 4C15 differentially expressed in, cloning, **264,** 413
Steroids
biosynthesis, role of cytochrome P450, **266,** 690
estrone sulfatase inhibitors, structure–activity relationship study, **254,** 811
induced LH and prolactin surges in ovariectomized rats, leptin stimulation of, mediation by melanocortin-4 receptor, **257,** 860
non-genomic effects in human sperm: stimulation of tyrosine phosphorylation by progesterone and 11-OH derivatives, **255,** 23
regulation of leptin in rat adipose tissue, **259,** 624
Steroid sulfotransferases
hepatic, recombinant human, sulfation of iodothyronines, **263,** 632
Sterol 14α-demethylase
G464S substitution, induction of fluconazole resistance in clinical strains of *Candida albicans,* **262,** 174
Sterol regulatory element binding protein
activation in liver, alterations in trisomy 21 fetuses (human), **260,** 499
cleavage enzymes for, in hamster liver microsomes, **258,** 542
Sterols
biosynthesis and catabolism, role of cytochrome P450, **266,** 690
import/export, regulation of expression of human ATP-binding cassette transporter 1 in macrophages, **257,** 29
Stomach
epithelial cells, cytoskeleton disorganization by *Helicobacter pylori* vacuolating cytotoxin (rat), **262,** 245
muscosa, *see* Gastric mucosa
Stomach cancer
DNA demethylase MBD2 mRNA expression (human), **264,** 962
Stomach cancer cells
apoptosis induced by growth factor withdrawal, enhancement by human *TFAR19* gene, **254,** 203
Streptococcus gordonii
surface of, expression of saliva-binding epitopes of *Porphyromonas gingivalis* FimA protein, **258,** 222
Streptococcus pneumoniae
dihydropteroate synthase from, substrate binding order and sulfonamide inhibition, **258,** 752
Streptokinase
antigenic regions, mapping in humans after streptokinase therapy, **259,** 162
mutant lacking C-terminal 42 amino acids, reactivity with preexisting antibodies in patient sera, **266,** 230
Streptokinase C
terminal peptide, circulating antibodies against, in normal blood donors, **263,** 454
Streptolysin O
neutrophils permeabilized by, GTPγS-induced NADPH oxidase activity in, reconstitution by cytosolic fractions (human), **265,** 29
Streptomyces aureofaciens
Csp protein expression upon cold shock and production of tetracycline, **265,** 305
Streptomyces griseus
cytochrome P450 105D1, heterologous expression, activity, and activation effects of multiple xenobiotics, **263,** 838
Streptomyces sp.
alkaline protease inhibitor from, with antifungal properties against phytopathogenic fungi, characterization, **262,** 702

Stress
  effect on phosphatase/kinase cascade of *Bacillus subtilis* σ^B in *E. coli,* **257,** 106
  hypertonic, selective induction of glial glutamate transporter GLT-1 in C6 glioma cells, **265,** 240
  hypoxic, induction of cardiotrophin-1 expression by cardiac myocytes (mouse), **264,** 436
  regulation of Δ^1-pyrroline-5-carboxylate synthetase 1 gene expression in *Arabidopsis thaliana,* **261,** 766
Stress-activated protein kinase
  activation
    by cell swelling in epithelial A6 cells, **266,** 547
    by hepatocyte isolation: induction of gene 33 expression (rat), **254,** 728
  functional dissociation from anoikis-like cell death (rat IEC-18, IEC-*ras*3 cells), **260,** 48
  JNK/SAPK activation by PDGF in A431 cells, role of phospholipase C-γ and phosphatidylinositol 3-kinase signaling pathways, **261,** 641
  SAPK2/p38, specific inhibitor SB 203580, inhibition of activation of neutrophil NADPH oxidase, **259,** 465
Stress protein
  Hsp90α, sequence features and phylogenetic analysis (Chinook salmon), **258,** 784
Stress-related disorders
  HSP70-1 gene in patients with, additional exon in, **257,** 193
Stress response
  HSF1-mediated, to chemical stressors in mammalian cells, temperature dependence, **265,** 763
Stretch-activated cation channels
  role in regulation of spontaneous and stimulated $[Ca^{2+}]_i$ transients in human osteoblast-like cells, **263,** 206
Stretch-activated ion channels
  relationship to antigens: rippling muscle/MG-associated autoantibodies recognizing skeletal muscle proteins, **264,** 430
Stroke
  in human, role of apoptosis, **266,** 699
  murine model, neuroprotective effects of genistein, **258,** 685
  spontaneously hypertensive rat prone to, and WKY rat, membrane voltage and conductance of mesangial cells from, effects of cytosolic Ca^{2+}, **256,** 273
Stromal cell-derived factor-1
  attachment of C-terminus to N-terminus, enhancement of biological activity of N-terminal peptide, **264,** 42
Stromal cells
  lymphohematopoietic, selective granzyme D expression and function in, analysis (mouse), **264,** 768
  marrow, tissue-nonspecific alkaline phosphatase gene expression, enhancement by phosphate depletion (ST2 cells), **265,** 24
Styrene
  effect on transport of dopamine in purified rat striatal synaptic vesicles, **255,** 70
Styrene oxide
  effect on transport of dopamine in purified rat striatal synaptic vesicles, **255,** 70
Substance P
  mRNA, autocrine induction in keratinocytes (human), **263,** 327
  osteoclast regulation (rabbit), **262,** 418
Subtiligase
  long polypeptide benzyl thioester substrates, direct preparation with benzyl mercaptan, **254,** 147
Suc1
  role in activation of cyclosome by protein kinase Cdk1/cyclin B, **257,** 12
SUC2 gene
  and *HXK2* gene, regulatory elements of, direct binding by Med8 (*Saccharomyces cerevisiae*), **254,** 345
Succinate
  uptake and oxidation, in confirmation of intactness of liver mitochondria (rat), **258,** 778
Sugar recognition
  lectin multigene family in *Drosophila melanogaster,* **261,** 923
Sugars
  sialyl Lewis^X-related, 6-*O*-sulfation, lymph node sulfotransferase causing, purification and characterization (pig), **256,** 170
Sugar supplement therapy
  human glycosylation disorders, **255,** 189
Sulfate transporter
  mammalian brain, identification (rat), **263,** 123
Sulfation
  eicosanoids, murine sulfotransferase catalyzing, bacterial expression, purification, and characterization, **254,** 65
  iodothyronines by recombinant human liver steroid sulfotransferases, **263,** 632
6-*O*-Sulfation
  galactose residues in 2′-fucosyllactose and other sialyl Lewis^X-related sugars, lymph node sulfotransferase causing, purification and characterization (pig), **256,** 170
Sulfidoleukotrienes
  release in human cultured mast cells, Ca^{2+} and PKC signaling for, **257,** 895; *erratum,* **259,** 503
Sulfonamide
  inhibition of dihydropteroate synthase from *Streptococcus pneumoniae,* **258,** 752
Sulfonylurea receptor
  mitochondrial, modification by thiol reagents (bovine), **262,** 255
Sulfotransferase
  eicosanoid-sulfating, bacterial expression, purification, and characterization (mouse), **254,** 65
  lymph node, causing 6-*O*-sulfation of galactose residues in 2′-fucosyllactose and other sialyl Lewis^X-related sugars, purification and characterization (pig), **256,** 170
Sulfur
  transfer to biotin from biotin synthase, **254,** 632
Sulglycotide
  effect on gastric mucosal inflammatory responses to *Helicobacter pylori* LPS: downregulation of caspase-3 and NO synthase-2 (rat), **261,** 15
SUMO-1
  in vitro modification, requirement of ubiquitin activating and ubiquitin conjugating enzymes for, **254,** 693
Superficial zone protein
  articular cartilage, homology with megakaryocyte stimulating factor precursor and role in growth, cytoprotection, and lubrication (bovine, human), **254,** 535
Superoxide
  generation
    by fMet-Leu-Phe-stimulated human neutrophils, regulatory role of phospholipase D, analysis with MAK kinase inhibitor PD 98059, **264,** 371
    in human neutrophils, effects of steroidal saponins of *Anemarrhenae* rhizomes, **259,** 636
    monitoring using lucigenin, validation, **254,** 319
    uncompetitive inhibition by synthetic peptide corresponding to NADPH binding site in gp91-*phox,* **257,** 124
  induction of inositol phosphate formation in mesenteric artery SMCs, role of tyrosine kinase (rat), **259,** 239

  intramitochondrial production, detection with chemiluminescent probe lucigenin (human), **262,** 80
  oxygen radical formation in solutions of 7,8-dihydroneopterin, **264,** 262
  role in blue light-mediated signal transduction in coleoptile tips, **256,** 293
Superoxide dismutase
  Cu,Zn-containing, *see* Cu,Zn superoxide dismutase
  Fe-containing, cloned prokaryotic, protection of yeast cells against oxidative stress, **256,** 63
  induction in ursodeoxycholic acid protection of hepatocyte against oxidative injury, **263,** 537
  mimetic activity of manganese dipyridoxyl diphosphate, assessment *in vitro,* **254,** 768
  Mn-containing, *see* Mn superoxide dismutase
Suppressor of binding protein
  role in *c-fos* SRE gene expression, **262,** 523
Suprachiasmatic nucleus
  arylalkylamine *N*-acetyltransferase expression: melatonin synthesis enzyme (rat brain), **258,** 772; *erratum,* **261,** 546
Surface plasmon resonance
  real time analysis of inositol 1,4,5-trisphosphate receptor type I interaction with ligand, **260,** 527
  real-time study of interactions of HIV-1 LTR NRE and several transcription factors of nuclear extracts, **264,** 6
Surfactants
  interactions with DNA: duplex stabilization from coupled cooperativity in ligand binding, **263,** 41
  synthetic lung, Exosurf Neonatal, enhancement of dendrimer-mediated transfection *in vitro,* **264,** 253
SURFEIT-1 gene
  analysis and 2D blue native gel electrophoresis in cytochrome *c* oxidase deficiency (human), **265,** 339
Survival motor neuron protein
  differential subcellular localization in spinal cord and skeletal muscle (mouse), **254,** 10
Survivin
  induction by VEGF in human umbilical vein endothelial cells, **264,** 781
Suspension cells
  maize, and endosperm, differential splicing of transposable element *Ds* from primary transcripts, **261,** 798
Syk
  osmotic stress-induced activation in B cells, role of receptor aggregation and reactive oxygen species, **262,** 231
Synaptic membranes
  RalA dissociation from, induction by Ca^{2+}/calmodulin (rat), **263,** 765
Synaptic proteins
  SAPAP/GKAP family, interaction with proline-rich synapse-associated proteins ProSAP1 and ProSAP2 (rat), **264,** 247
Synaptic scaffolding molecule
  interaction with neural plakophilin-related *armadillo*-repeat protein/δ-catenin, **256,** 456
  nRap GEP binding to, with function as neural GDP/GTP exchange protein for Rap1, analysis (human), **265,** 38
Synaptic transmission
  hippocampal slices, effect of arachidonic acid (rat), **254,** 446
Synaptic vesicles
  purified rat striatal, dopamine transport in, effects of styrene and styrene oxide, **255,** 70
Synaptobrevin 1
  highly variable C-terminus generated by alternative splicing, **264,** 777
Synaptosomes
  peroxynitrite-induced formation of phospholipid hydroperoxides, and inhibition by α-tocopherol (rat brain), **257,** 651
Synaptotagmin
  planarian homologue, antibody against, in analysis of planarian neural network, **260,** 426
Syncytium
  HTLV-I-induced formation, role of heat shock cognate protein 70, **261,** 357
Synechococcus sp. strain PCC 7942
  heterologous *Microcystis aeruginosa* K-81 *psbA* transcripts in, light dependence and circadian rhythmicity, **255,** 47
Synovial hyperplasia
  in rheumatoid arthritis, dominant and shared T cell receptor β chain variable regions inducing, **263,** 172
Synovial tissue
  coincubation with cartilage, generation of soluble aggrecanase (bovine), **255,** 686
Synoviocytes
  fibroblastic, from patients with osteoarthritis and rheumatoid arthritis, m-calpain mRNA expression, downregulation by inflammatory cytokines, **266,** 341
Syntaxin
  tomosyn splicing variant region binding to, identification, **256,** 218
Syntaxin 8
  molecular cloning, expression analysis, and chromosomal localization (human), **257,** 577
Systemic glucocorticoid resistance
  and chronic lymphocytic leukemia, lymphocytes from patient with, *in vitro* expression of glucocorticoid receptor isoforms, **254,** 559
System L
  LAT1 subunit, molecular cloning and transport function (human), **255,** 283

T

Tachykinin
  from midgut of *Schistocerca gregaria,* identification by ESI-Qq-oa-TOF mass spectrometry, **266,** 237
Tachykinin-related peptides
  invertebrate, isolated from *Urechis unicinctus,* cDNA sequence encoding, characterization, **263,** 848
TAK-778
  promotion of chondrogenesis *in vitro* and *in vivo* (ATDC5 cells, rabbit), **261,** 131
Tamoxifen
  in analysis of role of sex steroid milieu in plasma leptin levels in adult rats, **259,** 56
TATA-binding protein, *see* TBP
TATA box
  transcription from variety of gene promoters through, stimulation by C-terminally truncated coactivator UTF1, **258,** 519
Tat protein
  HIV-1, poly(ADP-ribosyl)ation *in vitro,* **261,** 90
  HIV-1 and HIV-2, extracellular cofactors for, epithelin/granulin growth factors as, **256,** 299
Taurine
  formation by hypotaurine oxidation with photochemically generated singlet oxygen, effect of azide, **254,** 661
Taxol
  mode of action, **263,** 398
TBP
  Dr1, overexpression in *Xenopus* postblastular embryo, inhibition of class II gene transcription, **265,** 644
  recruitment to promoter proximal position, stimulation of RNA polymerase II transcription without activator proteins, **256,** 45
TBP-associated factor
  $\mathrm{TAF}_{\mathrm{II}}32$ isoform, repression, as part of program of genes regulated during Mpl ligand-induced megakaryocyte differentiation, **262,** 55

TBP-interacting protein 120
  TIP120A, gene encoding, expression, localization, and chromosome mapping, **266,** 123
  TIP120B, specifically expressed in muscle, cDNA isolation (rat), **261,** 911
TBP-like protein
  TLP, cDNA isolation, chromosome mapping, and expression (human), **255,** 137
TCDD, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
T-cell factor
  Tcf4, residues involved in high-affinity β-catenin binding, identification, **256,** 584
T-cell leukemia
  adult, development, role of ICSAT (mouse), **260,** 329
T-cell leukemia Jurkat cells
  apoptosis execution, distinct ATP-dependent steps upstream and downstream of mitochondrial cytochrome *c* release, inhibition by NO, **258,** 215
  glyceraldehyde-3-phosphate dehydrogenase and glucose-6-phosphate dehydrogenase mRNA levels, upregulation by nicotinic acid and nicotinamide, **255,** 133
T-cell lymphotrophic virus type-I
  tax gene, role in macrophage inflammatory protein-1α secretion (human), **262,** 429
T-cell receptor
  calcium signals and protein-tyrosine kinases induced by CD3/TCR, bypass by caffeine in inhibition of phosphatidylserine synthesis by Jurkat T cells, **266,** 497
  dominant and shared β chain variable regions inducing synovial hyperplasia in rheumatoid arthritis, **263,** 172
T cells
  activated
    expression of CD30 ligand (mouse), **256,** 519
    support of osteoclast formation *in vitro* (human), **265,** 144
  anti-CD3-activated, adhesion to syngeneic colon adenocarcinoma cells, regulation by protein-tyrosine kinase, protein kinase C, and cAMP (mouse), **255,** 460
  apoptosis
    Fas/Fas ligand-mediated, induction by doxycycline (Jurkat cells), **260,** 562
    inhibition by annexin V, association with induction of Ca^{2+} influx (human), **265,** 709
    tributyltin-induced, pre- and postmitochondrial events in, role of calcium (Jurkat cells), **266,** 460
  blastic, tyrosine phosphorylated paxillin in, binding by Chk (human), **256,** 668
  dideoxycytidine-resistant cell line, collateral resistance to 5-fluoro-2′-deoxyuridine (H9 cells), **262,** 657
  dominant and shared TCR/Vβ regions inducing synovial hyperplasia in rheumatoid arthritis, **263,** 172
  helper, activities of c-Jun N-terminal kinase JNKp46, JNKp55, and ERK2, effects of cAMP (human), **266,** 129
  Herpesvirus saimiri-immortalized, apoptosis induction, **263,** 352
  IκB degradation, induction, synergistic effect of ceramide with phorbol ester or okadaic acid, **263,** 63
  immunosuppressive effect of leukotriene B$_4$ receptor antagonist *in vitro* (mouse), **264,** 321
  intergenic transcription in IL-4/IL-13 gene cluster (human), **255,** 556
  interleukin-10 production, induction by gangliosides GD1a and GM3 (human), **256,** 41
  memory, allergen-specific, telomerase activation induced by natural antigen in bronchial asthma (human), **259,** 617
  phosphatidylserine synthesis by Jurkat clones, regulation: caffeine bypass of CD3/TCR-induced protein-tyrosine kinases and calcium signals, **266,** 497
TCF
  role in *c-fos* SRE gene expression, **262,** 523
Tcf
  gene expression mediated by, modulation by glycogen synthase kinase 3β site for phosphorylation of axin, **266,** 28
Tctex2
  related outer arm dynein light chain, phosphorylation at activation of sperm motility, **256,** 177
Tec
  and related protein kinases, pleckstrin homology domain in, structural modeling, **265,** 151
Teeth
  expression of rat dentin sialoprotein in transgenic mouse, conferral by gene regulatory sequences, **260,** 433
Telethonin
  mouse homologue, developmental and functional regulation, **257,** 699
TEL gene
  encoding of transcription repressor associated with SMRT and mSin3A, **264,** 871
Telomerase
  activation, induction by natural antigen in allergen-specific memory T cells in bronchial asthma, **259,** 617
  antisense RNA, transfection, effect on growth of human gastric cancer cell lines, **255,** 753
  associated with intact nuclei from human leukemia CEM cells, enzymatic activity, **265,** 51
  promoter activity in normal and tumor cells, role of Myc (human), **263,** 361
  relationship to telomere maintenance (human), **254,** 795
  upregulation by hypoxia via MAP kinase signaling in solid tumor cells (human), **260,** 365
Telomerase repeat amplification protocol
  molecular diagnosis of parathyroid carcinoma (human), **265,** 252
Telomeres
  binding by replication factor C large subunit p140 (human), **258,** 482
  crosslinked telomere–protein complexes, isolation from erythrocyte nuclei (chicken), **254,** 517
  length in primates, human uniqueness, **263,** 308
  maintenance, relationship to telomerase activity (human), **254,** 795
Temperature
  culture, effects on HSF1-mediated stress response to chemical stressors in mammalian cells, **265,** 763
  differential effects on HSF1 activation in somatic and male germ cells in poikilotherm trout, **259,** 15
  effects in combination with electromagnetic fields on embryogenesis of *Drosophila,* **265,** 73
  effects on fast laser-induced solute release from photochromic lipid-sensitized liposomes, **262,** 406
  effects on ROMK1 processing and transport (MDCK cells), **261,** 364
  related expressed sequence tags in rat testis during spermatogenesis, cloning, **258,** 401
Template-activating factor-I
  functional domains, as protein phosphatase 2A inhibitor, **259,** 471
Tenascin
  expression in embryonic lung mesenchyme and downregulation by dexamethasone in early organogenesis (rat), **263,** 597
Terminal restriction fragments
  length in primates, human uniqueness, **263,** 308
Ternary complex factor
  role in *c-fos* SRE gene expression, **262,** 523

Testis
  androgen receptor mRNA levels (Japanese eel), **254,** 378
  carbonyl reductase-like 20β-hydroxysteroid dehydrogenase cDNA expression (rainbow trout), **255,** 123
  development and regression, associated expression of angiopoietin-2B and VEGF (chicken), **260,** 492
  DYRK1B expression (human, mouse), **254,** 474
  expression of seven-transmembrane receptor fex with homology to glycoprotein receptors (mouse), **254,** 273
  expression of tetratricopeptide repeat-containing protein gene *tpis* induced by differentiation of spermatogenic cells (mouse), **264,** 81
  FHL4 expression (mouse), **255,** 251
  ganglioside sialidase expression (human), **261,** 21
  gonadotropin receptor cDNA expression (amago salmon), **263,** 584
  gonadotropin receptor GTH-RI cDNA expressed in, cloning and functional characterization (amago salmon), **265,** 366
  metalloproteinase-disintegrin cDNAs with expression specific to, isolation (human), **263,** 810
  phospholipase C-δ1 expression (mouse), **261,** 393
  specific expression, conferral by 1.3-kb upstream 5′ region of rat phosphoglycerate mutase m gene in transgenic mice, **263,** 244
  temperature-related expressed sequence tags during spermatogenesis, cloning (rat), **258,** 401
  transgenic mice expressing human activin/inhibin βA subunit gene in, sterility in, **259,** 699
Testis zinc finger protein
  gene identification and structure (human), **264,** 789
Testosterone
  in analysis of role of sex steroid milieu in plasma leptin levels in adult rats, **259,** 56
  effects on TCDD signal transduction pathways in LNCaP prostate cancer cells, **256,** 462
  oxidation by heterologously expressed *Streptomyces griseus* cytochrome P450 105D1, **263,** 838
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
  effects on testosterone signal transduction pathways in LNCaP prostate cancer cells, **256,** 462
  induced gene expression in human endometrial cells in culture, **257,** 259
  oxidative stress mediated by, in CYP1A2 knockout mice, **264,** 376
Tetrachlorohydroquinone
  reductive dehalogenase system for, two-component, from *Phanerochaete chrysosporium,* **257,** 901; *erratum,* **259,** 232
Tetracycline
  production in association with cold shock, induction of Csp protein family in *Streptomyces aureofaciens,* **265,** 305
  Tet-controlled inducible cell lines, rapid selection with green fluorescent–transactivator fusion protein, **257,** 874
Tetracyclines
  inhibition of Na^+/K^+ pump capacity in Calu-3 human airway cells, **260,** 13
12-*O*-Tetradecanoylphorbol 13-acetate
  effect on ATP-evoked Ca^{2+} mobilization in C6 glioma cells, **260,** 614
Tetrahydrobiopterin
  oxidation by peroxynitrite, implications for vascular endothelial function, **263,** 681
  single molecule sufficient for stoichiometric Arg binding in oxygenase domain of iNOS, **257,** 344
4b,5,9b,10-Tetrahydroindeno[1,2-*b*]indole
  inhibition of apoptosis by prevention of caspase activation after mitochondrial depolarization (Jurkat cells), **264,** 622
Tetrahymena thermophila
  cytokinesis initiation, molecular cloning of p85 gene regulating, **264,** 112
meso-Tetra(*N*-methyl-4-pyridyl)porphine
  photosensitization of wild and mutant *Escherichia coli* strains, **256,** 84
Tetrapeptide
  C-terminal, of substance P, and IGF-1, synergistic upregulation of integrin α5 in SV40-transformed human corneal epithelial cells, **255,** 692
Tetratricopeptide repeat-containing protein
  gene *tpis,* isolation: expression induced with spermatogenic cell differentiation (mouse), **264,** 81
TFAR19 gene
  enhancement of tumor cell apoptosis induced by growth factor withdrawal (human), **254,** 203
TFG gene
  characterization in *Mus musculus* and *Caenorhabditis elegans,* **257,** 67
Th1/Th2 pathway
  effect of minimized Fc-binding peptide from protein A (mouse), **258,** 141
Thapsigargin
  induced histamine release by rat mast cells, effect of HCO_3^-, **260,** 71
Thaumatin
  related antifungal protein, first chromatographic isolation from French bean legumes and demonstration of antifungal activity, **263,** 130
Thermal denaturation
  ribonuclease A: role of valine-108 residue in stablity (bovine), **265,** 356
Thermoascus aurantiacus
  extracellular low-molecular mass component with phenoloxidase activity, isolation and partial characterization, **256,** 20
Thermus thermophilus
  isopropylmalate dehydrogenase from, localized structural effects of electrostatic interactions, **258,** 179
Thiamine deficiency
  associated fiber cell degeneration in mouse lens *in vivo,* **258,** 703
Thiamin pyrophosphate
  regulatory effect on pig heart pyruvate dehydrogenase complex, **256,** 341
Thiazolidinediones
  downregulation of plasminogen activator inhibitor type 1 expression in human vascular endothelial cells, **258,** 431
  suppression of endothelin-1 secretion from vascular endothelial cells (bovine), **254,** 757
Thimet oligopeptidase
  role in MHC class I antigen presentation, **255,** 591
  and stability of MHC class I epitopes in macrophage cytosol, **255,** 596
Thiocolchicine
  analogs, interaction with tubulin isoforms from bovine brain, **254,** 334
Thiol-specific antioxidant protein
  properties in solution: identity with calpromotin (human), **262,** 127
Thioltransferase
  activity of bovine erythrocyte glutathione peroxidase, **257,** 567
  localization in rat brain and functional implications during focal ischemia, **258,** 390
Thioredoxin
  folded and functional peptide fragment: minithioredoxin, **261,** 676
  gene encoding, molecular cloning and characterization (*Echinococcus granulosus*), **262,** 302
  negative regulation of TNF-α-induced p38 MAP kinase activation and IL-6 production, **258,** 443
Thioredoxin-1
  gene encoding, lens-specific regulation upon *in vivo* photochemical oxidative stress in Emory mouse, **265,** 345
Thioredoxin-2
  gene encoding, regulation, effect of *in vivo* photochemical oxidative stress in Emory mouse, **265,** 345
Thioredoxin reductase
  refolding assisted by groEL and protein disulfide-isomerase, **255,** 17
  selenocysteine-containing, in *Caenorhabditis elegans,* **259,** 244

- Threonine
  - residues at P1′ position of peptides, endopeptidase with strict specificity (*Archachatina ventricosa*), **256,** 307
  - Thr-188 role in NAD$^+$ interaction with human NAD$^+$-dependent 15-hydroxyprostaglandin dehydrogenase, **257,** 414
  - vasoactive intestinal peptide/pituitary adenylate cyclase activating peptide receptor 1 mutation at Thr-343, activating effects (human), **254,** 15
- Thrombin
  - catalytic site, allosteric changes induced by bothrojaracin interaction with anion-binding exosites I and II, **262,** 819
  - fibrin polymerization induced by, incipient stage, detection by fluorescence correlation spectroscopy, **260,** 35
  - induction of phosphatidylinositol 3-kinase product formation in platelets, dependence on synergistic autocrine stimulation (human), **263,** 780
  - stimulation of p70^{S6k} activity and morphological changes in Swiss 3T3 cells, selective potentiation by NO donors, **266,** 352
- α-Thrombin
  - inhibition of IL-6-induced Stat3 signaling and gp130 gene expression in primary cultures of lung fibroblasts (human), **256,** 626
- Thrombin receptor agonist peptide
  - induced Ca^{2+} mobilization in platelets, synergistic effect of thrombopoietin (human), **263,** 230
- Thrombopoietin
  - potentiation of agonist-stimulated activation of p38 MAP kinase in platelets (human), **261,** 58
  - synergistic effect on Ca^{2+} mobilization in platelets caused by ADP or thrombin receptor agonist peptide, **263,** 230
- Thrombospondin 1
  - expression by skeletal tissues and cells (human), **263,** 389
- Thrombospondin-1 like proteins
  - neural, NELL1 and NELL2, biochemical characterization and expression analysis (rat), **265,** 79
- Thrombospondin 2
  - expression by skeletal tissues and cells (human), **263,** 389
  - gene transcription, detection of exon skipping and retained introns (human), **259,** 527
  - and TSP3, mRNAs, relative abundance in human tissues, **258,** 792
- Thrombospondin 3
  - and TSP2, mRNAs, relative abundance in human tissues, **258,** 792
- Thromboxane A$_2$
  - production in infarcted heart *in situ,* relationship to NO production and effect of aspirin (rabbit), **257,** 488
- Thromboxane A$_2$ receptor
  - linked with Ca^{2+} pathway in rat colonic crypt cells, **258,** 708
  - murine gene, structure and expression, **256,** 391
  - second intracellular loop, critical role of Phe-138 in receptor–G-protein coupling (human), **264,** 171
- Thymic medulla
  - cells regulating immune tolerance, expression of autoimmune regulator (human), **257,** 821
- Thymidine kinase
  - glioma gene therapy with HSV-TK/GCV system, bystander effect in, tentative mechanism, **259,** 455
  - HSV-1, multiple nuclear localization signals, characterization, **264,** 338
- Thymocytes
  - nonapoptotic, single-strand breaks in agarose-embedded chromatin (mouse), **264,** 388
  - proliferation in response to minimized Fc-binding peptide from protein A (mouse), **258,** 141
- Thyrocytes
  - primary culture (mouse), **257,** 511
- Thyroglobulin
  - misassembled, rescue in follicular lumen, role of oxidative reactions and extracellular protein chaperones (human), **255,** 438
  - sulfated tyrosines, role in thyroid hormone synthesis (pig), **262,** 193
- Thyroid cells
  - G1/S transition in rat FRTL-5 cells, direct interaction of 73-kDa heat shock cognate protein with P27Kip1 during, **257,** 340
  - protein kinase A catalytic subunit activity *in vitro,* control by TSH (pig), **266,** 15
  - sphingosylphosphorylcholine activation of G$_q$, G$_{i\text{-}2}$, and G$_{i\text{-}3}$, implications for activation of Ca^{2+} fluxes and Na$^+$–H$^+$ exchange (FRTL-5 cells), **258,** 812
  - TSH/dibutyryl cAMP-activated Cl$^-$/I$^-$ channel (FRTL-5 cells), **259,** 631
- Thyroid gland
  - follicular lumen, rescue of misassembled thyroglobulin in, role of oxidative reactions and extracellular protein chaperones (human), **255,** 438
- Thyrotropin
  - control of protein kinase A catalytic subunit activity in thyroid cell cultures (pig), **266,** 15
  - and dibutyryl cAMP, Cl$^-$/I$^-$ channel activated by, in FRTL-5 cells, **259,** 631
- Thyrotropin-releasing hormone receptor gene
  - human, transcription: basal promoter and glucocorticoid response elements, **257,** 829
- Thyroxine
  - hepatic uptake, role of Na$^+$/taurocholate cotransporting polypeptide and organic anion transporting polypeptide, **254,** 497
  - synthesis, role of sulfated tyrosines of thyroglobulin (pig), **262,** 193
- Tight junctions
  - induction in human connexin 32-transfected murine hepatocytes: interaction of connexin 32 with occludin, **266,** 222
- Timerosal
  - modification of mitochondrial sulfonylurea receptor (bovine), **262,** 255
- Tip60
  - interaction with human interleukin-9 receptor α-chain, **263,** 149
- TIP120, *see* TBP-interacting protein 120
- Tissue factor pathway inhibitor-2
  - role in activation of ProMMP-1 and ProMMP-3, **255,** 94; *erratum,* **258,** 497
- Tissue inhibitor of metalloproteinase-1
  - binding to cell surface and translocation to nucleus of MCF-7 breast carcinoma cells, **257,** 494
- Tissues
  - ALP expression: CC chemokine with unique C-terminal extension (mouse), **258,** 737
  - GAP^{IP4BP} and GAP^m expression (human), **255,** 421
  - glucuronosyltransferase GlcAT-S expression: enzyme involved in HNK-1 epitope biosynthesis (rat), **255,** 182
  - G protein coupled receptor NPGPR expression (human), **256,** 352
  - immunoreactive prolactin-releasing peptide distribution (rat), **257,** 264
  - inflamed, expression of Bcl-2 and Bak (human), **264,** 139
  - LCAT-like lysophospholipase expression (human), **257,** 50
  - lipophilin expression (human), **256,** 147
  - peripheral, NO synthase immunolabeling (sea slugs), **262,** 545
  - phenylalanyl-tRNA synthetase α- and β-subunit expression (human), **255,** 765
  - placental-type 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase distribution (rat), **257,** 177
  - S100A11 steady-state RNA levels (human), **263,** 135
  - soluble guanylate cyclase distribution (human), **263,** 696
  - STK2 serine/threonine kinase distribution (mouse), **264,** 449
  - thrombospondin 2 and 3 mRNAs, relative abundance (human), **258,** 792
  - and tumors, expression patterns of *ets* family gene *EHF* (human), **264,** 119
  - UCH-6 distribution (chicken), **264,** 235

Tissue transglutaminase
  correlation with 4-hydroxyphenylretinamide effects on growth and apoptosis of retinoic acid-resistant carcinoma cell lines, **254,** 636
Titin
  gene structure (human), **262,** 411
TNF-related activation-induced cytokine
  ODF/OPGL/TRANCE/RANKL, regulation of osteoclast differentiation and function, **256,** 449
TNF-related apoptosis-inducing ligand, *see* TRAIL
Tobacco leaves
  recombinant fungal phytase expressed in, characterization, **264,** 201
α-Tocopherol
  inhibition of peroxynitrite-induced formation of phospholipid hydroperoxides in rat brain synaptosomes, **257,** 651
γ-Tocopherol
  reduction of ox-LDL-mediated activation of NF-κB and apoptosis in human coronary artery endothelial cells, **259,** 157
Toluene
  minor metabolites, oxidative damage of DNA potentially leading to carcinogenesis and reproductive dysfunction (human), **261,** 478
(15R)-16-*m*-Tolyl-17,18,19,20-tetranorisocarbacyclin
  protective effects on ischemic delayed neuronal damage (gerbil), **265,** 301
(15S)-16-*m*-Tolyl-17,18,19,20-tetranorisocarbacyclin
  protective effects on ischemic delayed neuronal damage (gerbil), **265,** 301
Tomoregulin
  stimulation of tyrosine phosphorylation of erbB-4 in MKN28 gastric cancer cells, **266,** 593
Tomosyn
  splicing variants, isolation and syntaxin-binding region identification, **256,** 218
tonB
  spontaneous deletion mutations, in *polA1* strain of *E. coli,* DNA sequence analysis, **261,** 584
Torsion angles
  determination of mean and standard deviation of dihedral angles, **257,** 348
tpis gene
  tetratricopeptide repeat-containing protein, isolation: expression induced with spermatogenic cell differentiation (mouse), **264,** 81
Trabecular cells of the eye
  mechanical stretching, induced expression of oculomedin gene (human), **259,** 349
TRAD/R51H3/RAD51D gene
  human homologue, multiple alternative transcripts, **257,** 156
TRAF2
  phosphorylation, inhibition of binding to CD40 cytoplasmic domain, **256,** 620
TRAIL
  expression in human brain and brain tumors, **257,** 454; *erratum,* **259,** 230
  induction of Bid cleavage by caspase-8 with subsequent loss of mitochondrial membrane potential resulting in apoptosis in BJAB cells, **265,** 130
  locoregional, eradication of intracranial malignant glioma xenografts in athymic mice in absence of neurotoxicity, **265,** 479
TRAIL receptors
  expression in human brain and brain tumors, **257,** 454; *erratum,* **259,** 230
TRANCE
  ODF/OPGL/TRANCE/RANKL, regulation of osteoclast differentiation and function, **256,** 449
trans-acting factor
  carbohydrate response element-binding protein of rat L-type pyruvate kinase gene promoter, characterization and purification, **257,** 44
Transactivation
  by CO-sensing activator CooA, **261,** 270
  Elk-1, MAP kinase-dependent, induced by EGF in mesangial cells, inhibition by BMP-2, **258,** 490
  hepatitis B virus pregenomic promoter by HPV-16 E6 with HBV X protein, mediation by AP1 site of E element in enhancer I in human liver cell, **265,** 62
  by hepatocyte nuclear factor-1α, effects of diabetes-associated mutations (human), **266,** 196
  human but not rat CYP7A1 promoter by hepatocyte nuclear factor 1, **260,** 829
  myogenin gene by MEF2-mediated recruitment of Myf5, inhibition by adenovirus E1A protein, **265,** 222
  properties of paired and homeobox protein Pax-4 for, **259,** 510
  by Stat3, role of serine 727 residue (COS-7, F9 cells), **266,** 481
  UCP-1 promoter, induction by PPARα activation by Wy 14643 in fetal rat brown adipocytes without increase in UCP-1 mRNA, **264,** 311
Transactivator protein
  TetR/VP16, fused with GFP, rapid selection of tetracycline-controlled inducible cell lines using, **257,** 874
Transcription
  acetylcholinesterase, increase after denervation of chicken skeletal muscle, **260,** 251
  apurinic/apyrimidinic endonuclease, activation by oxidative stress, role of CREB, **261,** 859
  arachidonate 12-lipoxygenase in A431 cells, enhancement by c-Fos overexpression, **261,** 848
  bcl-2 gene *in vitro,* block by peptide nucleic acid, **264,** 537
  calcium transporters and channels in developing neurons, control by calcium, **266,** 624
  C/EBPδ, regulation in G_0 growth-arrested mammary epithelial cells (mouse), **262,** 696
  class II genes, inhibition in *Xenopus* postblastular embryos with overexpressed Dr1, **265,** 644
  copper-containing nitrite reductase gene (*Alcaligenes xylosoxidans*), **255,** 427
  Cu/Zn superoxide dismutase gene, xenobiotic responsive element for activation of, analysis (rat), **256,** 133
  cyclooxygenase-2 gene
    regulation by diverse ligands in osteoblasts (mouse), **264,** 865
    stimulation in pancreatic acinar cells after induction of acute pancreatitis (rat), **265,** 545
  eel androgen receptor in transfected mammalian cells, steroid activation of, **254,** 378
  farnesyltransferase gene, effects of insulin, **254,** 243
  GAL80 gene in *Saccharomyces cerevisiae,* initiation mediated by initiator binding protein, **255,** 157
  Galβ1,3GalNAc/Galβ1,4GlcNAc α2,3-sialyltransferase gene, epithelial cell-specific regulation (human), **257,** 516
  from gene promoters through TATA box, stimulation by C-terminally truncated coactivator UTF1, **258,** 519
  genes subject to transcriptional regulation, screening after iron chelation in astrocytoma cells (human), **264,** 709
  glyceraldehyde-3-phosphate dehydrogenase in alveolar epithelial cells, increase by hypoxia (rat), **266,** 156
  growth/differentiation factor-5 gene: analysis of minimal promoter components (human), **263,** 707
  HIF1A gene, promoter and 5′ UTR analyses (human), **261,** 534
  inducible nitric-oxide synthase gene
    induction by hepatic ischemia/reperfusion by activation of NF-κB (rat), **261,** 917
    NF-κB-dependent, role in glycated serum albumin-induced production of NO in VSMC, **259,** 128
  intergenic, in human IL-4/IL-13 gene cluster, **255,** 556
  MCP-4 gene, regulation in dermal fibroblasts (human), **255,** 470

- Transcription (*continued*)
  - metallothionein-I and -II genes, regulation in livers of Cu,Zn-superoxide dismutase knockout mice, **264,** 735
  - Myc-associated zinc finger protein activity for, regulation by casein kinase II, **262,** 198
  - nitrogen regulator gene *glnL* of *E. coli in vitro,* stimulation by heat shock protein, **258,** 341
  - *rae28/mph1* gene, *cis*-elements for, characterization (mouse), **262,** 509
  - regulation, role of deubiquitinating enzymes, **266,** 633
  - repression
    - by Pax2, mediation by paired domain DNA recognition motif (zebrafish), **266,** 532
    - physical association of MBP-1 with histone deacetylase for, **260,** 405
  - repressor of, associated with SMRT and mSin3A, encoding by leukemia-associated *TEL* gene, **264,** 871
  - by RNA polymerase II, activation without activator proteins, stimulation by recruitment of TBP and TFIIB to proximal promoter position, **256,** 45
  - thrombospondin 2 gene: detection of exon skipping and retained introns (human), **259,** 527
  - thyrotropin-releasing hormone receptor gene: basal promoter and glucocorticoid response elements (human), **257,** 829
  - ZF5 repressing, self-association, requirement of zinc finger domain for, **256,** 573
- Transcriptional silencer
  - upstream of BRCA2 gene, identification and characterization (human), **265,** 285
- Transcription factor IIB
  - recruitment to promoter proximal position, stimulation of RNA polymerase II transcription without activator proteins, **256,** 45
- Transcription factor IIE
  - yeast, activator-specific requirement for, **261,** 734
- Transcription factor A gene
  - upregulation in mitochondrial DNA-depleted HeLa cells, role of oxidative stress, **258,** 44
- Transcription factor CP2
  - role in hemoglobin synthesis during erythroid terminal differentiation *in vitro,* **263,** 580
- Transcription factors, *see also specific transcription factor*
  - in nuclear extracts, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
- Transcription–translation
  - human steroid 21-hydroxylase *in vitro:* effects of missense mutations and deletions, **257,** 384
- Transdifferentiation
  - alveolar epithelial primary cultures, caveolin-1 expression and biogenesis of caveolae during, analysis (rat), **262,** 744
- Transducin
  - interaction with uracil nucleotides, **262,** 341
- Transfection
  - adenovirus-mediated, amphicrine AR42J cells with truncated mutant SNAP-25, **260,** 781
  - analysis of functional roles of complexin I and II in exocytosis of secretory vesicles (PC12 cells), **265,** 691
  - antisense telomerase RNA, effect on growth of human gastric cancer cell lines, **255,** 753
  - colon cancer cells with human IFN-β gene, induction of apoptosis, **257,** 771
  - dendrimer-mediated, enhancement using synthetic lung surfactant Exosurf Neonatal *in vitro,* **264,** 253
  - genes in rat heart *in vivo* using Sendai virus-coated proteoliposomes, gene product identification after, **259,** 408
  - glycosyltransferase gene, in masking and reduction of α-Gal epitope (swine), **264,** 611
  - primary mouse thyrocytes, **257,** 511
- Transfer RNA
  - wobble variants of unmodified form of tRNA$_1^{Ser}$, *in vitro* codon-reading specificities, **257,** 662
- Transforming growth factor α
  - downregulation of m-calpain mRNA expression in fibroblastic synoviocytes from patients with osteoarthritis and rheumatoid arthritis, **266,** 341
- Transforming growth factor β
  - enhancement of osteoclast differentiation in hematopoietic cell cultures stimulated with RANKL and M-CSF, **265,** 233
  - inhibition of pancreatic cancer COLO-357 cell growth, suppression by Smad6, **255,** 268
  - regulation of heparin binding EGF-like growth factor gene in intestinal epithelial cells (rat), **264,** 808
  - signaling pathways, and mutation of type II receptor gene, **259,** 385
  - triggering of two independent senescence programs in cancer cells, **255,** 110
  - upregulation of P2Y$_2$ receptor mRNA in rat VSMC, **258,** 648
- Transforming growth factor β receptor
  - type II, gene mutation, and TGF-β signaling pathways, **259,** 385
- Transforming growth factor β1
  - deficiency, associated α_1-antichymotrypsin gene induction in brain (mouse), **263,** 270
  - effects on fibronectin splicing at EDA region in MDCK cells, comparison with effects of HGF/scatter factor, **260,** 225
  - osteoblastic responsiveness to, effect of serial passage of MC3T3-E1 cells, **265,** 246
  - production in bovine aortic endothelial cells, regulation by nicotine, **257,** 306
- Transfusion
  - platelets, potential substitute: liposomes carrying von Willebrand factor-binding domain of platelet glycoprotein Ibα, **261,** 784
- Transgenes
  - mRNA splice patterns, in mammary glands of pigs, rabbits, and mice, **257,** 843
- Transgenic mouse
  - expressing activin βA subunit gene in testis, male sterility in, **259,** 699
  - testis- and skeletal muscle-specific expression of rat phosphoglycerate mutase m gene conferred by 1.3-kb upstream 5′ region, **263,** 244
- Transglutaminase
  - association with GTPase in secretion of anterior prostate (rat), **260,** 351
  - correlation with 4-hydroxyphenylretinamide effects on growth and apoptosis of retinoic acid-resistant carcinoma cell lines, **254,** 636
  - role in formation of intracellular aggregates, **260,** 150
- Trans-Golgi network
  - interaction of LGP85 cytoplasmic tail with adaptor protein complex at, **255,** 54
- Transhydrogenases
  - diphenyliodonium-sensitive and -insensitive activities, detection in plant mitochondria, **265,** 106
- Translation
  - alternative initiation, role in 67/45 kDa dimorphism of human estrogen receptor ERα, **257,** 84
  - *bcl-2* gene *in vitro,* block by peptide nucleic acid, **264,** 537
  - cell-free system, codon-reading specificities of wobble variants of unmodified form of tRNA$_1^{Ser}$, **257,** 662
  - DNA vaccine, efficiency in mammalian cells, codon optimization effect on, **261,** 445
  - hepatitis C virus, enhancement using yellow fever virus 5′ noncoding region, **253,** 257; *erratum,* **257,** 250
- Translocation
  - cytochrome *c,* associated with photodynamic therapy-induced apoptosis, inhibition of respiration and activation of caspase in lymphoma cells, **255,** 673

NPM, correlation with anticancer drug cytotoxicity: dissociation of N-terminal half of NPM from nucleoli, **264,** 305
nuclear, TIMP-1 fusion protein after binding to MCF-7 breast carcinoma cells, **257,** 494
phospholipase C-δ1 in MDCK cells in response to hypo-osmotic stress, PH domain-dependent, real-time visualization, **254,** 284
secretory proteins, defect caused by depletion of *Bacillus subtilis* histone-like protein HBsu, **258,** 211
TIMP-1 fusion protein to nucleus of MCF-7 breast carcinoma cells after binding to cell surface, **257,** 494

Transmodulation
epidermal growth factor receptor by PDGF, spatial organization (human fibroblasts), **261,** 695

Transplantation
graft rejection in human, role of apoptosis, **266,** 699

Transport
guanine nucleotides into heart mitochondria (rat), **257,** 466
intracellular, MHC class I proteins, effect of N-glycan chain length, **262,** 473
L-phenylalanine, role in melanogenesis (human), **262,** 423

Transposition
studies using Tn5, **266,** 729

Transposons
Ds, in maize, differential splicing from primary transcripts in endosperm and suspension cells, **261,** 798
Tn5, in studies of transposition, **266,** 729

trans RNA interference
caused by expanded CTG trinucleotide repeat: hypothesis for myotonic dystrophy pathogenesis (human), **264,** 76

Transthyretin
mutant Y114C, self-association properties related to familial amyloidotic polyneuropathy, effects on detection and quantitation, **261,** 264
and retinol binding protein, high serum levels, compound heterozygote with, **264,** 365
with val30met mutation, targeting, inosine$^{15.1}$ hammerhead ribozymes for, **260,** 313

TRAP assay
molecular diagnosis of parathyroid carcinoma (human), **265,** 252

βTrCP1
and cullin-1, Skp1, and βTrCP2, SCF-like complex containing, catalysis of IκBα, ubiquitination, **256,** 127

βTrCP2
and cullin-1, Skp1, and βTrCP1, SCF-like complex containing, catalysis of IκBα, ubiquitination, **256,** 127

TREB5 gene
targeted disruption, induction of cardiomyocyte necrosis at embryonic stage (mouse), **261,** 350

Triad complex
supramolecular, in skeletal muscle, integral role of 90-kDa sarcoplasmic reticulum junctional protein (rabbit), **261,** 603

Triazolopyrimidine sulfonamide
quinoline-linked analogues, synthesis and interactions with recombinant tobacco acetolactate synthase, **258,** 797

Tributyltin
T-cell apoptosis induced by, pre- and postmitochondrial events in, role of calcium (Jurkat cells), **266,** 460

Trichostatin A
neuronal differentiation of Neuro 2a cells by, **256,** 372

Triiodothyronine
sulfation by recombinant human liver steroid sulfotransferases, **263,** 632

3,3′,5-Triiodothyronine
hepatic uptake, role of Na$^+$/taurocholate cotransporting polypeptide and organic anion transporting polypeptide, **254,** 497
synthesis, role of sulfated tyrosines of thyroglobulin (pig), **262,** 193

3,3′,5′-Triiodothyronine
hepatic uptake, role of Na$^+$/taurocholate cotransporting polypeptide and organic anion transporting polypeptide, **254,** 497

Trinucleotide repeat
expanded CTG, *trans* RNA interference caused by, and myotonic dystrophy pathogenesis (human), **264,** 76

Trisomy 21
fetuses with, alterations of SREBP activation in liver (human), **260,** 499
gene dosage effects hypothesis, evaluation: cardiac ets-2 expression in Down syndrome, **254,** 395

TrkB
catalytic form, immunoreactivity in brain, loss in Alzheimer's disease (human), **264,** 648

Troglitazone
suppression of cell growth of myeloid leukemia cell lines by induction of p21WAF1/CIP1 cyclin-dependent kinase inhibitor, **261,** 833
suppression of endothelin-1 secretion from vascular endothelial cells (bovine), **254,** 757

Trophoblast
mature, RasGAP-associated protein (mouse), **263,** 523

Trophoblast cells
colocalization of leptin receptor mRNA and placental lactogen-II (rat), **257,** 425

Troponin
subunits, exchanging in detergent-skinned rat cardiac fiber bundles, **263,** 219

Troponin I
phosphorylation, role in effects of NO on myocyte contractile function, **256,** 398

Troponin T
cardiac, carboxyl terminal missense mutation Arg278Cys, functional consequences (human), **261,** 79

TRP-1
expression in melanocytes, regulatory role of microphthalmia transcription factor (human), **256,** 657

TRTK-12 peptide
interaction with S100A1, role of S100A1 C-terminal extension, **254,** 36

Trypanosoma cruzi
secreted phosphatase activity in, induction by platelet-activating factor, **266,** 36
trans-sialidase galactose-binding site location, **262,** 549

Trypsin inhibitor
Dioclea glabra trypsin inhibitor DgTI, primary structure: Bowman–Birk inhibitor, **261,** 838

Trypsinogen
stabilization by mutation Arg117→His: unifying pathomechanism for hereditary pancreatitis (rat), **264,** 505

Tryptophan
annexin V Trp-187, role in annexin V–membrane interaction, molecular mechanics analysis, **254,** 484
reaction with peroxynitrite by radical pathway, **259,** 460
recombinant horseradish peroxidase lacking, stability and catalytic properties, **262,** 297
residues on porcine myeloid antibacterial peptide PMAP-23, effects on antibiotic activity, **264,** 281
role in tobacco acetolactate synthase, **259,** 136

TSH, *see* Thyrotropin

TT virus
with different genotypes, multiple infection of Japanese hemophiliacs, **256,** 208

Tubulin
brain membrane, hydrophobic behavior, role of Na$^+$,K$^+$-ATPase, **253,** 824; *erratum,* **257,** 642

Tubulin (*continued*)
  interaction with S100A1, role of S100A1 C-terminal extension, **254,** 36
  isoforms from bovine brain, interaction of thiocolchicine analogs with, **254,** 334
Tumor cells
  Apaf-1 forms, identification (human), **261,** 746
  c-met association with E-cadherin and catenins (human), **261,** 406
  hematopoietic, *DAMS* expression: antisense transcript to *SMAD5* (human), **255,** 668
  human telomerase promoter activity, role of Myc (human), **263,** 361
  phenylalanyl-tRNA synthetase α- and β-subunit expression, **255,** 765
  solid, telomerase activity, upregulation by hypoxia via MAP kinase signaling (human), **260,** 365
Tumorigenesis
  phenotype, restoration *in vivo* in embryonic stem cells lacking VEGF, potential of oncogenic *ras* for, **254,** 480
  role of CD98: transformation of NIH3T3 cells by CD98 overexpression, **262,** 720
Tumorigenicity
  prostate cancer cells, suppression, role of C-CAM1 cytoplasmic domain (DU145 cells), **263,** 797
Tumor necrosis factor
  cytotoxicity, JNK-mediated resistance in L929 cells, regulation by IκBα, **263,** 107
  induction of apoptosis and necrosis of WEHI-164 cells, association with cell cycle stage-dependent patterns of caspase activation, **261,** 385
Tumor necrosis factor α
  aromatase stimulated by, inhibition by paclitaxel and 2-methoxyestradiol (human), **261,** 214
  downregulation of m-calpain mRNA expression in fibroblastic synoviocytes from patients with osteoarthritis and rheumatoid arthritis, **266,** 341
  effect on soluble ICAM-1 release by human fibroblasts, smooth muscle cells, endothelial cells, epithelial cells, and keratinocytes, **260,** 734
  and ET-1 and IL-4
    interplay in gastric mucosal inflammatory responses to *Helicobacter pylori* LPS, **258,** 17
    role in buccal mucosal ulcer healing: effect of chronic alcohol ingestion (rat), **257,** 373
  hammerhead ribozymes directed against, characterization *in vitro* and *in vivo* (mouse), **260,** 390
  and IL-1β, induction of cyclooxygenase-2 gene in osteoblasts (mouse), **264,** 865
  induced apoptosis in rat intestinal epithelial cells, and signaling mechanisms involved in, **260,** 159
  induced ICAM-1 expression in human epidermal keratinocytes, potentiation by retinoic acid, **255,** 64
  induced p38 MAP kinase activation and IL-6 production, negative regulation by thioredoxin, **258,** 443
  induction of CD11a mRNA and protein in tissue macrophages, role of Na^+/H^+ exchange and PKC and comparison with induction by IFN-γ and LPS, **257,** 635
  induction of functional Fas ligand expression on HT29 and MCF7 adenocarcinoma cells, **264,** 813
  polyvinyl pyrrolidone-conjugated, synthesis and characterization, **257,** 448
  production by microglial cells activated with β-amyloid and IFN-γ, inhibition by α-MSH peptides, **263,** 251
  role in dose-dependent induction of proliferation or apoptosis by bacterial protein A, **260,** 105
Tumor necrosis factor-related apoptosis-inducing ligand, *see* TRAIL
Tumors
  adaptation to hypoxia by angiogenesis, **266,** 718
  cachectic, isolated adipocytes from rats bearing, inhibition of IRS-1 phosphorylation and GLUT4 expression in, **256,** 676
  growth in rat tumor model, effect of resveratrol, **254,** 739
  and tissues, expression patterns of *ets* family gene *EHF* (human), **264,** 119
  vascular targeting with tumor-tissue endothelium-specific monoclonal antibody (mouse, rat), **260,** 346
Tumor suppression
  angiostatin protein activity for, role of kringles 1 to 3 (human), **264,** 469
Tumor suppressor gene
  DOC-1R identification and mutation analysis: DOC-1 related gene (human), **255,** 59
Tumor suppressor proteins
  potential regulation of human gene encoding HECT domain and RCC1-like repeats, **266,** 115
  von Hippel-Lindau, β-domain, interaction with regulatory domain of protein kinase C isotypes, **263,** 491
Tunneling microscopy
  single-molecule, higher plant light-harvesting complex II, **256,** 288
Two-phase systems
  aqueous, extractive cultivation of recombinant *Escherichia coli* with, for production and separation of extracellular xylanase, **255,** 274
Ty3 retrotransposon
  yeast, reverse transcriptase activity for, cell cycle control of, **254,** 679
Tyk2
  tyrosine phosphorylation, mediation by interleukin-17 (U937 cells), **262,** 14
Tyrosinase
  folding and copper loading *in vivo:* calnexin and α-glucosidase II roles, **261,** 720
Tyrosinase-related proteins
  TRP-1, expression in melanocytes, regulatory role of microphthalmia transcription factor (human), **256,** 657
Tyrosine
  in consensus sequence Y-E-N of nonphosphorylated inhibitor G1TE to Grb2-SH2 domain, structural requirement for, **264,** 902
  erythropoietin receptor residues, role in erythroid differentiation of CD34+ progenitors (human), **256,** 685
  metabolism, inhibition by dichloroacetate, implications for DCA biotransformation and toxicity (human, rat), **262,** 752
  phosphorylation, *see* Tyrosine phosphorylation
  sulfated, in thyroglobulin, role in thyroid hormone synthesis (pig), **262,** 193
L-Tyrosine
  from L-phenylalanine autocrine turnover, role in melanogenesis (human), **262,** 423
Tyrosine kinase, *see* Protein-tyrosine kinase
Tyrosine phosphorylation
  58-kDa Shc protein in *Xenopus* eggs upon egg activation, **258,** 265
  in B- and T-lineage lymphoid cells, role of reactive oxygen species produced by NADPH oxidase (human), **255,** 262
  cultured fibroblasts, induction by hemolysate (dog, human), **264,** 100
  effect of factor J-induced cell adhesion (Jurkat cells), **266,** 51
  erbB-4 in MKN28 gastric cancer cells, stimulation by EGF-like molecule with two follistatin modules, **266,** 593
  focal adhesion kinase
    reduction by *Helicobacter pylori* vacuolating cytotoxin, **262,** 245
    stimulation by growth hormone in human osteoblast-like Saos2 cells, **263,** 100
  proteins in sperm plasma membrane, induction by capacitation (boar), **262,** 787
  rapid, induction by IL-17 in U937 monocytic progenitor cells and role of Raf-1 kinase pathway, **259,** 172
  role in formation of stable type I interferon receptor, **255,** 539
  role in inhibition of calcium signaling in UV-irradiated fibroblasts (V79 cells), **261,** 504
  STAT3 by leptin via leptin receptor in metaphase 2 stage oocyte (mouse), **256,** 480

  stimulation by progesterone and 11-OH derivatives, Ca^{2+} role (human sperm), **255,** 23
Tyrosyl radical
  in native or *p*-butoxyphenol-treated mouse ribonucleotide reductase R2 protein, regeneration, **258,** 322

U

U937 cells
  apoptosis
    effects of peripheral benzodiazepine receptor agonists, **265,** 457
    induction by acetylleucine chloromethyl ketone: inhibitor of acylpeptide hydrolase, **263,** 139
  cell growth suppression by troglitazone, role of induction of p21WAF1/CIP1 Cdk inhibitor, **261,** 833
  differentiation, enabling of phospholipase D-dependent pathway of cytosolic PLA$_2$ activation, **260,** 232
  glucose uptake, inhibition by flavonoids, **260,** 568
  interleukin-17 induction of rapid tyrosine phosphorylation and Raf-1 kinase activation, **259,** 172
  permeabilized, FcγRII capping in, engagement of spectrin and actin, **259,** 287
  telomerase activity, effect of hypoxia (human), **260,** 365
U73122
  activation of nuclear estrogen receptors (SKBR-3 cells), **261,** 340
U73343
  activation of nuclear estrogen receptors (SKBR-3 cells), **261,** 340
Ubiquinol
  plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
Ubiquinone
  plasma, in measurement of oxidative stress in newborn infants with/without asphyxia, **257,** 244
Ubiquitin activating enzyme
  requirement for *in vitro* modification of SUMO-1, **254,** 693
Ubiquitination
  and endocytosis, of Gap1 permease, role of N-terminal C$_2$ domain of yeast Npi1/Rsp5 ubiquitin ligase, **257,** 561
  IκBα, catalysis by SCF-like complex with Skp1, cullin-1, βTrCP1, and βTrCP2, **256,** 127
  IκBα phosphorylated by IKK after association with IκBα-ubiquitin ligase *in vivo* and *in vitro,* **256,** 121
  pathological, abnormal dentatorubral-pallidoluysian atrophy protein complex
    in DRPLA brain (human), **260,** 133
    pathological role in DRPLA (human), **264,** 37
Ubiquitin-bonded proteins
  ubiquitin-bonded complex, characteristics, pathological role in dentatorubral–pallidoluysian atrophy (human), **264,** 37
Ubiquitin carboxy-terminal hydrolase-6
  chick, with high similarity to human UCH-L3, molecular cloning, **264,** 235
Ubiquitin conjugating enzyme
  requirement for *in vitro* modification of SUMO-1, **254,** 693
Ubiquitin C-terminal hydrolase
  review of deubiquitinating enzymes, **266,** 633
Ubiquitin-degradation pathway
  proteasome, role in intracellular aggregate formation, **260,** 150
Ubiquitin ligase
  Npi1/Rsp5, N-terminal C$_2$ domain of, role in ubiquitination and endocytosis of Gap1 permease (yeast), **257,** 561
Ubiquitin-like proteins
  and processing enzymes: review of deubiquitinating enzymes, **266,** 633
Ubiquitin–proteasome pathway
  mediation of degradation of fibrinogen chains, **261,** 590
Ubiquitin-specific processing protease
  review of deubiquitinating enzymes, **266,** 633
UDP-glucuronosyltranserase
  isoforms encoded by *UGT1* locus, glucuronidation of 7-ethyl-10-hydroxycamptothecin (human), **260,** 199
UGT1 locus
  human UDP-glucuronosyltranserases encoded by, glucuronidation of 7-ethyl-10-hydroxycamptothecin, **260,** 199
Ulcer healing
  buccal mucosal, interplay of ET-1, IL-4, and TNF-α during, effect of chronic alcohol ingestion (rat), **257,** 373
  gastric, interleukin-4 downregulation of endothelin-1 (rat), **263,** 591
Ultrasound
  low-intensity pulsed, effect on expression of PGE$_2$ and COX-2 in mouse osteoblasts, **256,** 284
Ultraviolet laser
  protein/DNA crosslinking induced by, analysis: detection of sequence variations of DNA elements bound by c-Jun *in vivo,* **256,** 68
Ultraviolet light
  fibroblasts irradiated by, inhibition of calcium signaling in, role of tyrosine phosphorylation and protein kinase C (V79 cells), **261,** 504
  genotoxicity, evaluation with reconstituted three-dimensional human skin, **254,** 49
  induced DNA repair synthesis in human chromosomes, focal sites, **257,** 378
  induced phosphorylation of p53 by p38 MAP kinase at serine 389, alleviation by SB203580, **261,** 464
  UVB, skin of rats irradiated with, expression of glutathione *S*-transferase A4-4 detoxifying 4-hydroxy-2(*E*)-nonenal, **260,** 740
  UVC-induced 8-oxo-2′-deoxyguanosine, discrepancies in measurement of, **259,** 374
Ultraviolet–visible spectroscopy
  flow linear dichroism, analysis of ellagic acid interaction with calf thymus DNA, **265,** 416
Ultraweak luminescence
  with ESR, study of peroxynitrite reaction with heterocyclic compounds: role of radical pathway, **259,** 460
Uncoupling protein 1
  expression and mRNA in fetal rat brown adipocytes, effects of PPARα and PPARγ, analysis with agonists Wy 14643 and rosiglitazone, **264,** 311
Uncoupling protein 2
  gene functional organization and juxtaposition to UCP3 gene (human, mouse), **255,** 40
  gene regulation by dietary fat and genomic organization (mouse), **256,** 27
  hepatic, mRNA upregulation by fish oil feeding or fibrate administration in mice, **257,** 879
  mRNA expression in adipocytes
    increase by BRL49653 and bromopalmitate, **256,** 138
    regulation by PPARγ activation with rosiglitazone (human), **265,** 265
  promoter region, molecular cloning and functional characterization (human), **265,** 326
Uncoupling protein 3
  gene 5′ flanking region, cloning and characterization (human), **258,** 278
  gene regulation
    by dietary fat, and genomic organization (mouse), **256,** 27
    by fatty acid in mouse skeletal muscle and C2C12 myotubes, **258,** 464
  mRNA
    increase in white adipose tissues and skeletal muscle of bezafibrate-treated rat, **260,** 547
    muscle-specific expression, upregulation by long-term hindlimb unloading (rat), **266,** 518
    upregulation in primary cultures of rat preadipocytes by etomoxir, **263,** 87
    upregulation in skeletal muscle, induction by GLUT4 overexpression (mouse), **258,** 187

Uncoupling proteins
  expression
    in immortal brown adipocytes from *p53*-knockout mice, **255,** 221
    in skeletal muscle, role of β_3-adrenergic receptor and/or putative β_4-adrenergic receptor (mouse), **261,** 870
  mRNAs in white adipose tissue, effects of n-3 polyunsaturated fatty acids ($KK\text{-}A^y$ mouse), **259,** 85
  in regulation of energy metabolism in human cells in aging and diabetes, **266,** 662
Uracil-DNA subtraction assay
  in identification of differentially expressed genes in activin-induced apoptotic LNCaP cells, **257,** 187
Uracil nucleotides
  interaction with transducin, **262,** 341
Urea
  regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
Urea I
  inhibition of cyclin D1–cdk4, **260,** 768
Urea II
  inhibition of cyclin D1–cdk4, **260,** 768
Urechistachykinins
  invertebrate, isolated from *Urechis unicinctus,* cDNA sequence encoding, characterization, **263,** 848
Uric acid
  inhibition of oxidative damage to rat brain synaptosomal lipids, **257,** 651
Uridine kinase
  upregulated, identification by RLCS in ventral horn after crush injury to sciatic nerve (rat), **266,** 104
Urine
  cachectic cancer and AIDS patients, 24-kDa protein isolation, characterization, and distribution, **254,** 642
  hydrogen peroxide in, implications for antioxidant defense and redox regulation (human), **262,** 605
  8-iso-prostaglandin $F_{2\alpha}$ and 15-keto-13,14-dihydro-prostaglandin $F_{2\alpha}$ in experimental hepatotoxicity (rat), **254,** 764
  protease-sensitive pheromones in, induction of region-specific Fos expression in rat accessory olfactory bulb, **260,** 222
Uroguanylin
  porcine, cDNA and deduced amino acid sequence, and biochemical activity of chemically synthesized peptide, **259,** 141
Urotensin II
  identification as endogenous ligand for orphan G-protein-coupled receptor
    GPR14 (HEK293 cells), **266,** 174
    SENR (pig), **265,** 123
Ursodeoxycholic acid
  protection of hepatocytes against oxidative injury via antioxidant induction, **263,** 537
USF
  and NFIL-6 and huGATA-3, of nuclear extracts, interactions with composite DNA regulatory region of HIV-1, real-time study, **264,** 6
UTF1
  C-terminally truncated form, stimulation of transcription from variety of gene promoters through TATA box, **258,** 519
UTP
  as $P2Y_2$ receptor agonist, intracellular Ca^{2+} response in rat VSMC, **258,** 648
uvrA
  induction by polyamines (*Escherichia coli*), **264,** 584

V

VacA
  Helicobacter pylori, disorganizing effect on cytoskeleton of gastric epithelial cells, **262,** 245
Vaccine delivery
  using immunopotentiating fusogenic liposomes, **261,** 824
Vacuoles
  polyphosphate level, in *Saccharomyces cerevisiae,* role of Spt7p: nickel detoxification, **257,** 835
Vagina vera
  effects of *Caenorhabditis elegans* KPSFVRFamide (*Ascaris suum*), **254,** 222
Valine
  end-product inhibition of acetolactate synthase, effect of mutations to synthase regulatory subunit (*Streptomyces cinnamonensis*), **266,** 162
VAMP-1
  highly variable C-terminus generated by alternative splicing, **264,** 777
Vanadium
  and molybdenum, supplements in Burk's nitrogen-free growth medium, regulated expression of *nifM* of *Azotobacter vinelandii* in response to, **264,** 186
Vancomycin
  effect on expression of *drp35* gene of *Staphylococcus aureus,* **264,** 348
Vascular cell adhesion molecule-1
  expression after carotid cuff injury in apoE null mice, reduction by reconstituted HDL containing human apoA-1, **264,** 465
Vascular cell adhesion molecule-1 receptor
  VLA-4, expression in HL-60 cells, suppression by 1,25-dihydroxyvitamin D_3, **255,** 371
Vascular endothelial cells
  aortic, *see* Aortic endothelial cells
  arterial, glucocorticoid-mediated suppression of COX-2 gene promoter activity, modulation by glucocorticoid receptor expression (bovine), **254,** 292
  in arteries, veins, and capillaries, protein C activation, function of EPCR as receptor for (human), **259,** 671
  carotid artery, endothelin-1 secretion, suppression by thiazolidinediones (bovine), **254,** 757
  coronary artery, ox-LDL-mediated activation of NF-κB and apoptosis, reduction by γ-tocopherol (human), **259,** 157
  dermal microvascular, release of soluble ICAM-1 (human), **260,** 734
  Fas ligand expression, effect of cyclosporine downregulation (human), **263,** 430
  human umibilical vein, *see* Human umbilical vein endothelial cells
  nuclear translocation of caveolin-1, endothelial NO synthase, and Flk-1/KDR, induction by VEGF (bovine), **256,** 192
  from resistance-sized pulmonary arteries, K^+ current profile (rat), **263,** 405
  Wnt-responsive signal transduction pathway, identification (mouse), **263,** 384
Vascular endothelial growth factor
  and angiopoietins, *in vitro* effects on hematopoietic and endothelial cells (mouse), **264,** 133
  embryonic stem cells lacking, tumorigenic phenotype restoration *in vivo,* potential of oncogenic *ras* for, **254,** 480
  expression
    in nonparenchymal and parenchymal cells in liver after necrosis (rat), **254,** 587
    during retinal vaso-obliteration and hypoxia (mouse), **262,** 333
    stimulation by okadaic acid, **265,** 584
    during testicular development and regression (chicken), **260,** 492
  Flt-1 receptor site binding to, characterization, **262,** 731
  induction of nuclear translocation of Flk-1/KDR, endothelial NO synthase, and caveolin-1 in vascular endothelial cells, **256,** 192

  induction of survivin and XIAP in human umbilical vein endothelial cells, **264,** 781
  inhibition of hepatic stellate cell contraction during activation *in vitro,* and FLT tyrosine kinase receptor expression (rat), **258,** 674
  plasma levels after heparin administration (human), **255,** 80
  secretion by cultured rat cardiac myocytes, stimulation by pulsatile stretch, **254,** 462
  stimulation of mitogen-activated protein kinase, mechanism (human), **255,** 545
  vegf-d mRNA expression pattern in adult and fetal mouse, **257,** 891
Vascular endothelial growth factor-165
  induced angiogenesis *in vitro,* inhibitory effect of full-length human endostatin, **263,** 340
Vascular endothelial growth factor-A
  stimulation of endothelial cells, associated induction of NO release by VEGF receptor-2 (human, pig), **265,** 636
Vascular endothelial growth factor receptor-1
  fourth immunoglobulin-like loop of extracellular domain, heparin binding site in, detection (HUVEC cells), **264,** 730
Vascular endothelial growth factor receptor-2
  induction of NO release in response to VEGF-A stimulation in endothelial cells (human, pig), **265,** 636
  lipocortin V function as signaling protein for, **258,** 713
Vascular responses
  to angiotensin II, exaggeration via upregulation of AT1 receptor in AT2 knockout mice, **258,** 194
Vascular smooth muscle cells
  activated, detection of hypernuclear acetylation (human), **266,** 417
  angiotensin AT1a receptor gene expression, transcriptional suppression by interferon-γ (rat), **262,** 494
  arterial, atherosclerotic, expression of heterogeneous nuclear ribonucleoprotein complex K protein and prolyl-4-hydroxylase α subunit (rabbit), **260,** 382
  caveolin expression and localization, regulation by serum and heparin (human), **265,** 722
  collagenase-3 expression *in vitro* (human), **261,** 904
  DNA synthesis and proliferation, effects of platelet surface membranes (bovine coronary artery), **259,** 341
  glycated serum albumin-induced NO production by NF-κB-dependent transcriptional activation of iNOS (rat), **259,** 128
  heparin-binding EGF-like growth factor induction, role of intracellular ROS and Ca^{2+} elevation (rat aorta), **259,** 50
  in high glucose medium, increased adrenomedullin expression (rat), **258,** 453
  MAPKK-dependent growth factor-induced upregulation of P2Y$_2$ receptor (rat), **258,** 648
  migration
    effects of human cytomegalovirus immediate early gene products (rat aorta), **256,** 608
    inhibition by manumycin A (rat), **264,** 915
  migration and loss, effects of fasudil, role in fasudil reduction of intimal hyperplasia (human, rabbit), **262,** 211
  nitric-oxide synthase gene expression, inhibition by sesquiterpene lactones (rat aorta), **262,** 375
  osteopontin expression *in vitro,* enhancement by high glucose (rat aorta), **258,** 722
  peroxisome proliferator-activated receptor γ expression (rat aorta), **247,** 353; *erratum,* **255,** 549
  platelet-derived growth factor-B expression, increase by mechanical strain (rat), **265,** 606
  platelet-derived growth factor β receptor expression
    effects of human cytomegalovirus immediate early gene products (rat aorta), **256,** 608
    glucose-induced increase, prevention by aldose reductase inhibitor (rat aorta), **261,** 853
    increase by mechanical strain (rat), **265,** 606
  proliferation
    effects of human cytomegalovirus immediate early gene products (rat aorta), **256,** 608
    inhibition by eicosapentaenoic acid and docosahexaenoic acid by inhibition of phosphorylation of Cdk2–cyclinE complex (rat), **254,** 502
    inhibition by manumycin A (rat), **264,** 915
  release of soluble ICAM-1 (human aorta), **260,** 734
  signal transduction: control of osmotically induced aldose reductase expression by cell kinases and phosphatases (rat), **255,** 12
  superoxide anion-induced formation of inositol phosphates in, role of tyrosine kinase (rat mesenteric artery), **259,** 239
Vasculature
  tumor, targeting with tumor-tissue endothelium-specific monoclonal antibody (mouse, rat), **260,** 346
Vasculopathy
  implications of cyclosporine downregulation of Fas ligand expression on vascular endothelial cells (human), **263,** 430
Vasoactive intestinal peptide/pituitary adenylate cyclase activating peptide receptor 1
  constitutive activation by mutations at threonine 343 (human), **254,** 15
Vasoconstriction
  modulation by angiotensin type II receptor (mouse), **261,** 345
Vasorelaxation
  EDHF-type, of rabbit jugular vein, mediation by cAMP, **263,** 52
VCAM-1 receptor
  VLA-4, expression in HL-60 cells, suppression by 1,25-dihydroxyvitamin D$_3$, **255,** 371
VDJP
  3′–5′ exonuclease associated with, characterization, **259,** 262
V(D)J RSS dependent DNA joining protein
  3′–5′ exonuclease associated with, characterization, **259,** 262
VEGF, *see* Vascular endothelial growth factor
vegf-d
  restricted expression pattern in adult and fetal mouse, **257,** 891
Venom
  Conus anemone, crude, binding to [^{3}H]neuropeptide Y, high-affinity displacement by insect neuropeptides, **262,** 180
  snake, *see* Snake venom
Ventral horn
  upregulated uridine kinase in, identification by RLCS after crush injury to sciatic nerve (rat), **266,** 104
Ventromedial nucleus
  hypothalamic, D$_5$ dopamine receptor mRNA distribution (rat), **266,** 556
Veratryl alcohol oxidase
  activity of, addition to manganese peroxidase by site-directed mutagenesis, **256,** 500
Verotoxin
  binding to glycolipid receptor, inhibition by monovalent soluble mimic adamantyl globotriaosyl ceramide, **257,** 391
Verotoxin-1
  reactive oxygen species as risk factor in rats exposed to, **260,** 813
Very late antigen-4
  expression in HL-60 cells, suppression by 1,25-dihydroxyvitamin D$_3$, **255,** 371
Very-long-chain acyl-CoA dehydrogenase deficiency
  with hypoglycemic phenotype, identification of novel mutations (human), **264,** 483
Very-long-chain acyl-CoA synthetase
  cloning, topography, and relevance to branched-chain fatty acid metabolism (human), **257,** 615

- Vesicle-associated membrane protein-associated proteins
  - human and rat homologues, molecular cloning and characterization, **254,** 21
- Vesicle-associated membrane proteins
  - VAMP-1, highly variable C-terminus generated by alternative splicing, **264,** 777
- Vesicles
  - hepatic plasma membrane, uptake of MRI contrast agents, mechanisms (rat), **257,** 746
  - interaction with cytoskeleton, role in aquaporin 5 trafficking in AQP5 gene-transfected salivary gland cells (human), **266,** 443
  - isolated from basolateral region of plasma membrane of ovine parotid acinar cells, acetate and formate uptake, **259,** 606
  - phospholipid, heterogeneously sized, protein-induced fusion, **262,** 586
  - secretory, exocytosis, functional roles of complexin I and II, transfection analysis (PC12 cells), **265,** 691
  - synaptic, purified from rat striatum, dopamine transport in, effects of styrene and styrene oxide, **255,** 70
  - synthetic phytanyl-chained glycolipid membranes, as matrix for functional reconstitution of cyanobacterial photosystem II complex, **265,** 734
- Vessel injury
  - sustained SMC proliferation after, role of platelet surface membranes (bovine), **259,** 341
- Vimentin
  - and hSNF2H homologue and H ferritin, differential expression in nickel(II) acetate-treated CHO cells, **258,** 592
- Vincristine
  - acceleration of course of multidrug resistant leukemia, **266,** 167

  - *Mycobacterium tuberculosis,* mRNA differential display study, **258,** 94
- Visipaque
  - regulation of aquaporin-1 expression in proximal tubule epithelial cells, **256,** 240
- Visuomotor system
  - maturation, and extraocular muscle calcium homeostasis (rat), **257,** 678
- Vitamin A
  - effect on rat cytochrome P4501A1-dependent monooxygenase activity, **262,** 565
  - probe of conformational changes in protein disulfide isomerase, **261,** 41
- Vitamin B_{12}
  - posttranscriptional regulation of mammalian methionine synthase, **259,** 436
- Vitamin C
  - prevention of quinone-mediated DNA arylation (HL-60 cells), **262,** 769
- Vitamin C transporter
  - sodium-dependent, placental, molecular cloning and transport function (human), **262,** 762
- Vitamin D_3
  - effect on c-erbB-4/HER4 expression in T47D breast cancer cells, **258,** 559
  - THP cells differentiated with, IL-6 production, induction by S-form LPS, **257,** 327
- Vitamin D 1a-hydroxylase
  - renal, inducing capacity of low-calcium diet, decrease in adult rats, **255,** 731
- Vitamin D_3 receptor
  - conformation and ligand binding, role of putative helices 4 and 5 (human), **264,** 478
- Vitamin K
  - effect on rat cytochrome P4501A1-dependent monooxygenase activity, **262,** 565
- Vitellogenin-6
  - identification as major carbonylated protein in aging nematode, **264,** 580
- Vitronectin
  - mRNA, human retina and retinal pigment epithelium as abundant source of, **258,** 524
- VLA-4
  - expression in HL-60 cells, suppression by 1,25-dihydroxyvitamin D_3, **255,** 371
- Voltage-clamp study
  - interosseus muscle fibers: role of phosphorylation and physiological state in regulation of chloride channel ClC-1 (mouse), **261,** 528
- Voltage-dependent anion channel
  - isoforms 1 and 2, gene mapping correction, **255,** 707
- Vomeromodulin
  - N-linked oligosaccharides of, structural identification (rat), **255,** 451
- Vomeronasal mucosa
  - cytochrome P450 and steroid hydroxylase activity (mouse), **266,** 262
- von Ebner's gland protein
  - interaction with lysozyme and lactoferrin (human), **265,** 322
- von Hippel-Lindau tumor suppressor
  - domain mediating Sp1 binding and self-association, mapping, **266,** 43
- von Willebrand factor-binding domain
  - platelet glycoprotein Ibα, liposomes carrying, as potential platelet substitute, **261,** 784
- Vpr
  - cell cycle abnormality induced by, inhibition by quercetin (MIT-3 cells), **261,** 308
  - HIV-1, growth arrest activities, residues in HFRIGC sequence involved in, **264,** 287
- Vpr gene
  - HIV, multiple centrosome formation induced by expression in MIT-23 cells, **258,** 379
- v-Raf
  - phospholipase D activation induced by, Ral- and Rho-dependent mechanisms, **255,** 502

W

- W-7
  - effect on cytosolic Ca^{2+} concentration in endothelial cells (porcine aorta), **265,** 697
- Warfarin
  - oxidation by heterologously expressed *Streptomyces griseus* cytochrome P450 105D1, **263,** 838
- Water transport
  - molecular and functional study of *AQY1* from *Saccharomyces cerevisiae,* **257,** 139
- WAVE/SCAR
  - human homologues, as general actin regulatory molecules associating with Arp2/3 complex, **260,** 296
- White adipose tissue
  - FGF-10 as growth factor for preadipocytes (rat), **258,** 109
  - uncoupling protein-3 mRNA levels, increase in bezafibrate-treated rat, **260,** 547
  - uncoupling protein mRNAs, effects of n-3 polyunsaturated fatty acids (KK-A^y mouse), **259,** 85
- Wilms' tumor
  - associated gene product WT1, arrest of macrophage differentiation of HL-60 cells through zinc-finger domain, **254,** 192
  - sporadic unilateral, role of imbalanced expression of functionally different WT1 isoforms (human), **254,** 197

Wilson disease gene
  promoter region cloning and characterization (human), **259,** 206
Wilson protein
  role in copper homeostasis, **261,** 225
Wiskott–Aldrich syndrome gene
  promoter identification and characterization and complete genomic sequence (human), **256,** 104
Wnt protein
  responsive signal transduction pathway in endothelial cells, identification (mouse), **263,** 384
Wobble variants
  unmodified form of *E. coli* $tRNA_1^{Ser}$, *in vitro* codon-reading specificities, **257,** 662
Wound healing
  cutaneous, inflammatory response of, regulatory role of IL-10 (mouse), **265,** 194
WT1
  arrest of macrophage differentiation of HL-60 cells through the zinc-finger domain, **254,** 192
  functionally different isoforms, imbalanced expression, role in sporadic unilateral Wilms' tumor, **254,** 197
Wy 14643
  PPARα activation, effects on UCP-1 promoter and mRNA and on PPARγ-mediated rosiglitazone-induced effects on UCP-1 mRNA in fetal rat brown adipocytes, **264,** 311

X

X11L2
  interaction with Alzheimer β-amyloid precursor protein, **255,** 663
Xanthurenic acid
  induction of unfolded protein formation in endoplasmic reticulum of lens epithelial cells (bovine, pig), **265,** 600
Xenobiotic responsive element
  for transcriptional activation of Cu/Zn superoxide dismutase gene (rat), **256,** 133
Xenoestrogens
  dialkyl phthalates: binding characteristics for estrogen receptor, **254,** 311
Xeroderma pigmentosum group B protein
  binding to BCR, **260,** 309
XFGF-20
  FGF family member in *Xenopus laevis,* characterization, **261,** 756
XIAP
  induction by VEGF in human umbilical vein endothelial cells, **264,** 781
Ximpact cDNA
  spatiotemporal, allelic, and enforced expression (*Xenopus laevis*), **256,** 162
Xist gene
  antisense transcripts, molecular cloning (mouse), **258,** 537
X-linked adrenoleukodystrophy
  gene responsible for, cloning of functionally redundant human adrenoleukodystrophy related gene, **258,** 436
X-linked retinoschisis
  recurrent missense and nonsense mutations in XLRS1 gene in families with, **256,** 317
XLRS1 gene
  in families with X-linked retinoschisis, recurrent missense and nonsense mutations, **256,** 317
XPA protein
  single metal-binding domain in, EXAFS study (*Xenopus laevis*), **254,** 109
X protein
  hepatitis B virus
    gene expression, repression by hammerhead ribozymes, **257,** 759; *erratum,* **259,** 231
    and HPV-16 E6, transactivation of HBV pregenomic promoter, mediation by AP1 site of E element in enhancer I in human liver cell, **265,** 62
Xsal-3 gene
  molecular cloning (*Xenopus laevis*), **264,** 151
Xylanase
  extracellular, production and separation, extractive cultivation of recombinant *Escherichia coli* for, **255,** 274
Xylanase II
  from alkaliphilic thermophilic *Bacillus,* structure and evolutionary relationship to alkaliphilic xylanases, **263,** 640

Y

Y-27632
  attenuation of stellate cell contraction and portal pressure increase induced by endothelin-1 (rat), **266,** 296
YC-1
  effects on soluble guanylate cyclase ligation kinetics with carbon monoxide, **254,** 188
Yeast enhanced green fluorescent protein
  in analysis of nuclear import of nonnuclear proteins in relation to location and number of nuclear localizing signals, **256,** 278
Yeast one-hybrid assay
  identification of YY1 as binding factor for proacrosin promoter element, **257,** 871
Yeast two-hybrid assay
  casein kinase 2 binding to and phosphorylation of BRCA1, **260,** 658
  identification of epithelin/granulin as extracellular cofactors for HIV-1 and HIV-2 Tat proteins, **256,** 299
Yeast two-hybrid system
  detection of binding of human LBP/p40 to S21 protein of 40S ribosome, **256,** 385
  identification of site of Hsp27 binding to Hsp27 and αB-crystallin, **255,** 256
Yellow fever virus
  5′ noncoding region, for enhancement of hepatitis C virus production by modification of translational control, **253,** 257; *erratum,* **257,** 250
Yor180Cp
  preliminary characterization: yeast peroxisomal protein of fatty acid metabolism, **260,** 28
Y organs
  arthropod, cytochrome P450 4C15 differentially expressed in, cloning, **264,** 413
YY1
  as binding factor for proacrosin promoter element (mouse), **257,** 871

Z

ZEBRA
  enhanced expression, association with cocaine potentiation of Epstein–Barr virus switch from latency to replication in Raji cells, **264,** 33
ZF5
  consensus binding sequence and DNA-binding domain (mouse), **255,** 528
  self-association, requirement of zinc finger domain for, **256,** 573
ZHX1
  cloning, chromosomal location, and interaction with transcription factor NF-Y (human), **261,** 614
Zidovudine
  apoptotic cell death caused by, protection by protein A (mouse), **264,** 601
Zinc
  binding sites for, generation by protein aging via carboxymethylation of lysines, **260,** 332
  and imidazole, synergistic inhibition of carboxypeptidase A, **257,** 239
  role in orotidine 5′-monophosphate decarboxylase: absence of metal cofactor, **259,** 133

Zinc finger binding protein
  ZBP-99, cloning, characterization, and regulation of ornithine decarboxylase gene expression, **262,** 113
Zinc finger domains
  requirement for self-association of ZF1, **256,** 573
Zinc finger motif
  ankyrin repeats hooked to, cloning of cytoplasmic protein ankhzn with, **257,** 206
  requirement for histone acetyltransferase activity of Sas3, **266,** 405
Zinc finger proteins
  Ciz1, p21$^{\mathrm{Cip1/Waf}}$-interacting, cloning and characterization (human), **264,** 457
  Ro52, DNA-binding properties and sequence specificity (human), **259,** 665
  XSAL-3, molecular cloning (*Xenopus laevis*), **264,** 151
Zinc fingers and homeobox 1 protein
  cloning, chromosomal location, and interaction with transcription factor NF-Y (human), **261,** 614
Zinc-finger transcription factor
  p21$^{\mathrm{WAF}}$ promoter-binding, GADD34-like gene interacting with, cloning, **256,** 249
Zinc ionophore
  pyrithione, inhibition of NF-κB activation in bovine cerebral endothelial cells, **259,** 505
ZO-1
  in vivo interaction with AF-6 (Rat1 cells), **259,** 103
